# Overhead ratio

- Improve productivity on a group-wide basis and start reducing the overhead ratio
- Establish downward trend of overhead ratio and aim at around 60% at the earliest opportunity after FY3/2020

### Notes:

- 1 ROE for each unit is managerial accounting basis with RWA calculated assuming Basel III reforms are finalized. ROE for the International Business Unit excludes the mid- to long-term foreign currency funding costs. ROE for the Global Market Business Unit does not include interest-rate risk associated to the banking account. The objectives on RWA written in the three year plan are determined based on the current regulation
- 2 FY3/2017 comparison for ROE is image of three-year developments of ROE from FY3/2017 estimates when formulating the Medium-Term Management Plan
- 3 FY3/2017 comparisons for ROE and Net business profit are after adjustments for interest rate and exchange rate impacts
- 4 FY3/2017 results for each unit are managerial accounting basis, pursuant to current regulation

# Transformation of business/asset portfolio and quality of earnings base

- As RWA will inflate resulting from tighter regulations, we will maintain the RWA calculated based on the current regulations
- We will reduce low-margin assets while investing in more profitable and asset efficient businesses in order to control the RWA. In addition, we will pursue inorganic reductions

\* Made under assumption that RWA will be inflated by 25% compared to current levels

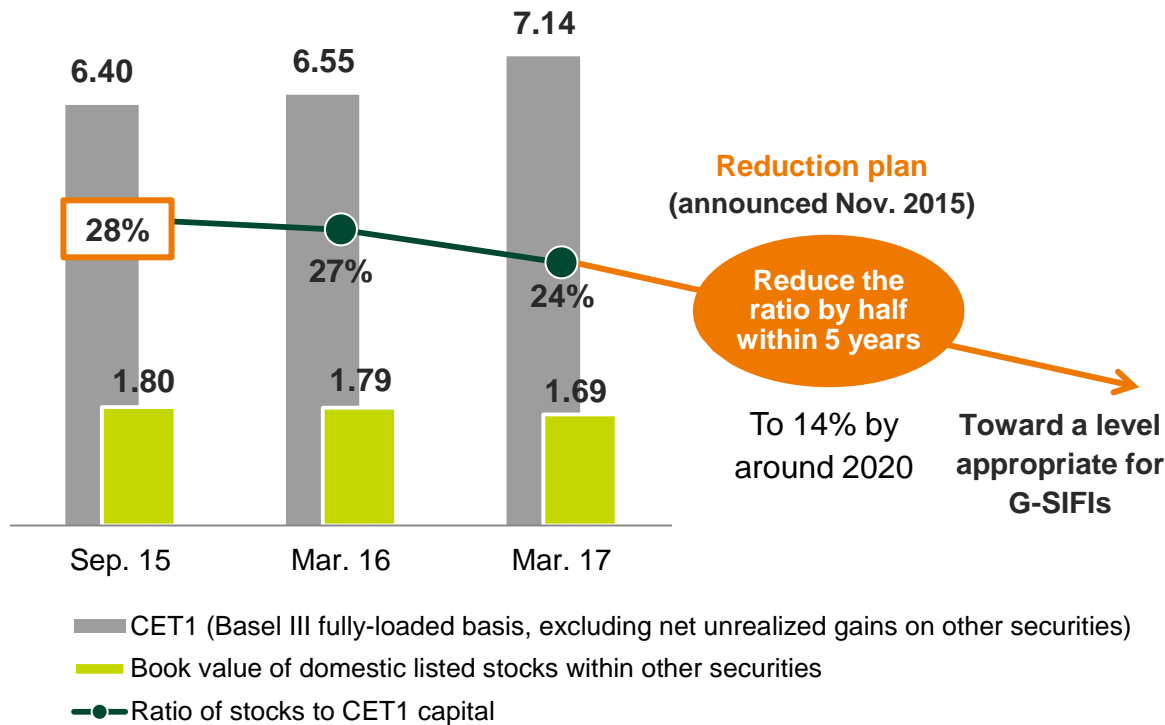

# Strategic shareholdings

- Aim to halve the ratio\* of stocks to CET1 during the five years starting from the end of Sep. 2015
    - Reduce the book value of domestic listed stocks of up to about 30%, or about JPY 500 bn (JPY 100 bn per year)

### Consolidated net business profit

Expected to earn almost the same level as FY3/17 by increasing non-interest income and expanding the overseas business in spite of impacts from the negative interest rates and declining spreads of domestic loans

### Total credit cost

Expected to increase because of smaller gains on reversal of reserves for possible loan losses at SMBC and the continuing uncertain market environment

### Profit attributable to owners of parent

Expected to increase on a year-on-year basis excluding the impact of an one time profit push up of approx. JPY 100 bn in FY3/17 because of implementing the consolidated corporate-tax system

- **Consolidated gross profit** increased in spite of an impact of negative interest rates, mainly led by revenue growth at SMBC Nikko and the new consolidation of SMFL Capital
- **General and Administrative expenses** increased due in part to IT investments in the past years and the enhancement of overseas business despite our continuous efforts to control expenses
- **Equity in gains (losses) of affiliates** increased due mainly to the absence of a goodwill impairment loss of BTPN recorded in FY3/16
- **Total credit cost** increased primarily due to worsened business results of an obligor with large exposure
- **Gains (losses) on stocks** from sales of shareholdings was approx. JPY 60 bn (reduction of strategic shareholdings in FY3/17 was approx. JPY 100 bn)
- **Others** increased due mainly to the absence of provisions for losses on interest repayments at SMCCF recorded in FY3/16
- **Extraordinary gains (losses)** includes JPY 43.0 bn of goodwill impairment loss of SMBC Friend and JPY 29.3 bn of gains on step acquisitions from the consolidation of SMAM
- **Income taxes** includes the effect of implementing the consolidated corporate-tax system (approx. JPY 100 bn)

# TLAC requirements

## TLAC and capital buffer requirements for SMFG

### Minimum external TLAC requirements

	2019 - 2021	After 2022
Minimum external TLAC requirements (RWA basis)	16%	18%
Plus capital buffers*1	19.5%	21.5%
<b>Factoring treatment of access to Deposit Insurance Fund Reserves</b>	<b>17.0%</b>	<b>18.0%</b>
Minimum external TLAC requirements (Leverage ratio denominator basis)	6%	6.75%

- Based on current calculations, we expect that the TLAC requirements based on RWA will be more constraining than requirements based on the leverage ratio denominator

### Contribution of Japanese Deposit Insurance Fund Reserves

- The FSA plans to allow Japanese G-SIBs to count the amount equivalent to 2.5% of RWA from Mar. 2019 and 3.5% of RWA from Mar. 2022 as external TLAC

## Meeting TLAC requirement

### Issuance amount of SMFG senior unsecured debt\*2

(JPY tn)	FY3/2016	FY3/2017
Issuance amount through the period	0.5	1.6
Amount outstanding at period end	0.5	2.1

### Total capital plus SMFG senior debt to RWA\*3

(Consolidated)

\*1 Excludes countercyclical buffer. As for the G-SIB buffer, SMFG was allocated to bucket 1 (1.0%) according to the list published by the FSB in Nov. 2016

\*2 Translated at the exchange rate as of Mar. 31, 2016 (FY3/2016) and as of Mar. 31, 2017 (FY3/2017)

\*3 This figure is not the same as TLAC ratio

\*4 Transitional basis. We expect the calculation for TLAC ratio, when the TLAC requirements in Japan are finalized, will differ from the one for total capital ratio. For example, some items in total capital will not be included in TLAC capital and vice versa
