2. Unrealized gains (losses) of stocks (excluding stocks of subsidiaries and affiliates) are calculated with the average market price during the final month of the interim period. Rest of the securities are valuated at market prices as of the balance sheet date.

3. Other securities and Other money held in trust are valuated and recorded on the balance sheet at market prices. The figures in the table above indicate the difference between the acquisition cost (or amortized costs) and the balance sheet amounts.

Net unrealized gains on other securities as of Sep. 30, 2005 include losses of JPY 557 million that were recognized in income statement by applying fair value hedge accounting and valuation losses of JPY 400 million on embedded financial instruments in their entirety that were recorded in income statement because their embedded derivatives are not measured separately. Therefore, JPY 957 million is added to the amount to be directly included in stockholders' equity. Unrealized gains on other securities for Mar. 31, 2005 include gains of JPY 469 million recognized in income statement by applying fair value hedge accounting and valuation gains of JPY 82 million on embedded financial instruments in their entirety that were recorded in income statement because their embedded derivatives are not measured separately. Therefore, JPY 551 million is excluded from the amount to be directly included in stockholders' equity.

(Notes)

1. Unrealized gains (losses) for other securities include losses of JPY 557 million that were recognized in income statement by applying fair value hedge accounting and valuation losses of JPY 400 million on embedded financial instruments in their entirety that were recorded in income statement because their embedded derivatives are not measured separately.

As a result, the amount subject to inclusion in the stockholders' equity is 852,595 million yen and the actual amount included in the stockholder's equity under "Net unrealized gains on other securities" is 506,186 million yen (calculated by deducting deferred tax liabilities of 346,409 million yen).

2. Other securities with market value are considered impaired if the market value declines materially below the acquisition cost, and such decline is not considered recoverable. The market value is recognized as the balance sheet amount and the amount of write-down is accounted for as valuation loss (impaired) for this term. The rule for determining "material decline" is as follows and is based on the classification of issuers under the rules of self-assessment of assets.

Bankrupt/ Effectively bankrupt/ Potentially bankrupt issuers
Issuers requiring caution
Normal issuers

Market value is lower than acquisition cost. Market value is 30% or more lower than acquisition cost. Market value is 50% or more lower than acquisition cost.

Bankrupt issuers: Issuers that are legally bankrupt or formally declared bankrupt

Effectively bankrupt issuers: Issuers that are not legally bankrupt but regarded as substantially bankrupt

Potentially bankrupt issuers: Issuers that are not currently bankrupt but perceived to have a high risk of falling into bankruptcy Issuers requiring caution: Issuers that are identified for close monitoring Normal issuers: Issuers other than the above four categories of issuers
