# 2021

YEAR ENDED MARCH 31, 2021

# MISSION & VISION & FIVE VALUES

MISSION

VISION

FIVE VALUES

“Our Group Mission,”  
which serves as the foundation for all of our corporate activities,  
portrays our mission toward stakeholders.

“Vision” is our medium- to long-term aim for the Group.

“Five Values” represent the core values we share with all SMBC Group employees.

We grow and prosper together with our customers,  
by providing services of greater value to them.

We aim to maximize our shareholders’ value through the continuous growth of our business.

We create a work environment that encourages and rewards diligent and highly-motivated employees.

We contribute to a sustainable society by addressing environmental and social issues.

**A trusted global solution provider committed to the growth of  
our customers and advancement of society**

#### INTEGRITY

As a professional, always act with sincerity and a high ethical standard.

#### CUSTOMER FIRST

Always look at it from the customer’s point of view, and provide value based on their individual needs.

#### PROACTIVE & INNOVATIVE

Embrace new ideas and perspectives, don’t be deterred by failure.

#### SPEED & QUALITY

Differentiate ourselves through the speed and quality of our decision-making and service delivery.

#### TEAM “SMBC GROUP”

Respect and leverage the knowledge and diverse talent of our global organization, as a team.

Editorial Policy

SMBC GROUP ANNUAL REPORT 2021 is designed to convey financial and non-financial information about the overall picture, business strategy, and corporate infrastructure of SMBC Group. It has been compiled with reference to the International Integrated Reporting Framework issued by the International Integrated Reporting Council (IIRC) in December 2013.

The appendix in the back of this report contains more detailed information on the Group. Additional information on Sustainability activities can be found on the Company's corporate website.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This document contains “forward-looking statements” (as defined in the U.S. Private Securities Litigation Reform Act of 1995), regarding the intent, belief or current expectations of us and our management with respect to our future financial condition and results of operations. In many cases but not all, these statements contain words such as “anticipate,” “believe,” “estimate,” “expect,” “intend,” “may,” “plan,” “probability,” “risk,” “project,” “should,” “seek,” “target,” “will” and similar expressions. Such forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and actual results may differ from those expressed in or implied by such forward-looking statements contained or deemed to be contained herein. The risks and uncertainties which may affect future performance include: deterioration of Japanese and global economic conditions and financial markets; declines in the value of our securities portfolio; incurrence of significant credit-related costs; our ability to successfully implement our business strategy through our subsidiaries, affiliates and alliance partners; and exposure to new risks as we expand the scope of our business. Given these and other risks and uncertainties, you should not place undue reliance on forward-looking statements, which speak only as of the date of this document. We undertake no obligation to update or revise any forward looking statements.

Please refer to our most recent disclosure documents such as our annual report on Form 20-F and other documents submitted to the U.S. Securities and Exchange Commission, as well as our earnings press releases, for a more detailed description of the risks and uncertainties that may affect our financial condition and our operating results, and investors’ decisions.

Scope of Report

Period covered:

FY2020 (April 2020 to March 2021)

Some subsequent information is also included.

Organizations covered:

Sumitomo Mitsui Financial Group and its subsidiaries and affiliates

Published:

August 2021

“SMBC” has been designated as the corporate group’s master brand. All Group companies use the SMBC logo and promote the SMBC brand in order to enhance the brand power of the entire SMBC Group.

Rising Mark

The Rising Mark is the upward curving strip seen beside the letters “SMBC.” This mark indicates our desire for the Group to grow together with our customers, shareholders, and society by providing high-value-added, cutting-edge, and revolutionary services.

Corporate Colors

The fresh green color (color of young grass) of the Rising Mark symbolizes youthfulness, intellect, and gentleness while the trad green (deep, dark green) background presents tradition, reliability, and stability.

# History of SMBC Group

Throughout the course of its history, SMBC Group has adapted to the changing needs of the times and shifted its businesses while enhancing the quality of its corporate infrastructure through environmental, social, and governance (ESG) initiatives.

## 1590–

### Source of Management Enduring for Four Centuries

**1590**  
Riemon Soga (brother-in-law of Masatomo Sumitomo) started copper refining business

**1673**  
Takatoshi Mitsui opened Mitsui Echigoya Kimono Dealer

1876  
Mitsui Bank established

1895  
Sumitomo Bank established

### ESG

Predecessor of Sumitomo **E** **S**

**Around 1600**  
Development of cutting-edge copper refining techniques

**1894**  
Tree planting at deforested copper mine site

**1998** **E**  
Establishment of environmental policies

Predecessor of Mitsui **S**

**1673**  
Innovation of business practices (clothing sales)

**1683**  
Important developer of financial infrastructure (money exchanging)

## 2001–

### Birth and Growth of Comprehensive Financial Group

**2001**  
Sumitomo Mitsui Banking Corporation formed

**2002**  
Sumitomo Mitsui Financial Group established

**2004**  
SMBC Consumer Finance became an equity-method affiliate

**2009**  
SMBC Nikko Securities became a subsidiary

### ESG

**2002** **E**  
Endorsement of United Nations Environment Programme Finance Initiative

**2005** **G**  
Establishment of Audit Committee (optional)

**2007** **E** **S** **G**  
Signing of United Nations Global Compact

**2010** **G**  
Listed on New York Stock Exchange

## 2012–

### Expansion of the Scope of Operations and Target Markets

**2012**  
SMBC Aviation Capital became a subsidiary

**2012**  
SMBC Consumer Finance became a subsidiary

**2013**  
SMBC Trust Bank became a subsidiary

**2013**  
Bank BTPN became an equity-method affiliate

**2015**  
The Bank of East Asia became an equity-method affiliate

**2016**  
Sumitomo Mitsui Asset Management became a subsidiary

### ESG

Signing of Principles for Responsible Banking

**2020** **E** **S** **G**  
Revision of Our Mission  
Establishment of SMBC Group Statement on Sustainability

**2021** **E** **S** **G**  
Appointment of Group CSuO and establishment of Sustainability Committee

Financial Highlights

Profit attributable to Owners of Parent

Consolidated net business profit remained at the same level as FY2019 since the COVID-19 pandemic had both positive and negative effects. However, profit attributable to owners of parent decreased year on year due to an increase in total credit cost.

Overhead Ratio (OHR)

While allocating resources to overseas operations, OHR showed a year-on-year improvement as business expenses decreased due to the COVID-19 pandemic and group-wide cost reduction efforts.

Dividend per Share of Common Stock

To enhance shareholder returns as we presented in the Medium-Term Management Plan, we increased the FY2021 dividend forecast by ¥10 to ¥200 per share.

Return on Equity (ROE)

ROE was at a lower level as profit attributable to owners of parent decreased due to the increase in total credit cost as a result of the COVID-19 pandemic.

Common Equity Tier 1 Capital Ratio (CET1 Ratio)

While risk-weighted assets increased from providing financial support to customers, we maintained our CET1 ratio higher than the required level due to the growth in net unrealized gains on other securities as stock prices increased.

Credit ratings (As of June 30, 2021)

	Holding company		SMBC

# SMBC Group's Value Creation Process

## Definition of Sustainability

Creating a society in which today's generation can enjoy economic prosperity and well-being, and pass it on to future generations

MESSAGE FROM THE GROUP CEO

# CONFRONTING STRONG HEADWINDS

Jun Ohta

Director President and Group CEO

## **In a Calm Sea, Everyone Is a Pilot.**

**J**apan's financial sector, our mother market, faces a challenging environment with accelerating population decline and aging, a domestic economy that continues to suffer from years of anemic growth, a negative interest rate environment, and the COVID-19 pandemic. Furthermore, we are witnessing the increasing presence of new competitors in the financial sector and the increased unbundling and re-bundling of financial and non-financial services and products. Given this trend, while the need for financial functions such as deposits, loans, and settlements may remain, there is no guarantee that customers will select traditional players such as SMBC Group to provide them with those functions.

MESSAGE FROM THE GROUP CEO

However, by no means does this challenging business environment cause me to feel any pessimism. Rather, I have every confidence that SMBC Group will continue to grow as a global financial institution in a sustainable manner.

What we must not forget is that regardless of the business environment, there will also be opportunities for growth. In recent years, we saw a rapid acceleration in the pace of technological innovation and changing customer needs, for example the shift to cashless payments in the BtoC sector and the global move toward electronic vehicles in the automobile sector followed by advancements toward the commercialization of self-driving vehicles. At the base of such changes lie irreversible megatrends with some examples being enhanced convenience due to the digital shift and increased expectations of society toward ESG. This being the case, I expect these trends to accelerate even further going forward. In such an operating environment, traditional industry status and sales networks will not always function as an advantage. In fact, they could hinder innovation due to concerns regarding legacy and sunk costs. However, I believe it is possible to realize sustainable growth in a market such as Japan where growth in the size of the overall pie is not expected if we can create alternative demand and other new needs while also building the necessary platforms to address those needs.

Furthermore, advances in technology have provided humanity with new ways of facing and fighting threats. For example, in terms of COVID-19, scientists from around the world worked to identify the underlying virus and released the results of the genome sequence analysis online in January 2020, a time when the virus was still limited to parts of China. Effective vaccines were not only developed less than one year from this

breakthrough, the large-scale production of those vaccines was realized. Furthermore, we were able to resume business activities at a level similar to that before the global health crisis through the use of web conferencing and other digital tools as we combated the spread of the virus by curbing our activities while we waited for the rollout of vaccines. Humanity was essentially powerless in its efforts to combat past pandemics such as the Spanish Flu and SARS. Past efforts were limited to quarantining infected individuals and placing restrictions on the movement of people, after which there was no real effective means that could be implemented other than to wait for the pandemic to run its course. As you can see humanity has made great progress in its ability to combat pandemics and other threats. The COVID-19 pandemic continues to have a tremendous impact on the lives of people all over the world, and I sincerely wish nothing more than to see this pandemic brought to an end at the earliest possible date, but I am also encouraged to see humanity pooling its wisdom and using innovation to minimize economic disruption while controlling the spread of the virus.

“In a calm sea, everyone is a pilot.” This is the English equivalent of the saying “*Shippu ni Keiso wo Shiru*” from the *Book of the Later Han* in China which illustrates that people and organizations that remain like a *Keiso* (wind resistant blade of grass) stand out in the face of *Shippu* (strong headwinds). SMBC Group is facing a number of headwinds, and our true strength as a financial institution is being challenged. Having said this, I have no doubt that we will overcome these headwinds and realize sustainable growth through tireless innovation and by finding new opportunities for growth. I will share the reasons for my confidence in a later part of my message.

Commencing Our Journey in a Storm

We kicked-off our current Medium-Term Management Plan last spring during Japan’s first state of emergency. At that time, we were not able to predict with any level of certainty how serious the impact of this unknown pandemic would be. As such, we had to launch the Medium-Term Management Plan in a volatile and highly uncertain business environment with all SMBC Group employees having to display ingenuity on a daily basis to carry-out their responsibilities.

First, as part of the financial infrastructure on which retail and wholesale customers rely to support their daily business and nonbusiness needs, we placed the highest priority on providing undisrupted financial services. For example, SMBC continued operating all of its branches and ATMs while implementing extensive safety precautions. Furthermore, the bank also enhanced online services to allow customers to perform transactions without having to visit a branch. SMBC Group also strived to fulfill its social responsibilities as a global financial institution by committing at its peak a total of ¥10 trillion to support domestic and overseas customers to overcome the impact of the COVID-19 pandemic.

In terms of business results, although I considered our progress in the first half of FY2020 as insufficient due to a slowdown in business activities and in the execution of our various initiatives, in the second half of the year we were able to accelerate initiatives targeting

our seven key strategies by leveraging online tools and enhancing marketing-related efforts in terms of both quality and quantity. While our consumer finance, aircraft leasing, and Asia business suffered from a slowdown in the global economy and decreased consumption due to the COVID-19 pandemic, we managed to generate consolidated net business profit which was close to the FY2019 figure thanks to the strong performance of our wealth management and overseas securities businesses. In addition, our final credit cost was lower than initially anticipated due to government support and liquidity support from banks, and our bottom line, while not at a level that reflects our true capabilities, exceeded initial expectations by a substantial amount.

Although the COVID-19 pandemic continues to reap havoc around the world, vaccinations are steadily progressing, and customers and SMBC Group are using digital technology to adapt our corporate activities to the current business environment. We also now possess a much clearer picture of the impact the global health crisis is having on our financial results. While we will continue to see volatility in the business environment, I believe immediate uncertainties have cleared. Now, not only can we clearly see the path we must follow in the short-term, we can also see an end to the disruptions caused by the COVID-19 pandemic.

***While we will continue to see volatility in the business environment, I believe immediate uncertainties have cleared.***

MESSAGE FROM THE GROUP CEO

*I have no doubt that we will overcome these headwinds and realize sustainable growth through tireless innovation and by finding new opportunities for growth.*

No Change to the Path We Must Follow

The path we must follow is none other than the path laid out in the current Medium-Term Management Plan that was established as the first step toward the realization of our Vision: “A trusted global solution provider committed to the growth of our customers and the advancement of society.” The COVID-19 pandemic was an unexpected factor that was not reflected in the original planning of the Medium-Term Management Plan, but certain trends we witnessed during FY2020 such as the acceleration of cashless payments, increased momentum of ESG, and the deepening of geopolitical risks are trends that we had identified prior to the COVID-19 pandemic. What the global health crisis changed is the momentum and the applicable timelines of those trends. As such, there is no need to change the overall direction of the Medium-Term Management Plan, and we will continue to proceed with its execution with the utmost confidence.

Of course, we will finetune our strategies in a flexible and precise manner based on the issues and strategies requiring acceleration which became clearer due to our experiences during the COVID-19 pandemic.

For example, if we look at our overseas securities business, we can see that although SMBC Nikko Securities’ gross profit for FY2020 was the highest since it joined SMBC Group, our competitors with more extensive and established overseas securities business operations were able to generate much larger profits. The reason is that financial markets

boomed before we could strengthen our overseas securities business framework to the extent targeted in the Medium-Term Management Plan. For cashless payments, the base of user clients and participating stores expanded due to the growing popularity of online shopping and touchless payment. We will further accelerate the strategies we established in the Medium-Term Management Plan targeting such business areas as we expect them to continue growing in the medium- to long-term.

On the other hand, our consumer finance, aircraft leasing, and Asia business were forced to operate under a challenging environment in FY2020. However, there is no change to those businesses’ medium- to long-term growth potential, and they retain their competitive and strategic importance in our overall business strategy. In FY2021 we will turn to the offensive and proactively expand our activities in those markets in light of the expected normalization of domestic consumption and the global economy.

While we expect for FY2022, the final year of the Medium-Term Management Plan, to be impacted to a certain degree by the COVID-19 pandemic I am confident that we can overcome the negative impact by accelerating the above strategies and focusing very closely on opportunities to reduce costs. We will continue our efforts to realize sustainable growth and there is no change to our goal of generating bottom-line profit of more than ¥700 billion in the final year of the Medium-Term Management Plan.

One Step Ahead of Customers’ Needs

I have repeatedly stressed the need to adhere to three key themes if we are to realize sustainable growth. These themes are the result of repeated deliberations aimed at identifying the role SMBC Group can play, the strengths we can leverage, and whether we can form partnerships with players from outside the financial sector to address issues in a future when the needs of customers and society will undergo a substantial change from the present day.

The first theme is data oriented.

Information and data are very valuable assets that are not represented on a company’s balance sheet, and businesses around the world, not only those in the financial sector, are striving to monetize these assets.

The second theme is to build platforms.

In Japan, we provide services to 43 million individual customers and SMBC extends loans to 80 thousand companies. By leveraging this robust customer base, SMBC Group can become a platformer that uses its financial capabilities as foundations to provide a variety of services.

The third theme is to become a solutions provider.

We can add value which truly enhances our customers business only if we look beyond immediate services such as loans and payments. We must identify the reasons for customers engaging in those services and provide comprehensive, top-tier solutions by proactively collaborating with companies from outside the financial sector if required.

These three themes are not independent of each other, rather, they are closely intertwined. While all the initiatives established under the Medium-Term Management Plan reflect these themes, I will take this opportunity to share with you three examples.

Advertising Business

A tremendous amount of payment and credit data is accumulated in our banking, securities, and consumer finance businesses. In other words, you could say that we are one large platform with finance at its base. We are currently contemplating a number of new businesses which will allow us to leverage this data, and in July 2021 we established SMBC Digital Marketing, Ltd., a company that operates an advertising and marketing services business utilizing financial big data. We will strive to create new value by developing a business that uses our platform to analyze customers’ needs and then transmit information and advertisements that are believed to reflect those needs. Of course, any concerns regarding the protection of personal data and the implementation of necessary security protocols will be addressed first.

Elder Business

The SMBC Elder Program is a business we launched as a result of thinking outside the traditional boundaries of the finance sector in response to the ongoing diversification of customers’ needs in Japan’s super-aging society. The concerns of senior citizens are not limited to securing sufficient funds to cover living expenses following their retirement. Their concerns encompass a diverse range of matters such as inheritance, health and nursing care, housework, security, and their relationship with family members. In order to offer a one-stop solution to such issues, we will develop a financial service focused platform that also provides services that SMBC Group does not offer, such as housekeeping and security, by proactively collaborating with players from outside the financial sector.

MESSAGE FROM THE GROUP CEO

*We made no change to the Multi-franchise strategy as we continued to search for seeds that had the potential to blossom into future platforms.*

Expanding Our Franchise in Asia

Under our Multi-franchise strategy, we are devising and implementing initiatives based upon a time span of ten or twenty years in order to build a second and third SMBC Group in Asia’s developing economies. We made three commitments when formulating our Multi-franchise strategy, which are: “We will become a full-line financial services provider in the target market,” “The franchise will have a strong home-market focus with its foundations firmly embedded in the local economy,” and “We will not retreat even when faced with changes in the business environment.” As such, even after COVID-19 spread throughout Asia, we made no change to the Multi-franchise strategy as we continued to search for seeds that had the potential to blossom into future platforms.

Such efforts allowed us to secure the opportunity to acquire a 49% stake in FE Credit, a leading Vietnamese consumer finance company. FE Credit has a robust retail business network and a highly competitive business model, allowing us to obtain a 50% market share of Vietnam’s fast growing consumer market sector. FE Credit has also maintained a high level of profitability with an ROE of more than 20% and is expected to continue experiencing robust growth in its assets and profits. Furthermore, we

entered into a capital partnership with Rizal Commercial Banking Corporation, a mid-tier commercial bank in the Philippines, while also obtaining a substantial retail finance platform in India, which is expected to become the most populous country in the world in the near future, through our acquisition of Fullerton India, a top tier nonbank that possesses a retail and SME business network throughout the country, as part of efforts to establish SMBC Group franchises in each of those countries.

Our businesses in these countries have traditionally involved the approaching of large local and Japanese firms through SMBC branches. The above deals allow SMBC Group to expand into the mid-tier corporate, SME, and fast-growing retail sectors, and combined with our earlier acquisition of BTPN in Indonesia move us one step closer to achieving our goal of establishing full-banking capabilities in Asia’s developing economies.

We will continue to pursue high quality inorganic opportunities in a disciplined manner as part of efforts to realize sustainable growth while also enhancing shareholder returns, a topic I will address later.

See page **051** for details.  
*Initiatives in Growth Fields in Asia and Other Markets*

Passing On a Green Earth to Future Generations

There is a 460 meter “The Trails of the Earth” at Furano Field which represents the earth’s 4.6-billion-year history. Furano Field is led by the screenwriter Mr. Soh Kuramoto, and SMBC Group has extended our support since its establishment. How long do you think Homo sapiens’ 200 thousand year history is in the “The Trails of the Earth”?

A mere two centimeters. When we read history books it feels that the birth of humanity took place a very, very long time ago, but the reality is, from the earth’s perspective, the history of the human race is about the same length as your fingertip. The 200 years following the Industrial Revolution, a period which saw the start of global warming, is a mere 0.02 millimeters. “The Trails of the Earth” continues into the future and at its end lies a stone monument with the words: “We are merely borrowing the earth from future generations.” I believe that Furano Field is trying to convey a very important message through “The Trails of the Earth.” There is no special technique or method to realize sustainability. Rather, there is an obvious solution, we must create a society in which the current generation can achieve happiness and enjoy the benefits of economic growth while also ensuring that we pass on the earth to future generations in a green, vibrant state. We must also accept that humanity, in return for enjoying the benefits of advancements in civilization, rapidly advanced global warming in a time frame that is only 0.02 millimeters of the earth’s total history.

In order to pass on a green earth to future generations, SMBC Group established a long-term road map to enhance our climate change-related efforts. First, SMBC Group will achieve net zero greenhouse gas emissions by 2030. We will also execute ¥30 trillion of sustainable finance by 2030 to support customers’ climate change-related initiatives and their transition to a green business model. Furthermore, we will commence efforts to identify the greenhouse gas emissions of our loan and investment portfolio while engaging in discussions with customers regarding the decarbonization of their business models as the first step to realizing a carbon-neutral supply chain by 2050. However, the expectations of society continue to grow even as we engage in such efforts, and I believe that climate change has the potential to become a game changer not only for the financial sector but for a wide range of business sectors. We will further enhance our efforts while continuing to update our decarbonization-related procedures and action plans in a flexible manner.

In order to successfully enhance our climate change-related initiatives, I would like to stress that we must also turn our attention to the short-term and conduct calm and objective analyses of the current status of business sectors and customers, after

See page **084** for details.  
*Initiatives to Realize Sustainability*

MESSAGE FROM THE GROUP CEO

which we would determine the best possible course of action that can be executed in the immediate future. The consistent execution of such actions must be balanced with the pursuit of long-term goals. Given our global relationships with customers from a variety of business sectors, and our role as a supplier of finance, the lifeblood of the modern economy, we must take great care in how we address the issue of climate change. If we abruptly turn to and proceed down the wrong path, not only

could we disrupt the steady supply of energy, we may also impede customers' efforts to develop technologies that could support the decarbonization of their business models and society. Together with our customers, we will strive to realize the decarbonization of society while engaging in careful discussions with all stakeholders, paying close attention to the impact our efforts will have on businesses and to trends in energy transition and innovation.

Discussion with Mr. Soh Kuramoto, the founder of Furano Field

*A financial group's most important resource is its people, and the workplace is an important stage where employees can grow and pursue their aspirations.*

A Work Environment Where Employees Can Realize Their Dreams

A financial group's most important resource is its people, and the workplace is an important stage where employees can grow and pursue their aspirations. An important responsibility of a CEO is to prepare a stage that is large enough for employees to truly challenge themselves and to write a script that allows them to demonstrate their unique potential, so that all employees can put on their best performance.

In recent years, we have seen a material change in employees' mindsets, especially in our younger employees, with a growing number of employees placing greater importance on how their company contributes to society. All our employees possess various ideas and have the backbone to pursue new challenges. Ever since assuming leadership of SMBC Group, I have urged employees to "Break the Mold," and I have supported employees attempting to pursue new challenges without being bound by precedent or fixed ideas. I have assigned management resources to employees who have stepped forward and established new companies for them to lead, even in cases when the employee was of a junior or mid-level rank. So far, 10 companies have been established through my "Producing CEO" initiative. The purpose of this initiative is to raise employees' motivation by instilling a "I can succeed if I try" mentality, and I look forward to seeing the new companies grow to a stage where they can contribute to SMBC Group's profitability or to the enhancement of customer services.

I will accelerate the following two initiatives so that this flow of innovation will become even stronger, diverse, and sustained.

The first is Midoriba, our internal SNS which we launched last year. More than 20 thousand employees at SMBC have joined the service with 6 thousand of those employees being active users who regularly post a variety of ideas and information. Promising business ideas receive helpful advice and constructive comments regardless of age or departments. Online communities in which employees support their colleagues in pursuing challenges are naturally developing. A number of new business ideas have already been identified as having the potential for commercialization. We plan on introducing Midoriba to other SMBC Group companies in the future.

The second is diversity and inclusion. Innovation that opens the door to the future is the result of employees with a diverse range of characteristics such as gender, age, and nationality coming together to combine their uniqueness and varied views while freely collaborating with players from outside their business sector. SMBC Group is comprised of companies that possess distinct characteristics, and its businesses are run by more than 100 thousand employees coming from diverse backgrounds spread across 40 countries and areas. We must not relax our efforts to further accelerate our diversity-related initiatives given that customers' needs and businesses are becoming increasingly diverse and global. We will strive to realize true diversity and inclusion through the diversification of our senior management team, the empowerment of female employees, and by supporting the balancing of professional responsibilities with life events.

MESSAGE FROM THE GROUP CEO

*The COVID-19 pandemic has not changed our policy of focusing on the enhancement of SMBC Group’s corporate value on an ongoing basis and distributing profits to our shareholders.*

Maximizing Shareholder Value from Both Financial and Non-Financial Perspectives

The COVID-19 pandemic has not changed our policy of focusing on the enhancement of SMBC Group’s corporate value on an ongoing basis and distributing profits to our shareholders. A progressive dividend policy remains our principal approach to shareholder returns, and our goal is to realize a dividend payout ratio of 40% during the course of the Medium-Term Management Plan. In FY2020 we maintained our dividend payment at ¥190 although we saw a substantial decrease in our bottom line. As a result, our dividend payout ratio rose to 51% but by no means do we view this as having reached our goal. Our goal is to realize a dividend payout ratio of 40% while achieving our target profit attributable to owners of parent of over ¥700 billion. As a first step toward realizing this goal we increased our dividend forecast for FY2021 to ¥200.

We will also pursue opportunities to execute share buybacks as part of our efforts to enhance shareholder returns. We decided not to announce share buybacks when we released our financial results of FY2020 in May given the re-extension of Japan’s state of emergency and other uncertainties in the business environment resulting from the COVID-19 pandemic. However, we will pursue

opportunities for share buybacks in FY2021 while continuing to pay careful attention to the ongoing impact of the COVID-19 pandemic and movements in overseas markets given our discounted share price and the fact that we expect to be able to maintain our capital levels at sufficient levels even after factoring in investments in inorganic growth opportunities.

Furthermore, in order to increase SMBC Group’s corporate value over the medium- to long-term, in addition to improving ROE and other quantitative financial metrics, it is vital that we also enhance the non-financial value of SMBC Group such as data, personnel, and ESG which are not reflected on our balance sheet. We will enhance our human capital, intellectual capital, and social capital by accelerating sustainability-related initiatives and the creation of a work environment that allows employees to pursue their hopes and dreams. We will maximize the disclosure of both financial and non-financial information and engage with all of our shareholders in an appropriate manner to minimize information asymmetry and decrease the cost of shareholder’s equity so that we may realize the sustained growth of SMBC Group’s corporate value.

No Such Thing as Coincidence

“Have the heavens granted me this mission by coincidence? No, this is surely not the case.” This is an approximate English translation of an excerpt from literature compiled during the Song dynasty in China and illustrates the importance of carrying out one’s duties, regardless of the circumstances. Roughly 40 years have passed since I joined the banking sector, and I have experienced firsthand many challenges such as the collapse of Japan’s bubble economy, Japan’s big bang financial reforms, the Lehman Crisis, and the current COVID-19 pandemic. However, I never forgot the importance of carrying out my responsibilities regardless of changes in the environment or the challenges I had to face.

The same can be said of companies. Bill Gates’s quote, “Banking is necessary, banks are not” addresses the fundamental issue of whether “banks” as a business format are essential to society or whether finance as a “function” is essential. I view this as having its roots in the same concept as the pessimistic theory which argues that modern society does not require banks. However, since the answer

is clearly the latter choice, we must continue to be the provider of essential functions without being bound by our past track record or the fact that we are a bank. In order to accomplish the mission we have been granted by the heavens, we must identify growth opportunities and tirelessly innovate so that we can contribute to customers and society through our financial functions.

Going forward, our world will change at an even faster rate, and our future will hold both numerous opportunities and challenges. SMBC Group will strive to realize further growth by driving our roots even deeper and wider as we press onward. I would like to ask for the continued support and understanding of all our stakeholders as I will stand at the forefront of our efforts to overcome the strong headwinds, and SMBC Group will put forth a united effort to overcome the challenging environment.

*I will stand at the forefront of our efforts to overcome the strong headwinds, and SMBC Group will put forth a united effort to overcome the challenging environment.*

MESSAGE FROM THE GROUP CFO

Supporting our customers, society, and the economy  
recover from the COVID-19 pandemic while allocating  
our capital in a manner that balances investment for  
growth and shareholder returns

Toru Nakashima  
Group CFO  
Director Senior Managing Executive Officer

FY2020 was a year in which the world was compelled to address the various social issues that arose due to the COVID-19 pandemic, the resulting changes in peoples’ mindsets and behavior, and fluctuations in financial markets. We at SMBC Group placed the highest priority on supporting customers, from both financial and non-financial perspectives, while at the same time taking the necessary steps to safeguard the wellbeing of our employees. Given this backdrop, as the Group CFO and Group CSO I paid close attention to the progress we were making in the implementation of the various initiatives established under the Medium-Term Management Plan which commenced in April 2020. In other words, I was attempting to determine whether the results we initially anticipated could be produced by the seven key strategies that were established under the core policies of “Transformation and Growth,” the cost control-related initiatives that were meant to expand our competitive edge in cost efficiency, and the leveraging of our strong capital base to pursue inorganic growth opportunities by measuring our progress according to the pace expected under the very challenging business

environment brought about by the COVID-19 pandemic. The impact the COVID-19 pandemic had on our businesses became clear following our FY2020 financial results. While it was difficult to determine the impact that the Medium-Term Management Plan’s initiatives were having in terms of actual figures given the negative impact of the COVID-19 pandemic, FY2020 was a year in which we were able to strengthen the profitability of our businesses, the underlying goal of many of our efforts. It is very encouraging to see that SMBC Group was able to carry out its initiatives in a consistent manner, regardless of the challenging business environment, and produce concrete results. Accelerating this trend and proactively transforming the various changes brought about by the COVID-19 pandemic into business opportunities will allow us to not only further enhance our earning capabilities in a more robust manner in FY2021; it will also position us to accomplish the goals we have set out under the Medium-Term Management Plan in FY2022, the final year of the plan.

Current Business Environment

(1) Overview of FY2020 Financial Results

Although we calculated that the COVID-19 pandemic reduced consolidated net business profit by ¥100 billion, we were still able to generate consolidated net business profit of ¥1.84 trillion, a result similar to that of FY2019. As we had anticipated at the start of the fiscal year, business sectors which we consider our strengths, namely credit cards, consumer finance, and aircraft leasing suffered due to the COVID-19 pandemic. However, in addition to the strong performance of our wealth management business and our overseas securities business due to heightened bond issuance needs, we also benefited from a fall in expenses which we had not initially foreseen. As such, the actual impact of the COVID-19 pandemic on consolidated net business profit was substantially lower than the

originally forecasted amount of ¥170 billion.

While credit cost increased in both domestic and overseas markets, thanks to the government support and liquidity support from banks, SMBC Group’s credit cost was ¥360.5 billion, approximately ¥90 billion lower than originally anticipated.

As a result, we were able to achieve profit attributable to owners of parent of ¥512.8 billion although we proactively took steps to address future risks, for example, recording provision for losses on interest repayments of our consumer finance business. Once again, the COVID-19 pandemic’s actual negative impact of ¥190 billion was substantially lower than the initially anticipated amount of ¥310 billion.

	FY2019	FY2020			FY2021	
		Impact of COVID-19*		Actual	Impact of COVID-19*	Forecast
		Original forecast	Actual			
Consolidated net business profit	1,085.0	(170)	(100)	1,084.0	(70)	1,120
Total credit cost	170.6	+260	+170	360.5	+100	300
Profit attributable to owners of parent	703.9	(310)	(190)	512.8	(120)	600

\* Impact of COVID-19 figures are rough estimates.

MESSAGE FROM THE GROUP CFO

(2) Progress of the Medium-Term Management Plan

SMBC Group focuses on business efficiency when conducting our business operations, and we selected profitability, efficiency, and financial soundness as three financial targets of the current Medium-Term Management Plan. In FY2020, although we had established a target of 8.5% for ROCET1, a metric we use to measure profitability, we were only able to achieve a ROCET1 of 6.9% due to a substantial decrease in profit attributable to owners of parent. On the other hand, we were able to decrease base

expenses\*<sup>1</sup>, a metric we use to measure efficiency, by ¥20 billion on a year-on-year basis due to cost reduction measures and restrictions placed upon our business activities due to the COVID-19 pandemic. Our CET1 ratio\*<sup>2</sup>, a metric we use to measure financial soundness, for FY2020 was 9.8%, a figure which falls within the 9.5% (± 0.5%) range we established in response to the impact of the COVID-19 pandemic.

\*1 G&A expenses excluding cost related to investment for future growth, revenue-linked variable cost, and others.  
\*2 Post Basel III reforms basis, excludes OCI

Financial Targets

In regards of initiatives, we focused on those related to the seven key strategies and cost control. Our profit attributable to owners of parent for FY2020 was ¥700 billion if we exclude the negative impact of the COVID-19 pandemic which has been calculated at ¥190 billion. This figure is very close to the target we originally set for the first year of the Medium-Term Management Plan and illustrates that we have been able to enhance the profitability of our businesses by successfully implementing the plan’s various initiatives

For example, in our wealth management business, we strengthened our business with high net-worth individuals by integrating the related capabilities of SMBC Nikko Securities, SMBC Trust Bank, and Sumitomo Mitsui Banking Corporation. We were also able to grow our payment business at an exponential rate due to the global health crisis accelerating the trend toward cashless payments. Furthermore, we enhanced our Sales & Trading and asset management businesses as part of efforts to increase capital efficiency while we strengthened our Asia franchise as we strive to capture the region’s growth. As you can see, in the first year of the current Medium-Term Management Plan we made a solid first step toward

achieving the various goals and targets that have been established under the plan.

Of course, there have also been instances when issues which we must address became even more evident due to changes in the business environment resulting from the COVID-19 pandemic and other factors. Specifically speaking, while we strive to strengthen and expand our overseas CIB business in order to grow non-interest income the gap in this business sector with our competitors increased in spite of favorable overseas bond markets.

We will make the necessary adjustments to our initiatives to reflect such changes so that we can achieve our target of increasing consolidated net business profit by ¥100 billion in the final year of the Medium-Term Management Plan.

(3) Cost Control

Our high cost-efficiency is an advantage we have over our competitors. In order to further enhance this advantage, we committed to reducing base expenses by ¥100 billion during the Medium-Term Management Plan by following three key initiatives: “Reform of domestic businesses,”

“Retail branch reorganization,” and “Integration of Group operations.”

While we witnessed delays in certain initiatives in FY2020 due to the COVID-19 pandemic, there were also positive developments, for example the accelerated digital shift and an unexpected fall in expenses resulting from the various constraints placed upon our business activities. Furthermore, our efforts to enhance operational efficiency lowered headcount requirements. As such, we were able to decrease base expenses by ¥35 billion. We aim to decrease base expenses by an additional ¥10 billion to ¥20 billion, on top of our original target of ¥100 billion by further

accelerating digitalization and transforming our various business models.

In addition, we will reduce costs and enhance operational efficiency by using the CEO Budget for IT-Related Investments to introduce an integrated accounting system for SMBC Group so that we can consolidate/standardize the accounting operations of SMBC Group companies over the medium-term. We will maintain a strong commitment to reaching our various targets, including the ones which were newly added, as the entire SMBC Group engages in cost control efforts.

Capital Policy

(1) Management of Capital under the COVID-19 Pandemic

We have set our target CET1 ratio at c.10%. The CET1 ratio is calculated taking into account the full implementation of Basel III reforms and excludes unrealized gains on securities. However, as we have placed the highest priority on supporting the liquidity needs of customers in and outside of Japan who have been adversely affected by the

COVID-19 pandemic, for the foreseeable future we will manage our CET1 ratio within the range of 9.5% (± 0.5%). While our total balance of COVID-19 associated credit peaked at ¥10 trillion in July 2020, a recovery in bond markets allowed obligors, especially overseas obligors, to proceed with repayments. As such, by the end of FY2020 risk weighted assets fell back within the range established at the start of the fiscal year, and we were able to achieve a CET1 ratio of 9.8% for FY2020, a figure which includes a 0.3% decrease due to COVID-19 associated credit. This result is on the high side of our range and substantially exceeds the required level of 8% per current regulations.

I believe we have succeeded in maintaining our financial soundness during the COVID-19 pandemic while at the same time securing sufficient funds for shareholder returns and investment for growth, two topics which I will address shortly. Having said this, we will continue to pay careful attention to the impact of the COVID-19 pandemic and gradually move our CET1 ratio target back to the original target of c.10%.

Capital Allocation of FY2020 and FY2021

MESSAGE FROM THE GROUP CFO

(2) Enhancing Shareholder Returns

Dividends are our principal approach to shareholder returns, and we will continue to pursue a progressive dividend policy, meaning that we will at least maintain, if not increase, dividend payments. Furthermore, in FY2022, the final year of our Medium-Term Management Plan, we aim to achieve a dividend payout ratio of 40%. In FY2020, due to a decrease in profit attributable to owners of parent resulting from the COVID-19 pandemic, our dividend payout ratio increased to 51%. Please be assured that we will by no means view this as having reached our target dividend payout ratio of 40%. I would like to clarify that our goal is to realize a dividend payout ratio of 40% in FY2022 while at the same time reaching our target profit attributable to owners of parent of ¥700 billion. As a step toward this goal, we increased our dividend payout for FY2021 by ¥10 to ¥200.

On the other hand, we decided not to announce share buybacks when we released our FY2020 financial results in May given the ongoing uncertainties in the business environment due to the COVID-19 pandemic which included, but were not limited to, delays in domestic vaccinations leading to the spread of mutant strains and the repeated extension of Japan’s state of emergency. I was well aware of investor expectations at that time in regard to share buybacks given movements in our share price, and if we were to only look at our capital level, I believe that committing to share buybacks in May was possible. We will continue to pay close attention to the impact of the

Shareholder returns

COVID-19 pandemic and the recovery of Japan’s economy as we consider the execution of flexible share buybacks during the remainder of the fiscal year.

(3) Investment for Growth

“Growth” is a core policy of the current Medium-Term Management Plan, and we will pursue SMBC Group’s sustainable growth by ensuring that adequate funds are allocated to growth areas from both organic and inorganic perspectives.

In terms of inorganic growth, while maintaining financial soundness, we will select potential M&A opportunities in strict accordance with our three investment criteria: “Fits with our strategy,” “ROCET1 ≥ 8.5%,” and “Risk is manageable.” Of course, opportunities must also contribute to SMBC Group’s sustainable growth.

We are seeing attractive M&A opportunities that fall under one or more of our seven key strategies due to the COVID-19 pandemic giving rise to a global trend of industrial reorganization and the reconsideration by companies of the current state of their businesses. Our pursuit of inorganic growth opportunities will be flexible in the short-term while in the medium- to long-term we will strike a balance with share buybacks.

The focus of our investments will be: “assets that promptly raise our ROCET1” and “investments for the future.” The former refers to areas in which SMBC Group possesses global strengths, with some past examples being investments in aircraft leasing and middle market LBO financing assets. The latter refers to investments in Asia, securities businesses, asset management, and digital businesses.

In terms of asset management, we pursued the realization of one of the Medium-Term Management Plan’s seven key strategies “Enhance asset-light business on a global basis” by partnering with domestic and overseas asset management companies that adhere to distinct operational strategies. Some examples are our capital and business alliance with Affirmative Investment Management Partners Limited, a UK firm that specializes in impact bond investments, and our acquisition of a majority stake in Alternative Investment Capital Limited, a specialist PE fund investor. Sumitomo Mitsui Finance and Leasing also strengthened its real estate business through subsidiarization of the real estate asset management firm Kenedix.

In Asia, we continued implementing our Multi-franchise strategy as we strive to establish a second and third SMBC Group. Up to this point our efforts have focused on Indonesia. In 2021, we announced investments

in VPBank Finance Company Limited, a major player in Vietnam’s consumer finance market; in Rizal Commercial Banking Corporation, a commercial bank in the Philippines; and in Fullerton India Credit Company Limited, a nonbank in India. By combining our new presence in the retail and SME business sector with our existing business with large corporates that we conduct through SMBC branches and existing investee companies, we moved one step closer to establishing a full-banking business platform as we strive to expand our Asia franchise as stated in our Medium-Term Management Plan.

(4) Reducing Strategic Shareholdings

After exceeding our target of reducing strategic shareholdings by ¥500 billion over a five-year period which was announced in September 2015, we announced a new plan to further reduce strategic shareholdings by ¥300 billion over a five-year period starting FY2020. In FY2020, the first year of the plan, we reduced our strategic shareholdings by ¥55 billion. Furthermore, given that we are holding unsold shares valued at ¥54 billion for which we have already obtained customers’ consent to sell, as of the end of March 2021 we have sold or have obtained consent to sell ¥109 billion worth of our strategic shareholdings.

The reduction of strategic shareholdings is also a very important facet of our capital policy as it not only reduces

stock price fluctuation risk, it also has a material impact on controlling the increase in mandatory capital requirements resulting from full Basel III reform implementation. We also expect an increasing number of customers to reduce their strategic shareholdings given the increasingly vocal positions adopted by proxy advisory firms, the Tokyo Stock Exchange’s planned realignment of its trading markets, and the revision to Japan’s Corporate Governance Code. Given this backdrop, we will do our best to further reduce our strategic shareholdings while ensuring that we continue to engage in close communications with customers.

Communicating with Our Stakeholders

In order to obtain our stakeholders’ understanding of SMBC Group’s strategies and overall status, we must disclose information in a timely and proactive manner given ongoing changes in the business environment and diversification of our operations. In FY2020, a different approach to communication was required given the impact of the COVID-19 pandemic. Regardless of such a backdrop, I believe that conducting multiple small meetings and conferences online with both domestic and overseas investors allowed us to realize the timely and necessary disclosure of information at a level which exceeded that of previous years.

Such discussions provided us with important opportunities to learn and recognize matters that had previously escaped our attention. Given investors’ heightened interest in ESG and the SDGs, SMBC Group for the first time held an investors meeting that addressed our ESG-related efforts. We also understand the strong

expectations in regard to shareholder returns, and we will reflect the feedback we received in the determination of future dividend and capital policies.

In a repeat performance of FY2019, SMBC Group was selected for the top award in the banking category of the 2020 Award for Excellence in Corporate Disclosure presented by the Securities Analysis Association of Japan. Furthermore, for the first time SMBC Group was selected for the top award in the individual investor category. I take great pride in the recognition we have received, and we will continue with our above efforts going forward.

Engaging in constructive discussions with investors and analysts is one of my key responsibilities as Group CFO. We at SMBC Group will continue to proactively disclose information that is useful for our shareholders and investors while pursuing sustainable growth and increasing our corporate value by engaging in interactive dialogue.

Round-Table Discussion with Outside Directors

## The Role Financial Institutions Should Play in Supporting the Resolution of Climate Change

Group CSuO Fumihiko Ito asked Masaharu Kohno and Eriko Sakurai, both outside directors of Sumitomo Mitsui Financial Group, for their thoughts regarding SMBC Group's sustainability initiatives.

**Ito** Thank you for taking part in today's round-table discussion. Given the rapid pace in which global awareness regarding climate change is increasing, I would like to first ask you about the roles you see SMBC Group and other global financial institutions playing in supporting the transition to a carbon-neutral society. Ms. Sakurai, would you be kind enough to kick things off?

**Sakurai** For many years I have been involved in the development of environmentally friendly products in my career at a global manufacturing firm, but lately my sense that financial institutions will play a critical role in the resolution of climate change has grown even stronger. The framework financial institutions apply when determining the recipient of a loan or investment can act as a guide for customers as

they transform their business models as part of efforts to realize a carbon-neutral society. As such, I believe that one of the roles financial institutions should play is to establish frameworks that pay sufficient consideration to sustainability. Furthermore, the realization of a carbon-neutral society is an objective that can be accomplished only if all members of a supply chain strive to accomplish it. Even if a single firm were to accomplish its sustainability goals, sustainability in the true sense would not have been accomplished if the actions of the said firm resulted in the sustainability efforts of other companies in the supply chain facing an additional burden. From a neutral standpoint financial institutions can demonstrate a common vision that overcomes the boundaries separating individual corporations and impacts the activities of an entire supply chain. As you can see, the role financial institutions play

in fighting climate change will only become more important.

**Kohno** I agree with Ms. Sakurai in that the global community is paying close attention to the logic financial institutions are adopting in determining the types of loans and investments that are made available to customers operating in differing business sectors, and I believe that this is actually the role required of financial institutions. If we look back at global trends in sustainability, we can see that approximately 15 years ago as the concept of ESG was becoming more mainstream the issue of climate change became a major discussion topic in the international community. This in turn led to the emergence of the SDGs which expanded on the existing concept of ESG. I believe that today's global movement toward the realization of a carbon-neutral society is the result of such trends impacting multiple aspects of society and our lives. My career gave me the opportunity to participate in international society as a diplomat, and international institutions, industrialized democracies, and international NGOs played a leading role in building the movement of fighting global warming we have seen in the past 20 years. However, the involvement of the private sector is essential for this trend to produce the desired results. In efforts to address global issues such as climate change financial institutions, given they are a key source of loans and investments, are faced with a larger role and heavier responsibility than other players in the private sector.

**Ito** I believe that financial institutions will play an important role in pushing forward ESG in society by no longer limiting the criteria for determining a loan or investment to cash flow and other financial elements and by accurately reflecting customers' ESG initiatives and other non-financial elements in their considerations. SMBC Group will continue to discuss how we can best measure non-financial elements and reflect them in our decision-making process. Next, could you please share with us how you view the Roadmap Addressing Climate Change and Action Plan that SMBC Group announced in May 2020?

**Sakurai** I felt SMBC Group's strong intent to clarify its goals and communicate its future plan of action. Although specific details must still be determined, I was very impressed with the fact SMBC Group adopted a long-term perspective in the roadmap and action plan. Another item I thought stood out was that SMBC Group did not attempt a simultaneous launch of its initiatives. Rather SMBC adopted a framework in which SMBC Group first selected a number of high impact initiatives to commence work on after which they would leverage

the experience they had obtained to move on to the next stage of the roadmap. This is a highly effective method and reflects SMBC Group's intent to improve its sustainability initiatives over the course of their actual execution. I also agree with SMBC Group announcing that it would engage with customers so that it can work with those customers to realize a carbon-neutral society. More and more employees want to work at companies that have a large, positive impact on society, and customers also increasingly desire to build relationships with those companies. Involving these stakeholders in its sustainability efforts is a wonderful approach and reflects SMBC Group's character.

**Kohno** I agree that it was very important for SMBC Group to reveal the Roadmap Addressing Climate Change and Action Plan at its current stage to both internal and external parties. On the other hand, specific details are still yet to be determined. This is a matter which the entire SMBC Group must work together to address, and the Group CSuO is responsible for driving forward SMBC Group's sustainability efforts. The duties of the Group CSuO differ from

**Masaharu Kohno**

Outside Director,  
Sumitomo Mitsui  
Financial Group

Round-Table Discussion with  
Outside Directors

those of traditional banking roles but there is no doubt of the position's importance. I will continue to support efforts to deepen discussions and further improve SMBC Group's sustainability initiatives.

**Ito** In my role as Group CSuO I will ensure to engage in quality internal communication with SMBC Group employees, which is something I believe ties in with both of your views. The first step is for me to proactively create opportunities to communicate sustainability-related information to our employees and work together to resolve the various issues that we face. The third point of today's discussion is that in order to successfully carry out our initiatives aimed at reducing greenhouse gas emissions, it is necessary to reduce greenhouse gas emissions generated by our customers (Scope 3). As such, I expect to face situations that require careful navigation. From the perspective of an outside director, do you have any advice on how we can smoothly engage with such customers?

**Sakurai** In the process of working with customers to implement sustainability initiatives, there will be times when customers' business models will need to undergo substantial change. So, I believe that at times difficult discussions will need to take place. At the companies where I play a key leadership role, we engage in repeated discussions with customers in order to compare and adjust our respective visions while making sure that we keep in mind the timeframe of customers' efforts

Eriko  
Sakurai

Outside Director,  
Sumitomo Mitsui  
Financial Group

to complete their transformation. I have experienced firsthand the importance of engaging in consistent communications like what I just mentioned, and I believe this also applies to financial institutions. In order to transform a business from a sustainability perspective, it is necessary to engage in discussions that employ a long-term, future-oriented perspective in a more persistent manner. When engaging in such discussions both parties must view the transformation in question as increasing their value and leading to the realization of long-term growth. By utilizing this mindset, it is possible to develop a relationship in which both parties, at the end of the day, are happy that they worked with each other to carry out the sustainability initiative in question.

**Ito** In order for this to be possible, all employees of SMBC Group must share a common mindset such as the ones you shared with us, and I will make sure to spread this message through internal communication.

**Sakurai** Until about 10 or so years ago sustainability was viewed as "Nice to have" and only certain members

of a company's management team would be involved. Now, the attitude is "Sustainability is business" and sustainability is viewed more and more as a matter that needs to be addressed by the entire firm. As such, it is necessary for each SMBC Group employee to view sustainability as being part of their responsibilities, and not solely of the Group CSuO.

**Kohno** First, all members of SMBC Group's management team must be able to engage in head-on discussions regarding climate change and other sustainability-related issues. It is vital for the individuals responsible for leading SMBC Group to be able to express their views regarding these issues in their own words. This in turn will help spread the common mindset regarding sustainability that the two of you talked about earlier. Second, each and every SMBC Group's employee must properly convey the Group's awareness of issues to customers as a member of SMBC Group. We directors engaged in repeated discussions regarding customer-oriented business conduct, and I believe that new added value can be created if common issues are shared with customers and

both parties arrive at a mutual understanding. You can say that this is customer-oriented business conduct in its truest sense. Third, SMBC Group must be an organization that can present and implement a new lifestyle. The entire SMBC Group must share a sense of crisis that if it cannot act with speed and urgency, it will be left behind with no opportunity to catch-up in the future. At the same time, SMBC Group must realize that it is already standing at the entrance of this new phase.

**Ito** To bring today's discussion to a close, can you please share with us the roles you see yourselves playing as outside directors in SMBC Group's efforts to enhance its non-financial value and corporate sustainability capabilities?

**Sakurai** In a way this is an extension of what we have already discussed. SMBC Group must realize the substantial impact it has on international society and play a leadership role in the pursuit of sustainability. As I mentioned at the start of today's discussion, SMBC Group's ability to connect various industries allows it to develop sustainability friendly frameworks and other initiatives whose impact transcends industrial boundaries. I believe that such endeavors will allow SMBC Group to access new customer segments and contribute to the enhancement of the Group's corporate value. The role I am expected to play as an outside director is to support such efforts while at the same time ensuring

they receive adequate supervision. Referring to my previous comments, "Sustainability is business" and I do not expect my role in regard to SMBC Group's sustainability initiatives to differ from the role I play in the Group's business strategies.

**Kohno** I believe my responsibility is to provide advice and views from a global perspective given my background as a diplomat. In April 2021, the Biden Administration held a virtual world leaders' summit on climate change. What surprised me was that the Secretary of Defense participated in the sessions. In other words, the U.S. views climate change as being directly connected to national security. We need to pay close attention to these new global trends. Next, although addressing the issue of climate change is a future-oriented initiative, we should not cut it off from past actions. Let's take a developing country that had built coal-fired power plants using overseas loans and investments. The financial institutions that had provided those loans and investments would not be fulfilling their responsibility if they just stopped providing support to

those plants due to the global move toward the realization of a carbon-neutral society. SMBC Group needs to tirelessly think about how it can continue to support clients, albeit in a different manner, as many customers have not yet made a concrete description in terms of how they would adapt to the new phase. Finally, Europe has consistently led climate change efforts over the past 10 or so years. SMBC Group must consistently pay close attention to Europe so that it is able to accurately grasp the state of world affairs which is changing daily. Climate change is a global issue that affects the entire human race, so we need to make sure that our attention is turned to the world as we engage in discussions.

**Ito** Thank you very much for sharing your valuable opinions with us today. I look forward to receiving your continued advice which reflects a variety of standpoints.

Ito

Group CSuO,  
Sumitomo Mitsui  
Financial Group

# Core Policy of the Medium-Term Management Plan (FY2020–FY2022)

## Financial Targets

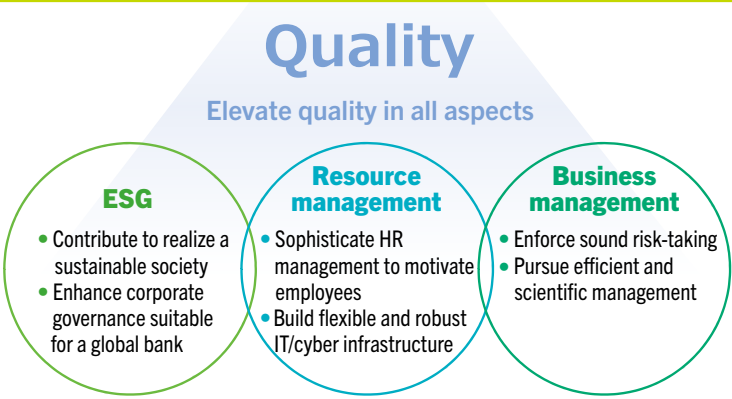

## Business Strategies – Transformation & Growth –

## Seven Key Strategies

## Management Base – Quality –

Customers

Support Customers Through Financial Services

SMBC Group, as a financial institution which is a part of the social infrastructure, will fulfill its responsibility by continuing to provide services such as financing and payment. To this end, with extensive safety precautions in place, SMBC is continuing the operation of all branches and ATMs while also enhancing its online services to allow customers to perform transactions without having to visit a branch. We are responding to customer needs by performing sales activities in a non-face-to-face manner through online venues.

We are also supporting the urgent financial needs of customers by offering loan programs with special interest rates and customer reliefs such as relaxing conditions of existing loans.

SMBC Group anticipates that changes to social and economic structures will be unavoidable in the new normal that will emerge after the COVID-19 pandemic has subsided. Accordingly, we aim to support customers in the post-COVID-19 world through discussions and information provision regarding the business issues brought to light by the pandemic.

Response to COVID-19

Considering the significant impact on people’s lives and the economy caused by COVID-19, SMBC Group strives to ensure the health and safety of our customers and employees. Furthermore, SMBC Group will support our customers through financial services and is committed to contributing to the medical industry and society as a whole.

Employees

Prevention of the Spread of Infection and Initiatives for Continuous Business Operation

In order to continue providing our services as a social infrastructure while preventing the spread of infection, ensuring the health of our employees as well as their families, and safety and security of our customers, we are implementing various initiatives all over the world.

To prevent the spread through droplet infection, we have installed acrylic boards at our branches. Our call centers and operational offices has been making efforts to keep conducting business operation by separating staffs into two or more teams. In addition, we will continue to limit the number of employees required to work in the office. We are also giving consideration to the health of our employees and their families through measures such as encouraging our employees who need to take care of their children to work at home via telework or to obtain special leave, and also established a health consultation counter. COVID-19 vaccinations are provided to employees in order to protect their health and help ensure business continuity by reaching a state of herd immunity.

[https://www.smfg.co.jp/english/covid\\_19/](https://www.smfg.co.jp/english/covid_19/)

SMBC Group has established a page on its website detailing its response to COVID-19. Please refer to this page for more information.

Community and Society

Contributing to the Community and Society

SMBC Group donated a total of ¥1.5 billion to fund measures for combating COVID-19, and we engaged in other support activities together with customers.

Supporting Medical Research and Activities

SMBC Group donated ¥500 million to the Center for iPS Cell Research and Application, Kyoto University (CiRA), to support research on the behavior and characteristics of COVID-19 and other newly discovered viruses, in order to help develop effective means of treating these viruses. Other efforts for combating the COVID-19 pandemic have included donations, such as a donation totaling ¥100 million to the free-of-charge AI-powered COVID-19 diagnosis support project and the AI development project for predicting which cases will escalate, both of which are being conducted by M3, Inc. These donations are not limited to Japan as SMBC Group also donated €1.0 million to the Coalition for Epidemic Preparedness Innovations to support vaccine development on a global scale.

Meanwhile, steps are being taken to support the healthcare professionals fighting COVID-19 on the front lines, despite a lack of medical supplies. To aid these brave individuals, SMBC has donated to healthcare institutions the protective gear and medical-use masks that had been stockpiled for emergency situations. These are just some of our various efforts for addressing the issues caused by the COVID-19 pandemic.

Enhancing Medical Care and Education in Emerging Countries

Furthermore, we have established the “SMBC Together with You Fund” to support people and companies in Asia and other regions and made a US\$1.7 million donation through this fund. SMBC Group is also providing support by supplying daily necessity items, pharmaceuticals, healthcare services, and education through collaboration with 17 partners in nine countries. In addition, a donation of INR85 million (approximately ¥130 million) was made to healthcare institutions in India, where the impacts of the COVID-19 pandemic have been particularly severe.

Support for Malaysia

Supporting the Promotion of Cultural Activities and the Arts

The spread of this disease has various effects on cultural and artistic activities that are indispensable to a prosperous society. As part of our support to the promotion of culture and arts, SMBC Group donated ¥100 million to the “Association of Japanese Symphony Orchestras” to support 37 orchestral organizations across Japan. SMBC Group will work with these organizations to promote projects to comfort and encourage people through music.

# Group Structure

SMBC Group is a global financial group that develops operations in a wide range of fields, including banking, leasing, securities, credit cards, and consumer finance.

Under the holding company, Sumitomo Mitsui Financial Group, we have established four business units that draft and implement Group strategies based on customer segments. For head office functions, we have clarified the managers responsible for specific areas of group-wide management and planning under the CxO system. In addition, we are taking steps to share management resources and optimize the allocation of resources.

# Retail Business Unit

The top-class companies in the banking, securities, credit card, and consumer finance industries that comprise the Retail Business Unit are addressing the financial needs of all individual customers through services capitalizing on the Group’s comprehensive strength, striving to develop the most trusted and No. 1 Japanese retail finance business.

The Retail Business Unit possesses the No.1 business foundation in Japan in its principal business areas, including wealth management, payment service, and consumer finance businesses, backed by high-quality, face-to-face consulting capabilities and advanced payment and finance products and services.

Customer behavior is undergoing substantial change amid various megatrends affecting financial services for individuals. These trends include the normalization of cashless payments and the move toward performing all banking processes digitally witnessed amid the COVID-19 pandemic as well as the rise in concerns for health seen among senior citizens and for asset building seen among younger generations in light of the upcoming era in which people consistently live to 100. Against that backdrop, SMBC Group was swift in implementing measures to address changing customer needs in FY2020. Specific measures included focusing on digital and remote operations and introducing reservation systems at all branches.

In FY2021, the Retail Business Unit will advance the measures put forth by the Medium-Term Management Plan, namely allocating resources

to growth markets, reviewing business processes to reform cost structures, and exploring new businesses utilizing digital and IT technologies, and we are committed to maximizing the success of these measures. At the same time, we will ramp up group-wide cost structure reforms in pursuit of sustainable growth.

In the wealth management business, we will facilitate the growth of the domestic economy by supplying funds to the market while supporting healthy individual asset building to help address people’s post-retirement concerns. At the same time, we will look to capitalize on the business opportunities presented by the overarching shift from saving to asset formation and investment. As for the payment service business, we provide services that are highly convenient for users and business operators alike in response to the increasingly rapid trend toward cashless payments. A unique function of banks, which are charged with protecting customers’ precious assets, is to ensure the smooth transfer of wealth between generations. Recognizing the responsibility this entails, SMBC strives to supply high-value-added services that go beyond the scope of traditional financial institutions to address the diversifying concerns of senior citizens.

PRIORITY STRATEGY

1

Sustainable Growth in Wealth Management Business

SMBC Group is accelerating sustainable growth through a concerted group-wide effort. We are focused on consolidating assets from other companies and banks on a group-wide basis by practicing a clear division of duties between SMBC, SMBC Nikko Securities, and SMBC Trust Bank in accordance with customer needs and by strengthening systems for intra-Group coordination. For affluent business owners and other individuals, we are enhancing the lineup of products and services offered under the SMBC Private Wealth brand. We are also approaching such customers through a coordinated effort that takes advantage of the strengths of Group companies, thereby aiming to achieve sustainable growth through reliable earnings. Furthermore, we are introducing products that accommodate wide-ranging inheritance needs to bolster our group-wide response capabilities and thus grow transactions among the next-generation of customers.

Balance of Fee-Based AUM

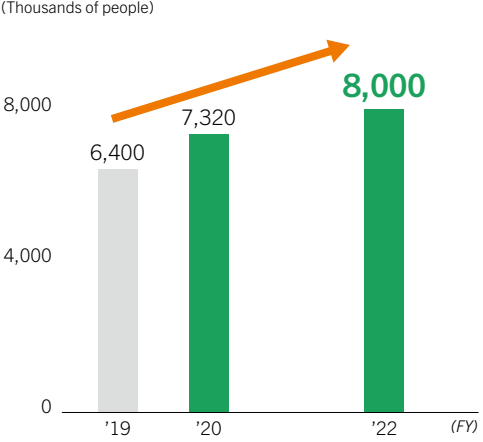

PRIORITY STRATEGY

3

Reinforcement of Consulting Businesses through Branch Reorganizations

SMBC is overhauling its SMBC app and other digital infrastructure to expand the range of processes that can be performed entirely online digitally and remotely and to enhance video chat functions. We thereby aim to improve convenience for customers while heightening operational efficiency. At the same time, we will continue efforts to boost the competitiveness of our physical branch network, seeking to raise customer satisfaction by using branches as venues for supplying local customers with the type of consulting services only possible at manned branches. Group companies, meanwhile, are coordinating to develop joint branches to supply a full lineup of services on a one-stop basis in order to improve customer convenience while also increasing the efficiency of branch operations.

\* Number of customers who have logged in to SMBC Direct at least once every six months

PRIORITY STRATEGY

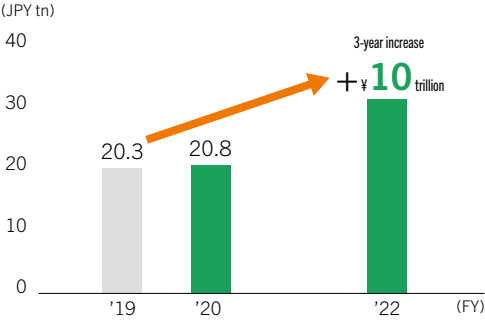

2

Pursuit of No. 1 Position in Payment Service Business

The COVID-19 pandemic triggered the acceleration of the trend toward cashless payments and digitalization. SMBC Group will respond to this trend by delivering even more convenient services. For users, we will continue to enhance our products and services in order to improve convenience and grow our customer base. For business operators, we seek to expand our market share as well as the scope of our business by introducing affordable subscription models for cashless payment terminals and content while also increasing the viability of our products through collaboration with external partners.

As for consumer finance businesses, we aim to provide highly convenient services by improving the user interface and experience of our apps based on rising digitalization needs and by utilizing Group expertise to bolster product lineups.

Consumer Loan Balance

Sustainability Initiatives

The SMBC Elder Program was launched in April 2021 to support customers as they live longer and to accommodate the diversifying lifestyles among individuals in rapidly aging Japan. Capitalizing on the transactional relationships we have built with individual and corporate customers thus far and the trust earned from these customers, we will provide financial services as well as non-financial services that support health, security, and meaningful lifestyles to help build a society offering peace of mind for all.

We also look to support the realization of a sustainable society. To this end,

we offer wealth management products that select investees based on their environmental, social, and governance (ESG) initiatives as well as products focused on companies committed to contributing to society. As we move forward, we will continue to expand our range of products to address a diverse range of customer needs.

SMBC Group is also improving the convenience of its internet banking services and encouraging customers to switch to online passbooks in order to cut back on the amount of paper used for such passbooks.

SMBC Group will continue to work toward sustainability through the services it provides to customers going forward.

Pamphlet for promoting the switch to online passbooks

# Wholesale Business Unit

The Wholesale Business Unit contributes to the development of the Japanese economy by providing financial solutions that respond to the diverse needs of domestic companies in relation to financing, investment management, M&A advisory, and leases through a united Group effort.

Faced with Japan’s negative interest rate policy and a continuously challenging operating environment, the Wholesale Business Unit mustered the collective strength of SMBC Group to deliver sophisticated solutions and carry out operations with an extensive focus on profitability. It was thereby able to maintain high levels of asset efficiency.

In FY2020, our focus was supporting the business continuity of customers and providing smooth funding support in response to the COVID-19 pandemic. At the same time, we addressed, as a united group, the rapid changes in customers’ management issues and needs seen amid the transformation of social structures. Our approach entailed supplying an array of solutions for business reorganization alongside the solutions of its cashless and payment service businesses and real estate businesses. We were thereby able to bring a number of proposals and projects to fruition. As a result, all Group companies in the Wholesale Business Unit achieved their net business profit targets while the unit as a whole posted consolidated net business profit of ¥388.5 billion, an increase of ¥21.5 billion year on year.

Deputy President and  
Executive Officer  
Co-Head of Wholesale Business Unit

Masahiko Oshima

In FY2021, the second year of the Medium-Term Management Plan, the Wholesale Business Unit will bolster coordination among domestic and overseas bases and Group companies to exercise the strength of our group-based comprehensive solutions to the greatest extent possible. At the same time, we will increase the degree to which management resources are allocated to growth fields. Social structures and trends are changing rapidly as the COVID-19 pandemic accelerates digitalization and cashless payment trends and the move to transition to a carbon-neutral society advances. Such changes are causing customers’ management issues to become more complex and sophisticated. Fully committed to addressing these issues, SMBC is ramping up efforts to create new businesses together with customers. Going forward, we will further bolster our strengths, including our keen ability to make proposals, speed, and pioneering spirit, to provide high-value-added solutions through coordination between front-office service and headquarter divisions and thereby contribute to the growth of customers and of the Japanese economy.

PRIORITY STRATEGY

1

Group-Based Comprehensive Solutions

Social structures and trends are changing rapidly due to the COVID-19 pandemic and the move to transition to a carbon-neutral society, and thus we are bolstering our ability to respond to the massive changes seen in customers' management issues and in social issues. As part of this process, we will unite our front-office and solution providing departments to provide comprehensive solutions while proactively allocating management resources to expanding business areas so that we can grow together with customers.

In addition, we are enhancing our sector approach through coordination between domestic and overseas bases and Group companies to cater to the needs of large corporations active on the global stage. To this end, we are developing systems for delivering swift and high-quality proposals in response to increasingly complex and sophisticated management issues pertaining to such matters as business portfolio revision and global M&A activities. We also seek to address the business reorganization, finance improvement, and corporate revitalization needs of customers that are becoming increasingly common amid the COVID-19 pandemic. In catering to these needs, we will supply hybrid finance, corporate revitalization investment, and other solutions based on customers' circumstances and needs. Promoted on a group-wide basis, these solutions will be offered through the Specialized Finance Department, which was established in April 2021. Meanwhile, we will allocate management resources to real estate businesses while bolstering coordination among Group companies to enhance efforts to propose solutions to customers utilizing real estate through a group-wide approach.

Solutions for Complicated Financial Needs

SMBC Group Real Estate Businesses

PRIORITY STRATEGY

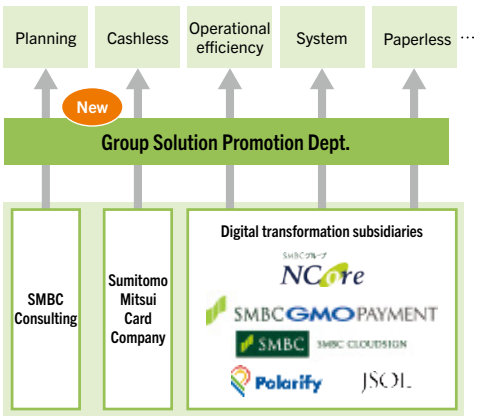

2

Corporate Digital Solutions

SMBC Group's efforts to utilize digital technologies go beyond the conventional aims of improving operational efficiency; we are increasingly looking to develop new businesses and transform existing businesses to address digital innovation and digital transformation needs. For the purpose of addressing the diversifying needs of customers, the Group Solution Promotion Department was established to help provide one-stop services of the Group companies' digital solutions. Through this new department, we will propose solutions tailor-made to the complex digital needs of customers.

Meanwhile, PlariTown, the corporate digital solution platform launched in FY2020 will be a central component in our efforts to supply various financial and non-financial solutions together with external partners. This is the approach through which we will work to support the digitalization of mid-sized corporations and SMEs and to create new business opportunities.

 For more information on PlariTown, please refer to page 066.

Sustainability Initiatives

In addition to its prior renewable energy project finance initiatives, the Wholesale Business Unit is promoting engagement with customers through the Sustainable Business Promotion Department, which was established in April 2020 as part of its focus on co-creating businesses to facilitate sustainability-related business reorganizations and the development of sustainable social foundations.

We used around ¥1 trillion to conduct such sustainability-related financing in Japan during FY2020. In addition, we established the GREEN×GLOBE Partners community to work toward resolutions to environmental and social issues together with customers. Moreover, we began offering green deposits in April 2021. Money in these deposits is only lent to eligible green projects related to the environment, particularly renewable energy, in order to provide opportunities for customers to utilize their assets for ESG purposes.

Going forward, the Wholesale Business Unit will continue to contribute to the realization of a sustainable society by supporting customers in resolving sustainability-related management issues, such as those pertaining to the fight against climate change and the transition to a carbon-neutral society.

GREEN×GLOBE Partners

環境・社会課題解決の「意識」と「機会」を流通させる

# Global Business Unit

The Global Business Unit supports the global business operations of domestic and overseas customers by leveraging SMBC Group’s extensive global network and products and services in which we possess strengths.

In FY2020, the COVID-19 pandemic became normalized throughout society. Despite the difficult operating environment seen centered on operations in Indonesia and aircraft businesses, the Global Business Unit achieved growth in consolidated net business profit through a concerted Group effort to meet customers’ funding needs and to flexibly implement the measures prescribed by the Medium-Term Management Plan in response to the changing operating environment. Thus, we feel that the unit achieved a high degree of success in the first year of the plan.

In FY2021, the second year of the Medium-Term Management Plan, we will maintain a consistent course with regard to implementing our priority measures. At the same time, we will seek to advance our business activities with an appropriately balanced focus on growth fields, such as sustainability and digital technologies, to accelerate our evolution to a global solution provider proficient at addressing customers’ management issues.

One specific area of focus will be bolstering overseas securities, a business where there is substantial room to grow from the perspectives of business lines and customer base expansion, in order to accelerate initiatives in our corporate investment banking business, which merges our

banking business with our securities business. We thereby aim to enhance our ability to propose solutions in response to the various corporate events of customers. Meanwhile, we will work to develop foundations for medium- to long-term growth in Asia by advancing inorganic growth strategies in Vietnam, the Philippines, and India. The goal of these strategies will be to establish a franchise capable of providing a broad assortment of services to customers ranging from individuals to large corporations.

The Global Business Unit also recognizes that customers are ramping up climate change and other ESG initiatives. We are responding by augmenting our advisory functions for sustainability fields and boosting our capacity to provide solutions for issues faced in ESG strategies. At the same time, we are strategically developing digital businesses to address the rise in needs related to non-contact interactions seen amid the COVID-19 pandemic. Meanwhile, in the trade finance field, an area of strength for SMBC Group, we aim to develop digital platforms a step ahead of the competition to provide new settlement and finance methods.

Through these initiatives, we will advance a concerted Group effort to achieve sustainable growth in high-growth-potential overseas markets.

PRIORITY STRATEGY

1

Reinforcement of CIB Business

The Global Business Unit is accelerating initiatives in its corporate & investment banking business, which merges its banking business with its securities business.

Banks and securities are becoming increasingly linked on a global basis, and thus there has been a rise in opportunities to provide advisory services pertaining to cross-border M&A activities by Japanese and non-Japanese companies. By enhancing coordination in global sectors, we will leverage the strengths of our product capabilities and global network to better propose solutions in response to customers' business portfolio reconstruction and other management issues.

Furthermore, we are enhancing our overseas securities services, which have significant potential for growth, to strengthen core functions for making our corporate investment banking business more sophisticated. Particular areas of focus include developing bond sales and trading businesses and selectively expanding customer base in the United States to develop a stronger market presence.

Gross Profit in Corporate Investment Banking Business in Europe and the United States\*1

\*1 Figures are on a managerial accounting basis (non-Japanese companies in Europe and the United States, fund-related services, etc.).

PRIORITY STRATEGY

2

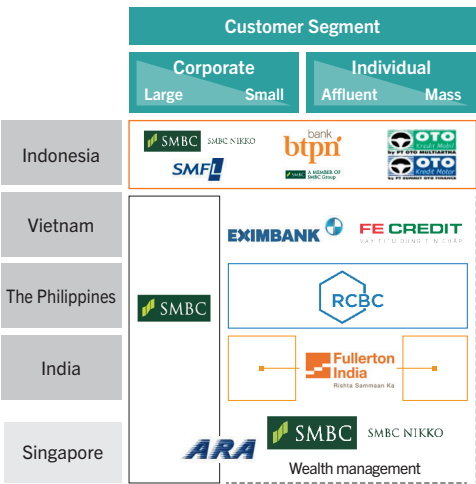

Initiatives in Growth Fields in Asia and Other Markets

In pursuit of medium- to long-term growth in Asia, the Global Business Unit is developing a financial franchise that supplies services to customers ranging from individuals to large corporations.

Our operations in Indonesia were impacted by the COVID-19 pandemic in FY2020. Regardless, there has been no change to our policy of developing growth foundations centered on Bank BTPN, and we are advancing our business in this country through means such as enhancing digital banking and approaching the middle-income demographic. In FY2021, we announced investments in non-banking companies in Vietnam and India and in a commercial banking company in the Philippines. Going forward, we will expand our platforms for operations targeting SMEs and for retail businesses.

Other initiatives included efforts to expand into new business areas such as asset management through investment in ARA Asset Management of Singapore, an increase in our stake in Ares Management Corporation in the United States, and other means.

Expansion of Financial Franchise in Asia

Sustainability Initiatives

In response to the ever-changing circumstances surrounding climate change and other sustainability issues, the Global Business Unit is augmenting its solution providing capabilities to better address customers' management issues.

In FY2020, we accelerated our green finance initiative in Europe, the United States, and other overseas markets, thereby climbing to the No. 2 position in global league tables with regard to green loan amounts. At the same time, we took steps to enhance our proposal capabilities as a global solution provider. Specific areas targeted included advisory services pertaining to customers' ESG strategies

and disclosure as well as peripheral advisory services related to financing arrangement and asset portfolio reconstruction to incorporate decarbonization and energy transactions. As one such initiative, in February 2021 we provided a loan to the U.S. subsidiary of a Japanese company in the US\$1,100 million financing bracket that receives preferential interest rates based on ESG ratings, a first for a Japanese bank. Looking ahead, we will accelerate our initiatives by taking part in various cutting-edge projects.

Moreover, through Bank BTPN, we began providing BTPN Wow!, a service that allows customers without bank accounts with Bank BTPN to perform banking transactions through messaging services. In addition, its subsidiary, Bank BTPN Syariah Tbk PT provides financing that conforms to the requirements of the Islamic faith primarily to low-income women. In these ways, we are working to provide financial services that can be used by a wide range of people.

PRIORITY STRATEGY

3

Establishing Business Foundations That Meet the Needs of a Global Financial Group

In response to market environment changes, rising geopolitical risks, and the implementation of stricter financial regulations, the Global Business Unit continues to prioritize the allocation of resources to areas such as corporate governance, risk management systems, and compliance. Efforts to support SMBC Group's overseas businesses and achieve sustainable growth as a global financial group will require us to predict various risks and develop proactive management foundations on a group-wide basis to address these risks.

Furthermore, we will continue to diligently streamline our operations by utilizing digitalization, revising business promotion frameworks, and consolidating administrative functions so that we may secure resources that can be allocated to priority fields while increasing investments in new businesses.

Proactive responses to market fluctuations and overseas regulatory requirements

# Global Markets Business Unit

The Global Markets Business Unit offers solutions through foreign exchange, derivatives, bonds, stocks, and other marketable financial products and also undertakes asset liability management (“ALM”) operations that comprehensively control balance sheet liquidity risks and interest rate risks.

The Global Markets Business Unit is, as market risk professionals, committed to enhancing risk-taking skills for our investment portfolio while continuously supplying customers with high levels of value. To support these efforts, we are focused on analyzing the various phenomena that occur throughout the world based on the Three “I” s of Insight, Imagination, and Intelligence in order to forecast the market trends that will emerge in the future or, in other words, discern the underlying essence of world affairs.

In FY2020, the COVID-19 pandemic had a massive impact on the flow of people and goods and on the market environment itself. In our portfolio management efforts, we assessed that market participants would be looking to transition from a phase of crisis response to a phase of preemptively acting in anticipation of future economic recovery. We responded by flexibly rebalancing our holdings of equities and bonds and thereby succeeded in generating a profit. At the same time, we maintained stable foreign currency funding to meet the funding

needs of customers. In sales and trading, meanwhile, we sought to develop a full understanding of customer needs so that we could address these needs by providing the optimal solutions.

Currently, governments and central banks around the world are continuously providing economic support to an unprecedented degree, making the outlook pertaining to asset prices and inflation increasingly uncertain. In addition, customer needs are constantly growing more diverse, as indicated by the advancement of the digitalization trend and the growing interest in social issues. In FY2021, the second year of the Medium-Term Management Plan, we will need to keep demonstrating our true value by reading the market trends emerging to create solutions that customers choose. Accordingly, the Global Markets Business Unit will continue to dedicate ourselves to face the markets sincerely with an even greater commitment to contributing to the growth of customers and of SMBC Group.

Contribution to Consolidated Net Business Profit (FY2020)

	FY2020	YoY*1
Gross profit (JPY bn)	460.7	+22.1
Expenses (JPY bn)	82.9	+3.3
Base expenses (JPY bn)	79.6	+1.9
Net business profit (JPY bn)	413.5	+22.0
ROCET1 *2	20.4%	+0.2%
RwA (JPY tn)	5.4	+0.3

\*1 Figures are after adjustments for interest rate and exchange rate impacts.

\*2 Figures include internal risk capital related to IRRBB (Interest-Rate Risk in the Banking Book).

Senior Managing Executive Officer  
Head of Global Markets Business Unit

Masamichi Koike

PRIORITY STRATEGY

1

Flexible Portfolio Management in Response to Market Changes

The strength of the Global Markets Business Unit lies in its ability to dynamically adjust its portfolio to maximize earnings by accurately capturing market trends through proactive observation of market fluctuations.

By making use of the Three "I" s, each unit employee collects and analyzes information with regard to various phenomena and thoroughly discusses these phenomena with others. Then, they make positions in accordance with the scenarios formulated through this work, after which they review the results and validity of these positions. The consistent application of this iterative process is the only way we can hone our ability to read the markets.

The Medium-Term Management Plan calls on us to enhance our portfolio management by branching out from managing assets mainly in developed countries to exploring new revenue sources through means such as dealing in a more diverse range of investment products and employing investment methods that take advantage of alternative data.

Overview of Portfolio Rebalancing

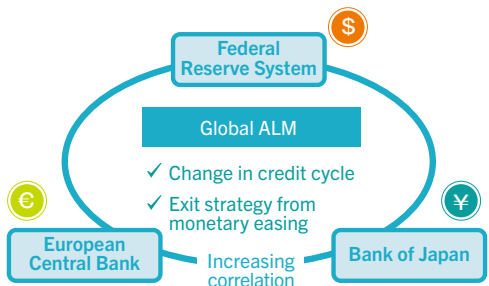

PRIORITY STRATEGY

3

Development of Robust Foreign Currency Funding Base

The Global Markets Business Unit is taking steps for foreign currency funding to balance between ensuring stability and pursuing cost efficiency so that it can continue to support customers' businesses through lending. For this purpose, we seek to expand our investor base and diversify funding methods. Initiatives toward these ends have included issuing foreign currency denominated covered bonds along with regular straight bonds and utilizing cross-currency repo transactions.\* In addition, we make funding strategies by taking into account the structure of SMBC Group's balance sheet and the market environments. Furthermore, we have integrated our ALM departments that were in charge of JPY and foreign currency to create a system for proactively responding to changes in various aspects of the global financial market, including financial regulations. This integration was conducted to facilitate effective balance sheet control from a long-term perspective.

\*Cross-currency repo transactions are forms of foreign currency funding backed by Japanese government bonds, etc.

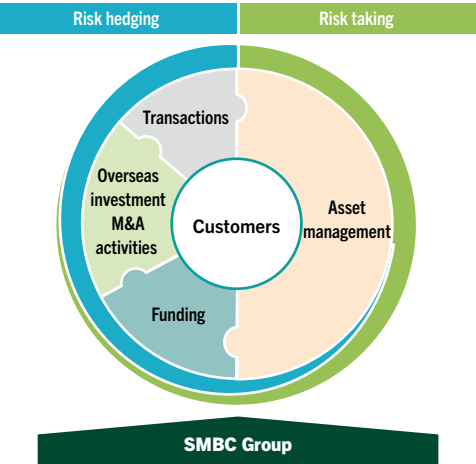

- Effective management for cash flows and collaterals
- Medium- to long-term funding strategy based on market environments

PRIORITY STRATEGY

2

Enhancement of Solutions Provided through Marketable Financial Products

The Global Markets Business Unit is expanding its product lineup and enhancing coordination between domestic and overseas product sales teams in order to respond to the risk-hedging needs associated with customers' businesses and balance sheets and the risk-taking needs related to customers' asset management and investment activities. By visualizing what kind of market risks customers are facing, we continue to deliver solutions tailor-made to the circumstances of each customer. We are also developing and strengthening systems on a global basis for supplying various products based on customer needs. Furthermore, we are addressing the rise in electronic transactions by enhancing foreign exchange platforms to provide higher levels of convenience to customers.

Sustainability Initiatives

The Global Markets Business Unit regularly issues green bonds from which procured funds are only used for eco-friendly projects, such as renewable energy projects.

In October 2015, we became the first Japanese private financial institution to issue U.S. dollar-denominated green bonds. In the years that followed, we proceeded to expand the scope of investors served with our green bonds, becoming the first private company in Japan to issue green bonds for individual investors in December 2018 and then issuing green bonds through a public offering in the United States in January 2021. To date, we have floated five green bond issues in

Japan and overseas, procuring a total of approximately US\$2.5 billion. In these issues, we carefully explained our sustainability initiatives to investors to foster mutual understanding.

SMBC Group possesses a strong track record in project finance for domestic and overseas solar and wind power generation projects and other renewable energy projects. Going forward, we will seek to make greater contributions to market growth and to environmental preservation as Japan's leading issuer of green bonds.

SMBC Group's  
Digital Strategies  
Transcending Finance

- 057 Development of a Next-Generation Core Banking System to Support the Digital Era
- 060 Creation of the Financial Group Most Chosen by Customers through the Power of Design
- 064 Digital Solutions for Corporate Clients Breaking the Mold of a Financial Group

Special Feature 1

Development of a Next-Generation Core  
Banking System to Support the Digital Era

SMBC has begun the development of a next-generation core banking system for the purpose of supporting the digitalization of the improvement of customer service and work processes. In this feature, we look at the background for our efforts to develop a system that builds upon our reputation for reliability and efficiency while also offering the flexibility and speed necessary for responding to future changes.

Pursuit of  
Banking Services  
Available Anywhere  
and at Any Time

One goal of the development of a next-generation core banking system is to provide non-stop online services that can be used at any time of day. As transactions become increasingly diverse and global, demand is rising among customers for online services that can be accessed around the clock. Under existing systems, however, online services have to be halted on Sunday nights to undergo maintenance. The next-generation core banking system currently under development will make it possible to conduct online bank transfers and to perform withdrawals or deposits at convenience store ATMs at any time of day. Moreover, this system will offer an expanded range of features, including services for immediate global transactions, such as overseas money transfers, and extended processing windows to increase customer convenience.

# Special Features

Special Features: SMBC Group's Digital Strategies Transcending Finance

## Construction of Forward-Looking Foundations

An important element of redeveloping our systems is to further build upon our reputation for reliability and efficiency while also ensuring that the new system offers the flexibility and speed necessary for responding to future changes.

SMBC has always been swift to update its banking systems. In 1994, then Sumitomo Bank undertook a complete overhaul of its banking systems a step ahead of the rest of the industry. This overhaul entailed the installation of a cutting-edge system for performing large-scale batch processing of account transfer transactions on an individual transaction basis (online batch processing). Furthermore, we were able to integrate our systems at low cost during the 2002 merger, which combined large-scale banks to create Japan's first megabank, by incorporating systems into the banking systems of the former Sumitomo Bank. Later, in 2009 we developed the frameworks necessary for operating all banking programs through open systems. This transformation gave us the option of adopting lower system costs while making it easier to incorporate the latest technologies. The current project for developing a next-generation core banking system uses the approach of expanding systems based on our online systems.

Evolution of SMBC's Banking System

## Low-Cost Development through the Utilization of Existing Systems

In renovating our systems, we examined the possibility of completely overhauling systems in ways that included rebuilding existing online systems from scratch. However, a survey of our existing systems produced favorable scores with regard to indicators of program complexity and volume, and there were no aspects of systems that had become inaccessible black boxes. It was therefore judged that there was no need for a complete overhaul of our systems, leading us to take the option of renovating systems while using the existing systems as a base. This approach is projected to allow us to limit system renovation costs to ¥50 billion, as opposed to the hundreds of billions estimated to be necessary for a complete overhaul.

The next-generation core banking system will include an open platform for the utilization of advanced technologies. Through this platform, a ledger mirror database will be compiled by copying the entirety of the general ledger in real time. This methodology will allow for the swift, low-cost development of new functions and products without placing additional burden on the mainframe that monitors the ledger while also making it possible to analyze the ledger in its entirety in real time. In the past, SMBC used an event-based marketing

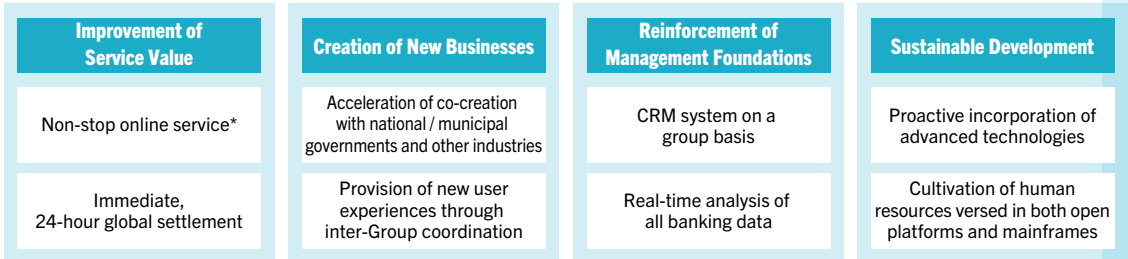

approach through which products were proposed based on customers' transaction histories. Going forward, however, we will use the new system to adopt a one-to-one marketing approach through which we propose the ideal product for each individual customer based on swift analysis of more dynamic customer data. We are also eying the development of new businesses as a platform holder. To this end, we are implementing a banking application programming interface (API) for realizing substantial improvements in the connectivity of internal and external systems while accelerating flexible coordination with various partner companies.

At the same time, we will partner with NEC Corporation to outfit the banking system for managing ledgers with a next-generation NEC mainframe to further build upon the reputation for reliability and efficiency we have cultivated thus far.

## Optimal Mix of Open Platforms and Mainframes

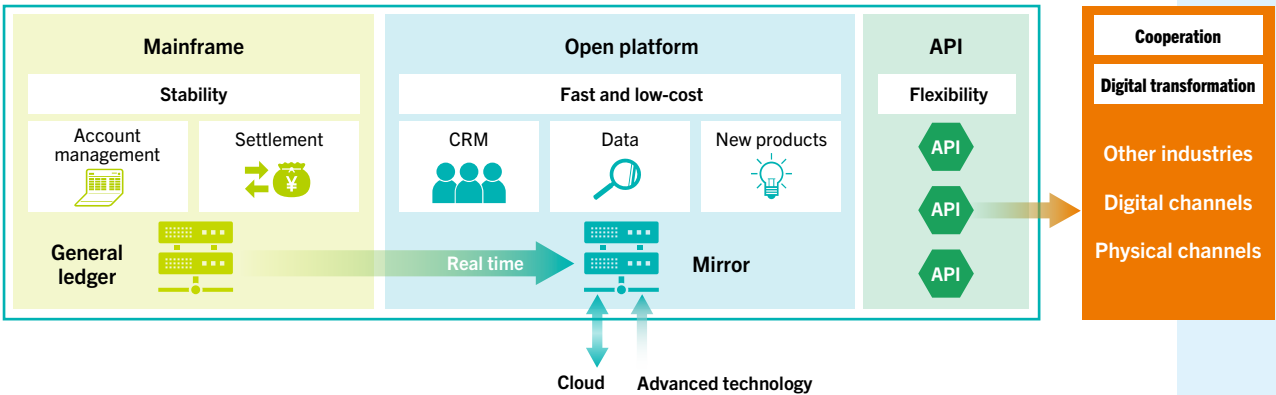

To create a system featuring an optimal mix of open platforms and mainframes, which could be said to be an amalgamation of past system development initiatives, we are utilizing technologies developed in preparation for the transition from our existing systems. Few of the world's financial institutions employ this type of system, and we will have a huge lead on other megabanks in terms of services and functions after the completion of our new system. Going forward, SMBC Group will continue its quest to create unprecedented value in order to accommodate the advancement of the digitalization trend.

Characteristics of Next-Generation Core Banking System

\* Excluding days for implementing disaster response drills and other special measures

Transition to a stable and flexible architecture that can respond quickly to environmental changes

## Special Feature 2

# DESIGN SHIFT

創造する、銀行の未来を。

## Creation of the Financial Group Most Chosen by Customers through the Power of Design

### In-House Designers' Efforts to Design Experiences

*Customers are at the heart of SMBC Group's digitalization efforts. Through digitalization, we aim to deliver services with the same level of hospitality and dedication as on-site transactions and to provide new experiences that can only be realized through digital technologies. In this feature, we introduce the efforts of the in-house designers who are designing such new experiences to break the mold of their traditional roles and to create new digital services that are unique to SMBC Group.*

## Design Team

SMBC Group's design team is a group of professionals who passionately believe that design can transform traditional banking culture.

This team has put forth a four-part mission statement (shown on the next page) that guides its members in their uncompromising pursuit of higher-quality services for customers as they seek to strike a balance between business viability and design.

### Designer Mission Statement

#### Strong Presence

*A company's presence is reflective of an ability to accomplish goals and influence others.*

*We believe that design has the power to create positive value for banks as well as for the rest of society, and we will therefore continue our efforts to develop a stronger presence through design.*

#### Core of Design Management

*The role of design management is to improve corporate competitiveness through enhanced brand image and increased capacity for innovation.*

*As an organization that is core to design management, we must remain, in our daily efforts, aware that design, right down to the most minute details of our craft, is directly linked to corporate competitiveness.*

#### First-Rate Personnel, First-Rate Quality

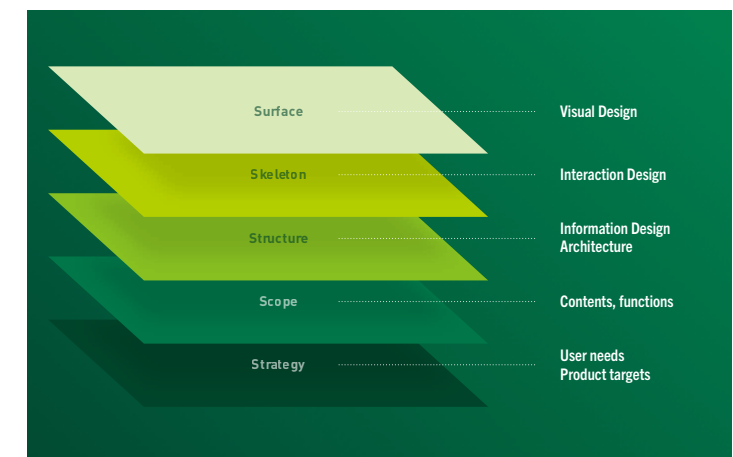

*It is a given that customers will be supplied with the desired quality, based on the differences that can only be seen through a professional's eye, at the ideal time.*

*Our first-rate personnel seek to provide new standards for first-rate quality that overwrite customer expectations.*

#### Self-Sculpted Environment for Excellence

*Designers give form to ideas with no tangible form and therefore must be ready, at times, to create the necessary tools for this task.*

*It is unsightly to complain about lacking the necessary environment; if the environment is lacking, we will sculpt it ourselves.*

## Role and Domain of In-House Designers

*In-house designers are expected to understand SMBC Group's culture and values and to call upon their robust experience and masterful techniques to design services.*

### Hiroshi Kanazawa

Hiroshi Kanazawa completed a graduate textile design program at Musashino Art University in 2008. After graduating from this program, he went on to act as a modeling artist and a web designer while also working as a fine arts professor before joining a web design company in 2011. At this company, Kanazawa was responsible for developing websites for major companies and on-site online banking services. He became the first designer at SMBC in 2016 and is currently providing his services as a specialist in the Human-Centered Design approach of Human-Centered Design Organization (HCD-Net).

### Naoki Kaneko

After graduating from university, Naoki Kaneko joined a recruitment firm in 2004, where he was responsible for corporate marketing. He then started his own company together with a colleague in 2006. His role in this company centered around e-commerce website operation and website and smartphone app planning and production. He moved on in 2013, taking up a website planning, production, and operation position at the marketing arm of a major advertising firm before joining SMBC in 2017. He is also a specialist in the Human-Centered Design approach of HCD-Net.

### Yuko Hori

Yuko Hori joined SMBC in 2017 and took up a position designing banking applications, webpages, and banking system user interface and experience. Participating in projects from the upstream design phase, which includes usability tests, user interface specification design, and visual design, she has been involved in proposing and producing concrete design and visual concepts. She is also a specialist in the Human-Centered Design approach of HCD-Net.

# Special Features

Special Features: SMBC Group's Digital Strategies Transcending Finance

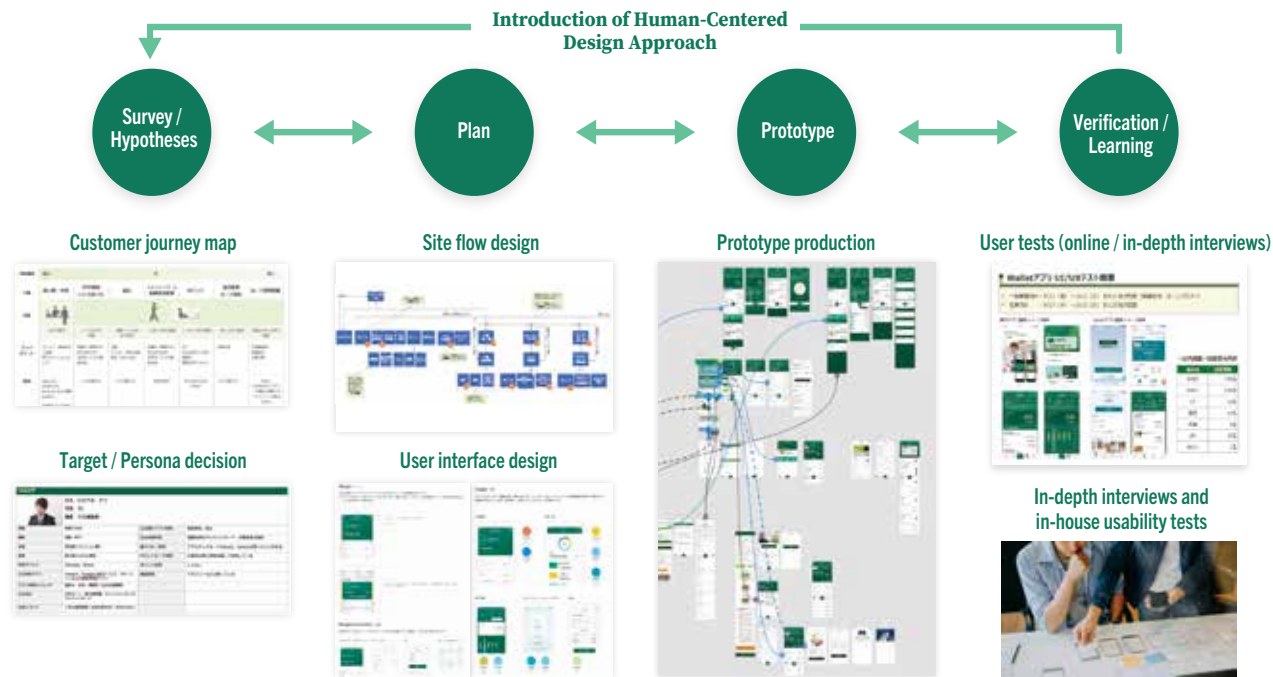

## Efforts of In-House Designers 1

### Redesigning of the SMBC App

Creation of an App That is Easy to Use for Digital Novices and Experts Alike

SMBC views its app as providing an exclusive branch, or approximately 9 million branches\* in all, for every customer who downloads the app. This app was redesigned in March 2019. In redesigning the app, in-house designers carefully crafted everything from the function menu, control feel, and coloring to create digital branches that offer the same ease of everyday use and reliable service in times of need that SMBC is known for.

\* Approximate number of app downloads as of June 30, 2021

## Review of the March 2019 App Redesign

In redesigning our app, we adopted a Human-Centered Design approach that entailed developing the interface based on observations of the natural behavior of people and of user-friendliness.

Through this process and through repeated user tests, we verified every aspect of the app, ranging from button locations and colors to how the screen reacts to taps. At the time, we were among the first in the industry to identify customer demand for a way to track the history of transactions with other, non-SMBC financial institutions in an integrated manner. This recognition prompted us to link data and functions with the Sumitomo Mitsui Card app as well as with the

Moneytree personal finance management app. Other companies have since followed suit. The inclusion of additional functions increases convenience while also creating the risk of making an app too complicated to use. For this reason, the utmost attention was paid to ensuring use was intuitive.

A year-on-year increase of 80% was seen in new downloads in the three-month period after the launch of the redesigned app, and we were even presented with an award for this app in the 2019 GOOD DESIGN AWARD program. Going forward, SMBC Group will ramp up its design initiatives to further the evolution of this app.

## Column

## Efforts of In-House Designers 2

### SMBC Website Redesign

SMBC's website serves as the digital entryway for the Company. On March 22, 2021, a redesigned version of this website was launched. The redesign was based on the concept of providing courteous customer service that is on par with our face-to-face service. In the redesign process, in-house designers fundamentally reinvented the user interface and then went on to install new experiences, such as a questionnaire function that allows us to solicit information on the desires of customers.

## Efforts of In-House Designers 3

### SMBC Tablets

Digital technologies are transforming how we communicate with customers even in face-to-face settings. Seeking to make our time with customers more meaningful, members of our sales staff teamed up with in-house designers to reinvent our sales-use tablets through a process of ongoing discussion and user tests. The reinvented tablets feature several new functions, such as favorite registries and "My Folder" functions that contribute to smooth sales proposals.

## Efforts of In-House Designers 4

### Design System

SMBC Group is committed to providing its customers with consistent service, even as its range of customer contact points expands to include venues such as its website, internet banking, apps, and SMBC tablets. To facilitate service consistency, we have prepared a design system as a shared development tool through an effort centered on in-house designers. This design system will be used as the basis for the services that we supply going forward.

## Other Design Team Efforts

**Official note Account**  
In-house designers operate our official note account that provides information on design-related activities.

**Designer Website**  
SMBC Group has created a website that displays designer profiles and introduces the projects of these designers. Also, we have ramped up the recruitment of mid-career designers.

## Special Feature 3

### Digital Solutions for Corporate Clients Breaking the Mold of a Financial Group

*SMBC Group is keen to support the growth of SMEs by helping them address their operational streamlining issues with digital tools.*

#### Ryo Namiki

President & CEO  
Plari Town, Inc.

*Ryo Namiki joined SMBC in 2008. After holding positions in corporate marketing, the Wholesale Banking Unit, and the Corporate Digital Solution Department, he became president & CEO of Plari Town, Inc., in May 2020.*

SMBC Group has defined the development of digital solutions for corporate clients as one of the key strategies of its Medium-Term Management Plan. This strategy is aimed at resolving the management issues of corporate clients and at creating new business value.

The forerunners of our digital strategies are SMBC CLOUDSIGN, Inc., and Plari Town, Inc. SMBC Group is encouraging in-house entrepreneurial ventures by supporting the ambitious and unprecedented undertakings of employees through a CEO production project. Both SMBC CLOUDSIGN and Plari Town, Inc., are led by CEOs in their 30s who have been appointed through this project.

In this feature, we look at the new endeavors of these two companies that break the mold of a financial group.

*Through partnerships between large and venture companies, we aim to provide new solutions that go beyond the traditional domain of banks.*

#### Hideki Mishima

President & CEO  
SMBC CLOUDSIGN, Inc.

*Hideki Mishima entered SMBC as a mid-career hire in 2018. He was initially assigned responsibility for overseeing our digital innovation center, "hoops link tokyo," and for developing new businesses. He became president & CEO of SMBC CLOUDSIGN in October 2019.*

# Special Features

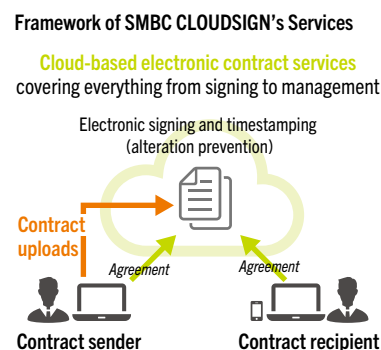

Special Features: SMBC Group's Digital Strategies Transcending Finance

## New Standard for Contracts

# SMBC CLOUDSIGN

SMBC CLOUDSIGN was established in October 2019 as a joint venture between Bengo4.com, Inc., and SMBC Group to provide electronic contract services. Based on its business vision of transforming Japanese legacy cultures and business processes centered on contracts, this company supplies cloud-based electronic contract services that allow all aspects of contract conclusion, ranging from signing to storage, to be performed online. SMBC CLOUDSIGN's services allow users to upload contracts for which negotiations have been completed to a cloud server, after which the counterparty can confirm and approve the contract online, resulting in its conclusion. This process expedites contract conclusion while reducing costs and making it easier to search for contract details.

The COVID-19 pandemic is spurring a shift away from traditional paper-based contract procedures, and cloud-based electronic contract services are gathering attention amid this transformation in traditional paper-based contract procedures.

## Source of Competitiveness for Winning Out in the Electronic Contract Market

The electronic contract market is currently home to fierce competition stimulated by the increasing entry of new players. SMBC CLOUDSIGN is able to exhibit competitiveness in this market by capitalizing on its large market share and the reliability associated with the SMBC brand. The combined market shares of SMBC CLOUDSIGN and Bengo4.com make for the top share of the domestic electronic contract market. Furthermore, SMBC CLOUDSIGN can utilize SMBC Group's base of corporate clients in its sales activities. This advantage makes it easier for SMBC CLOUDSIGN to approach large companies and those with long histories than it would be for a standard venture company. In this manner, the business of SMBC CLOUDSIGN will be advanced while coordinating with SMBC Group through means such as calling upon the Group's marketing resources to conduct demand surveys of companies.

## New Value Born Out of Partnerships between Large and Venture Companies

SMBC Group aims to become a global solution provider, and the accomplishment of that will require branching out from finance to resolve customer issues in their entirety. In this endeavor, partnerships between large and venture companies will be an important theme for creating new businesses based on ideas from employees. Through these partnerships, we aim to provide new solutions that go beyond the traditional domain of banks. SMBC CLOUDSIGN achieved profitability on a full-year basis in FY2020, a mere year and a half after its inception, with profit that erased the aggregate losses recorded thus far. One contributor to the company was the rise in attempts to move away from traditional paper-based procedures in response to the COVID-19 pandemic. SMBC CLOUDSIGN will continue building its track record in the pursuit of greater contributions to group-wide performance going forward as its management makes daily efforts to be an ongoing source of stimulation for employees as a successful case study for the CEO production project.

## Support for the Digitalization of Mid-Sized Companies and SMEs

# Plari Town, Inc.

Plari Town, Inc., was established in May 2020. At the same time, this company launched its PlariTown corporate digital platform for supporting the digitalization efforts of mid-tier companies and small-medium enterprises (SMEs) in Japan. The full-fledged provision of services through this platform was commenced in December 2020.

PlariTown coordinates with not just SMBC Group services but also the business apps and services of partner service providers to provide individualized information and digital services matched to customer needs. These services exceed the boundaries of finance to contribute to increased competitiveness by addressing customer issues related to operational streamlining and other aspects of management.

### PlariTown Service Examples

## Comprehensive Supply of Digital Services Necessary for Daily Operation

When Plari Town President & CEO Ryo Namiki was working in corporate marketing at SMBC, he often fielded questions from customers about management issues related to operational streamlining. There was a limit to the extent to which the services offered by a bank could be used to address such customer issues. The desire to help resolve these issues was what led to the creation of Plari Town, Inc.

A major characteristic of the Plari Town digital platform of this company is how it spreads beyond the boundaries of financial services to offer various services for supporting daily operations, including accounting, marketing, human resource management, legal affairs, and planning services, on a one-stop basis. As the digitalization trend advances, SMBC Group is keen, as a global solution provider, to support the growth of SMEs by helping them address their operational streamlining issues with digital tools.

## Development of a High-Value-Added Digital Platform

A major advantage at the time of the establishment of Plari Town, Inc., was the ability to assemble a team of human resources from both inside and outside of SMBC Group. From SMBC Group, individuals with highly specialized knowledge pertaining to legal affairs, taxation, IT, and other subjects were called. Meanwhile, project members were recruited from among like-minded individuals at various outside partner companies. Having an environment conducive to such a project is a valuable asset to SMBC Group. The thinking and speed of outside partners also helped inform various steps of the process. Such outside perspectives are something to be incorporated into SMBC Group going forward. Plari Town, Inc., will continue to coordinate with various internal and external organizations to heighten value and develop a digital platform for the entire Group.

## Sumitomo Mitsui Financial Group’s Corporate Governance System

In addition to fulfilling our responsibilities to stakeholders, which we consider to be “Our Mission,” SMBC Group has set forth a Vision for our medium- to long-term goals and Five Values as the core values to be shared by all executives and employees, and will seek to make the Vision and Five Values known as guiding principles for the group by all its directors and employees. Also, the “SMFG Corporate Governance Guideline,” a guideline for corporate governance, has been formulated and disclosed. We are promoting awareness and understanding regarding these guidelines among all SMBC Group officers and employees.

SMBC Group employs the Company with Three Committees structure. This structure was adopted in order to establish a corporate governance system that is globally recognized and is aligned with international banking regulations and supervision requirements and achieve enhanced oversight of the exercise of duties by the Board of Directors and expedite this exercise of duties. In addition, core subsidiaries SMBC and SMBC Nikko Securities employ the Company with Audit and Supervisory Committee system described in the Companies Act.

Through the implementation of effective corporate governance systems, we aim to prevent scandals and other forms of corporate misconduct while also achieving ongoing growth and medium- to long-term improvements in corporate value. We realize that there is no perfect form for corporate governance structures. Accordingly, we will continue working toward the strengthening and enhancement of corporate governance in order to realize higher levels of effectiveness.

## Corporate Governance System

Corporate Governance

Board of Directors

■ Role of the Board of Directors

The Board of Directors of the Company is primarily responsible for making decisions on the matters that are within its legally mandated scope of authority, such as basic management policies, as well as for overseeing the exercise of duties of executive officers and directors. Authority for execution decisions other than those legally required to be made by the Board of Directors will, in principle, be delegated to executive officers. The purpose for this delegation is to enhance the oversight function of the Board of Directors and to expedite the exercise of duties.

The Board of Directors works toward the realization of “Our Mission” and the long-term growth of corporate value and the common interests of the shareholders. Any action that may impede those objectives will be addressed with impartial decisions and response measures.

Furthermore, the Board of Directors is responsible for establishing an environment that supports appropriate risk taking by executive officers. It will develop a system for ensuring the appropriateness of SMBC Group’s business operations pursuant to the Companies Act and other relevant legislation in order to maintain sound management. Another responsibility of the Board of Directors is to exercise highly effective oversight of executive officers from an independent and objective standpoint. Accordingly, the Board of Directors endeavors to appropriately evaluate company performance and reflect these evaluations in its assessment of executive officers.

■ Composition of the Board of Directors

The Board of Directors is comprised of directors with various backgrounds and diverse expertise and experience.

As of June 29, 2021, the Board of Directors was comprised of 15 directors. Ten of the 15 directors did not have business execution responsibilities at the Company or its subsidiaries, with seven of these 10 directors being outside directors. The chairman of Sumitomo Mitsui Financial Group, who does not have business execution responsibilities, served as the chairman of the Board of Directors. This membership ensures an objective stance toward supervising the exercise of duties by executive officers and directors.

Outside directors serve as chairmen and members of the Company’s legally mandated and voluntarily established committees when necessary, outside directors will request reports on compliance, risk management, or other matters from the relevant divisions in order to promote appropriate coordination and supervision.

List of the Expertise of Outside Directors (Skills Matrix)

	Appointed	Expected knowledge and experience in particular				
		Corporate management	Finance	Global	Law	Financial accounting
Masayuki Matsumoto	2017	👤				
Arthur M. Mitchell	2015	👤	💰	🌐	⚖️

Masaharu Kohno	2015			🌐		
Yoshinobu Tsutsui	2017	👤	💰			
Katsuyoshi Shinbo	2017				⚖️	
Eriko Sakurai	2015	👤		🌐		

Note: The items listed in “Expected knowledge and experience in particular” are areas particularly expected of the relevant directors and do not represent all of the knowledge and experience possessed by the directors.

Internal Committees

■ Nomination Committee

The Nomination Committee is responsible for preparing proposals regarding the appointment and dismissal of directors to be submitted to the general meeting of shareholders. This committee also deliberates on matters regarding personnel decisions pertaining to officers of the Company and major subsidiaries and the selection of successors to the president of the Company, outside directors, and president of SMBC. The Nomination Committee comprises one internal director and five outside directors. In order to ensure transparency in deliberations on officer personnel decisions, an outside director has been appointed to serve as the chairman of this committee.

■ Compensation Committee

The Compensation Committee is responsible for deciding policies for determining the compensation of directors and executive officers of the Company as well as compensation amounts of individual directors and executive officers of the Company based on those policies. In addition, this committee deliberates on the policies for determining the compensation of the executive officers of major subsidiaries and the compensation amounts of individual executive officers of the Company. The Compensation Committee is comprised of two internal directors and four outside directors. In order to ensure transparency in deliberations on officer compensation, an outside director has been appointed to serve as the chairman of this committee.

■ Audit Committee

The Audit Committee is responsible for the auditing of the execution of duties by the executive officers and directors of the Company, preparation of audit reports, and determination of the content of proposals for election, dismissal, or non-reelection of the accounting auditor to be submitted to the general meeting of shareholders. Committee members are appointed by this committee to perform audits of the operations and assets of the Company and its subsidiaries. The Audit Committee is comprised of two internal directors and three outside directors. An outside director has been appointed to serve as the chairman of this committee in order to guarantee the objectivity of audits and independence from business execution. In principle, at least one member of this committee is to possess specialized expertise in finance.

■ Risk Committee

The Risk Committee is responsible for deliberation on matters relating to environmental and risk awareness, the operation of the Risk Appetite Framework, and the implementation of risk management systems as well as other important matters pertaining to risk management and reporting to the Board of Directors on these matters. The Risk Committee is comprised of one internal director, two outside directors, and two outside experts.

Corporate Governance

Sustainability Committee

The Sustainability Committee was established to deliberate with and advise the Board of Directors on the progress of sustainability initiatives, domestic and overseas sustainability trends, and other matters related to sustainability. This committee is comprised of two internal directors, two outside directors, and two internal and external experts. In addition, the chairman of the Sustainability Committee is an outside director.

Support Systems for Outside Directors

The Company recognizes that outside directors require an in-depth understanding of the Group’s business operations and business activities. Accordingly, we endeavor to continually supply outside directors with the information and insight on business activities that are necessary to supervise management while also providing the opportunities needed to fulfill their roles.

Initiatives to support directors in FY2020 included those indicated to the right.

- Participation in meetings of general managers of core Group companies and other executive team meetings, tours of bases of Group companies, and discussions with presidents of Group companies for facilitating a greater understanding of business operations and business activities
- Informal exchanges of opinion with internal officers by area of responsibility
- Explanatory forums on Board of Directors’ meeting agenda items prior to Board meetings to assist in understanding of items
- Study sessions for outside directors led by external lecturers on topics such as U.S.–China conflict and cybersecurity
- Distribution of PCs to outside directors for use in timely and effective provision of information such as details on the proceedings of internal meetings

Outside Director and Corporate Auditor Independence Standards

In order for an outside director or outside corporate auditor (“Outside Director or Corporate Auditor”) of the Company to be classified as independent, they must not fall under, or have recently fallen under, any of the following categories:

1 Major Business Partner	<ul style="list-style-type: none"><li>• An entity that has the Company or SMBC as a major business partner or an executive director, officer, or other person engaged in the execution of business of such an entity.</li><li>• An entity that is a major business partner of the Company or SMBC or an executive director, officer, or other person engaged in the execution of business of such an entity.</li></ul>
2 Specialist	<ul style="list-style-type: none"><li>• A legal expert, accounting expert, or consultant who has received money or other property from the Company or SMBC averaging more than JPY 10 million per year over the last three years, in addition to any compensation received as a director or corporate auditor.</li><li>• A member of a Juridical Person, etc. or other organization that provides specialist services, such as a law firm, accounting firm, or consulting firm, which has received large amounts of money or other property from the Company or SMBC.</li></ul>
3 Donations	A person who has received—or an executive director, officer, or other person engaged in the execution of business of an entity which has received—on average over the last three years, donations or other payments from the Company or SMBC in excess of the greater of JPY 10 million per year and 2% of the recipient’s annual revenue.
4 Major Shareholder	A major shareholder of the Company or an executive director, officer, or other person engaged in the execution of business of a major shareholder (including anyone who has been a major shareholder, or an executive director, officer, or other person engaged in the execution of business of a major shareholder, within the last three years).
5 Close Relative	A close relative of any person (excluding non-material personnel) who falls under any of the following: (1) A person who falls under any of 1 through 4 above; or (2) A director, corporate auditor, executive officer, or other person engaged in the execution of business of the Company or a subsidiary thereof.

 Please see Reference 6 of the “SMFG Corporate Governance Guideline” for more information.  
[https://www.smfg.co.jp/english/aboutus/pdf/cg\\_guideline\\_e.pdf](https://www.smfg.co.jp/english/aboutus/pdf/cg_guideline_e.pdf)

Evaluation of the Board of Directors’ Effectiveness

The “SMFG Corporate Governance Guideline” contains provisions on evaluating the effectiveness of the Board of Directors. In accordance with these provisions, annual analyses and evaluations are conducted by the Board of Directors to determine whether or not it is executing its duties in line with the guideline, and the results of these analyses and evaluations are disclosed.

In FY2020, the evaluation focused on the three areas described below, which are areas for which provisions exist in Japan’s Corporate Governance Code and the “SMFG Corporate Governance Guideline.” All seven outside directors were asked for their opinions regarding these areas at meetings of the Board of Directors held in April and May 2021, and interviews of internal directors were conducted thereafter. The primary subject of interviews with internal directors was their expectations of outside directors. Discussions based on the findings took place at Board of Directors’ meetings in June, after which analyses and evaluations were carried out to determine whether or not the Board of Directors was executing its duties in line with the “SMFG Corporate Governance Guideline.” Moreover, reviews by external specialists with expertise from developed nations are received at each stage of the evaluation process.

Overview of Results of Evaluation of the Board of Directors’ Effectiveness

1. Role of the Board of Directors

- Steps are taken to invigorate discussions based on the highly specialized expertise of the outside directors. These discussions were geared toward medium- to long-term improvements in corporate value based on the interests of various stakeholders while incorporating important matters related to business strategies to contribute to the fulfillment of “Our Mission.” In FY2020, the Board of Directors took part in discussions that carefully incorporated the input of outside directors on inorganic growth strategies and on important themes defined out of consideration for operating environment changes to be seen during and after the COVID-19 pandemic.
- Based on the executive-side discussions of the Management Committee, matters related to business plans and other basic management policies as well as the status of business execution were presented and reported on several occasions. As a result, effective deliberations on these matters were able to take place and oversight functions were exercised properly.
- It is important for the Board of Directors to fulfill its role based on mutual understanding among inside and outside directors facilitated through discussions about sustainability and other matters prioritized by society and investors.

2. Proceedings of the Board of Directors and Support Systems for Outside Directors

- The number and content of agenda items as well as the amount of time dedicated to discussion of agenda items were more or less at the appropriate level. Amid the COVID-19 pandemic, web conference tools were utilized, among other measures, for facilitating the continuation of brisk discussions.

- The Board of Directors continues to make flexible management decisions amid the changing operating environment. Members of the Board of Directors are provided with the information necessary for exercising their oversight function in a timely and appropriate manner.
- The Company continued to provide systems for effectively supporting the Board of Directors in making management decisions through venues such as study sessions for outside directors and forums for discussions between outside directors and internal directors, executive officers, and the accounting auditor. Steps were taken to contribute to livelier discussions at meetings of the Board of Directors, including the arrangement of small discussion forums for fostering mutual understanding between outside directors and internal officers.
- It is desirable for the Company to resume the arrangement of meetings comprised of only outside directors, which were canceled in FY2020 in light of the COVID-19 pandemic, to better utilize the insight of outside directors and contribute to more frank discussions.

3. Composition of the Board of Directors

- As of March 31, 2021, the Board of Directors consisted of 15 directors, seven of whom were outside directors. Accordingly, outside directors represented over 40% of all directors. It was once again acknowledged that the outside directors represented a diverse range of expertise, genders, and nationalities and that the Board of Directors features an atmosphere conducive to outside directors voicing opinions regarding management.

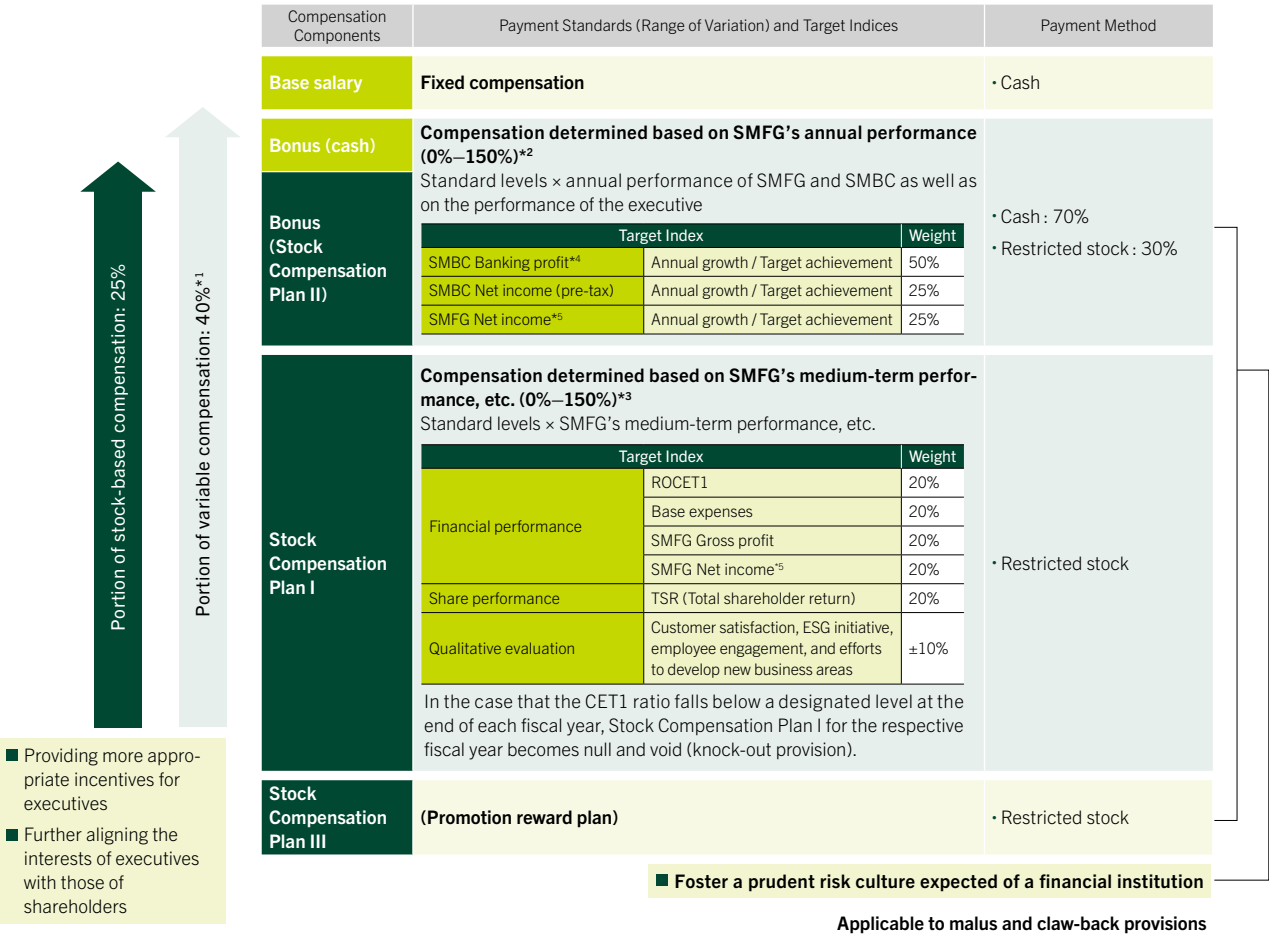

Compensation Program

To facilitate the fulfillment of Our Mission and the realization of Our Vision, SMBC Group’s medium- to long-term vision, we developed a compensation program for Directors, Corporate Executive Officers and Executive Officers (the “Executives”) and introduced Stock Compensation Plans as a part of Executives compensation programs, for the purpose of:

- 1
- 2
- Providing appropriately functioning incentives for Executives, strengthening linkage with our short-, medium-, and long-term performance, and
- Further aligning the interests of Executives with those of shareholders, by increasing the weight of stock compensation and enhancing the shareholding of our Executives.

Executives Compensation System

Cash compensation Stock compensation Variable compensation

\*1 Variable compensation capped at a maximum of 100% of total base salary  
\*2 Compensation amounts for each fiscal year determined by the Compensation Committee  
\*3 Compensation amounts determined by the Compensation Committee at the conclusion of the Medium-Term Management Plan  
\*4 Adding collaboration incentives between each company in the Group and Sumitomo Mitsui Banking Corporation to the banking profit of Sumitomo Mitsui Banking Corporation  
\*5 The Company's consolidated profit attributable to owners of parent

The Company’s executive compensation program is comprised of three components: base salary, cash bonuses, and stock compensation. Annual performance-linked compensation is determined using profit attributable to owners of parent, the indicator of management’s end performance. Medium-term performance-linked compensation is calculated based on the target indices of ROCET1 and base expenses as well as qualitative evaluations predicated on customer satisfaction and ESG initiatives, in order to hold executives accountable and provide incentive for improving medium- to long-term performance and shareholder value and contributing to the realization of a sustainable society.

Compensation programs and levels are determined by the Compensation Committee, which is comprised of a majority of outside directors, based on third-party surveys of manager compensation, economic and social trends, and the operating environment.

We have also introduced provisions for malus (forfeiture) of restricted stock and the claw-back of vested stock allocated to the Executives under the Stock Compensation Plans. These provisions may be applied based on the judgment of the Compensation Committee regardless of the amount of time that has passed since share allocation in order to restrain excessive risk-taking and foster a prudent risk culture expected of a financial institution.

Executive Management Systems

Management Committee

The Management Committee is set up under the Board of Directors to serve as the top decision-making body. The Management Committee is chaired by the President of Sumitomo Mitsui Financial Group with other members including executive officers and other officers designated by the President. The President of Sumitomo Mitsui Financial Group considers important matters relating to the execution of business in accordance with the basic policies set by the Board of Directors and based on discussions held by the committee members.

Group-Wide Business Units and CxO System

The Company employs group-wide business units and the CxO system. The group-wide business unit structure entailed the creation of the Retail Business Unit, the Wholesale Business Unit, the Global Business Unit, and the Global Markets Business Unit. The goal of this structure is to heighten our ability to address the various needs of customers on a group-wide basis by enabling the business units to formulate and implement business strategies based on their respective customer segments. The CxO system entails the appointment of 10 Group chief officers in charge of specific areas in addition to the Group CEO (President of Sumitomo Mitsui Financial Group). This system is meant to improve Group management capabilities centered on the holding company. The heads of business units as well as the chief officer positions will, in principle, be filled by executive officers of the Company, with the one exception being the Group CSuO. Individuals appointed to these positions are expected to exercise their duties as the person responsible for overseeing their business unit or head office division and report on the execution of their duties to the Board of Directors.

Corporate Governance

SMBC Group  
Global Advisors

SMBC Group Global Advisors (“Global Advisors”) act in an advisory capacity to the SMBC Group Management Committee by attending SMBC Group Global Advisory Meetings, which we hold on a regular basis.

SMBC Group has appointed Global Advisors to provide advice to it on global business and on political and economic issues in the Americas, EMEA, and Asia. At SMBC Group Global Advisory Meetings, advisors inform the Management Committee of trends and developments in the financial sector and the political and economic environments of respective regions. Global Advisors also provide regular insight with respect to political and economic issues related to the formulation of strategies and key risks faced by SMBC Group.

SMBC Group  
Technology Advisors

The SMBC Group Technology Advisory Committee meets regularly to facilitate the enhancement of the Company’s IT-related initiatives. This committee is an advisory body in which chief technology officer-class information system representatives from domestic and overseas companies participate. Meetings of this committee are held regularly to discuss predetermined themes for the purpose of gathering suggestions and advice regarding the outlook for IT-related trends and directives for SMBC Group. In 2020, committee meetings were conducted using remote meeting tools in light of the COVID-19 pandemic. With experts from various companies and numerous internal officers from the Management Committee in attendance, opinions were shared on themes such as cybersecurity and artificial intelligence.

# INITIATIVES TO REALIZE SUSTAINABILITY

## Our Approach

To realize a sustainable society, we are pursuing our business activities and initiatives focusing on “Environment,” “Community” and “Next Generation,” based on the “SMBC Group Statement on Sustainability” as our basic principle.

SMBC Group seeks to maximize its positive impact on all stakeholders while enacting its value creation process to realize the society we aim to achieve.

## PAST

Predecessor of Mitsui

Uki-e Suruga-cho gofukuya zu (Mitsui Bunko Collection)

Predecessor of Sumitomo

Left: Besshi Copper Mine in 1881 (Sumitomo Historical Archives Collection)  
Right: Current Besshi Copper Mine (Sumitomo Forestry Co., Ltd. Collection)

## PRESENT

### Priority Issues (Materiality)

#### Environment

An irreplaceable asset shared between generations, and the foundation of the society we aim to achieve

#### Community

A social safety net that fills the gap between the public sector and the private sector, based on “trust” and “mutual assistance” created by connections among people

#### Next Generation

Intelligent people who create a better society and pass it on to future generations

## SMBC Group GREEN×GLOBE 2030

1. Sustainability initiatives that are directed toward our customers/society
2. Internal initiatives that contribute to sustainability management
3. Enhance engagement with investors

Please refer to page 087 for information on progress with regard to KPIs.

## Society We Aim to Achieve

- Preservation of a healthy environment
- Creation of a society in which everyone can live with peace of mind
- Fostering of people and industries that will shape the future

## Definition of Sustainability

Creating a society in which today's generation can enjoy economic prosperity and well-being, and pass it on to future generations

## SMBC Group Statement on Sustainability

*Throughout its 400-year history, SMBC Group has continuously upheld its commitment to sustainability. We hereby declare that we will drive forward our efforts to make sustainability a reality.*

SMBC Group’s Sustainability Management System

In April 2021, SMBC Group established the new position of Group CSuO. Under its guidance, the Corporate Sustainability Department plans and formulates group-wide sustainability measures, while the Sustainability Business Promotion Department functions as a hub for providing solutions on a global, group-wide basis.

The Corporate Sustainability Committee, which is chaired by the Group CEO, discusses matters pertaining to the spread of sustainability management throughout the Group as well as measures necessary for promoting sustainability. Moreover, we newly established the Sustainability Committee as an internal committee of the Board of Directors in July 2021. The Group CSuO and the Group CRO will periodically report to the Sustainability Committee and the Risk Committee. We are continuously enhancing our corporate governance and management frameworks.

Furthermore, SMBC Group has incorporated quantitative indicators related to environmental, social, and governance (ESG) initiatives into executive compensation schemes to accelerate sustainability management.

Message

from

Group CSuO

Preserving rich nature, eradicating poverty, and eliminating discrimination and prejudice—these are all goals that companies around the world are expected to work toward in their pursuit of sustainability. Instead, companies have generally prioritized short-term financial gains, resulting in the world we currently call home being plagued by various environmental and social issues:

climate change and growing economic disparity, to name a few.

Meanwhile, SMBC Group has defined three materiality issues for practicing sustainability management: the “Environment,” “Community,” and “Next Generation.” In particular, we emphasize the “Environment” as an irreplaceable asset shared between generations and the foundation of social sustainability. However, SMBC Group cannot protect the environment and realize a sustainable society on its own. We are therefore striving to fulfill our social mission as a globally active financial institution by engaging and acting with our customers and various other stakeholders in a joint effort to build a sustainable society and to hand it down to the next generation.

As the Group CSuO, I am committed to accelerating SMBC Group’s sustainability initiatives from various angles going forward.

Fumihiko Ito

Group CSuO

SMBC Group GREEN×GLOBE 2030

In April 2020, SMBC Group established “SMBC Group GREEN×GLOBE 2030,” a ten-year plan that extends to 2030, based on the “SMBC Group Statement on Sustainability.”

“GREEN” represents SMBC Group’s corporate color and the environment, while “GLOBE” represents the Earth and a borderless world. The two terms are connected by an “×” to show the plan’s potential being measured in terms of multiplication rather than mere addition.

Moreover, in our aim to enhance our efforts addressing climate change, we upwardly revised our green finance and greenhouse gas (GHG) emissions reduction targets in May 2021.

Basic Concept	
“Create the future of the Earth and humanity with our customers”	
10-Year KPIs	FY2020 Results
<div>Upward revision</div> <div>Amount of green finance and finance that contributes to realizing sustainability between FY2020 to FY2029</div> <div>¥30 trillion (of which ¥20 trillion is green finance)</div>	<div>¥2.7 trillion in Japan and overseas (green finance)</div>
<div>Participants in the financial educational program between FY2020 to FY2029</div> <div>1.5 million</div>	<div>132 thousand participants</div>
<div>Measure social impact</div> <div>of social contribution activities</div>	<div>Measured the social impact of PROMISE Financial and Economic Educational Seminars and disclosed the results</div>
<div>Measure awareness and engagement levels</div> <div>concerning ESG/SDGs among front office personnel and customers</div>	<div>Number of front office personnel stating that they have taken ESG- and SDGs-related actions toward customers</div> <div>+10%</div>
<div>Upward revision</div> <div>Achieve net zero greenhouse gas emissions</div> <div>in SMBC Group’s group-wide operations by 2030</div>	<div>Greenhouse gas emissions (preliminary figure)</div> <div>Approx. 129 thousand t-CO<sub>2</sub> (7.5% reduction from FY2019)</div>

# Environment

## Environmental Initiatives

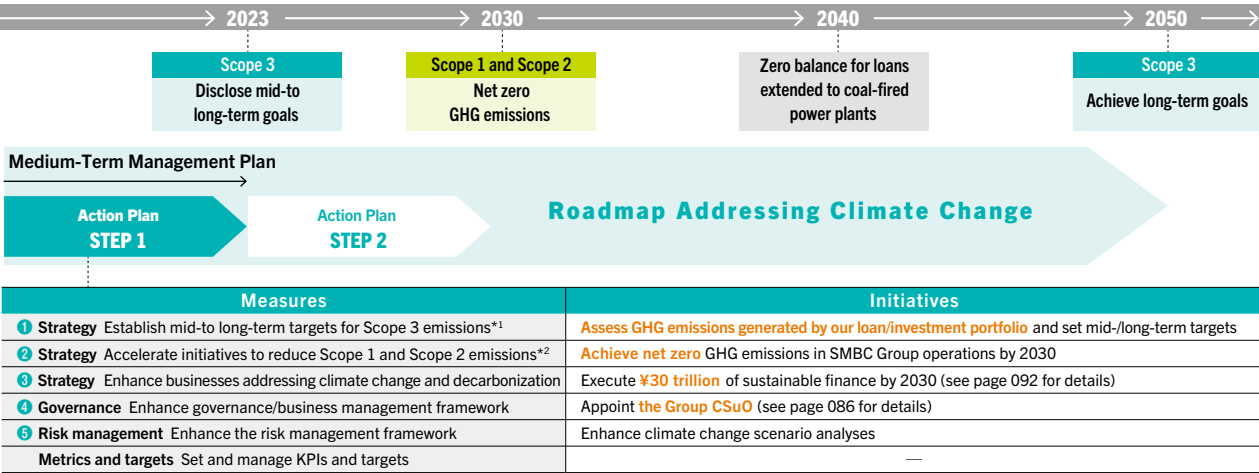

The global environment is an important asset that is shared by all of humanity, regardless of region or age, and a healthy environment is prerequisite to the realization of a sustainable society. SMBC Group is earnestly engaging with climate change and various other environmental issues. By helping resolve such issues through our business, we aim to ensure that we can pass on a healthy environment to future generations.

### Efforts Addressing Climate Change

In order to reinforce our efforts addressing climate change, SMBC Group clarified its position on the issue and revealed its “Roadmap Addressing Climate Change” and “Action Plan STEP 1” in May 2021. The Roadmap Addressing Climate Change is a long-term action plan to contribute to a carbon-neutral society by 2050. Action Plan STEP 1 is a package of initiatives to be undertaken and executed during the current Medium-Term Management Plan. Major components of this action plan include the measurement of GHG emissions of SMBC Group’s loan/investment portfolio and the establishment of medium- to long-term targets to reduce such emissions toward 2030 and 2050. In addition, we have redefined our prior green finance target to finance contributing to sustainability while raising the target amount to ¥30 trillion in total.

SMBC Group endorses the government’s policy and strives to achieve greenhouse gas emissions reductions in line with the goals of the Paris Agreement. Moreover, we will support the activities of our clients contributing to the transition toward and realization of a decarbonized society.

For more information on the Roadmap Addressing Climate Change, please refer to Sumitomo Mitsui Financial Group’s corporate website. [https://www.smfg.co.jp/news\\_e/e110168\\_01.html](https://www.smfg.co.jp/news_e/e110168_01.html)

\*1 Emissions from other corporations associated with a company’s business activities (emissions from corporations receiving loans/investments in the case of a financial institution)  
\*2 Direct emissions from a company and indirect emissions associated with electricity consumption, etc.

### Major Initiatives of Action Plan STEP 1

#### Measurement of GHGs Generated by Loan/Investment Portfolio and Establishment of Medium- to Long-Term Targets

To guide its long-term efforts addressing climate change leading up to 2050, SMBC Group will assess GHG emissions from its loan/investment portfolio (Scope 3) and set medium- to long-term targets. We will also need to enhance our engagement with customers in order to contribute to the realization of a decarbonized society together. We will first focus on business sectors with high GHG emissions (oil and gas, power), and then move on to other business sectors.

#### Acceleration of Initiatives to Reduce Group-Wide GHG Emissions

SMBC Group was pursuing a target to reduce SMBC’s CO<sub>2</sub> emissions volumes by 30% from FY2018 levels by FY2029. However, we revised this target to further accelerate our initiatives. The new target is to achieve net zero GHG (Scope 1 and Scope 2) emissions in our group-wide operations by 2030. This goal will mainly be pursued by accelerating measures such as sourcing electricity from renewable energy.

#### Reinforcement of the Risk Management Framework

Since FY2019, SMBC Group has been performing climate change scenario analyses based on the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). In the past, we analyzed the financial impacts of transitional risks in the energy and electricity sectors based on scenarios presuming global warming of 2°C and 4°C above pre-industrial levels. Going forward, we will perform estimates and analyses based on a wider scope (including transportation and other sectors) and on the scenario presuming global warming of 1.5°C above pre-industrial levels.

In addition, we plan to develop monitoring systems for brownfield and greenfield assets while examining how best to classify and subdivide these assets based on domestic and overseas trends and at the requests of various authorities.

Target: SMBC Group’s GHG emissions

Net 0 (by 2030)

# Environment

## Response to Climate Change Based on the TCFD Recommendations

SMBC Group announced its support for the TCFD recommendations in December 2017, and is performing climate change scenario analyses based thereon. In addition, we are working together with customers to address the issues caused by climate change in order to realize a decarbonized society. Going forward, we will enhance the disclosure of information through our TCFD reports (next report scheduled to be published in September 2021).

For more information on initiatives regarding the recommendations of the TCFD, please refer to Sumitomo Mitsui Financial Group's corporate website.  
<https://www.smfg.co.jp/english/sustainability/materiality/environment/climate/>

### Governance

Policies for promoting sustainability management and combating climate change are reflected in business strategies based on discussions by the Corporate Sustainability Committee, which is chaired by the Group CEO, and by the Management Committee. Regular reports regarding the implementation of these policies are made to the Board of Directors, while the Risk Committee, established within the Board of Directors, reports on climate change-related risks. In addition, in FY2021, we newly appointed a Group CSuO and established the Sustainability Committee, which oversees and provides advice regarding group-wide sustainability initiatives. We will continue to enhance our corporate governance and management frameworks going forward.

### Strategy

SMBC Group has defined three materiality issues regarding its efforts to contribute to the resolution of social issues—“Environment,” “Community,” and “Next Generation.” We are providing finance that contributes to the goals of the Paris Agreement while also analyzing climate change risks to improve our climate change resilience.

### Climate-Related Risks

SMBC Group identifies the financial impacts of climate change by anticipating changes in the external and business environment due to the emergence of climate change-related issues and by identifying risk events based on various transmission channels. In addition, we calculate a portion of our loan portfolio comprising carbon-related assets based on the TCFD recommendations.

## Exposure of Carbon-Related Assets (FY2020)

	Exposure	Balance
Energy (Oil and gas, etc.)	4.1%	¥3.5 trillion
Utilities (Electricity)	2.4%	¥2.1 trillion
Total	6.5%	¥5.6 trillion

Notes:  
1. Exposure calculated by dividing balance of outstanding loans to carbon-related assets by total balance of outstanding loans  
2. Balance of outstanding credit to carbon-related assets represents 4.4% of total assets (total assets on the balance sheet plus off-balance sheet assets) at SMBC (including consolidated subsidiaries)

## Scenario Analyses (SMBC)

We have begun to conduct scenario analyses on physical risks related to water damage and transitional risks of the energy and electricity sectors pertaining to SMBC. Going forward, we will perform estimates and analyses based on a wider scope (including transportation and other sectors) and on the scenario presuming global warming of 1.5°C above pre-industrial levels.

	Physical risks		Transitional risks	
Risk events	Water-related disasters		Changes in government policy and supply–demand balance	
Scenario used	RCP2.6 (2°C scenario)	RCP8.5 (4°C scenario)	IEA/Sustainable Development Scenario (2°C scenario)	IEA/Stated Policies Scenario
Target of analysis	Corporate customers		Energy and electricity sectors in carbon-related assets defined by the TCFD	
Region	Global			
Analysis period	Up to 2050			
Risk indicators	Credit costs that are expected to increase			
Analysis results	¥55 to ¥65 billion in total		¥2 to ¥10 billion per fiscal year	

## Climate-Related Opportunities

The transition toward a decarbonized society is expected to stimulate growth in the needs of climate change-related businesses as well as financing needs pertaining to these businesses. SMBC Group has set up a dedicated organization (Sustainable Business Promotion Department) to address customers' sustainability-related issues and is reinforcing its global function on this front. Moreover, we conducted a total of ¥2.7 trillion of green finance in FY2020, and we continue to support the transition to a decarbonized society through the provision of our solutions.

## Risk Management

SMBC Group has positioned climate change among its Top Risks and is conducting stress test impact analyses with regard to this risk. Moreover, policies have been set for financing certain businesses and sectors, and we are expanding the scope of environmental and social risk analyses.

Please refer to page 100 for information on risk management initiatives.

## Metrics and Targets

Metrics	Targets	FY2020
Finance that contributes to realizing sustainability	Total of ¥30 trillion from FY2020 to FY2029 (of which ¥20 trillion is green finance)	¥2.7 trillion in green finance
GHG emissions from SMBC Group's operations*1	Net zero emissions by FY2030	129 thousand t-CO <sub>2</sub> in greenhouse gas emissions
Coal-fired power generation loans*2	50% of the FY2020 level by FY2030; zero balance by FY2040	Outstanding balance of ¥300 billion

\*1 Scope 1 and Scope 2  
\*2 Project finance loans (excludes projects contributing to the transition to a decarbonized society)

# Environment

## Promotion of Sustainable Businesses

SMBC Group is committed to the resolution of environmental and social issues through its business. We are increasing green financing initiatives, which focus particularly on environmental fields. Our prior goal of conducting green finance amounting to ¥10 trillion by FY2030 has been replaced by a more ambitious target of conducting a total of ¥30 trillion of green finance and finance that contributes to the realization of sustainability (of which ¥20 trillion is green finance).

SMBC Group is ramping up support for customers contributing to the realization of a decarbonized society in various areas, including the 14 core fields in the Green Growth Strategy defined by the Japanese government in conjunction with its goal of achieving carbon neutrality by 2050. Specifically, all Group companies are providing support that capitalizes on the characteristics of their business—SMBC through financing and deposits, SMBC Nikko Securities through underwriting of ESG bonds, SMBC Trust Bank through contracting related to equipment and sites, Sumitomo Mitsui Finance and Leasing through equipment leasing and The Japan Research Institute, through consulting.

In addition, we are engaged in initiatives pertaining to the social implementation of hydrogen systems, which are anticipated to play a central role in realizing a decarbonized society, as well as to the creation of cutting-edge businesses in the field of agriculture. We are also emphasizing engagement with customers in providing solutions as a comprehensive financial group to support the resolution of customers’ sustainability issues.

## ESG-Minded Financing

SMBC Group has disclosed policies for businesses and sectors with a high risk of significantly impacting the environment or society. Major subsidiaries (SMBC, SMBC Trust Bank, Sumitomo Mitsui Finance and Leasing, and SMBC Nikko Securities) are introducing these policies according to their business.

Going forward, we will continue to engage with customers and various other stakeholders while constantly considering the need to revise our financing policies as necessitated by the operating environment.

Target: Coal-Fired Power Generation Loans  
50% of the FY2020 level by FY2030

Outstanding balance of  
¥0 by FY2040

### Businesses and Sectors for Which Policies Have Been Disclosed

- Coal-fired power generation • Hydroelectric generation • Oil and gas
- Coal mining • Tobacco manufacturing • Natural conservation areas
- Palm oil plantation development • Deforestation
- Manufacturing of cluster bombs and other weapons of destruction

For more information on our management of environmental risks, please refer to the Sumitomo Mitsui Financial Group’s corporate website.

<https://www.smfg.co.jp/english/sustainability/materiality/environment/risk/>

## Column

### Revision of Policy Regarding Coal-Fired Power Generation

Stricter policy for coal-fired power generation instituted in June 2021

#### Policy

Support for newly planned coal-fired power plants and the expansion of existing plants is not provided.

#### Understanding of the Business/Sector

SMBC Group expects our customers to establish and publicly announce long-term strategies aimed at realizing a carbon-neutral business model and other initiatives to address climate change. Moreover, SMBC Group will support the activities of our clients contributing to the transition toward and realization of a decarbonized society.

# Social

## Community

As people live and the economy advances, communities to form connections between proponents in these areas and thereby encourage mutual support and enable each other to act in peace of mind are needed. SMBC Group continues to contribute to communities and society and to fulfill our social responsibility as an entity that acts as a member of these communities.

### GREEN×GLOBE Partners

GREEN×GLOBE Partners is a community for facilitating cross-organizational action to address environmental and social issues that cannot be resolved by a single person or company. Based on the goal of spreading awareness and opportunities for the resolution of environmental and social issues, 163 companies and organizations\*1 have joined the community since its establishment in July 2020.

Activities of this community include monthly events, distribution of exclusive articles on environmental and social issues and workshops for formulating ideas to address such issues and drive the creation of new businesses.

\*1 As of June 30, 2021

For more information on GREEN×GLOBE Partners, please refer to the Sumitomo Mitsui Financial Group's corporate website (Japanese only). <https://ggpartners.jp/>

GREEN×GLOBE Partners event

### SMBC Elder Program

The SMBC Elder Program was established to provide financial and non-financial services that help to bring health, security, and meaning to the lives of senior citizens, and addresses diversified needs and lifestyles in Japan's rapidly aging society. This program is administered by dedicated concierges with a breadth of knowledge acquired through the gerontology certification program\*2 and other venues. These concierges field consultations from customers and help address their concerns by proposing services and offering other forms of support.

Going forward, SMBC Group will continue to enhance its range of services in response to the needs of customers and society in order to help build a society that offers peace of mind for all and support the upcoming era of 100-year lives.

\*2 Program designed to facilitate learning of the various issues faced in an aging society, including healthcare, nursing care, social security, and other matters pertaining to the mental and physical well-being of senior citizens

SMBC Elder Program Pamphlet

## Next Generation

Ensuring the sustainability of our society and economy amid the changing social environment will require the cultivation of human resources who can support society with the necessary knowledge and technologies. SMBC Group is promoting sustainability by fostering the next-generation human resources and industries that will shape the society of the future together with us.

### Financial Literacy Education

Capitalizing on the insight and expertise of Group companies, SMBC Group is providing financial literacy education.

In FY2020, we introduced online seminars as a new learning style for financial literacy educational activities in light of the COVID-19 pandemic. We offered various programs based on the requests of the applying schools, and financial literacy education was provided to approximately 132 thousand people through face-to-face lessons in FY2020, including 60 thousand people via online seminars.

By providing financial literacy education to a wide range of age groups, from children to adults, SMBC Group will help to build a society in which people can live with peace of mind by acquiring accurate knowledge pertaining to finances.

### Programs to Create and Support New Businesses

To support next-generation businesses, SMBC Group is advancing the “Mirai” program. Through this program, we solicit business plans from those aspiring to commercialize a certain new idea or technology. A wide range of opportunities is provided to individuals whose plans pass the judging process, including business development support from advisors, networking assistance, financial aid, and support for developing collaborative businesses with sponsors.

We are also developing open innovation centers to facilitate new business creation. In September 2017, we established “hoops link tokyo,” which was followed by “hoops link kobe,” opened in September 2020. Through coordination between these two centers, we are arranging a variety of events, including pitch events, meetups, and seminars for encouraging entrepreneurship.

By forging connections with various companies and investors, SMBC Group is helping customers grow and innovate while also contributing to the development of next-generation industries.

Target: Financial Literacy Educational Program Participants between FY2020 to FY2029

1.5 million

# Customer-Oriented Initiatives

## Our Approach

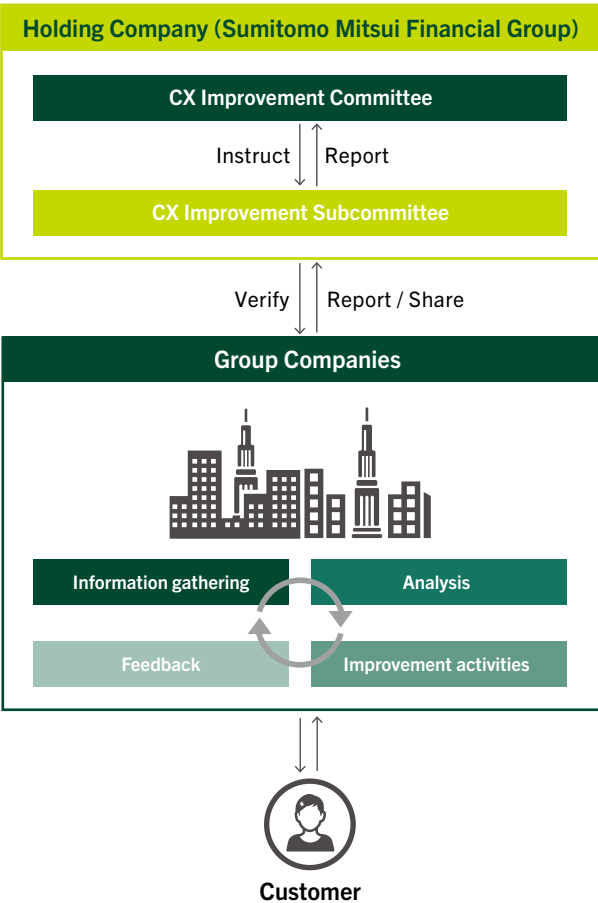

SMBC Group companies are united in their efforts for customer experience (CX) and quality improvement in line with “Our Mission,” which states “We grow and prosper together with our customers, by providing services of greater value to them.”

### CX Improvement System

We have established the CX Improvement Subcommittee as well as the CX Improvement Committee, through which we are advancing initiatives, reinforcing management systems, and promoting Group coordination related to customer-oriented business conduct.

Outside experts are invited to serve as advisors at meetings of the CX Improvement Subcommittee, where information is exchanged on how to fully entrench a customer-oriented mindset. Meanwhile, the CX Improvement Committee, which shares members with the Group Management Committee, deliberates on concrete measures based on reports from the CX Improvement Subcommittee.

### Incorporation of Customer Feedback into Management

#### Declaration of Compliance with ISO 10002

SMBC, SMBC Nikko Securities, and SMBC Consumer Finance have declared their intent to comply with the ISO 10002 (JIS Q 10002) international standard with regard to their processes for incorporating customer feedback into management.

### Customer-Oriented Business Initiative

Based on the Principles for Customer-Oriented Business Conduct (a guideline on fiduciary duties) released by the Financial Services Agency, SMBC Group\* formulated its Basic Policy for Customer-Oriented Business Conduct and the Basic Policy for Customer-Oriented Business Conduct in the Retail Business Unit.

#### Basic Policy for Customer-Oriented Business Conduct (Excerpt)

##### ■ SMBC Group's Customer-Oriented Business Conduct

As one part of “Our Mission,” it is stated that “We grow and prosper together with our customers, by providing services of greater value to them.” Based on the spirit of this mission, we have defined our Five Values, a list of five key words that includes “Customer First” (always think based on a customer-oriented perspective and provide value based on the individual needs of customers), shared by all the executives and employees of SMBC Group.

##### ■ Initiatives for Promoting Customer-Oriented Business Conduct

SMBC Group will implement the following initiatives to entrench the principles of customer-oriented business conduct into its activities.

1. Provision of Products and Services Suited to the Customer
2. Easy-to-Understand Explanation of Important Information
3. Clarification of Fees
4. Management of Conflicts of Interest
5. Frameworks for Properly Motivating Employees

SMBC Group aims to facilitate the shift from savings to asset holding seen in Japan through such initiatives. Furthermore, we will periodically disclose information on initiatives by SMBC Group based on this policy with the aim of facilitating understanding regarding these initiatives among customers. In addition, the status of initiatives and their results will be verified so that initiatives can be revised as necessary to improve upon operating practices. Information regarding these verifications and revisions will be disclosed.

\* Group companies applicable under this policy: Sumitomo Mitsui Banking Corporation; SMBC Trust Bank Ltd.; SMBC Nikko Securities Inc.; Sumitomo Mitsui DS Asset Management Company, Limited

For information on the Basic Policy for Customer-Oriented Business Conduct, please see pages 143-144.

### Basic Policy for Customer-Oriented Business Conduct in the Retail Business Unit

Based on the Sumitomo Mitsui Financial Group's Basic Policy for Customer-Oriented Business Conduct, the Retail Business Unit shall adhere to the following conduct policies in offering service as a retail company that is responsible for providing wealth management and asset building services for individual customers. In accordance with these policies, the Retail Business Unit shall implement a plan–do–check–act (PDCA) cycle that entails disclosing specific indicators, confirming and analyzing its status in relation to these indicators, and utilizing this information in the future to improve business practices.

#### ■ Conduct Policies

##### 1. Customer-Oriented Wealth Management Proposals Based on Medium- to Long-Term Diversified Investment

With a focus on accurately addressing customers' wealth management needs related to protecting or building assets, we will provide customer-oriented wealth management proposals based on medium- to long-term diversified investment. Through this approach, we strive to deliver customer-oriented financial products.

##### 2. Lineup of Customer-Oriented Products

We shall constantly revise our product lineup, utilizing third-party evaluations of the products of Group companies and other products as necessary, in order to enhance our lineup so that we can accurately address customers' needs related to protecting or building assets. At the same time, we will increase the amount of information provided to customers and take steps to ensure that this information is easy to understand.

##### 3. Customer-Oriented After-Sales Services

We will provide fine-tuned after-sales services to help customers continue to hold our wealth management products with peace of mind over the long term.

##### 4. Customer-Oriented Performance Evaluation Systems

We shall develop performance evaluation systems that encourage employees to engage in effective customer-oriented sales activities.

##### 5. Improvement of Consulting Capabilities

We shall continuously improve our consulting capabilities to ensure we are always capable of proposing the best possible solution for customers' wide-ranging needs.

- 15

Costs and returns of investment trusts with top-ranking balance amounts
- 16

Risks and returns of investment trusts with top-ranking balance amounts
- 17

Acquisition status of FP qualifications

■ Performance with Regard to Disclosed Indicators

Increase in Balance of Investment Assets (Indicator 1)

In FY2020, the total balance of investment assets for SMBC, SMBC Nikko Securities, and SMBC Trust Bank continued to grow due in part to the continuation of customer-oriented initiatives focused on medium- to long-term diversified investment.

Note: Figures represent the combined total for the Retail Banking Unit of SMBC and the Retail (Private) of SMBC Nikko Securities.

Number of customers using wealth management products (Indicator 3)

We continue to increase the number of customers using wealth management products by working to accurately address customers' needs related to protecting or building assets.

Number of investment trust and automatic foreign currency deposit accounts (Indicator 8)

To respond to the needs of customers seeking to begin acquiring assets, we have been aggressively proposing investment trust products that allow for small-sum investments as well as time-dispersed investments in automatic foreign currency deposits. As a result, steady growth has been achieved in the number of investment trust and automatic foreign currency deposit accounts.

Internal Audit

Our Approach

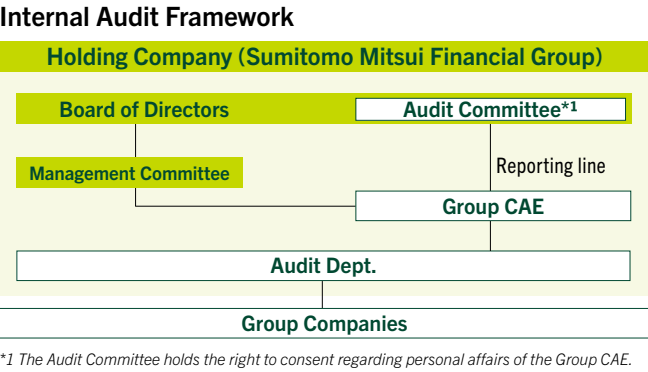

As a part of SMBC Group's internal control framework, the audit department (the Department) verifies the effectiveness of the internal control of each business unit, risk management and compliance departments, and other departments from an independent standpoint and pursues the quality of internal audits in order to contribute to development and the highest trust across the entire SMBC Group.

Overview of the Group's Internal Audit Framework

The Department has been established under the Audit Committee and is independent from each business unit, risk management and compliance departments, and other departments. Internal audits within our Group companies are structured broadly in line with SMFG. The Group CAE oversees group-wide internal audit activities.

The Department verifies the appropriateness and the effectiveness of internal control which aims to assure the appropriateness of Group operations and the soundness of assets by conducting internal audits on each department and Group entity as well as conducting on continuous monitoring of Group companies' internal auditing and other activities. The activities are based on the "Group Internal Audit Charter" and the "Basic Audit Policy and Plan" formulated by the Audit Committee and the Board of Directors.

Major audit findings and relevant information are regularly reported to the Audit Committee, the Board of Directors, and the Group Management Committee. Whilst the Department strives to strengthen cooperation to conduct proper audit practices through frequent information exchange with external auditors. As teleworking spreads amid the COVID-19 pandemic, audit activities are performed via online conferences and other means to ensure the effectiveness in audits.

\*1 The Audit Committee holds the right to consent regarding personal affairs of the Group CAE.

Enhancement and Effectiveness of Internal Audit

The Department has adopted auditing methods in accordance with the Institute of Internal Auditors (IIA) standards,\*2 conducts risk-based audits, and expands the same approach to Group companies. To implement effective and efficient internal audits, the Department conducts monitoring by attending important meetings and by obtaining internal management documents of SMFG and Group companies.

In addition, the Department seeks to enhance group-wide internal auditors' expertise by gathering up-to-date internal audit practices, providing the practices to Group companies, holding training programs, and encouraging auditors to obtain internal auditors' international certification. Furthermore, the Department enhances its quality assurance on a group-wide basis by both fully satisfying the IIA standards and referring to G-SIFIs practices.

\*2 The Institute of Internal Auditors, Inc. (IIA), was founded in 1941 in the United States as an organization dedicated to raise the level of specialization and the status of professionalism of internal auditing staff. Its main activity is to study the theory and practice of internal audit and to provide an internationally recognized qualification (Certified Internal Auditor (CIA)).

# Risk Management

## Our Approach

Strengthening of compliance and risk management is positioned as a key issue in SMBC Group’s Principles of Action on Compliance and Risk. SMBC Group is therefore devoted to improving its systems in these areas in order to become a truly outstanding global group.

### Risk Culture

In order for SMBC Group to realize and maintain a sustainable growth in corporate value as a “Top Tier Global Financial Group,” each one of our colleagues should think and judge on their own if their actions meet the expectations and requirements of customers, markets, and other stakeholders, not just if they are compliant with laws and regulations. SMBC Group has established “Principles of Action on Compliance and Risk” in order for every colleague to hold onto as a “keystone” of their daily business. The principles include “Business based on the Risk Appetite Framework” and “We will conduct business operations with risk ownership of the risks, such as credit risk, market risk, liquidity risk, operational risk, and conduct risk, that arise in our own business.” Concrete measures include internal surveys for monitoring the compliance awareness and risk sensitivity of our colleagues as well as internal training for fostering a sound risk culture.

### Risk Appetite Framework

SMBC Group has introduced a Risk Appetite Framework for controlling group-wide risks that clarifies the types and levels of risk that we are willing to take on or are prepared to tolerate in order to grow profits (risk appetite).

The Risk Appetite Framework is one of two pivots of our business management alongside business strategies. It functions as a management framework for sharing information on the operating environment and risks facing SMBC Group among management and for facilitating appropriate risk taking based thereon.

### Risk Appetite Framework Positioning

### Risk Appetite Composition

Categories			
Soundness	Profitability	Liquidity	Credit
Market	Operational	Conduct <sup>*1</sup>	
		Established for each category	
Risk Appetite Statement		Risk Appetite Measures	
A qualitative explanation of our approach to risk taking and risk management for various risk categories		Quantitative Risk Appetite Measures that function as benchmarks for risks that we are considering taking and for risk/return	

<sup>\*1</sup> Conduct risk is the risk that our conduct negatively affects customers, market integrity, effective competition, public interest, and SMBC Group’s stakeholders, through acts that violate laws and regulations or social norms.

Individual risk appetites have been established by strategies for each business unit as necessary based on the overall risk appetite of SMBC Group. Risk appetites are decided during the process of formulating business strategies and management policies. These risk appetites are set based on Top Risks that threaten to significantly impact management and on risk analyses (stress testing) that illustrate the impact if a risk should materialize.

In addition, risk register and Key Risk Events (KRE) are utilized as part of a system for assessing the risks present in new and existing business activities and for verifying the adequacy of Top Risks, risk appetites, and business strategies.

The outlooks for the operating environment and risks and the risk appetite situation are monitored throughout the course of the fiscal year. Risk Appetite Measures and business strategies are revised as necessary. For example, overall risk capital<sup>\*2</sup> has been selected as an indicator for risk appetite, which displays the soundness of SMBC Group. Overall risk capital is the aggregate of the risk capital amounts for each risk category. Management standards have been set for the upper limit for overall risk capital based on group-wide management constitution. Overall risk capital levels are thus monitored throughout the course of each fiscal year to clearly indicate risk-taking capacity and promote the sound taking of risks.

In addition, specific risk appetite indicators have been set for credit risk, market risk, liquidity risk, and other risk categories to facilitate appropriate management based on a quantitative understanding of risk appetite.

<sup>\*2</sup> The amount of capital required to cover the theoretical maximum potential loss arising from risks of business operations.

### Top Risks

SMBC Group identifies risks that threaten to significantly impact management as Top Risks. The selection of Top Risks involves comprehensive screening of risk factors, evaluation of each risk scenario’s possibility of occurrence and potential impact on management, and discussion by the Risk Management Committee and the Management Committee. Top Risks are utilized to enhance risk management by being incorporated into discussions of the Risk Appetite Framework and the formulation of business strategies and into the creation of risk scenarios for stress testing.

Top Risks	Volatile financial and economic environment
	Intensified political, ideological and religious conflicts
	Decline in Japan’s social vitality
	Disasters such as large-scale earthquakes, and storms and floods
	Pandemics
	Increasing external threats (cyber attacks, financial crimes, etc.)
	Increased awareness regarding environmental issues (climate change, etc.)
	More emphasis on solving social issues (human rights issues, etc.)
	Growing needs for more sophisticated governance system
	Materialization of risks impeding implementation of strategies (lack of human resources, etc.)

Note: The above is only a portion of the risks recognized by SMBC Group. It is possible that the materialization of risks other than those listed above could have a significant impact on our management.

Please see page 127 for Top Risks.

### Stress Testing

At SMBC Group, we use stress testing to analyze and comprehend the impact on SMBC Group’s businesses of changes in economic or market conditions, in order to plan and execute forward-looking business strategies.

In our stress testing, we prepare multiple risk scenarios including macroeconomic variables such as GDP, stock prices, interest rates, and foreign exchange rates based on the aforementioned Top Risks, discussions with experts and related departments.

When developing business strategies, we set out scenarios assuming stressed business environments such as

Risk Management

serious economic recessions and market disruption for the sake of assessing risk-taking capabilities at SMBC Group and verifying whether adequate soundness can be maintained under stress.

During a fiscal year, we will undertake stress testing on a flexible basis to assess the potential impact on our business and to take the appropriate response in case a serious risk event occurs. For example, stress tests have been conducted with regard to the intensifying struggle for supremacy between the U.S. and China, and the prolonged impacts of the COVID-19 pandemic, to verify the soundness of SMBC Group’s capital and confirm the appropriate actions to be taken.

In addition, we conduct detailed stress testing for individual risks such as credit risk, market risk, and liquidity risk, so as to decide and review risk-taking strategies.

We are also in line with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). As part of our efforts in this regard, we have included climate-related risk\* in our Top Risks, and scenario analyses on physical and transition risks have been conducted to estimate the potential credit-related expenses.

*\* Natural disasters resulting from extreme weather (physical risks) and carbon-related stranded assets due to the transition to a carbon-neutral society (transition risks) and so forth.*

 Please see page 088 for information on our approach to climate change.

Risk Register

A risk register is formulated by each business unit for the purpose of realizing more sophisticated risk governance and enhancing business units’ risk ownership. In formulating these registers, business units communicate with risk management departments to identify the risks present in their business, and

these risks are reflected in business strategies after they have been evaluated and the adequacy of measures for controlling them has been verified.

Key Risk Events

Key Risk Events (KRE), external events that indicate the increased threat of risks, have been identified to ascertain the symptoms of the potential risks. KRE are utilized to analyze and assess how likely similar cases will occur in SMBC Group and what effects such similar cases will have on SMBC Group, and to enhance our risk management system.

Risk Management Systems

Based on the recognition of the importance of risk management, top management is actively involved in the risk management process, and systems are in place for verifying the effectiveness and appropriateness of this process. Specifically, the group-wide basic policies for risk management are determined by the Management Committee before being authorized by the Board of Directors, and regular reports are issued to the Board of Directors by the Group CRO with regard to the status of risk management based on these policies.

Three lines of defense have been defined, and we have clarified related roles and responsibilities of relevant divisions. With these provisions in place, risk management systems have been established based on the characteristics of particular businesses, and measures are being put in place to strengthen and improve the effectiveness of these systems in accordance with these basic policies for risk management.

Furthermore, SMBC Group is strengthening group-wide risk management systems through the Group CRO Committee and the Global CRO Committee.

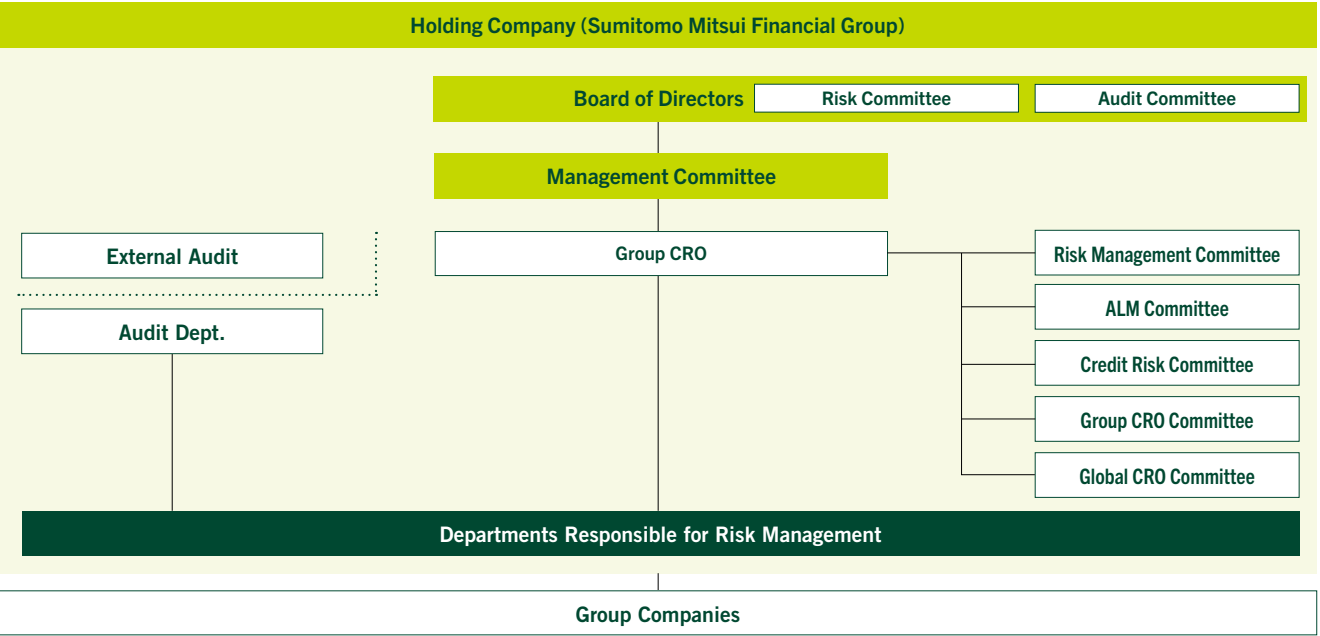

Column

Response to the COVID-19 Pandemic

The rapid changes seen around the world in FY2020 in the circumstances surrounding the COVID-19 pandemic made for a consistently opaque global economic outlook. In response to this uncertainty, SMBC Group strove to respond to customer funding demands to the greatest extent possible while using stress tests and up-to-date information to quantitatively assess the adequacy of capital and liquidity whenever deemed necessary.

Furthermore, we reinforced information security and practiced exhaustive information management to combat the cyber attack and financial crime risks arising in response to changes in lifestyles and workstyles. These verification processes and risk countermeasures will continue to be implemented based on discussion by the Management Committee and the Risk Committee going forward.

SMBC Group’s Risk Management System

Definition of SMBC Group’s Three Lines of Defense

The Basel Committee on Banking Supervision’s “Corporate governance principles for banks” recommends “three lines of defense” as a framework for risk management and governance. Based on this framework, we have clarified

the roles and responsibilities of each unit as indicated below and we are taking steps to achieve more effective and stronger risk management and compliance systems.

Principal Organizations		Roles and Responsibilities
First Line	Business Units	<p>The Business Units shall be risk owners concerning their operations and shall be responsible for the following in accordance with the basic principles provided by Second Line.</p> <ul style="list-style-type: none"><li>• Identification and evaluation of risks encountered in the business activities</li><li>• Implementation of measures for minimizing and controlling risks</li><li>• Monitoring of risks and reporting within First Line and to Second Line</li><li>• Creation and fostering of a sound risk culture</li></ul>
Second Line	Risk Management and Compliance Departments	<p>The Risk Management and Compliance Departments shall assume the following functions and responsibilities in order to manage the risk management and compliance systems.</p> <ul style="list-style-type: none"><li>• Drafting and development of basic principles and frameworks concerning risk management and compliance</li><li>• Oversight, monitoring, and development of training programs for First Line</li></ul>
Third Line	Audit Department	<p>Independent from First Line and Second Line, the Audit Department shall assess and verify the effectiveness and appropriateness of risk management and compliance systems managed and operated by First Line and Second Line, and report these results to the Audit Committee and the Management Committee. The Department shall provide recommendations regarding identified issues / problems.</p>

# Compliance

## Our Approach

Management positions the strengthening of compliance and risk management as a key issue in enabling SMBC Group to fulfill its public mission and social responsibilities as a global financial group. We are therefore working to entrench such practices into our operations as we aim to become a truly outstanding global group.

## Compliance Management

SMBC Group seeks to maintain a compliance system that provides appropriate instructions, guidance, and monitoring for compliance to ensure sound and proper business operations on a group-wide and global basis. Measures have been put in place to prevent misconduct and quickly detect inappropriate activities that have occurred to implement corrective measures.

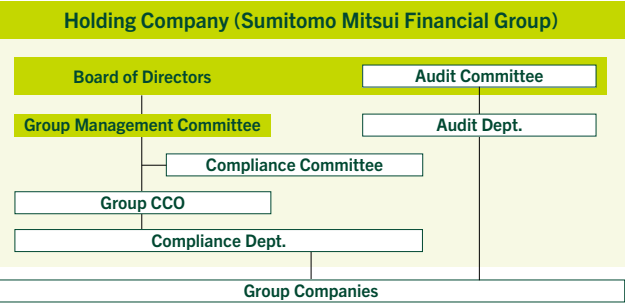

SMBC Group has established the Compliance Committee, which is chaired by the Group CCO responsible for overseeing matters related to compliance. This committee comprehensively examines and discusses SMBC Group’s various work processes from the perspective of compliance.

In addition, SMBC Group formulated the Group Compliance Program to provide a concrete action plan for practicing compliance from the perspective of group-based management. Group companies develop their own compliance programs based on the Group program and take necessary steps to effectively install compliance frameworks.

The Company receives consultations and reports on compliance-related matters from Group companies, providing suggestions and guidance as necessary to ensure compliance throughout the Group.

From the perspective of global-based management, compliance departments for major overseas offices have been reorganized within the Compliance Unit, which facilitated to develop an integrated group-based compliance management framework for overseas offices.

## Compliance Systems at SMBC Group

## Initiatives for Supporting Healthy Risk Taking and Appropriate Risk Management

In order for companies to coexist with society and develop sustainable growth, it is crucial to take an appropriate amount of risks and to maintain appropriate risk management, including compliance. In particular, financial institutions should emphasize compliance and risk management, considering its public mission and the heaviness of the social responsibility.

Based on this recognition, management positions the strengthening of compliance and risk management as a key issue in enabling SMBC Group to fulfill its public mission and social responsibilities. SMBC Group is therefore devoted to improving its systems in these areas in order to become a truly outstanding global group.

Specifically, SMBC Group has defined the Principles of Action on Compliance and Risk to serve as guidelines for executives and employees in practicing compliance and risk management. Continuous reviews are carried out to improve compliance with these guidelines and to ensure their effectiveness.

## Anti-Money Laundering (AML) and Countering the Financing of Terrorism (CFT)

SMBC Group recognizes the importance of preventing money laundering and terrorist financing (ML/TF), and therefore, undertakes every effort to prevent ourselves and employees, from engaging in, and/or assistance to, the commission of ML/TF.

SMBC Group strictly complies with AML/CFT regulations by establishing a Group policy and implementing effective internal control systems in each of the Group companies to ensure that our operations are sound and appropriate. The Group Policy and systems are implemented in accordance with the requirements of the relevant international organizations (e.g., the United Nations and the Financial Action Task Force Recommendations) and the laws/regulations of relevant countries including Japan in which the Group has operations (e.g., U.S. “Office of Foreign Assets Control Regulations”).

In April 2019, SMBC entered into a written agreement with the Federal Reserve Bank of New York (the “Reserve Bank”) to improve its New York Branch’s program for compliance with the Bank Secrecy Act (“BSA”) and related U.S. anti-money laundering (“AML”) laws and regulations, which was found to be inadequate by the Reserve Bank.

Furthermore, SMBC is working to improve compliance on

a global basis while taking other necessary actions based on the written agreement with the Reserve Bank.

## Response to Anti-Social Forces

SMBC Group has established a basic policy stipulating that all Group companies must unite in establishing and maintaining a system that ensures that the Group does not have any connection with anti-social forces or related individuals.

Specifically, the Group strives to ensure that no business transactions are made with anti-social forces or individuals. Contractual documents or terms and conditions state the exclusion of anti-social forces from any business relationship. In the event that it is discovered subsequent to the commencement of a deal or trading relationship that the opposite party belongs to or is affiliated with an antisocial force, we undertake appropriate remedial action by contacting outside professionals specializing in such matters.

### Basic Policy for Anti-Social Forces

1. Completely sever any connections or relations from antisocial forces.
2. Repudiate any unjustifiable claims, and do not engage in any “backroom” deals. Further, promptly take legal action as necessary.
3. Appropriately respond as an organization to any anti-social forces by cooperating with outside professionals.

## Customer Information Management

SMBC Group has established Group policies that set forth guidelines for the entire Group regarding proper protection and use of customer information. All Group companies adhere to these policies in developing frameworks for managing customer information.

Group companies establish and disclose privacy policies for their measures regarding the proper protection and use of customer information and customer numbers. Appropriate frameworks are established based on these policies.

## Anti-Bribery and Corruption

The SMFG Group Policies for Anti-Bribery Compliance and Ethics have been established to prevent business entertainment and the provision or receipt of anything of value that violate laws, regulations or social practices and customs. Group companies have developed frameworks to prevent bribery and corruption based on these policies.

# Human Resources Strategy

## Our Approach

One overarching social trend is the change in relationship between companies and employees and there are more alterations and diversifications in employees' attitudes toward work.

SMBC Group has approximately 100,000 employees around the world. We aim to improve both employee motivation and corporate productivity in order to effectively implement the Group's management strategies. We envisage to be a bank with the best talent pool by fostering talent capable of continuous growth and encouraging employees to tackle ambitious challenges.

## Human Resource Medium-Term Management Plan

To establish a robust platform to realize SMBC Group's medium- to long-term vision, we have established the Human Resource Medium-Term Management Plan, with the following three pillars.

- (1) **Resource Management**  
Strategic Allotment of Human Resources across Group Companies and Divisions
- (2) **Seamless Platform**  
Realization of True Diversity and Inclusion
- (3) **Employee Engagement**  
Measures to Enable All Employees to Fully Exercise Their Potential

**(1) Resource Management**

SMBC Group promotes business transformation and the streamlining of its business processes through business model reforms, branch reorganizations, and group-wide integration of operations. At the same time, we will be more proactive in reallocating human resources on a group-wide basis to strategic fields and areas as designated in the seven key strategies of the new Medium-Term Management Plan.

As a result, we aim to enable natural attrition of the domestic workforce by 7,000 people over the new Medium-Term Management Plan period, an increase from the reduction of 3,300 people achieved in the previous Medium-Term Management Plan.

**(2) Seamless Platform**

Strategic utilization of human resources on an inter-Group company basis, cross-divisional manner requires the elimination of obstacles that may impede the ability of diverse employees to excel in their positions. By establishing the necessary systems and frameworks and reforming the mindsets of employees and other parties through education, SMBC Group will realize true diversity and inclusion.

**① Construction of Platforms for Supporting Business Strategies**

SMBC Group is moving forward with the construction of platforms to support the flexible and effective reinforcement

and streamlining of businesses.

In the Retail Business Unit, we have established the Wealth Management Division and the Payments & Consumer Finance Division. In conjunction with this move, human resource systems and recruitment strategies are being revised with a focus on cross-entity fluidity of human resources.

Meanwhile, we are developing human resources with specialized skills in the Wholesale Business Unit and providing career paths for these individuals in order to heighten our ability to accommodate customer needs.

**② Flexible Group-Wide Recruitment Strategies**

SMBC Group is enhancing Intra-Group coordination in new graduates recruitment through holding joint recruitment events and reconsidering recruitment strategies on a group-wide basis. In the recruitment of mid-career hires, we have raised the number of such hires to account for approximately 20% of all hires with the aim of greatly increasing related recruitment numbers. In order to acquire diverse talent including candidates for management positions, we are employing a multi-channel approach such as recruitment through referrals and alumni networks. At the same time, we are developing workplace environments to encourage active contributions of mid-career hires.

**③ Diversification of Management and Human Resources**

**• Global Diversity**

Seeking to utilize human resources on a global basis, SMBC Group has compiled a database for integrated management of information on overseas employees and established the Global Talent Management Council as a framework for increasing the transparency of promotions of overseas employees to senior management positions.

In addition, we offer various development programs for fostering leadership capabilities in a multi-cultural environment, including a leadership program for management-level employees delivered in partnership with The Wharton School of the University of Pennsylvania in the United States and group training programs for employees from offices around the globe. We also conduct the Global Japan Program, under which employees from overseas offices are assigned to departments in Japan for up to one year. Approximately 1,700 employees have participated in these programs to date.

**• Gender Diversity**

SMBC Group has set targets for the ratio of female managers and the number of female executive officers. We are devoting efforts to fostering female management candidates and creating a pool of female managers by increasing the hiring of women, specifically aiming to have women account for 30% of all hires, and enhancing educational programs through leadership training and programs for reforming the gender awareness of supervisors. To ensure appointments and promotions are determined based on individuals' skills and competencies, unconscious bias training has been made compulsory for management and members of the Human Resources Department.

Furthermore, SMBC Group joined 30% Club Japan, an organization striving to increase female representation in corporate decision-making, in April 2021 as part of its efforts to empower female employees and diversify decision makers.

Meanwhile, in support of the LGBT community and other sexual minorities, the Company has expanded its employee welfare and benefit to include same-sex partners and set up helpdesks to support members of sexual minorities. We are also offering employee education and supporting the development of networks of sexual minority allies through aid and donations for external events.

**• Age Diversity**

Following the extension of the retirement age at SMBC Group, we have been taking steps to provide elderly employees with positions that let them exercise their skills at Group companies and implementing group-wide efforts to support the contributions of these employees. For example, recurrent training and post-appointment support is provided, with a focus on both skills and mindsets, for individuals being reassigned across company lines, and a second career support system has been put in place.

Human Resources Strategy

4 Energization of Diverse Employees

• Health and Productivity Management

Group companies have formulated a “Statement on Health Management” and are developing environments in which all employees can remain healthy and feel empowered through joint efforts by companies, health insurance unions, and health support staff under the leadership of the Chief Health Officer.

For example, we offer health seminars and exercise awareness campaigns and are also bolstering systems and providing training regarding the unique health issues faced by women. In addition, we provide financial assistance for employees looking to take part in programs for quitting smoking, and approximately 80% of the participants in our FY2020 quit smoking campaign successfully gave up smoking.

Mental healthcare measures include training programs based on group analyses and stress checks for all employees, mental health helpdesks, and support for returning to work. We also monitor working hours and implement systems to ensure sufficient intervals between shifts to prevent excessive or concentrated working hours.

• Work-Life Balance Support

As employees’ values diversify, SMBC Group is fostering workplace environments designed to help all employees deliver their maximum performance, regardless of life

stage or physical or mental characteristics. For example, we are expanding leave systems, providing training, and encouraging male employees to take childcare leave. In addition, we have set up a helpdesk to answer questions regarding nursing care.

Moreover, we strive to ensure that all employees feel motivated and ambitious in their work. To this end, we have adopted systems that allow for flexibility in working hours and work locations, such as flextime, staggered working hours, and telework systems. We also seek to improve productivity through heightened operational efficiency by promoting paperless operations and utilizing robotic process automation tools.

(3) Employee Engagement

1. Talent Development Strategy: Environment Self-Driven Career Development

SMBC Group fosters a sense of solidarity between employees through group-wide training sessions and cross-Group job rotations while also cultivating human resources who are able to view the Group from an overarching perspective as well as candidates for future Group management positions.

As a result of these efforts, SMBC has received an innovation award in the Good Career Company Award program of the Ministry of Health, Labour and Welfare. This award was presented in recognition of SMBC’s robust lineup of career support systems as well as its business-oriented models for self-driven career development.

Looking ahead, we intend to bolster our range of career development support systems to offer programs for learning about digital technologies along with other reeducation and awareness reform programs to ensure that we can respond quickly to operating environment changes and accordingly swiftly implement management strategies.

• SMBC’s Human Resource Development Policies

In its Medium-Term Management Plan, SMBC puts forth its Human Resources Vision. Guided by this vision, we are transitioning from Human Resources Department-driven development models to more business-oriented, self-driven development models to better support the ambitions of all employees. Also, we are increasing the transparency of human resource evaluations to cultivate an atmosphere in which employees are evaluated based on their contributions.

• Acceleration of Experiential Learning Cycle Based on On-the-Job Training

For junior employees, SMBC Group provides frameworks through which new employees receive guidance from more experienced employees (“anchor” system) and is introducing development systems for fostering rigorous self-understanding, gaining insight on basic actions and basic knowledge, and cultivating an appropriately competitive mindset.

In addition, the wevox engagement survey system is utilized on an individual-workplace basis and one-on-one feedback meetings are held at all banks as part of our efforts to accelerate an experimental learning cycle based on on-the-job training.

At the same time, we have developed an off-the-job support system for managers and mid-level employees that includes multifaceted evaluations and formal management training.

• Self-Disciplined Career Support

The annual SMBC Job Forum, an opportunity to learn about divisions and work at other SMBC Group companies, and the twice-annual voluntary application programs for training, jobs, and posts are provided as frameworks for self-driven career development. The FY2020 voluntary application program saw a 50% year-on-year increase in the number of applicants, to 429, and a 35.4% increase in the number of applications selected, which reached 152. This turnout shows that the number of employees seeking to shape their own careers is rising.

For employees seeking to develop their careers in a manner that exceeds the normal frameworks of position and rank, we have prepared a trial position and rank reassignment program that allows these employees to experience the actual work and workplace environment of their desired position. To date, nearly 100 employees have taken advantage of this program. To address the needs of employees with ambitions to pursue

self-driven learning, SMBC Group provides a system that allows employees to take leave to attend graduate schools through dispatches to domestic and overseas graduate schools and other external educational institutions (used by 60 individuals to date) as well as a system that offers financial support for paying tuition fees for employees taking part in educational programs while continuing to work normally.

In addition to these career support systems, SMBC has introduced an expert/specialist framework that allows highly specialized employees with more than five years of experience in their field of expertise to receive career assurance and compensation based on their skill level. This system was introduced in response to the need for robust experience and sophisticated technical skills given job task diversification as well as a rise in the number of employees seeking to advance in specialized fields (used by 375 employees in 30 certified fields to date).

2. Corporate Culture

A sense of psychological safety that encourages employees to tackle challenges on a self-driven basis is imperative to improving employee engagement. For this reason, we have a free dress code, enabling employees to wear what they please to work, and encourage employees to refer to each other without titles. In addition, we have introduced an internal social networking service as a digital tool for strengthening connections between people and organizations.

Furthermore, the wevox engagement survey system is being introduced on a group-wide and global basis to develop a corporate culture that facilitates self-driven improvements by organizations. In the March 2021 survey of Group employees, 73% of our employees expressed that they felt pride in working for SMBC Group.

Column

Midoriba: Internal Social Networking Service

An internal social networking service known as Midori no Hiroba (meaning green plaza), or Midoriba for short, was introduced at SMBC in October 2020 (application at Group companies planned). This system is designed to encourage mutual communication between management-, organization-to-employee and employee-to-employee that is not limited by organizational boundaries and to promote employee innovation. Specifically, employees are able to learn about colleagues and other business fields, connect with likeminded colleagues, and share ideas and opinions with each other through this system. Thus, the system will support the establishment of a proper mindset for

career development and encouraging the employee-initiated establishment of internal communities. We aim to develop a framework in which employees can create new business opportunities or transform existing businesses by freely sharing ideas and receiving mentoring or sponsorship from specialized departments or management. This system is already used by more than 20,000 employees, with thousands of interactions, including knowledge sharing and idea consultations, taking place each month.

# IT Strategy

## Our Approach

Currently, the operating environment for IT businesses is trending toward hybrid solutions, whether it comes to the maturing domestic market or growing overseas markets, the expansion of opportunities to utilize digital technologies, the reinforcement of security measures, the need for digital innovation and digital transformations, the importance of existing IT fields that now represent a majority of sales, or system ownership and use. In this environment, we will advance IT strategies with a focus on supporting both management and operations while also practicing effective corporate governance.

## IT Investment Strategies

Under the new Medium-Term Management Plan, the budget for IT investments was increased to ¥500 billion, a rise from the ¥440 billion budget under the previous Medium-Term Management Plan, with the aim of fueling future growth for SMBC Group. By effectively controlling investments in existing IT areas via efficient management, we will secure a significantly larger budget for strategic investments. Specifically, we have secured a CEO budget of ¥100 billion to be used for flexible investments in areas in which the Group CEO expects growth in the future. With this budget, SMBC Group will promote digitalization, reinforce management foundations, and implement business strategies.

## Increased IT Investments for Future Growth

## Digitalization

Efforts to transform business models and create new value are being accelerated through the Digital Solution Division, which was established to accommodate digital transformations, as well as the Digital Strategy Department

## Accreditation

Presenting Organizations	Certification / Award	Reason for Selection

	IT Encouragement Award	System integration and digital transformation at SMFL Capital (formerly GE Capital) through Sumitomo Mitsui Finance and Leasing

\* Code detailing the measures to be undertaken by management to improve corporate value amid the digital transformation trend

and the Corporate Digital Solution Department set up within the Digital Solution Division. SMBC Group has received high evaluations from external entities with regard to its efforts to create new services, including non-financial services, leading the Company to receive numerous awards.

## Reformation and Reconstruction of Core Infrastructure Supporting Future Businesses

SMBC Group is developing core infrastructure with an eye toward the next decade based on the three perspectives of flexibility, sustainability, and efficiency with the aim of adapting to the medium- to long-term changes in the business environment and in customer needs. Based on this policy, accounting systems are being reformed to create the framework for our efforts.

Please refer to page 057 for information on the next-generation core banking system.

## Development of Human Resources for Supporting Sustainable Growth in a Digital Society

Accelerating digitalization at SMBC Group and contributing to customers and society require all employees, not just those in divisions dedicated to IT, to possess a digital-oriented mindset and basic IT knowledge. At SMBC Group, the Digital University has been established within core IT Group company The Japan Research Institute, as an internal training institution for promoting IT adoption and digitalization. The Digital University provides training for all employees on digital IT literacy and on IT adoption measures applicable to actual work.

We are also devoted to fostering human resources with specialized skills. For this purpose, we offer a unique menu of training programs including training based on the operations of specific Group companies, curricula employing the expertise gained from project case studies, and cutting-edge technology workshops.

## Cybersecurity

In recent years, cyber attacks have been rapidly becoming ever-more serious and sophisticated. In order to respond to the risks of such attacks, SMBC Group has strengthened cybersecurity measures by defining cyber risks as one of its Top Risks and establishing a Declaration of Cyber Security Management.

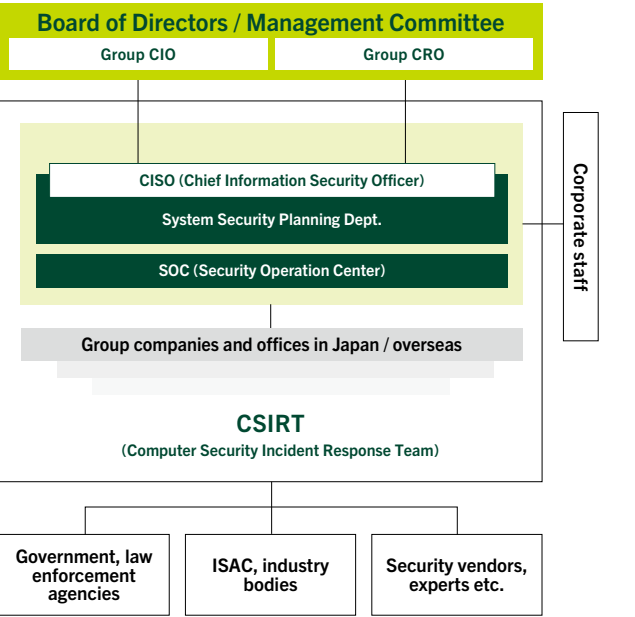

Seeking to facilitate management-led measures for fortifying response frameworks, the general manager of the System Security Planning Department has been appointed as the Chief Information Security Officer (CISO) and positioned

under the Group CIO and the Group Chief Risk Officer (CRO), and steps have been taken to clarify the roles and responsibilities of the CISO. Furthermore, we have established a computer security incident response team (CSIRT) and a security operation center (SOC), and analyses are performed on information regarding threats and observed cases collected from inside and outside of the Group. The results of these analyses, along with information on the status of security measures currently being implemented, are discussed regularly at meetings of the Board of Directors and the Management Committee to drive ongoing improvements to our cybersecurity measures.

The CSIRT is centered on the System Security Planning Department, which possesses dedicated cybersecurity functions. To ensure preparedness for cyber incidents, the CSIRT coordinates with national government agencies as well as with external institutions to share information on pertinent topics such as cyber attack methods and vulnerabilities.

The SOC, which is centered on The Japan Research Institute, is dedicated to continuously fortifying cybersecurity monitoring systems to mitigate the ever-rising threat of cyber attacks. Measures taken by the SOC include the integration of the monitoring systems of Group companies and the development of global systems for conducting monitoring on a 24-hours-a-day, 365-days-a-year basis.

## SMBC Group's Cybersecurity Governance System

# Communication with Stakeholders

## Our Approach

SMBC Group strives to contribute to the sustainable development of society. To this end, we work diligently to provide greater value to our various stakeholders: “Customers,” “Shareholders and the market,” “Employees” and “The environment and society.”

## Stakeholders of SMBC Group

Stakeholder Type	Example Communication Activities
Customers	In-branch questionnaires, Customer satisfaction surveys, Call centers
Shareholders and the market	General meeting of shareholders, Investors meetings, One on one meetings
Employees	Opinion exchange meetings with top management, Employee surveys
The environment and society	Support for initiatives in Japan and overseas, Volunteer activities of employees

## Engagement with the Environment and Society

In addition to the contribution to society through our business operations, SMBC Group will contribute to realize a flourishing society in the future by pursuing diverse social contribution activities in order to fulfill responsibilities as a “good corporate citizen.”

For example, our employees have taken part in local clean-up activities nationwide. In addition, employees support NPOs through pro bono activities to contribute to the resolution of social issues.

## Engagement with Shareholders and the Market

SMBC Group recognizes that appropriate disclosure of corporate and management information must form the foundation of our efforts to realize one of the statements posted in “Our Mission”: “We aim to maximize our shareholders’ value through the continuous growth of our business.” For this reason, we are taking steps to facilitate accurate understanding of our management strategies and financial position through investor meetings after announcements of financial results, conferences, one-on-one meetings, large meetings for individual investors, and other activities. These efforts have been highly evaluated, resulting in the Company winning the 2019 and 2020 Award for Excellence in Corporate Disclosure (ranked No. 1 in the banking industry) from the Securities Analysts Association of Japan.

Investor meeting video presentation

Large meeting for individual investors

The 19th Ordinary General Meeting of Shareholders

Small meeting led by the Group CFO

## Activities in FY2020

General meeting of shareholders	Participants: 546*
IR meetings for institutional investors and analysts	11 meetings
One-on-one meetings with institutional investors and analysts	301 meetings
Conferences held by securities companies	4 conferences
Large meetings for individual investors	2 meetings

\* Including 440 viewers of simultaneous Internet broadcast

Even faced with the COVID-19 pandemic, we endeavored to prevent declines in the quality of disclosure while taking steps to ensure safety. As one effort for this purpose, we held briefings and individual meetings in non-face-to-face formats.

## Engagement with Employees

Management implements various initiatives to engage with employees and foster mutual understanding.

For example, a Group CEO luncheon was held in FY2020 in which junior employees from various Group companies participated. A lively exchange of ideas took place during the luncheon, with various new ideas being produced as junior employees talked about their dreams and goals.

Even amid the COVID-19 pandemic, we continued to facilitate direct communication between management and frontline employees through venues such as town hall meetings and award ceremonies for internal contests.

Financial Review

Consolidated Performance Summary

Consolidated gross profit increased by ¥37.6 billion year-on-year to ¥2,806.2 billion. This increase was primarily the result of the strong performance in the wealth management and overseas securities businesses as well as the success of nimble portfolio management in the Global Markets Business Unit, which outweighed a decline in profit due to the COVID-19 pandemic.

Conversely, consolidated net business profit was approximately at the same level as in FY2019, ¥1,084.0 billion due to a decrease in equity in gains of affiliates largely attributable to increased credit costs at SMBC Aviation Capital Limited and Asian investees.

Total credit cost increased by ¥189.9 billion year-on-year to ¥360.5 billion due to precautionary provisions recorded in order to prepare for possible future losses as well as higher costs incurred mainly from companies that were susceptible to the impacts of the COVID-19 pandemic.

Profit attributable to owners of parent decreased by ¥191.1 billion year-on-year to ¥512.8 billion because of impairment losses on goodwill in Sumitomo Mitsui DS Asset Management Company, Limited, and the recording of losses on forward dealings aimed at mitigating risks of stock price.

	(Billions of yen)	
	FY2020	Increase (Decrease)
Consolidated gross profit	2,806.2	+37.6
General and administrative expenses	1,747.1	+7.5
Equity in gains (losses) of affiliates	25.0	(31.1)
Consolidated net business profit	1,084.0	(1.0)
Total credit cost	360.5	+189.9

Consolidated Balance Sheet Summary

Loans and Bills Discounted (SMBC non-consolidated)

Loans and bills discounted increased by ¥1.7 trillion year-on-year to ¥81.9 trillion due to an increase in domestic loans following the smooth supply of funds in response to higher funding demand among customers amid the COVID-19 pandemic.

Balance of Loans

(Trillions of yen)

Deposits (SMBC non-consolidated)

Deposits increased by ¥14.7 trillion year-on-year to ¥134.7 trillion. This increase was mainly due to increases in both individual and corporate deposits in Japan.

Balance of Deposits

(Trillions of yen)

Domestic Loan-to-Deposit Spread (SMBC non-consolidated)

In FY2020, domestic loan-to-deposit spread decreased by 0.07 percentage point year-on-year to 0.84% following an increase in short-term loans with lower interest as a result of the COVID-19 pandemic.

Domestic Loan-to-Deposit Spread

(%)

	FY2020				FY2019	
	1Q	2Q	3Q	4Q	Yearly average	Yearly average
Interest earned on loans and bills discounted	0.84	0.82	0.84	0.84	0.84	0.91
Interest paid on deposits, etc.	0.00	0.00	0.00	0.00	0.00	0.00
Loan-to-deposit spread	0.84	0.82	0.84	0.84	0.84	0.91

Securities

Other securities increased by ¥9,762.0 billion year-on-year to ¥36,411.2 billion due to an increase in the amount of Japanese government bonds held by SMBC to use as collateral. Net unrealized gains on other securities increased by ¥1,039.5 billion year-on-year to ¥2,931.8 billion mainly because of higher stock prices.

Unrealized Gains (Losses) on Other Securities

(Billions of yen)

	Balance		Net unrealized gains (losses)	
	March 31, 2021	YoY	March 31, 2021	YoY
Stocks	3,693.3	+956.5	2,255.6	+986.1
Bonds	17,655.2	+7,587.8	8.0	(13.5)

Total	36,411.2	+9,762.0	2,931.8	+1,039.5

NPLs Based on the Financial Reconstruction Act

The balance of NPLs based on the Financial Reconstruction Act increased by ¥316.2 billion year-on-year to ¥966.5 billion due to deterioration of the credit ratings of obligors as a result of the COVID-19 pandemic, and the NPL ratio remained at a low level, despite increasing by 0.30 percentage point to 0.98%.

Balance of NPLs Based on the Financial Reconstruction Act and NPL Ratio

(Billions of yen)

(%)

Financial Review

Capital

Capital

Common equity Tier 1 capital, the most important form of core capital, increased by ¥981.5 billion year-on-year to ¥10,562.8 billion primarily due to the accumulation of earnings and an increase in net unrealized gains on other securities attributable to higher stock prices. As a result, Tier 1 capital rose by ¥949.4 billion year-on-year to ¥11,199.3 billion and total capital increased by ¥737.3 billion to ¥12,289.3 billion.

Risk-Weighted Assets

Risk-weighted assets increased by ¥4,408.9 billion year-on-year to ¥66,008.0 billion due to an increase in domestic loans attributable to the COVID-19 pandemic.

Capital Ratio

Due to the above, the common equity Tier 1 capital ratio was 16.00% and the total capital ratio was 18.61%. Both ratios exceeded the mandated level, indicating that we have maintained a sufficient level of capital.

Leverage Ratio

The leverage ratio rose 1.34 percentage points year-on-year to 5.65% because of the increase in the Tier 1 capital ratio as well as the exclusion of deposit with the Bank of Japan from the total exposure due to a partial revision to the Financial Services Agency notification regarding the leverage ratio.

External TLAC Ratio

In addition to total capital, SMBC Group seeks to increase external TLAC capital by procuring external TLAC bonds primarily from overseas corporate bond markets. The external TLAC ratio was 25.82% on a risk-weighted asset basis and 9.77% on a total exposure basis, exceeding the mandated levels on both items.

Total Capital Ratio (BIS Guidelines)

Support for Initiatives in Japan and Overseas

As a global corporate citizen of the global society, SMBC Group is fully aware of the social impact of financial institutions, and it supports the following initiatives in Japan and overseas (the action guidelines for the corporate activities and principles).

ESG Indices on Which Sumitomo Mitsui Financial Group Is Listed

SMBC Group has been included in the following major global ESG indices (as of June 30, 2021).

#### Support for the Cultivation of Next-Generation Athletes

Since the start of its sponsorship of the Olympic and Paralympic Games Tokyo 2020 in 2015, SMBC Group has continued to support the cultivation of next-generation athletes through the Olympic and Paralympic Games.

As one facet of these efforts, we used a portion of the proceeds from the Olympic Concert 2020 Premium Sound Series of concerts arranged by the Japanese Olympic Committee, which SMBC helped conduct, to make donations to seven organizations fostering future athletes in the areas where concerts were held.

The donations were used to pay for participation in competitions and training camps, equipment and supplies, and instructors as well as to purchase items for helping prevent the spread of COVID-19.

SMBC Group will continue to support the cultivation of next-generation athletes even after the Tokyo 2020 Olympic and Paralympic Games.

#### Contributions to Paralympic Sports in Preparation for the Tokyo 2020 Paralympic Games

As of July 2021, SMBC Group employed 20 para-athletes. Previous initiatives by these athletes have included taking part in sports workshops for children and joining panels in employee training sessions to promote greater recognition of Paralympic sports both inside and outside the Group and to help foster a more inclusive society.

These activities continued even after the April 2020 announcement that the Tokyo 2020 Paralympic Games would be delayed. Since this announcement, the athletes have participated in an online event arranged by Yokohama City, and we have continued to engage in various other Paralympic support activities through coordination with municipalities and other para-athletes.

SMBC Group will continue to contribute to the spread of Paralympic sports through the Tokyo 2020 Paralympic Games and through its efforts thereafter.

Sumitomo Mitsui Financial Group is the Gold Partner (Banking Category) of the Olympic and Paralympic Games Tokyo 2020.

## SMFL Sumitomo Mitsui Finance and Leasing

[www.smfl.co.jp/english/](http://www.smfl.co.jp/english/)

Sumitomo Mitsui Finance and Leasing ("SMFL") is a leading Japanese leasing company. Boasting a history spanning over half a century in the leasing business, SMFL provides high-value-added financial services that capitalize on the expertise cultivated over this history as well as the collective strength of SMBC Group.

In the Medium-Term Management Plan launched in April 2020, SMFL has defined the priority fields of transportation, green energy, real estate, and the 3Rs (reduce, reuse, and recycle). Based on these priority fields, SMFL is entering into new business fields, such as helicopter leasing; green energy generation; energy services; real estate development, rental, and asset management; and equipment and plant decommissioning subcontracting, in addition to strengthening its operations in these fields.

SMFL contributes to the sustainable development of its clients and of society by providing services that exceed the boundaries of finance and preemptively address social changes.

Ever since our foundation in 1918 as Kawashimaya Shoten, SMBC Nikko Securities Inc. has over the past 100 years been supported by many clients and we have grown together with our clients.

Since October 2009, when we joined Sumitomo Mitsui Financial Group, we have been redoubling our efforts to further improve our ability to assist our clients, both individual and corporate clients, and to enhance our capabilities as an integrated securities company.

Our vision remains to grow with our clients and be their trusted advisor. "Share the Future" is our brand slogan and, as a firm of financial professionals, we will strive to act in the best interests of our clients by leveraging our track record of managing diverse risks and delivering innovative financial services.

Since its founding in 1967, Sumitomo Mitsui Card Company, Limited, has continued to drive the development of Japan's credit card industry as a pioneer in the issuance of the Visa Card in Japan and as a comprehensive payment service provider at the forefront of the cashless payment trend.

In April 2021, the headquarters functions of Sumitomo Mitsui Card Company and SMBC Finance Service were consolidated into the SMBC Toyosu Building. This proximity is expected to lend itself to increased coordination between the two companies and to thereby enable them to provide even higher-quality services as the core of SMBC Group's cashless payment strategies.

Capitalizing on the transaction base, expertise, credibility, and other strengths it has accumulated as an industry leader, Sumitomo Mitsui Card Company aims to grow into a digital and innovation company that is chosen by clients and which supports these clients in their various activities through the integration of its credit card, installment and transaction business.

**Company Name:** Sumitomo Mitsui Card Company, Limited

## Risk Management

### Risk Management Categories

SMBC Group defines the following risk management categories and conducts management of these risks accordingly.

Group companies manage risk in accordance with the characteristics of their particular businesses. These risk categories are continuously reviewed and new ones may be added in response to changes in the operating environment.

Risk Category		Department in Charge
Credit risk	Credit risk is the possibility of a loss arising from a credit event, such as deterioration in the financial condition of a borrower, that causes an asset (including off-balance sheet transactions) to lose value or become worthless.	Credit & Investment Planning Department
Market risk	Market risk is the possibility that fluctuations in interest rates, foreign exchange rates, stock prices, or other market prices will change the market value of financial products, leading to a loss.	Corporate Risk Management Department
Liquidity risk	Liquidity risk is defined as uncertainty around the ability of the firm to meet debt obligations without incurring unacceptably large losses. Examples of such risk include the possible inability to meet current and future cash flow / collateral needs, both expected and unexpected. In such cases, the firm may be required to raise funds at less-than-favorable rates or be unable to raise sufficient funds for settlement.	Corporate Risk Management Department
Operational risk	Operational risk is the possibility of losses arising from inadequate or failed internal processes, people, and systems or from external events (see page 123 for information on risk categories and the departments in charge).	Corporate Risk Management Department
Conduct risk	Conduct risk is the risk that our conduct negatively affects customers, market integrity, effective competition, public interest, and the SMBC Group's stakeholders through acts that violate laws and regulations or social norms.	Corporate Risk Management Department Compliance Department

### Top Risks

Top Risks, risks that threaten to significantly impact management, recognized by SMBC Group are listed in the table below (see page 101 for information on methods of utilizing Top Risks).

Top Risks	
Volatile financial and economic environment	• Increasing in asset price fluctuation risk due to concerns about tapering in the United States
Intensified political, ideological and religious conflicts	• Economic and financial market disruption due to intensifying struggle for supremacy between the United States and China
Decline in Japan's social vitality	• Downward pressure on interest income as negative interest rates become even lower due to sluggish Japanese economy
Disasters such as large-scale earthquakes, and storms and floods	• Widespread damage to people or property and dislocate in Japanese economy
Pandemics	• Severe economic stagnation due to the impact of the COVID-19 pandemic
Increasing external threats (cyber attacks, financial crimes, etc.)	• Impacts on business continuity due to major system failures
Increased awareness regarding environmental issues (climate change, etc.)	• Deterioration of our company's reputation due to inadequate responses to increasing societal, regulatory and political focuses
More emphasis on solving social issues	• Deterioration of our company's reputation due to inadequate responses to human rights issues
Growing needs for more sophisticated governance system	• Administrative actions and deterioration of our' company's reputation due to misconduct
Materialization of risks impeding implementation of strategies (lack of human resources, etc.)	• Decline in competitiveness of our company due to having difficulty in securing specialized human resources

Note: The above is only a portion of the risks recognized by SMBC Group. It is possible that the materialization of risks other than those listed above could have a significant impact on our management.

Stress Testing

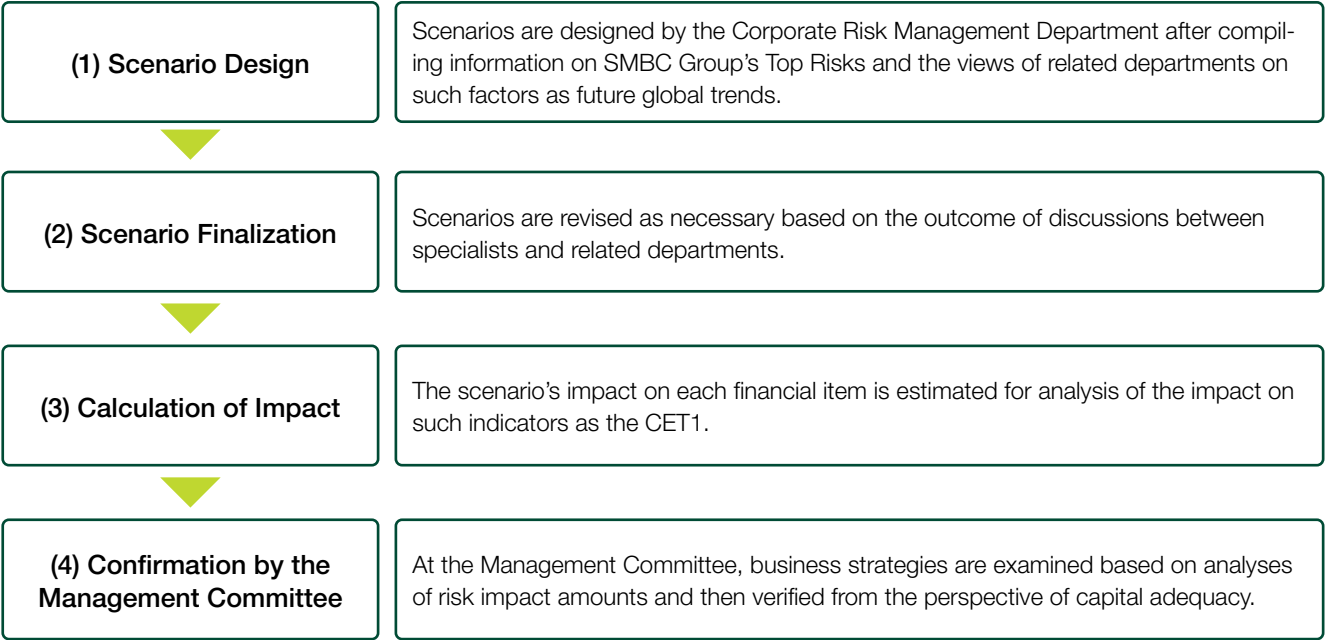

SMBC Group conducts stress testing for each category of risks as well as stress testing used to verify the overall soundness of comprehensive risk management practices. The level of soundness used for verifications is determined based on risk appetite combined with consideration for the severity of the scenario anticipated.

When evaluating group-wide soundness, evaluations are made using the consolidated balance sheets and consolidated statements of income, which include data from affiliates, with the goal of identifying major risks to our business and asset portfolio. Specifically, scenarios are selected based on the aforementioned severity level as well as background conditions that cover all areas in which we may face risks (e.g. an outlook encompassing the entire world). We also employ methodology for ensuring scenarios can be accurately reflected and for incorporating business and portfolio characteristics.

Commonly used statistical methods are utilized in developing such methodologies. However, as it is necessary to estimate outliers, we may choose the methodology that best recreates outliers rather than the methodology that offers the highest statistical accuracy. When projecting scenarios for which there are no prior examples, human judgment may be given greater weight than the results of estimates.

In this manner, stress testing processes often require a variety of expertise. When selecting the background conditions for scenarios, expertise regarding macroeconomic conditions and geopolitical risks is required. When selecting methodologies, insight into the statistical and other mathematical analysis techniques is crucial. When calculating impacts on SMBC Group as a whole, insight into SMBC Group and the businesses of its customers must be used. Stress testing processes will thus be based on discussions and opinions of directors, members of upper management, specialists, and representatives from relevant organizations and records will be created of these discussions and opinions in order to ensure objectivity, transparency, and reproducibility. In this way, measures for practicing proper governance of stress testing will be applied.

Stress Testing Process

Risk-Weighted Assets

Risk-weighted assets subject to the Basel Capital Accord totaled ¥66,008 billion as of March 31, 2021, up ¥4,409 billion from March 31, 2020. The main factors behind the increase in risk-weighted assets was an increase in our corporate credit exposure.

Risk-Weighted Assets as of March 31, 2021

	March 31, 2020	March 31, 2021	Increase (decrease)
Credit risk	55.1	58.6	+3.5
Market risk	2.5	2.6	+0.1
Operational risk	3.9	4.1	+0.1
Floor adjustments*	–	0.5	+0.5
Total	61.5	66.0	+4.4

\*Adjustments for difference between Advanced Internal Ratings-Based (AIRB) approach and Foundation Internal Ratings-Based (FIRB) approach

Risk Assets of Individual Business Units

SMBC Group	Retail Business Unit	Wholesale Business Unit	Global Business Unit	Global Markets Business Unit
Credit risk 58.6	10.6	21.8	22.9	5.7
Market risk 2.6				
Operational risk 4.1				
Floor adjustments 0.5				

Credit Risk

1. Basic Approach to Credit Risk Management

(1) Characteristics of Credit Risk

Credit risk is characterized by the possibility of a loss arising from a credit event, such as deterioration in the financial condition of a borrower, that causes an asset (including off-balance sheet transactions) to lose value or become worthless.

(2) Fundamental Principles for Credit Risk Management

All Group companies follow the fundamental principles established by SMBC Group to assess and manage credit risk on a group-wide basis and further raise the level of accuracy and comprehensiveness of group-wide credit risk management. Each Group company must comprehensively manage credit risk according to the nature of its business, and assess and manage credit risk of individual loans and credit portfolios quantitatively and using consistent standards.

Credit risk is the most significant risk to which SMBC Group is exposed. Without effective credit risk management, the impact of the corresponding losses on operations can be overwhelming.

The purposes of credit risk management is to keep credit risk exposure to a permissible level relative to capital, to maintain the soundness of group-wide assets, and to ensure returns commensurate with risk. Doing so leads to a loan portfolio that achieves high returns on capital and assets.

(3) Credit Policy

SMBC Group’s credit policy comprises clearly stated universal and basic operating concepts, policies, and standards for credit operations, in accordance with our business mission and rules of conduct. SMBC Group is promoting the understanding of and strict adherence to its Group credit policy among all its managers and employees. By fostering a culture of appropriate levels of risk-taking and providing high-value-added financial services, SMBC Group aims to enhance shareholder value and play a key contributory role in the community.

2. Credit Risk Management System

At SMBC Group, the Group CRO formulates credit risk management policies each year based on the group-wide basic policies for risk management. Meanwhile, the Credit & Investment Planning Department is responsible for the comprehensive management of credit risk. This department drafts and administers credit risk regulations, including the Group credit policies, manages non-performing loans (NPLs), and performs other aspects of credit portfolio management. We have also established the Credit Risk Committee to serve as a body for deliberating on matters related to group-wide credit portfolios.

At SMBC, the core bank of SMBC Group, the Credit & Investment Planning Department within the Risk Management Unit furnishes the credit risk management system and is thus responsible for the comprehensive management of credit risk. This department drafts and administers credit policies, the internal rating system, credit authority guidelines, and credit application guidelines, and also manages NPLs and performs other aspects of credit portfolio management.

The department also cooperates with the Corporate Risk Management Department in quantifying credit risk (risk capital and risk-weighted assets) and controls the bank’s entire credit risk. Further, the Credit Portfolio Management Department within the Credit & Investment Planning Department has been strengthening its active portfolio management function for stable credit portfolios mainly through credit derivatives and the sales of loans.

The credit department in charge, in cooperation with branches, conducts credit risk assessments and manages credit portfolios within each credit department’s jurisdiction. The credit approval authority is determined based on the credit amount and internal grades, while credit departments focus on the analysis and management of customers and transactions with relatively high credit risk. The Credit Administration Department is responsible for handling NPLs of borrowers classified as potentially bankrupt or lower, and draws up plans for their workouts, including write-offs. It works to

efficiently reduce the amount of NPLs through Group company SMBC Servicer Co., Ltd., which engages in related services, and by such means as the sell-off of claims. Through industrial and sector-specific surveys and studies of individual companies, the Corporate Research Department works to form an accurate idea of the circumstances of borrower companies and quickly identify those with potentially troubled credit positions as well as promising growth companies.

The Compliance Unit has in place a system of coordinating to establish systems for providing explanations to customers and develop information management practices for the purpose of customer protection and to prevent transactions with antisocial forces, among other tasks.

The Internal Audit Unit, operating independently of the business units, audits asset quality, the accuracy of gradings and self-assessment, and the state of credit risk management, and reports the results directly to the Audit and Supervisory Committee and the Management Committee.

SMBC has established the Credit Risk Committee as a consultative body to round out its oversight system for undertaking flexible and efficient control of credit risks, and ensuring the overall soundness of the bank’s loan operations.

3. Credit Risk Management Methods

(1) Credit Risk Assessment and Quantification

At SMBC Group, to effectively manage the risk involved in individual loans as well as the credit portfolio as a whole, we first acknowledge that every loan entails credit risks, assess the credit risk posed by each borrower and loan using an internal rating system, and quantify that risk for control purposes.

(a) Internal Rating System

There is an internal rating system for each asset control category established according to portfolio characteristics. For example, credits to corporates are assigned an “obligor grade,” which indicates the borrower’s creditworthiness, and/or “facility grade,” which indicates the collectibility of assets taking into account transaction conditions, such as guarantee/collateral, credit period, and tenor. An obligor grade is determined by first assigning a financial grade using a financial strength grading model and data obtained from the obligor’s financial statements. The financial grade is then adjusted taking into account the actual state of the obligor’s balance sheet and qualitative factors to derive the obligor grade. In the event that the borrower is domiciled overseas, internal ratings for credit are made after taking into consideration country rank, which represents an assessment of the credit quality of each country, based on its political and economic situation as well as its current account balance and external debt. The borrower categories used in self-assessment are consistent with the obligor grade categories.

Obligor grades and facility grades are reviewed once a year, and whenever necessary, such as when there are changes in the credit situation. There are also grading systems for loans to individuals and project finance and other structured finance tailored according to the risk characteristics of these types of assets.

The Credit & Investment Planning Department centrally manages the internal rating systems and properly designs, operates, supervises, and validates the grading models. It validates the grading models and systems of main assets following the procedures manual (including those for statistical validation) once a year to ensure their effectiveness and suitability and submits reports with this regard. SMBC, the core bank of SMBC Group, employs a total of 22 grading models for corporate, specialized lending, and retail applications. For details on internal rating methods, please refer to Appendix II.

(b) Quantification of Credit Risk

Credit risk quantification refers to the process of estimating the degree of credit risk of a portfolio or individual loan taking into account not just the obligor’s Probability of Default (PD) but also the concentration of risk in a specific customer or industry and the loss impact of fluctuations in the value of collateral, such as real estate and securities.

Specifically, first, the PD by grade, Loss Given Default (LGD), credit quality correlation among obligors, and other parameter values are estimated using historical data of obligors and facilities stored in a database to calculate the credit risk. Then, based on these parameters, we run a simulation of simultaneous default using the Monte Carlo method to calculate our maximum loss exposure to the estimated amount of the maximum losses that may be incurred. Based on these quantitative results, we allocate risk capital.

Risk quantification is also executed for purposes such as to determine the portfolio’s risk concentration, or to simulate economic movements (stress tests), and the results are used for making optimal decisions across the whole range of business operations, including formulating business plans and providing a standard against which individual credit applications are assessed. For details on internal rating methods, please refer to Appendix II.

(2) Framework for Managing Individual Loans

SMBC Group strives to maintain a sound portfolio through appropriate credit assessments and monitoring conducted over credit periods. The following framework is used for managing individual loans at SMBC, the core bank of SMBC Group.

(a) Credit Assessment

At SMBC, credit assessment of corporate loans involves a variety of financial analyses, including cash flow, to predict an enterprise’s capability of loan repayment and its growth prospects. These quantitative measures, when combined with qualitative analyses of industrial trends, the enterprise’s R&D capabilities, the competitiveness of its products or services, and its management caliber, result in a comprehensive credit assessment. The loan application is analyzed in terms of the intended utilization of the funds and the repayment schedule. Thus, SMBC is able to arrive at an accurate and fair credit decision based on an objective examination of all relevant factors.

Increasing the understandability to customers of loan conditions and approval standards for specific borrowing purposes and loan categories is a part of SMBC’s ongoing review of lending practices, which includes the revision of loan contract forms with the chief aim of clarifying lending conditions utilizing financial covenants.

To respond proactively and promptly to customers’ funding needs—particularly those of SMEs—we employ a standardized credit risk assessment process for SMEs that uses a credit-scoring model. With this process, we are building a regime for efficiently marketing our Business Select Loan and other SME loans.

In the field of housing loans for individuals, we employ a credit assessment model based on credit data amassed and analyzed by SMBC over many years. This model enables our loan officers to efficiently make rational decisions on housing loan applications and to reply to the customers without delay. It also facilitates the effective management of credit risk as well as the flexible setting of interest rates.

We also provide loans to individuals who rent out properties such as apartments. The loan applications are subjected to a precise credit risk assessment process utilizing a risk assessment model that factors in the projected revenue from the rental business. We also provide advice to such customers on how to revise their business plans.

■ SMBC’s Domestic Obligor Grading System

Obligor Grade	Definition	Borrower Category	Financial Reconstruction Act Based Disclosure Category
1	Very high certainty of debt repayment	Normal Borrowers	Normal Assets
2	High certainty of debt repayment		
3	Satisfactory certainty of debt repayment		
4	Debt repayment is likely but this could change in cases of significant changes in economic trends or business environment depending on the situation		
5	No problem with debt repayment over the short term, but not satisfactory over the mid to long term and the situation could change in cases of any changes in economic trends or business environment		
6	Currently no problem with debt repayment, but it is highly likely that this could change in cases of significant changes in economic trends or business environment		
7	Close monitoring is required due to problems in meeting loan terms and conditions, sluggish/unstable business, or financial problems	Borrowers Requiring Caution	Substandard Loans
	(Borrowers Requiring Caution identified as Substandard Borrowers)	Substandard Borrowers	
8	Currently not bankrupt, but experiencing business difficulties, making insufficient progress in restructuring, and highly likely to go bankrupt	Potentially Bankrupt Borrowers	Doubtful Assets
9	Though not yet legally or formally bankrupt, has serious business difficulties and rehabilitation is unlikely; thus, effectively bankrupt	Virtually Bankrupt Borrowers	Bankrupt and Quasi-Bankrupt Assets
10	Legally or formally bankrupt	Bankrupt Borrowers	

(b) Credit Monitoring System

At SMBC, in addition to analyzing loans at the application stage, the Credit Monitoring System is utilized to maintain an understanding of the circumstances surrounding the obligor in order to reassess obligor grades and review self-assessment and credit policies so that problems can be detected at an early stage and quick and effective action can be taken. The system includes periodic monitoring carried out each time an obligor enterprise discloses financial results as well as continuous monitoring performed each time credit conditions change, as indicated in the diagram below.

(3) Framework for Credit Portfolio Management

In addition to managing individual loans, SMBC Group applies the following basic policies to the management of the entire credit portfolio to maintain and improve its soundness and profitability over the medium to long term. Information on the status of credit portfolio management is reported to the Management Committee and the Board of Directors and regular monitoring is performed through the Risk Appetite Framework (RAF).

(a) Appropriate Risk Control within Capital

To take risks within the acceptable level of capital, we set upper limits for overall risk capital based on the risk appetite and portfolio plan of each business unit and monitor credit risk capital as a breakdown of overall risk capital.

(b) Controlling Concentration Risk

As the equity capital of SMBC Group may be materially impaired in the event that the credit concentration risk becomes apparent, we implement measures to manage credit toward industrial sectors with excessive risk concentration and introduce large exposure limit lines and conduct intensive loan review for obligors with large exposure.

To manage country risk, we also have credit limit guidelines based on each country's creditworthiness.

(c) Researching Borrowers More Rigorously and Balancing Risk and Returns

Against a backdrop of drastic change in the business environment, we rigorously research borrower companies' actual conditions. It runs credit operations on the basic principle of earning returns that are commensurate with the credit risk involved, and makes every effort to reduce credit and capital costs as well as general and administrative expenses.

(d) Preventing and Reducing Non-Performing Loans

On NPLs and potential NPLs, we carry out regular loan reviews to clarify handling policies and action plans, enabling it to swiftly implement measures to prevent deterioration of borrowers' business situations, support business recoveries, collect on loans, and enhance loan security.

(e) Actively Managing Portfolios

We make active use of credit derivatives, loan asset sales, and other instruments to proactively and flexibly manage its portfolios to stabilize credit risk.

(4) Self-Assessment, Write-Offs and Provisions, Non-Performing Loans Disclosure

(a) Self-Assessment

Self-assessment is a preparatory task for ensuring SMBC Group's asset quality and calculating the appropriate level of write-offs and provisions. Each asset is assessed individually for its security and collectibility. Depending on the borrower's current situation, the borrower is assigned to one of five categories: Normal Borrowers, Borrowers Requiring Caution, Potentially Bankrupt Borrowers, Virtually Bankrupt Borrowers, and Bankrupt Borrowers. Based on the borrower's category, claims on the borrower are classified into Classification I, II, III, and IV assets according to their default and impairment risk levels, taking into account such factors as collateral and guarantees.

Self-assessment is the latter stage of the obligor grading process for determining the borrower's ability to fulfill debt obligations, and the obligor grade criteria are consistent with the categories used in self-assessment. As part of our efforts to bolster risk management throughout SMBC Group, consolidated subsidiaries carry out self-assessment in substantially the same manner.

Borrower Categories, Defined	
Normal Borrowers	Borrowers with good earnings performances and no significant financial problems
Borrowers Requiring Caution	Borrowers identified for close monitoring
Potentially Bankrupt Borrowers	Borrowers perceived to have a high risk of falling into bankruptcy
Virtually Bankrupt Borrowers	Borrowers that may not have legally or formally declared bankruptcy but are essentially bankrupt
Bankrupt Borrowers	Borrowers that have been legally or formally declared bankrupt

Asset Classifications, Defined	
Classification I	Assets not classified under Classifications II, III, or IV
Classification II	Assets perceived to have an above-average risk of uncollectibility
Classification III	Assets for which final collection or asset value is very doubtful and which pose a high risk of incurring a loss
Classification IV	Assets assessed as uncollectible or worthless

(b) Write-Offs and Provisions

In cases in which claims have been determined to be uncollectible or deemed to be uncollectible, write-offs signify the recognition of losses on the account books with respect to such claims. Write-offs can be made either in the form of loss recognition by offsetting uncollectible amounts against corresponding balance sheet items, referred to as a direct write-off, or else by recognition of a loan loss provision on a contra-asset account in the amount deemed uncollectible, referred to as an indirect write-off. Recognition of indirect write-offs is generally known as provision for the reserve for possible loan losses.

The write-off and provision standards and procedures for each self-assessment borrower category at SMBC, the core bank of SMBC Group, are shown below. As part of our overall measures to strengthen credit risk management throughout SMBC Group, all consolidated subsidiaries use substantially the same standards as SMBC for write-offs and provisions.

SMBC's Standards for Write-Offs and Provisions		
Self-Assessment Borrower Categories	Standards for Write-Offs and Provisions	
Normal Borrowers	The expected loss amount for the next 12 months is calculated for each grade based on the grade's historical bankruptcy rate, and the total amount is recorded as "provision for the general reserve for possible loan losses."	
Borrowers Requiring Caution	These assets are divided into groups according to the level of default risk. Amounts are recorded as provisions for the general reserve in proportion to the expected losses based on the historical bankruptcy rate of each group. The groups are "claims on Substandard Borrowers" and "claims on other Borrowers Requiring Caution." The latter group is further subdivided according to the borrower's financial position, credit situation, and other factors. Further, when cash flows can be estimated reasonably accurately, the discounted cash flow (DCF) method is applied mainly to large claims for calculating the provision amount.	
Potentially Bankrupt Borrowers	A provision for the specific reserve for possible loan losses is made for the portion of Classification III assets (calculated for each borrower) not secured by collateral, guarantee, or other means. Further, when cash flows can be estimated reasonably accurately, the DCF method is applied mainly to large claims for calculating the provision amount.	
Virtually Bankrupt / Bankrupt Borrowers	Classification III asset and Classification IV asset amounts for each borrower are calculated, and the full amount of Classification IV assets (deemed to be uncollectible or of no value) is written off in principle and provision for the specific reserve is made for the full amount of Classification III assets. Further, when cash flows from future reconstruction can be estimated reasonably accurately, the DCF method is applied mainly to large claims for calculating the provision amount.	
Notes	General Reserve	Provisions made in accordance with general inherent default risk of loans, unrelated to specific individual loans or other claims
	Specific Reserve	Provisions made for claims that have been found uncollectible in part or in total (individually evaluated claims)

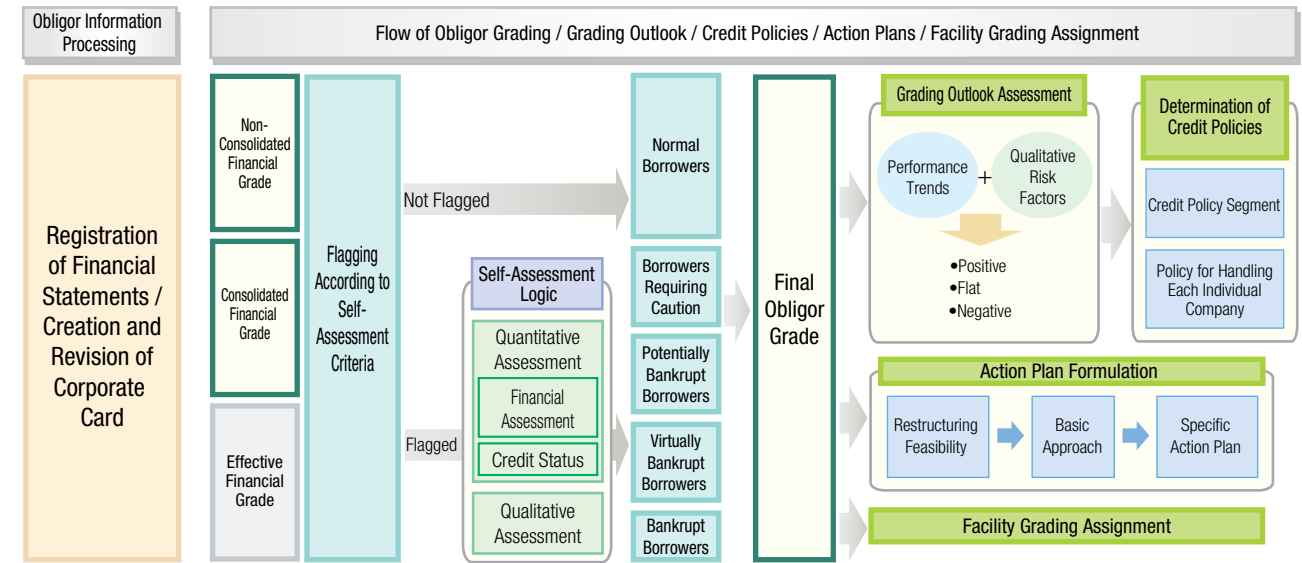

Discounted Cash Flow Method

SMBC uses the discounted cash flow (DCF) method to calculate the provision amounts for large claims on Substandard Borrowers or below when the cash flow from repayment of principal and interest received can be estimated reasonably accurately. SMBC then makes provisions equivalent to the excess of the book value of the claims over the said cash inflow discounted by the initial contractual interest rate or the effective interest rate at the time of origination. One of the major advantages of the DCF method over conventional methods of calculating the provision amount is that it enables effective evaluation of each individual borrower. However, as the provision amount depends on the future cash flow estimated on the basis of the borrower's business reconstruction plan and the DCF formula input values, such as the discount rate and the probability of the borrower going into bankruptcy, SMBC makes every effort to utilize up-to-date and correct data to realize the most accurate estimates possible.

Forward-Looking Provisions

SMBC records general reserves in amounts deemed necessary through comprehensive judgments to prepare for future losses in accordance with forecasts for specific portfolios with a high likelihood of occurrence and that cannot be reflected in past performance or in the borrower categories of specific companies based on recent operating environment and risk trends.

■ SMBC's Credit Monitoring System

(c) Non-Performing Loans Disclosure

Non-Performing Loans are loans and other claims of which recovery of either principal or interest appears doubtful and are disclosed in accordance with the Banking Act (in which they are referred to as “risk-monitored loans”) and the Financial Reconstruction Act (in which they are referred to as “Non-Performing Loans”). Non-Performing Loans are classified based on the borrower categories assigned during self-assessment. For detailed information on results of self-assessments, asset write-offs and provisions, and disclosure of Non-Performing Loans at March 31, 2021, please refer to page 353.

4. Risk Management of Marketable Credit Transactions

Financial products, such as investments in funds, securitized products, and credit derivatives, that bear indirect risk arising from underlying assets such as bonds and loan obligations are considered to be exposed to both credit risk from the underlying assets as well as “market risk” and “liquidity risk” that arise from their trading as financial products. This is referred to as marketable credit risk.

For these types of products, we manage credit risk by analyzing and assessing the characteristics of the underlying assets, but, for the sake of complete risk management, we also apply the methods for management of market and liquidity risks.

In addition, we have established guidelines based on the characteristics of these types of risks and appropriately manage the risk of losses.

Market and Liquidity Risks

1. Basic Approach to Market and Liquidity Risk Management

(1) Definitions of Market and Liquidity Risks

Market risk is the possibility that fluctuations in interest rates, foreign exchange rates, stock prices, or other market prices will change the market value of financial products, leading to a loss.

Liquidity risk is defined as the uncertainty around the ability of the firm to meet debt obligations without incurring unacceptably large losses. Examples of such risk include the possible inability to meet current and future cash flow/collateral needs, both expected and unexpected. In such cases, the firm may be required to raise funds at less than favorable rates or be unable to raise sufficient funds for settlement.

(2) Fundamental Principles for Market and Liquidity Risk Management

SMBC Group is working to further enhance the effectiveness of its quantitative management of market and liquidity risks across the entire Group by setting allowable risk limits; ensuring the

transparency of the risk management process; and clearly separating front-office, middle-office, and back-office operations to establish a highly efficient system of mutual checks and balances.

2. Market and Liquidity Risk Management System

In accordance with the group-wide basic policies for risk management decided upon by the Management Committee, SMBC Group determines important matters relating to the management of market and liquidity risks, such as basic policies and risk limits, in order to manage these risks. The ALM Committee meets four times a year, in principle, to report on the state of market and liquidity risk management and to discuss ALM operation policies. The Corporate Risk Management Department, which is independent of the business units that directly handle market transactions, manages market and liquidity risks in an integrated manner. This department not only monitors the current risk situations but also reports regularly to the Management Committee and the Board of Directors. Furthermore, the ALM Committee at SMBC, the core bank of SMBC Group, meets on a monthly basis to examine reports on the state of observance of limits on market and liquidity risks and to discuss ALM operation policies.

Verification of the effectiveness of this risk management system is conducted through regular internal audits implemented by the independent Audit Department.

3. Market and Liquidity Risk Management Methods

(1) Market Risk Management

SMBC Group manages market risk by controlling amounts of value at risk (VaR), losses, and risk capital based on consideration for the Group’s shareholders’ equity and other principal indicators of the Group’s financial position and management resources and for business policies pertaining to market transactions.

Market risk can be divided into various factors: foreign exchange rates, interest rates, equity prices, and option risks. SMBC Group manages each of these risk categories by employing the VaR method as well as supplemental indicators suitable for managing the risk of each risk factor, such as the BPV.

Trading activities are market operations that gain profits by taking advantage of fluctuations of market prices in the short term or price differences among markets. We assess and manage the market risk of trading activities on a daily basis by utilizing VaR and other tools. Banking activities are market operations which gain profits by controlling interest rates and term period for assets (loans, bonds, etc.) and liabilities (deposits, etc.). In the same way as in the case of trading activities, we assess and manage the market risk of banking activities on a daily basis, utilizing VaR and other tools.

Please note that, the risk of interest rate fluctuation differs substantially by how to recognize the dates for the maturity of demand deposits (current accounts and ordinary deposit accounts that can be withdrawn at any time) and how to estimate the time of cancellation prior to maturity of time deposits and consumer loans. At SMBC, the maturity of demand deposits that are expected to be left with the bank for a prolonged period is regarded to be up to five years (2.5 years on average). The cancellation prior to the maturity of time deposits and consumer loans is estimated based on historical data.

(a) Market Risks

a. Trading activities

Trading activities are market operations that gain profits by taking advantage of fluctuations of market prices in the short term or price differences among markets. At SMBC Group, we assess and manage the market risk of trading activities on a daily basis by utilizing VaR and other tools.

The following table shows the VaR results of the Group’s trading activities during fiscal 2020. VaR fluctuated greatly during this fiscal year due to changes in the nature and investment positions of our trading operations.

b. Banking activities

Banking activities are market operations which gain profits by controlling interest rates and term period for assets (loans, bonds, etc.) and liabilities (deposits, etc.). At SMBC Group, in the same way as in the case of trading activities, we assess and manage the market risk of banking activities on a daily basis, utilizing VaR and other tools.

The following table shows the VaR results of the Group’s banking activities during fiscal 2020.

■ VaR for Trading Activities

(Billions of yen)						
	Fiscal 2020					March 31, 2020
	March 31, 2021	September 30, 2020	Maximum	Minimum	Average	
Sumitomo Mitsui Financial Group (consolidated)	20.7	18.1	24.4	15.6	19.5	16.2
Interest rates	14.6	12.8	15.1	11.7	13.2	12.6
Foreign exchange	8.8	8.2	9.9	6.6	8.4	9.5
Equities, commodities, etc.	8.6	7.0	12.7	4.4	7.9	5.0
SMBC (consolidated)	6.2	7.0	8.1	5.5	6.5	6.4
SMBC (non-consolidated)	2.4	3.1	4.4	2.3	3.0	3.5

Note: VaR for a one-day holding period with a one-sided confidence interval of 99.0% [computed daily using the historical simulation method (based on four years of historical observations)].

■ VaR for Banking Activities

(Billions of yen)						
	Fiscal 2020					March 31, 2020
	March 31, 2021	September 30, 2020	Maximum	Minimum	Average	
Sumitomo Mitsui Financial Group (consolidated)	55.0	47.8	59.0	46.2	52.3	50.5
Interest rates	50.8	45.2	56.1	43.9	49.9	46.2
Equities, etc.	17.4	8.3	27.7	7.5	15.3	15.4
SMBC (consolidated)	54.5	47.2	58.5	45.5	51.7	49.6
SMBC (non-consolidated)	46.4	39.7	50.5	37.5	43.9	41.7

Notes: 1. VaR for a one-day holding period with a one-sided confidence interval of 99.0% [computed daily using the historical simulation method (based on four years of historical observations)].  
2. The above category of “Equities, etc.” does not include strategic shareholdings.

(b) Market Risk Volume Calculation Model

SMBC Group uses internal models to measure VaR and stressed VaR. For information on the consolidated subsidiaries that employ these internal models, please refer to the section on market risk.

a. Presuppositions and limits of model

In the Group’s internal VaR and stressed VaR models, various market fluctuation scenarios are drawn up on the basis of past data, and the historical simulation method is used to run profit-and-loss movement simulations that enable us to forecast probable maximum losses. The appropriateness of the internal model is later verified through back-testing.

However, as back-testing cannot take into account major market fluctuations that have not actually occurred historically, we supplement this method with the use of stress testing.

This internal model employed by SMBC Group undergoes regular auditing by an independent auditing firm to ensure that it operates appropriately.

b. Validity verification process

i Outline of validity verification

SMBC Group uses back-testing as a method for verification of the validity of the internal model. VaR figures calculated by the internal model are compared with actual portfolio profit-and-loss figures on a given day to compute an appropriate VaR level and confirm the adequacy of risk capital management.

ii Back-testing results

Information on back-testing of trading in fiscal 2020 can be found on page 315.

c. Indicators substitute for the back-testing method

SMBC Group employs, as a method substitute for the back-testing method, the VaR wherein presumptions for the model, such as observation periods, change.

d. Changes in model from fiscal 2019

There have been no changes in the model from fiscal 2019.

(c) Stress Testing

The market occasionally undergoes extreme fluctuations that exceed projections. To manage market risk, therefore, it is important to run simulations of unforeseen situations that may occur in financial markets (stress testing). SMBC Group conducts stress tests regularly, assuming various scenarios, and has measures in place for irregular events.

(d) Management of Strategic Shareholdings

SMBC Group establishes risk allowance limits for total risk capital to control stock price fluctuation risk appropriately. Risk capital associated with strategic shareholdings is monitored as a component of total risk capital. More specifically, VaR (1 year holding period) computed from profit-and-loss simulations based on historical market fluctuation data and aggregated fluctuation in market price from the beginning of the fiscal year are subject to the risk capital management and monitored on a daily basis.

SMBC Group conducts ongoing measures for mitigating stock price fluctuation risks with the aim of securing the financial base necessary to sufficiently exercise intermediary functions, even under high-stress environments that create substantial declines in stock prices.

Specifically, we have been reducing balances of strategic shareholdings\* based on the reduction plan over five years from March 31, 2020, that was announced in May 2020, with the goal of reducing book value of strategic shareholdings by ¥300.0 billion.

\* Refers to book value of Group holdings of stocks listed in Japan

■ Composition, by Industry, of Listed Equity Portfolio

(2) Liquidity Risk Management

At SMBC Group, liquidity risk is regarded as one of the major risks. The Group’s liquidity risk management is based on a framework consisting of setting Risk Appetite Measures and establishing contingency plans.

The Risk Appetite Measures are measures for selecting the types and levels of risk that we are willing to take on or tolerate. As the level of liquidity risk is evaluated based on cash flow and balance sheet conditions, Risk Appetite Measures have been set for both of these areas. These measures include Liquidity Coverage Ratio, a liquidity regulation; periods set for which it will be possible to maintain funding levels even under stress due to deposit outflow or other factors; and the ratio that stable funding covers loans.

The tolerated levels of risk are set based on account funding status, cash management planning, economic environments, and other factors, and measures are monitored on a daily or monthly basis in order to limit reliance on short-term funding and appropriately manage liquidity.

As a framework to complement the Risk Appetite Measures, upper limits are set in place on both a Group company basis and an individual branch basis with regard to funding gaps, which is defined as a maturity mismatch between the source of funds and use of funds.

Furthermore, contingency plans are established in preparation for emergency situations. These plans contain information on chains of command and lines of reporting as well as detailed action plans depending on the existing situation (i.e., normal, concerned, or critical). Meanwhile, SMBC carries out quantitative management of alert indications based on early warning indicators established to assist the bank in promptly and systematically detecting liquidity risks.

Operational Risk

1. Basic Approach to Operational Risk Management

(1) Definition of Operational Risk

Operational risk is the risk of loss arising from inadequate or failed internal processes, people, and systems or from external events. Specifically, the risk—which, in addition to processing risk and system risk, covers legal risk, human resources risk, reputational risk, and tangible asset risk, and third party risk—consists of the following seven event types that may lead to the risk of loss defined in the Basel Capital Accord: (1) internal fraud, (2) external fraud, (3) employment practices and workplace safety, (4) clients, products, and business practices, (5) damage to physical assets, (6) business disruption and system failures, and (7) execution, delivery, and process management.

(2) Fundamental Principles for Operational Risk Management

We have set forth the policies on Operational Risk Management to define the basic rules to be observed in the conduct of operational risk management across the entire Group. Under these policies, we have been working to enhance the operational risk management framework across the whole Group by establishing an effective system for identifying, assessing, controlling, and monitoring material operational risks as well as a system for addressing risks that have materialized and implementing emergency response measures. Based on the framework of the Basel Capital Accord, we have been continuously pursuing sophisticated quantification of operational risks and advanced group-wide management.

2. Operational Risk Management System

Based on the group-wide basic policies for risk management established by Sumitomo Mitsui Financial Group, Group companies have developed an operational risk management system.

At Sumitomo Mitsui Financial Group, the Management Committee makes decisions on basic policies for operational risk management, and these decisions are authorized by the Board of Directors. In addition, the Corporate Risk Management Department oversees the overall management of operational risks and works together with departments responsible for the subcategories such as processing risks and system risks to establish a system for comprehensively managing operational risks.

As a brief overview, this system operates by collecting and analyzing internal loss data and Key Risk Indicators (KRI) from Group companies. In addition, the system entails comprehensively specifying scenarios involving operational risks based on the operational procedures of companies that have adopted the Advanced Measurement Approach (AMA) on a regular basis and estimating the loss amount and frequency of the occurrence of such losses based on each scenario. Risk severities are quantified for each scenario. For those scenarios having high severities, risk

Risk Category	Definition	Department in Charge
Operational risk	The risk of loss arising from inadequate or failed internal processes, people, and systems or from external events.	Corporate Risk Management Department
Processing risk	The risk of losses arising from negligent processing by directors and employees, and from accidents or misconducts.	Operations Planning Department
System risk	The risk arising from nonconformity to the business strategies, inappropriate technologies applied, changes to the development plan and delay in development when building an information system, and the risk of loss incurred due to the breakdown including those caused by cyber attack, malfunction, deficiency, or unauthorized use (unauthorized alteration, destruction, duplication, and leakage of the information).	System Security Planning Department
Legal risk	The risk of compensation of damages arising from insufficient legal consideration or breach of contract, or a surcharge, a forfeit or an administrative fine for infringing the laws and regulations.	Compliance Department
Human resources risk	The risk of loss arising from inappropriate labor practices, poor working environments, discriminatory conduct, an outflow or loss of human resources, or deterioration in employee morale.	Human Resources Department
Reputational risk	The risk of loss arising from deterioration in reputation as a consequence of the spread of rumors or media reports of the actual risk events.	General Affairs Department, Public Relations Department
Tangible asset risk	The risk of loss arising from damage to tangible assets or deterioration in the operational environment caused by disasters or inadequate asset maintenance.	Administrative Services Department
Third party risk	The risk of loss arising from damage due to negative incidents caused by third parties who have business relationship with SMBC Group.	Corporate Risk Management Department

mitigation plans will be developed and the implementation status of such risk mitigation plans will be monitored by the Corporate Risk Management Department. Furthermore, operational risks are quantified and quantitatively managed by utilizing the collected internal loss data and scenarios.

Regular reports are issued to the Group CRO on internal loss data, KRI, scenario risk severity information, and the status of risk mitigation to ensure the effectiveness of risk management measures. Moreover, our independent Internal Audit Department conducts periodic internal audits to verify that the Group's operational risk management system is functioning properly.

3. Operational Risk Management Methodology

As previously defined, operational risks cover a wide range of cases, including the risks of losses due to errors in operation, system failures, and natural disasters. Also, operational risk events can occur virtually anywhere and everywhere. Thus, it is essential to check whether material operational risks have been overlooked, monitor the overall status of risks, and manage and control them. To this end, it is necessary to be able to quantify risks using a measurement methodology that can be applied to all types of operational risks and to comprehensively and comparatively capture the status of and changes in potential operational risks in business processes. Also, from the viewpoint of internal control, the measurement methodology used to create risk mitigation measures must be such that the implementation of the measures quantitatively reduces operational risks.

At the end of March 2008, SMBC Group adopted the AMA set forth by the Basel Capital Accord for calculating the operational risk equivalent amount. The approach has been utilized for the management of operational risks since then.

Specifically, a model to which internal loss data and scenario analysis results are input has been introduced to calculate the operational risk equivalent amount and risk asset amounts. In addition, steps are taken to ensure the objectivity, accuracy, and comprehensiveness of scenario evaluations by utilizing external loss data and Business Environment and Internal Control Factors in verification processes.

The quantification model produces the distribution of loss frequency and loss severity based on the internal loss data and scenario analysis results, and it also produces the loss distribution based on the said distribution of loss frequency (distribution of losses in a year) and the distribution of loss severity (distribution of loss amount per case) by making various combinations of frequencies and amounts of losses according to the Monte Carlo simulation method. In addition, the model calculates the maximum amount of loss expected, due to operational risks, based on the assumption of one-sided confidence interval of 99.9% and the holding period of one year. Regarding losses on repayment of excess interest of certain subsidiaries engaged in consumer finance operations, expected losses are deducted from the maximum amount of operational risk loss when calculating the operational risk equivalent amount.

Operational risk equivalent amount in respect of the tangible asset damages arising from earthquakes is measured using the probability data of earthquake occurrence in each part of Japan and the distribution of loss amount from those earthquake occurrences.

The measurement units are Sumitomo Mitsui Financial Group consolidated basis, SMBC consolidated basis, and SMBC non-consolidated basis. The operational risk equivalent amount based on the AMA is calculated as the simple aggregate of the amount of the seven event types set forth by the Basel Capital Accord and of tangible asset damages arising from earthquakes. However, in the case of Sumitomo Mitsui Financial Group consolidated basis, the risk

of losses on repayment of excess interest is added on. The measurement accuracy is ensured through a framework of regularly conducted verifications of the quantification models pre- and post-measurement.

Meanwhile, the operational risk equivalent amounts of other Group companies that do not apply the AMA are calculated according to the Basic Indicator Approach (BIA), and the operational risk equivalent amounts for Sumitomo Mitsui Financial Group consolidated basis and SMBC consolidated basis are calculated by consolidating such amounts calculated based on the BIA with the operational risk equivalent amount calculated based on the AMA.

4. Processing Risk Management

Processing risk is the risk of losses arising from negligent processing by directors and employees, and from accidents or misconducts.

SMBC Group has clarified the divisions responsible for the oversight functions for processing risk management, and we are working to raise the level of sophistication of our management of processing risk across the whole Group on a risk basis by establishing systems for managing the processing risks faced by Group companies, ensuring in-office inspection, minimizing losses in the event of processing risk materialization by drafting exhaustive contingency plans, and carrying out thorough quantification of the risk under management as basic principles.

Basic policies for processing risk management are decided by the Management Committee and then approved by the Board of Directors. The status of processing risk management is reported to the Management Committee and the Board of Directors regularly and when necessary. These and other steps are taken to ensure that we can provide customers with high-quality services.

Based on the group-wide basic policies for risk management, Group companies promote appropriate operating practices by establishing operating rules and regulations, systematizing transaction processing, receiving guidance from business divisions, and inspecting conditions related to transaction processing.

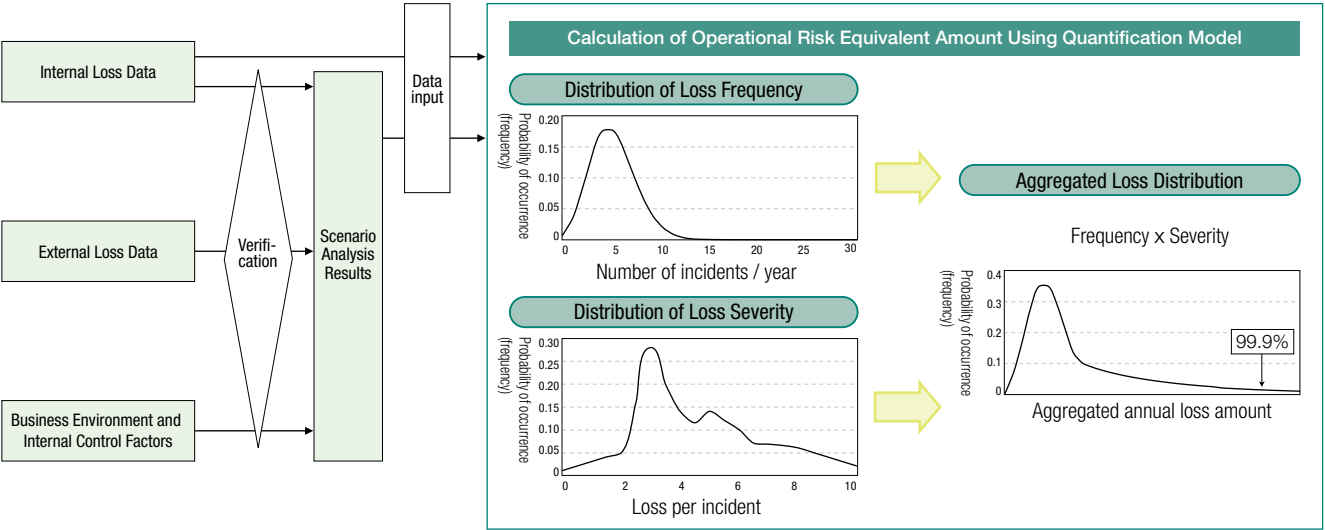

Cyber attacks are becoming increasingly serious, and cyber attack methods are rapidly growing more sophisticated and diverse. Accordingly, the threat of cyber risks to financial institutions is becoming more significant. In response to the growing threat of cyber risks, SMBC Group continues to enhance its response measures, going beyond basic security measures for addressing vulnerabilities to utilize third-party assessments to objectively evaluate its response systems and to enhance its response measures. In addition, we are complementing our prior program of cyber attack response drills and internal awareness-raising activities by expanding the range of practical-application drills anticipating multiple simultaneous attacks and workshops in order to improve security awareness and knowledge among all Group employees.

Furthermore, as SMBC Group's scope expands to include areas other than finance, we take steps to identify risks from new perspectives and to implement management systems that match the extent of risks in a given area of business. SMBC Group is ramping up its risk management support efforts, beginning with high risk areas, to assist in strengthening the risk management structure at companies requiring sophisticated risk management, regardless of their size, as well as business partners and other areas of the supply chain.

In addition, we actively and openly incorporate various technological progress to improve convenience for customers. We also strengthen our risk management structure on an ongoing basis in response to environmental changes, to deal with projected risks arising from promoting digitalization in a wide range of fields, such as the creation of new businesses and boosting productivity and efficiency. As SMBC Group adopts artificial intelligence, cloud, robotic process automation, application programming interface, and other technologies, manuals have been prepared with regards to items requiring compliance at the time of implementation and items for periodic monitoring as part of efforts to reinforce group-wide IT governance.

SMBC operates its risk management system by conducting risk assessments based on the Security Guidelines published by the Center for Financial Industry Information Systems (FISC) and by enhancing safety measures based on the results of these assessments. System failures at banks have the potential to heavily impact society. In addition, system risks are diversifying due to advances in IT and the expansion of business fields. Recognizing these facts, we have numerous measures in place for system failure prevention, including maintenance to ensure stable and uninterrupted operation, duplication of various systems and infrastructure, and a disaster-prevention system consisting of data centers in eastern and western Japan. In addition, we are preparing for unforeseeable circumstances through the creation of contingency plans and the implementation of system failure drills. To maintain the confidentiality of customer data and prevent leaks of information, sensitive information is encrypted, unauthorized external access is blocked, and all other possible measures are taken to secure data.

Basic Framework of Operational Risk Measurement

5. System Risk Management

System risk is the risk arising from nonconformity to the business strategies, inappropriate technologies applied, changes to the development plan and delay in development when building an information system, and the risk of loss incurred due to system breakdown including those caused by cyber attack, malfunction, deficiency or unauthorized use (unauthorized alteration, destruction, duplication and leakage of information).

SMBC Group has set the following as basic principles: recognizing information systems as an essential part of management strategy taking into account advances in IT, minimizing system risk by updating policies and procedures, including a security policy and establishing contingency plans to minimize losses if a system risk materializes. A risk management system has thus been put in place to ensure adequate risk management.

Conduct Risk

1. Basic Approach to Conduct Risk Management

(1) Definition of Conduct Risk

Conduct risk is the risk that our conduct negatively affects customers, market integrity, effective competition, public interests, and the SMBC Group’s stakeholders, through acts that violate laws and regulations or social norms.

(2) Fundamental Principles of Conduct Risk Management

SMBC Group’s fundamental stance is that its business is not to negatively affect customers, market integrity, effective competition, public interests, and stakeholders. Efforts are being made to improve group-wide conduct risk management. Focuses of these efforts include preemptively identifying phenomena with the potential to cause significant deterioration in the trust of the Group and preventing the materialization of serious management risks by being keenly responsive to environmental changes.

2. Conduct Risk Management System

Based on the group-wide basic policies for risk management, SMBC Group has developed a conduct risk management system. The Management Committee makes decisions on basic policies for conduct risk management, and these decisions are authorized by the Board of Directors. In addition, the Corporate Risk Management

Department and the Compliance Department oversee the overall management of conduct risks and promote basic conduct risk management policies, frameworks, and measures. In addition, these bodies report on circumstances pertaining to conduct risk management to the Audit Committee and Risk Committee and discuss these circumstances to ensure the effectiveness of conduct risk management. Furthermore, the Internal Audit Unit verifies and evaluates the conduct risk management system.

3. Conduct Risk Management Methodology

SMBC Group mitigates and controls conduct risk by having business units identify and assess the major risks present in their business and establish measures for controlling these risks using the risk register framework. Meanwhile, risk management departments verify the appropriateness of the risks identified and assessed by business units and their control measures based on the KRE and KRI. Through this process of verification, these departments maintain close communication with business units with regard to matters such as the need to add risks or revisit assessments while checking and monitoring activities in order to improve the effectiveness of conduct risk management efforts.

Glossary

ALM

Abbreviation for Asset Liability Management  
Method for comprehensive management of assets and liabilities, with appropriate controls on market risk (interest rates, exchange rates, etc.) and liquidity risk.

Advanced Measurement Approach (AMA)

Based on the operational risk measurement methods used in the internal management of financial institutions, this is a method for obtaining the operational risk equivalent amount by calculating the maximum amount of operational risk loss expected over a period of one year, with a one-sided confidence interval of 99.9%.

Back-testing

A formal statistical framework that consists of verifying that actual losses are in line with projected losses. This involves systematically comparing the history of VaR forecasts with their associated portfolio returns.

Basic Indicator Approach (BIA)

A calculation approach in which an average value for the most recent three years derived by multiplying gross profit for the financial institution as a whole by certain level (15%) is deemed to be the operational risk equivalent amount.

BPV

Abbreviation for Basis Point Value  
Potential change in present value of financial product corresponding to 0.01-percentage-point increase in interest rates.

Credit cost

Average losses expected to occur during the coming year.

Historical simulation method

Method of simulating future fluctuations without the use of random numbers, by using historical data for risk factors.

LGD

Abbreviation for Loss Given Default  
Percentage of loss assumed in the event of default by obligor; ratio of uncollectible amount of the exposure owned in the event of default.

Monte Carlo simulation method

General term used for a simulation method which uses random numbers.

Operational risk equivalent amount

Operational risk capital requirements under the Basel Capital Accord.

PD

Abbreviation for Probability of Default  
Probability of becoming default by obligor during one year.

Present value

A future amount of money that has been discounted to reflect its current value taking into account the interest rate and the extent of credit risk.

Risk appetite

The types and levels of risk that we are willing to take on or tolerate to drive earnings growth.

Risk capital

The amount of capital required to cover the theoretical maximum potential loss arising from risks of business operations. It differs from the minimum regulatory capital requirements, and it is being used in the risk management framework voluntarily developed by financial institutions for the purpose of internal management.

Risk factor

Anything which may become a factor for risk. In the case of market risk, it would be the share price or interest rate; in the case of credit risk, it would be the default rate or economic environment.

Risk-weighted assets

The denominator used in the calculation of the capital ratio designed to maintain prudential standards for banks.

VaR

Abbreviation for Value at Risk  
The maximum loss that can be expected to occur with a certain degree of probability when holding a financial asset portfolio for a given amount of time.

## Internal Reporting Systems and Hotline for Inappropriate Accounting and Auditing Activities

SMBC Group Alarm Line is intended to promote self-correction through early detection and rectification of actions that may violate laws and regulations. All Group employees can use this internal means of reporting from inside and outside their company. In addition, SMBC and other Group companies have established internal reporting systems for their employees.

Sumitomo Mitsui Financial Group Accounting and Auditing Hotline is aimed at strengthening the Group’s self-correction function by encouraging early detection and rectification of improper actions relating to accounting, accounting internal controls, and auditing at the Company and its consolidated subsidiaries. The hotline can be used from inside or outside the Group to report accounting and auditing irregularities.

**SMFG Accounting and Auditing Hotline/Designated Dispute Resolution Agencies**

## Basic Policy for Customer-Oriented Business Conduct

SMBC Group<sup>1)</sup> has formulated the Basic Policy for Customer-Oriented Business Conduct for its domestic asset management and asset formulation businesses, based on which they are promoting customer-oriented business conduct.

This policy informs our basic stance of emphasizing the dispersing of investments over the medium to long term through which we seek to support customers in stable asset formulation. Also based on this policy, Sumitomo Mitsui Financial Group and its Group companies aim to contribute to the development of capital markets that provide companies with the funds they need to grow and to economic growth through their asset management and asset formulation businesses.

**1. SMBC Group's Customer-Oriented Business Conduct**

As one part of “Our Mission,” it is stated that “We grow and prosper together with our customers, by providing services of greater value to them.” Based on the spirit of this mission, we have defined our Five Values, a list of five key words that includes “Customer First” (always think based on a customer-oriented perspective and provide value based on the individual needs of customers), shared by all the executives and employees of SMBC Group. SMBC Group continues to push forward with various initiatives to actualize these values.

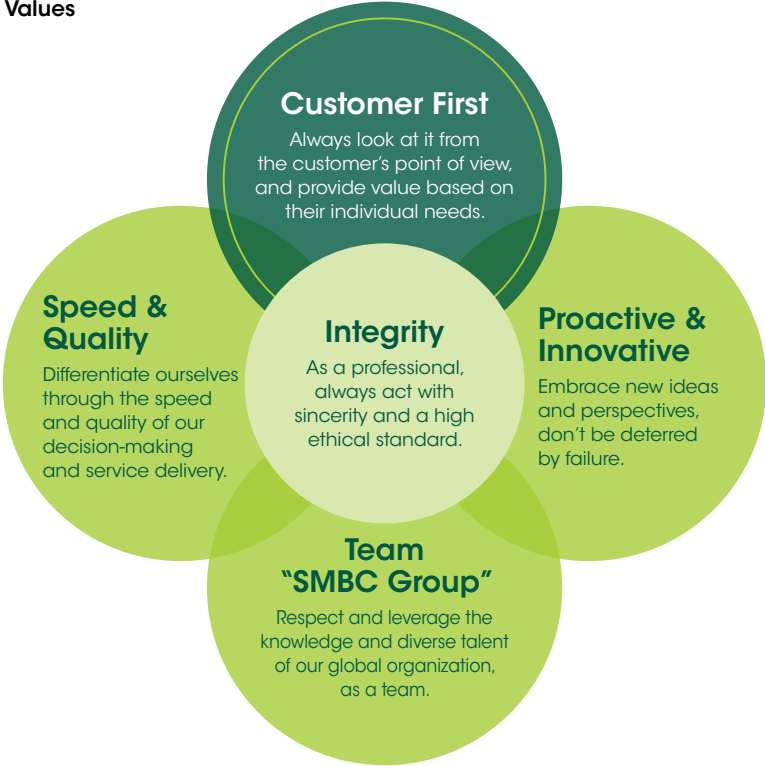

Sumitomo Mitsui Financial Group is fully aware of the severity of the government penalties imposed on SMBC in April 2006 in

relation to its sales practices for interest rate swaps. We are thus committed to preventing the recurrence of such malpractice. Accordingly, we have adopted a customer-oriented perspective in pursuing sustainability throughout our management, internal control, and compliance systems. Through these and other efforts, we have endeavored to regain trust from customers and from society as a whole.

Furthermore, the Customer Experience (CX) Improvement Subcommittee has been set up to incorporate customer input into management. The opinions of external experts<sup>2)</sup> are utilized in meetings of this committee as discussions on and verification of initiatives at Group companies are carried out to promote the exercise of a customer-oriented perspective on a group-wide basis. In addition, the CX Improvement Committee, which comprises officers sitting on the Group Management Committee, holds regular discussions on customer-oriented business conduct.

We are convinced that the ongoing quest to provide quality products and services based on customer needs and desires will contribute to economic growth and subsequently growth for SMBC Group. Everyone at SMBC Group will carry out their duties in an earnest and just manner while exercising a high degree of specialized knowledge and good business ethics. SMBC Group will never let up in its efforts to ensure that it always thinks and acts based on a customer-oriented perspective in the truest sense as it strives to generate the greatest profits for its customers.

■ Five Values

2. Initiatives for Promoting Customer-Oriented Business Conduct

Sumitomo Mitsui Financial Group will implement the following initiatives to entrench the principles of customer-oriented business conduct into its activities.

(1) Provision of Products and Services Suited to the Customer

When drawing up and underwriting financial products, we will act with an accurate understanding of customer needs, determining the ideal target customer group based on the risks and complexity of the products, in order to properly develop and select products.

We will also help customers to find the ideal products and services. Our first step in this process will be to learn about our customers, inquiring into their needs and goals. We will next look at their level of knowledge, investment experience, and asset portfolios so that we can propose the best possible products and services for them.

If we think that a product may not be ideally suited to a customer's needs based on its characteristics or risks, we will discuss this matter with the customer as necessary and refrain from proposing such products when doing so is inappropriate.

(2) Easy-to-Understand Explanation of Important Information

The amount of information provided to customers on the characteristics, risks, and fees of the products we handle as well as on the economic climate and market trends will be enhanced to help customers make informed decisions. Furthermore, we will strive to explain this information in an easy-to-understand manner.

(3) Clarification of Fees

Sumitomo Mitsui Financial Group receives fees from customers for the products and services it provides out of consideration for the need to develop and improve the quality of products and services and to supply various types of information as well as for processing- and infrastructure-related expenses. We will seek to provide thorough explanations of these fees that are as easy to understand as possible.

(4) Management of Conflicts of Interest

Performing duties in an earnest and just manner based on a customer-oriented perspective entails managing any potential conflicts of interest to ensure that our operations are truly customer oriented.

Based on the Management Policy Concerning Conflicts of Interest in Sumitomo Mitsui Financial Group, we have defined the types of conflicts of interest requiring management as well as the types of transactions that tend to present conflicts of interest and procedures for identifying these transactions, methods and systems for managing conflicts of interest, and the scope of Group companies at which conflicts of interest should be managed. In this manner, we take steps to ensure that conflicts of interest are properly managed and therefore do not impede the interests of customers.

(5) Frameworks for Properly Motivating Employees

Always thinking and acting based on a customer-oriented perspective in the truest sense requires our employees to be properly motivated so that they can remain dedicated and effective in their work. Sumitomo Mitsui Financial Group thus develops its performance evaluation systems from a long-term perspective with the aim of encouraging customer-oriented sales activities. At the same time, we are expanding our range of training programs for promoting earnest and just work practices and higher levels of business ethics.

SMBC Group aims to facilitate the shift from savings to asset holding seen in Japan through such initiatives.

Furthermore, we will periodically disclose information on initiatives by SMBC Group based on this policy with the aim of facilitating understanding regarding these initiatives among customers. In addition, the status of initiatives and their results will be verified so that initiatives can be revised as necessary to improve upon operating practices. Information regarding these verifications and revisions will be disclosed.

\*1 Sumitomo Mitsui Financial Group and its subsidiaries and affiliates are referred to collectively as "SMBC Group." The following SMBC Group companies are subject to this policy: SMBC; SMBC Trust Bank Ltd.; SMBC Nikko Securities Inc.; Sumitomo Mitsui DS Asset Management Company, Limited

\*2 External experts\* are invited to meetings of the CX Improvement Subcommittee to provide advice and suggestions with the aim of incorporating a wide range of perspectives into management that includes and goes beyond input and requests from customers.

\* External experts (in alphabetical order)

Support for Mid-Sized Corporations and SMEs, Vitalization of Local Regions in Japan

Services for Corporations

Through the Area Corporate Office, SMBC provides services to mid-sized corporations and SME clients. The Area Corporate Office has in place a system for providing specialized services utilizing the networks of SMBC Group companies to address customers' funding needs, wide-ranging financial needs, and management issues. We are also supporting customers' business continuity through funding assistance via means such as setting up a special fund specifically for mid-sized corporations and SME clients that continue to be impacted by the COVID-19 pandemic.

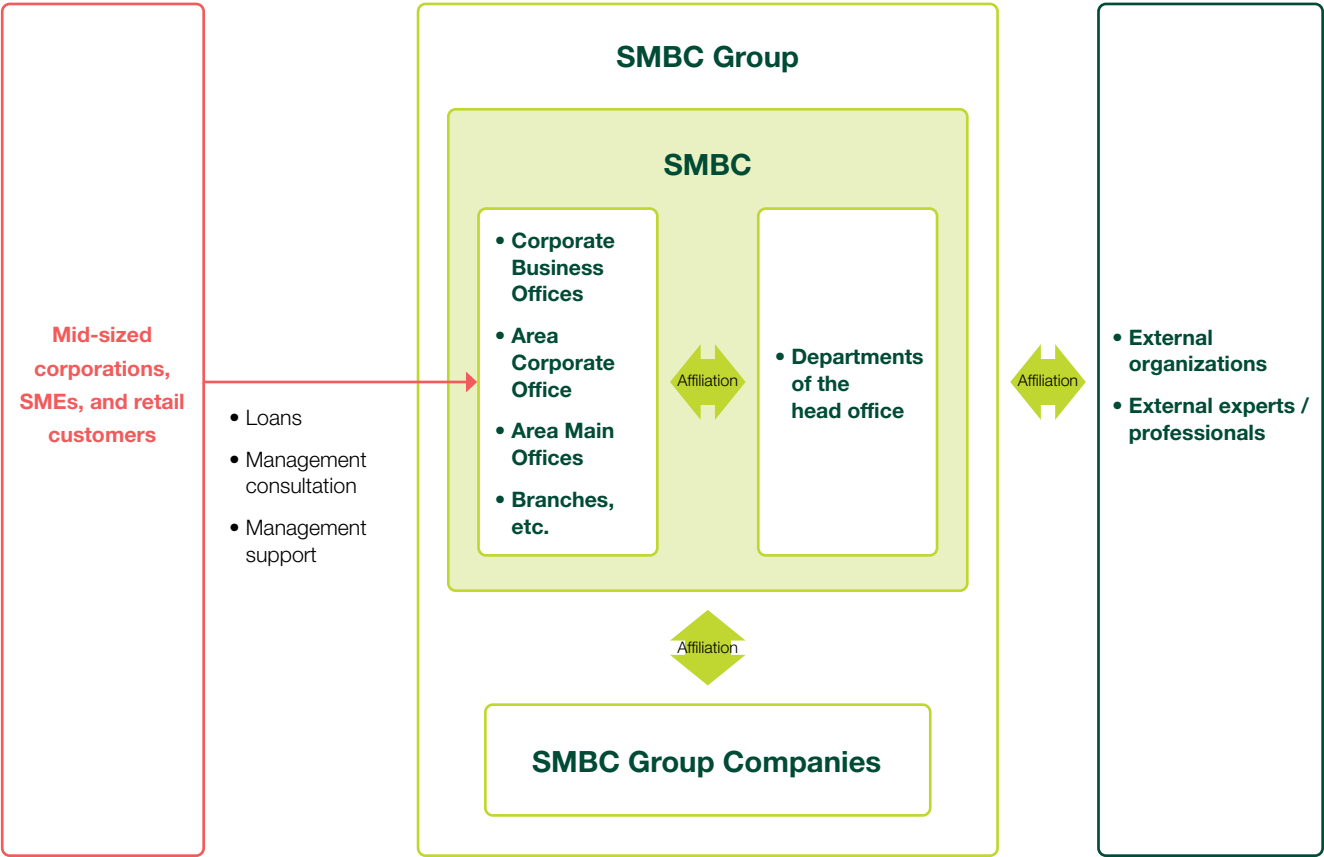

Going forward, we will continue to fulfill our social responsibility as a financial institution by providing support based on the customer's standpoint.

Collaboration with Local Credit Guarantee Corporations

SMBC offers Business Select Loans, a loan service that offers unsecured and unguaranteed financing, and also provides jointly guaranteed loans and support for using prefectural financing systems in Japan through collaboration with local credit guarantee corporations, enabling it to meet the funding needs of customers that continue to be impacted by the COVID-19 pandemic.

Credit Guarantee Corporation	Name
Credit Guarantee Corporation of Tokyo	SMBC Strengthen Management Base Guarantee (SDGs, electronic contracts)
Credit Guarantee Corporation of Kanagawa	Kanagawa Asset 200
Credit Guarantee Corporation of Osaka	CS Next Guarantee
Credit Guarantee Corporation of Hyogo-Ken	HIYAKU

Support System for Mid-Sized Corporations and SMEs

# Employees

## Support for Improved Management, Business Turnaround, and Business Transformation

Along with its efforts to fulfill its financial intermediary function smoothly, SMBC seeks to provide solutions to management issues, putting itself in the position of the client to devise optimum proposals based on the nature of the issues and the client's stage in life. Examples include offering a full range of loan products designed to meet funding needs and address management issues. We also provide solutions in such areas as business matching, overseas business development, and business succession.

Our assistance in business operating improvements and regeneration involves links with external experts / professionals<sup>\*1</sup> and external organizations<sup>\*2</sup> to provide support in drawing up plans for improvement and advice in such areas as cost cutting and asset sales.

For clients that have suffered damage in natural disasters or have been impacted by the COVID-19 pandemic, we propose optimal solutions and support the implementation of rebuilding lives and business.

<sup>\*1</sup> SMBC Consulting, certified tax accountants, certified public accountants, etc.

<sup>\*2</sup> Council supporting revitalization of SMEs, Regional Economy Vitalization Corporation of Japan, etc.

## Involvement in Regional Revitalization

It is becoming more important for regions to exercise their overall capabilities. There are thus high expectations for contributions that financial institutions can make by leveraging their wide-reaching information networks.

In September 2020, SMBC Group set up hoops link kobe in the SMBC Kobe head office building. This innovation center is operated together with KiP Hyogo, an entrepreneur-support organization based in Hyogo Prefecture.

We followed this up with the opening of the adjacent UNOPS Global Innovation Center Japan, an international organization aimed at contributing to the accomplishment of the United Nations Sustainable Development Goals through collaboration with domestic and international start-ups and global companies, in November 2020. This organization is utilized by many seeking to promote open innovation and industry-academia collaboration within the region.

Furthermore, the Kansai Growth Strategy Department was established in April 2021, to create new businesses in order to contribute to the ongoing growth of the Kansai region by utilizing SMBC Group's information and network in preparation for Expo 2025 Osaka, Kansai, Japan.

At the same time, we will continue to work with local government entities and regional financial institutions across Japan, drawing on SMBC Group's network to contribute to local economies through regional revitalization.

hoops link kobe

### Measures for Finance Facilitation

SMBC's "Basic Policy for Finance Facilitation" underlies efforts to be diligent and thorough in the provision of funding and consultation.

#### "Basic Policy for Finance Facilitation"

1. Conduct appropriate review of applications submitted for a new loan or requests to modify loan conditions
2. Provide appropriate management consultation and guidance for clients and appropriate support for management improvements
3. Strive to improve the ability to assess the value of a client's business appropriately
4. Provide appropriate and thorough explanations to clients in consultations and applications for new loans or modification of loan conditions
5. Respond appropriately and adequately to client inquiries regarding new loan and modification consultations and applications and to consulting requests or complaints
6. Liaise closely with other financial institutions involved in applications for modifying loan conditions, applications for support through public and third-party institutions, or other applications
7. Respond appropriately in respect of personal guarantees in accordance with the "Guidelines for Personal Guarantee Provided by Business Owners"

## Notes to Consolidated Financial Statements

Sumitomo Mitsui Financial Group, Inc. and Subsidiaries

### (Basis of presentation)

Sumitomo Mitsui Financial Group, Inc. (“the Company”) was established on December 2, 2002 as a holding company for the SMBC Group

(“the Group”) through a statutory share transfer (*kabushiki iten*) of all of the outstanding equity securities of Sumitomo Mitsui Banking

Corporation (“SMBC”) in exchange for the Company’s newly issued securities. The Company is a joint stock corporation with limited liability

(*Kabushiki Kaisha*) incorporated under the Companies Act of Japan. Upon formation of the Company and completion of the statutory share

transfer, SMBC became a direct wholly owned subsidiary of the Company.

The Company has prepared the accompanying consolidated financial statements in accordance with the provisions set forth in the Japanese

Financial Instruments and Exchange Act and its related accounting regulations, and in conformity with accounting principles generally

accepted in Japan (“Japanese GAAP”), which are different in certain respects as to application and disclosure requirements from International

Financial Reporting Standards (“IFRS”).

The accounts of overseas subsidiaries and affiliated companies, are, in principle, integrated with those of the Company’s accounting policies

for purposes of consolidation unless they apply different accounting principles and standards as required under U.S. GAAP or IFRS, in which

case a certain limited number of items are adjusted based on their materiality.

These consolidated financial statements are translated from the consolidated financial statements contained in the annual securities report

filed under the Financial Instrument and Exchange Act of Japan (“FIEA based financial statements”) except for the addition of the non-

consolidated financial statements and US dollar figures.

Amounts less than 1 million yen have been rounded down. As a result, the totals in Japanese yen shown in the financial statements do not

necessarily agree with the sum of the individual amounts.

The translation of the Japanese yen amounts into U.S. dollars is included solely for the convenience of readers outside Japan, using the

prevailing exchange rate at March 31, 2021 which was ¥110.71 to US\$1. These translations should not be construed as representations that the

Japanese yen amounts have been, could have been, or could in the future be, converted into U.S. dollars at that rate.

As of and for the years ended March 31, 2020 and 2021

(Significant accounting policies for preparing consolidated financial statements)

1. Scope of consolidation

SMBC Consumer Finance Co., Ltd.  
The Japan Research Institute, Limited  
Sumitomo Mitsui DS Asset Management Company, Limited (“SMDAM”)  
SMBC Bank International plc  
Sumitomo Mitsui Banking Corporation (China) Limited  
PT Bank BTPN Tbk  
SMBC Americas Holdings, Inc.  
SMBC Guarantee Co., Ltd.

Changes in the consolidated subsidiaries in the fiscal year ended March 31, 2021 are as follows:

Alternative Investment Capital Limited and 12 other companies were newly included in the scope of consolidation as a result of acquisition of shares and for other reasons.

SMBC Finance Service Co., Ltd. was excluded from the scope of consolidation following its merger with the Company’s consolidated subsidiary Cedyna Financial Corporation. 9 other companies were also excluded from the scope of consolidation, as they ceased to be subsidiaries due to liquidation and for other reasons.

Cedyna Financial Corporation changed its name to SMBC Finance Service Co., Ltd., and Sumitomo Mitsui Banking Corporation Europe Limited changed its name to SMBC Bank International plc.

(2) Unconsolidated subsidiaries

Principal company: SBCS Co., Ltd.

7 of the unconsolidated subsidiaries are investment partnerships, and neither their assets nor profit/loss are substantially attributable to subsidiaries, and thus are excluded from the scope of consolidation pursuant to Article 5, Paragraph 1, Item 2 of the Ordinance on the Terminology, Forms, and Preparation Methods of Consolidated Financial Statements.

Other unconsolidated subsidiaries are excluded from the scope of consolidation because their total amounts in terms of total assets, ordinary income, net income and retained earnings are immaterial, as such, they do not hinder a rational judgment of the financial position and results of operations of the Company and its consolidated subsidiaries when excluded from the scope of consolidation.

2. Application of the equity method

(1) Unconsolidated subsidiaries accounted for by the equity method

The number of unconsolidated subsidiaries accounted for by the equity method at March 31, 2021 is 5.

Principal company: SBCS Co., Ltd.

(2) Equity method affiliates

The number of affiliates accounted for by the equity method at March 31, 2021 is 93.

Principal companies: Sumitomo Mitsui Finance and Leasing Company, Limited  
Sumitomo Mitsui Auto Service Company, Limited

Changes in the equity method affiliates in the fiscal year ended March 31, 2021 are as follows:

24 companies became equity method affiliates due to new establishment and for other reasons.

Kansai Mirai Financial Group, Inc. (“KMFG”) and 26 other companies have been excluded from the scope of equity method affiliates as they ceased to be affiliates due to sale of KMFG’s stocks which SMBC had contributed to employee retirement benefit trusts.

(3) Unconsolidated subsidiaries that are not accounted for by the equity method

7 unconsolidated subsidiaries that are not accounted for by the equity method are investment partnerships, and neither their assets nor profit/loss are substantially attributable to subsidiaries, and thus are excluded from the scope of equity method pursuant to Article 10, Paragraph 1, Item 2 of the Ordinance on the Terminology, Forms, and Preparation Methods of Consolidated Financial Statements.

(4) Affiliates that are not accounted for by the equity method

Principal company: Park Square Capital / SMBC Loan Programme S. à r. l.

Affiliates that are not accounted for by the equity method are also excluded from the scope of equity method because their total amounts in terms of net income and retained earnings are immaterial, and as such, they do not hinder a rational judgment of the Company’s financial position and results of operations when excluded from the scope of equity method.

3. The balance sheet dates of consolidated subsidiaries

(1) The balance sheet dates of the consolidated subsidiaries at March 31, 2021 are as follows:

October 31 .....	2
November 30 .....	1
December 31 .....	90
March 31 .....	84

(2) The subsidiaries with balance sheets dated October 31 are consolidated using the financial statements as of January 31 and a subsidiary with balance sheets dated November 30 as well as certain subsidiaries with balance sheets dated December 31 are consolidated using the financial statements as of March 31. Other subsidiaries are consolidated using the financial statements as of their respective balance sheet dates.

Appropriate adjustments were made to material transactions during the periods between their respective balance sheet dates and the consolidated closing date.

4. Accounting policies

(1) Standards for recognition and measurement of trading assets/liabilities and trading income/losses

Transactions for trading purposes (seeking gains arising from short-term changes in interest rates, currency exchange rates, or market prices of securities and other market related indices or from variation among markets) are included in “Trading assets” or “Trading liabilities” on the consolidated balance sheets on a trade date basis. Profits and losses on trading-purpose transactions are recognized on a trade date basis, and recorded as “Trading income” and “Trading losses” on the consolidated statements of income.

Securities and monetary claims purchased for trading purposes are stated at the fiscal year-end market value, and financial derivatives such as swaps, futures and options are stated at amounts that would be settled if the transactions were terminated at the consolidated balance sheet date.

“Trading income” and “Trading losses” include interest received or paid during the fiscal year. The year-on-year valuation differences of securities and monetary claims are also recorded in the above-mentioned accounts. As for the derivatives, the year-on-year changes in gains or losses of the derivatives calculated by assuming they were settled at the end of the fiscal year ended March 31, 2020 and 2021.

In terms of the evaluation of specific market risks and credit risks for derivative transactions, those fair values are calculated by group basis of the financial assets and liabilities based on net asset or liability after offsetting.

(2) Standards for recognition and measurement of securities

1) Debt securities that consolidated subsidiaries have the positive intent and ability to hold to maturity are classified as held-to-maturity securities and are carried at amortized cost (based on straight-line method) using the moving-average method. Investments in affiliates that are not accounted for by the equity method are carried at cost using the moving-average method. Securities other than trading purpose securities, held-to-maturity securities and investments in unconsolidated subsidiaries and affiliates are classified as “other securities” (available-for-sale securities). Other securities are carried at their fair values (cost of securities sold is calculated using primarily the moving-average method). Stocks with no market prices are carried at cost using the moving-average method.

Net unrealized gains (losses) on other securities, net of income taxes, are included in “Net assets” except for the amount reflected on the gains or losses by applying fair value hedge accounting.

2) Securities included in money held in trust are carried in the same method as in (1) and (2), 1) above.

(3) Standards for recognition and measurement of derivative transactions

Derivative transactions, excluding those classified as trading derivatives, are carried at fair value.

In terms of the evaluation of specific market risks and credit risks for derivative transactions, those fair values are calculated by group basis of the financial assets and liabilities based on net asset or liability after offsetting.

(4) Depreciation

1) Tangible fixed assets (excluding assets for rent and lease assets)

Buildings owned by the Company and SMBC, which is a consolidated subsidiary of the Company, are depreciated using the straight-line method. Others are depreciated using the declining-balance method. The estimated useful lives of major items are as follows:

Buildings:	7 to 50 years
Others:	2 to 20 years

Other consolidated subsidiaries depreciate tangible fixed assets primarily using the straight-line method over the estimated useful lives of the respective assets.

2) Intangible fixed assets

Intangible fixed assets are depreciated using the straight-line method. Capitalized software for internal use owned by the Company and its consolidated domestic subsidiaries is depreciated over its estimated useful life (5 to 10 years).

3) Assets for rent

Assets for rent are depreciated using the straight-line method, assuming that lease terms are, in principle, their depreciation period and the salvage is estimated disposal value when the lease period expires.

4) Lease assets

Lease assets with respect to non-transfer ownership finance leases, which are recorded in “Tangible fixed assets,” are depreciated using the straight-line method, assuming that lease terms are their expected lifetime and salvage values are zero.

(5) Reserve for possible loan losses

The reserve for possible loan losses of major consolidated subsidiaries is provided as detailed below in accordance with the internal standards for write-offs and provisions.

For claims on borrowers that have entered into bankruptcy, special liquidation proceedings or similar legal proceedings (“Bankrupt borrowers”) or borrowers that are not legally or formally insolvent but are regarded as substantially in the same situation (“Effectively bankrupt borrowers”), a reserve is provided based on the amount of claims, after the write-off stated below, net of the expected amount of recoveries from collateral and guarantees. For claims on borrowers that are not currently bankrupt but are perceived to have a high risk of falling into bankruptcy (“Potentially bankrupt borrowers”), a reserve is provided in the amount deemed necessary based on an overall solvency assessment of the claims, net of the expected amount of recoveries from collateral and guarantees.

SMBC, which is a consolidated subsidiary of the Company, applies Discounted Cash Flows (“DCF”) method for claims of large borrowers exceeding a certain amount, of which borrowers categories are bankrupt borrowers, effectively bankrupt borrowers and potentially bankrupt borrowers and whole or part of loans are classified as “Past due loans (3 months or more)” or “Restructured loans” requiring close monitoring, and whose cash flows from collection of principals and interest can be rationally estimated. SMBC establishes a reserve for possible loan losses using the DCF method for such claims in the amount of the difference between the present value of principal and interest (calculated using the rationally estimated cash flows discounted at the initial contractual interest rate) and the book value.

For other claims, they are recorded by estimating the amount of expected loss in the next one year or three years. The estimated amount of expected loss is calculated by using average ratio of loan-loss ratio or probability of bankruptcies for certain periods in the past based on actual loan losses or bankruptcies in the past one year or three years, and by making necessary adjustments including future estimations.

In addition, in light of the latest economic situation and risk factors, for potential losses for specific portfolios that are based on the future prospects with high probability, but cannot be reflected in actual loan losses in the past and in any individual borrower’s classification, a reserve is provided in the amount deemed necessary based on an overall assessment.

For claims originated in specific overseas countries, an additional reserve is provided in the amount deemed necessary based on the assessment of political and economic conditions.

Branches and credit supervision departments assess all claims in accordance with the internal rules for self-assessment of assets, and the Credit Review Department, independent from these operating sections, audits their assessment.

The reserve for possible loan losses of other consolidated subsidiaries for general claims is provided in the amount deemed necessary based on the historical loan-loss ratios, and for doubtful claims in the amount deemed uncollectible based on assessment of each claim.

For collateralized or guaranteed claims on bankrupt borrowers and effectively bankrupt borrowers, the amount exceeding the estimated value of collateral and guarantees is deemed to be uncollectible and written off against the total outstanding amount of the claims. The amount of write-off for the fiscal years ended March 31, 2020 and 2021 were ¥142,834 million and ¥163,185 million, respectively.

(6) Reserve for employee bonuses

The reserve for employee bonuses is provided for payment of bonuses to employees, in the amount of estimated bonuses, which are attributable to the fiscal year.

(7) Reserve for executive bonuses

The reserve for executive bonuses is provided for payment of bonuses to executives, in the amount of estimated bonuses, which are attributable to the fiscal year.

(8) Reserve for executive retirement benefits

The reserve for executive retirement benefits is provided for payment of retirement benefits to executives, in the amount deemed accrued at the fiscal year-end based on our internal regulations.

(9) Reserve for point service program

The reserve for point service program is provided for the potential future redemption of points awarded to customers under the “SMBC Point Pack,” credit card points programs, and other customer points award programs. The amount is calculated by converting the outstanding points into a monetary amount, and rationally estimating and recognizing the amount that will be redeemed in the future.

(10) Reserve for reimbursement of deposits

The reserve for reimbursement of deposits which were derecognized as liabilities under certain conditions is provided for the possible losses on the future claims of withdrawal based on the historical reimbursements.

(11) Reserve for losses on interest repayment

The reserve for losses on interest repayment is provided for the possible losses on future claims of repayment of interest based on historical interest repayment results.

(12) Reserve under the special laws

The reserve under the special laws is a reserve for contingent liabilities and provided for compensation for losses from securities related transactions or derivative transactions, pursuant to Article 46-5 of the Financial Instruments and Exchange Act.

(13) Employee retirement benefits

In calculating the projected benefit obligation, mainly the benefit formula basis is used to attribute the expected benefit attributable to the respective fiscal year.

Unrecognized prior service cost is amortized on a straight-line basis, primarily over 9 years within the employees’ average remaining service period at incurrence.

Unrecognized net actuarial gain (loss) is amortized on a straight-line basis, primarily over 9 years within the employees’ average remaining service period, commencing from the next fiscal year of incurrence.

(14) Translation of foreign currency assets and liabilities

Assets and liabilities of the Company and SMBC, which is a consolidated subsidiary of the Company, denominated in foreign currencies and accounts of SMBC overseas branches are translated into Japanese yen mainly at the exchange rate prevailing at the consolidated balance sheet date, with the exception of stocks of subsidiaries and affiliates translated at rates prevailing at the time of acquisition.

Other consolidated subsidiaries’ assets and liabilities denominated in foreign currencies are translated into Japanese yen at the exchange rate prevailing at their respective balance sheet dates.

(15) Lease transactions

1) Recognition of income on finance leases

Interest income is allocated to each period.

2) Recognition of income on operating leases

Primarily, lease-related income is recognized on a straight-line basis over the full term of the lease, based on the contractual amount of lease fees per month.

(16) Hedge accounting

1) Hedging against interest rate changes

As for the hedge accounting method applied to hedging transactions for interest rate risk arising from financial assets and liabilities, SMBC, which is a consolidated subsidiary of the Company, applies deferred hedge accounting.

SMBC applies deferred hedge accounting stipulated in “Treatment for Accounting and Auditing of Application of Accounting Standard for Financial Instruments in Banking Industry” (JICPA Industry Committee Practical Guidelines No. 24, October 8, 2020) to portfolio hedges on groups of large-volume, small-value monetary claims and debts.

As for the portfolio hedges to offset market fluctuation, SMBC assesses the effectiveness of such hedges by classifying the hedged items (such as deposits and loans) and the hedging instruments (such as interest rate swaps) by their maturity. As for the portfolio hedges to fix cash flows, SMBC assesses the effectiveness of such hedges by verifying the correlation between the hedged items and the hedging instruments.

As for the individual hedges, SMBC also assesses the effectiveness of such individual hedges.

2) Hedging against currency fluctuations

SMBC, which is a consolidated subsidiary of the Company, applies deferred hedge accounting stipulated in “Treatment of Accounting and Auditing Concerning Accounting for Foreign Currency Transactions in Banking Industry” (JICPA Industry Committee Practical Guidelines No. 25, October 8, 2020) to currency swap and foreign exchange swap transactions executed for the purpose of lending or borrowing funds in different currencies.

Pursuant to JICPA Industry Committee Practical Guidelines No. 25, SMBC assesses the effectiveness of currency swap and foreign exchange swap transactions executed for the purpose of offsetting the risk of changes in currency exchange rates by verifying that there are foreign-currency monetary claims and debts corresponding to the foreign-currency positions.

In order to hedge risk arising from volatility of exchange rates for stocks of subsidiaries and affiliates and other securities (excluding bonds) denominated in foreign currencies, SMBC applies deferred hedge accounting or fair value hedge accounting, on the conditions that the hedged securities are designated in advance and that sufficient on-balance (actual) or off-balance (forward) liability exposure exists to cover the cost of the hedged securities denominated in the same foreign currencies.

3) Hedging against share price fluctuations

SMBC, which is a consolidated subsidiary of the Company, applies fair value hedge accounting to individual hedges offsetting the price fluctuation of the shares that are classified under other securities, and accordingly evaluates the effectiveness of such individual hedges.

4) Transactions between consolidated subsidiaries

As for derivative transactions between consolidated subsidiaries or internal transactions between trading accounts and other accounts (or among internal sections), SMBC manages the interest rate swaps and currency swaps that are designated as hedging instruments in accordance with the non-arbitrary and strict criteria for external transactions stipulated in JICPA Industry Committee Practical Guidelines No. 24 and No. 25. Therefore, SMBC accounts for the gains or losses that arise from interest rate swaps and currency swaps in its earnings or defers them, rather than eliminating them.

Certain other consolidated subsidiaries apply the deferred hedge accounting, fair value hedge accounting or the special treatment for interest rate swaps.

(17) Amortization of goodwill

Goodwill is amortized using the straight-line method over a period in which its benefit is expected to be realized, not to exceed 20 years. Immaterial goodwill is charged or credited to income directly when incurred.

(18) Scope of “Cash and cash equivalents” on consolidated statements of cash flows

For the purpose of presenting the consolidated statements of cash flows, “Cash and cash equivalents” are cash on hand, non-interest earning deposits with banks and deposits with the Bank of Japan.

(19) Consumption taxes

National and local consumption taxes of the Company and its consolidated domestic subsidiaries are accounted for using the tax-excluded method.

(20) Adoption of the consolidated corporate-tax system

The Company and certain consolidated domestic subsidiaries apply the consolidated corporate-tax system.

(Significant Accounting Estimates)

1. Reserve for possible loan losses

- (1) The amount recorded in the consolidated financial statements for the fiscal year ended March 31, 2021

Year ended March 31, 2021	Millions of yen
Reserve for possible loan losses .....	¥659,017

- (2) Information on details of the significant accounting estimates for the identified item

Based on the assessment of all claims including loans and bills discounted conducted in accordance with the self-assessment procedures, and borrower category determined depending on their credit risk status, the following amounts are recorded as a reserve for possible loan losses.

- The estimated amount of expected loss calculated for each borrower category based on the average value of historical loan-loss ratio or probability of default over a certain past period is recorded as a reserve for loan losses
- As for claims classified as substandard or lower level classifications whose cash flows from collection of principals and interest can rationally be estimated, the Discounted Cash Flows (“DCF”) method is applied for ones with large borrowers of those claims and the amount calculated by the DCF method is recorded as a reserve for loan losses
- As for expected loss based on the future prospects with high probability, but cannot be reflected in historical loan-losses and in any individual borrower category, the amount deemed necessary based on an overall assessment is recorded as a reserve for loan losses

Reserve for possible loan losses recorded by the method above involves the following uncertainties in the process of estimation, hence requiring high-level managerial judgment.

- Consideration for qualitative factors including forward-looking information in determining borrower category
- Reasonable estimation of future individual cash flows in the DCF method
- Determination of a method for estimating expected loss based on future prospect in consideration of the latest economic environment and risk factors, and of the targeted portfolio

These may be affected by changes in economic environment, which have a potentially significant impact on the amount of reserve for possible loan losses for the next fiscal year.

(Note) For the estimation of the reserve for possible loan losses specifically related to COVID-19, refer to (Additional Information).

2. Impairment loss for fixed assets

- (1) The amount recorded in the consolidated financial statements for the fiscal year ended March 31, 2021

Year ended March 31, 2021	Millions of yen
Tangible fixed assets .....	¥1,458,991
Intangible fixed assets .....	738,759
Losses on impairment of fixed assets .....	42,525

- (2) Information on details of the significant accounting estimates for the identified item

Fixed assets that have an indication of impairment are tested for recognition of impairment loss, and if recognition is required, their book values are reduced to the recoverable amount and the reduced amount is recorded as impairment loss. Recoverable amount is either net realizable value, which is deducting expected disposal cost from fair value of the fixed asset, or value in use which is the present value of cash flows expected to derive from the continuous use and disposal of the fixed asset after use.

Future cash flows and the growth rate used for testing the recognition of impairment loss as well as for calculating value in use are determined based on the factors including the estimation or judgment by management and the market growth rate, etc. Discount rate used for calculating value in use is determined based on the market interest rate and other market conditions, and these may be affected by changes in economic and financial environment. Therefore, if modification is required, it may have a potentially significant impact on the amount of impairment loss for fixed assets for the next fiscal year.

3. Fair value of financial instruments

- (1) The amount recorded in the consolidated financial statements for the fiscal year ended March 31, 2021  
This is stated in (Notes to financial instruments).
- (2) Information on details of the significant accounting estimates for the identified item  
This is stated in (Notes to financial instruments).

4. Reserve for losses on interest repayment

- (1) The amount recorded in the consolidated financial statements for the fiscal year ended March 31, 2021

Year ended March 31, 2021	Millions of yen
Reserve for losses on interest repayment .....	¥140,758

- (2) Information on details of the significant accounting estimates for the identified item

Reserve for losses on interest repayment is recorded based on estimated amount of claim of repayment in preparing for future claims of interest repayment from the customers whose loans are offered at interest rates in excess of the ceiling prescribed under the Interest Rate Restriction Act.

Estimated amount of claim for such repayment is calculated based on certain assumptions using the historical data regarding the number and amount of claims from customers. The trend in future claims of repayment from customers has a potentially significant impact on the amount of reserve for losses on interest repayment for the next fiscal year.

5. Retirement benefits expenses and retirement benefit obligations

- (1) The amount recorded in the consolidated financial statements for the fiscal year ended March 31, 2021

Year ended March 31, 2021	Millions of yen
Net defined benefit asset .....	¥565,534
Net defined benefit liability .....	35,334
Retirement benefit expenses included in general and administrative expenses .....	18,237

- (2) Information on details of the significant accounting estimates for the identified item

Retirement benefit expenses and retirement benefit obligations for the defined benefit plans for employees are recorded based on various assumptions including discount rate, employee turnover and future salary increase rate.

Discount rate is determined based on Japanese government bond yields, while the indicators such as employee turnover and future salary increase rate are determined based on historical data as well as the latest information on future outlook. Determining these key factors and metrics requires high-level managerial judgment, and if modifications are required, it may have significant impact on the amounts of retirement benefit expenses and retirement benefit obligations for the next fiscal year.

6. Deferred tax assets

- (1) The amount recorded in the consolidated financial statements for the fiscal year ended March 31, 2021

Year ended March 31, 2021	Millions of yen
Deferred tax assets .....	¥ 29,840
Deferred tax liabilities .....	532,193

- (2) Information on details of the significant accounting estimates for the identified item

The amount of tax associated with temporary differences is recorded as deferred tax assets or deferred tax liabilities excluding the amount of tax that is not expected to be collected or paid in the future accounting periods. Deferred tax assets and deferred tax liabilities of the same taxable entity are offset and presented on a net basis.

While the recoverability of deferred tax assets is determined by reasonably estimating the scheduling of temporary differences and taxable income, in the event of changes to the scheduling of temporary differences, taxable income which is lower than initial estimation, or tax reform such as reduction of corporate income tax rate, there is a potentially significant impact on the amount of deferred tax assets for the next fiscal year.

(Changes in Accounting Policies)

1. Accounting Standard etc. for Fair Value Measurement (Changes in accounting policies due to application of new or revised accounting standards)

The Company has applied “Accounting Standard for Fair Value Measurement” (ASBJ Statement No.30, July 4, 2019) and “Implementation Guidance on Accounting Standard for Fair Value Measurement” (ASBJ Guidance No.31, July 4, 2019) from the beginning of the fiscal year ended March 31, 2021.

Due to this application, the measurement of the fair value of stocks with market price (including foreign stocks, hereinafter the same) in other securities is changed from the fair value method based on their average prices during the final month of the fiscal year to the fair value method based on their fiscal year-end market prices. Derivative transactions are carried at fair value reflecting one’s own credit risks and counterparty’s credit risks etc.

As for stocks with market price, in accordance with transitional treatment stipulated in Item 19 of “Accounting Standards for Fair Value Measurement” and Item 44-2 of “Accounting Standard for Financial Instruments,” (ASBJ Statement No.10, July 4, 2019) the Company has applied new accounting policies since the beginning of the fiscal year ended March 31, 2021. As for fair value of derivative transactions, in accordance with transitional treatment stipulated in Item 20 of “Accounting Standards for Fair Value Measurement,” the cumulative effects are adjusted to “Retained earnings” of the beginning of the fiscal year ended March 31, 2021, in the case that the new accounting policy is retroactively applied prior to the beginning of the fiscal year ended March 31, 2021.

As a result, “Trading assets” decreased by ¥66,010 million, “Other assets” decreased by ¥29,768 million, “Deferred tax assets” increased by ¥2,306 million, “Trading liabilities” decreased by ¥21,557 million, “Other liabilities” decreased by ¥14,495 million, “Deferred tax liabilities” decreased by ¥15,570 million, “Retained earnings” decreased by ¥41,849 million, and “Net assets per share” decreased by ¥30.56 at the beginning of the fiscal year ended March 31, 2021.

2. Changes in recognition of installment-sales-related income and installment-sales-related expenses (Changes in accounting policies due to justifiable reasons other than above 1)

As for recognition of installment-sales-related income and installment-sales-related expenses, Sumitomo Mitsui Finance and Leasing Company, Limited (hereinafter, “SMFL”), which conducts leasing business, had been applying a method for which installment-sales-related income and installment-sales-related expenses are recognized on a due-date basis over the full period of the installment sales in accordance with “Implementation Guidance on Accounting Standards for Leasing Transactions” (ASBJ Guidance No.16, March 25, 2011). However, from the beginning of the fiscal year ended March 31, 2021, the net amount, which is calculated by deducting installment-sales-related expenses from installment-sales-related income, is recorded as “Interest on deferred payment.”

This change is made to properly reflect the fund transaction under the financial type installment-sales transactions on the consolidated financial statements due to SMFL becoming an equity method affiliate and other reasons.

These changes in accounting policies are applied retroactively, and therefore the consolidated financial statements for the fiscal year ended March 31, 2020 reflect the retroactive application. As a result, comparing before and after the retroactive application, “Ordinary income”, “Ordinary expenses”, and “Other operating expenses” decreased by ¥722,440 million respectively, “Interest income” increased by ¥30,335 million, and “Other operating income” decreased by ¥752,775 million, and there are no effects on “Ordinary profit”, “Income before income taxes”, “Profit” and “Profit attributable to owners of parent” for the fiscal year ended March 31, 2020. There is also no cumulative effect on “Net assets” at the beginning of the fiscal year ended March 31, 2020.

(Unapplied Accounting Standards and Others)

“Revised Accounting Standard for Revenue Recognition” (ASBJ Statement No.29) etc. (issued March 30, 2018, revised March 31, 2020)

- (1) Outline

The accounting standard etc. provide comprehensive principles for revenue recognition by taking into account of international trends. The principles of revenue recognition in the standard etc. are to recognize revenue by depicting the transfer of promised goods or services to customers in an amount of the consideration expected to be earned in exchange for those goods or services.
- (2) Date of Application

The Company will apply the standard etc. from the beginning of the fiscal year commencing on April 1, 2021.
- (3) Effects of Application of the Accounting Standard etc.

The effects of the application of these accounting standard etc. are currently being assessed.

(Changes in Presentation Method)

The Company has adopted the “Accounting Standard for Disclosure of Accounting Estimates” (ASBJ Statement No. 31, March 31, 2020) from the consolidated financial statements as at the end of the fiscal year ended March 31, 2021, and notes related to significant accounting estimates are included in the consolidated financial statements.

However, in accordance with transitional treatment stipulated in the proviso of Paragraph 11 of the accounting standard, no information is disclosed for the fiscal year ended March 31, 2020.

(Additional information)

(1) The estimates of reserve for possible loan losses related to the impact of the spread of the novel coronavirus disease (COVID-19) Considering the continuing uncertainty of the spread of COVID-19, estimation of the reserve for possible loan losses associated with COVID-19 is reflected on the consolidated financial statements in the following method.

For potential losses related to individual borrowers due to deterioration in business performance and funding, a reserve for possible loan losses is provided by reviewing, as necessary, borrower category based on the most recent available information.

In addition, for potential losses which cannot be reflected in any of individual borrower category, a reserve for possible loan losses is recorded at an amount deemed necessary based on an overall assessment. The assessment is conducted by specifying the portfolio significantly affected by COVID-19 and estimating the impact of the changes in economic trend and market condition due to the voluntary restraint on the economic activities caused by COVID-19, after consideration of the effect of the government’s financial support on bankruptcy trends.

(2) Transition from the consolidated corporate-tax system to the group tax sharing system

Companies are required to shift from the consolidated corporate-tax system to the group tax sharing system from the fiscal year beginning on or after April 1, 2022, in accordance with the “Act for Partial Amendment of the Income Tax Act, etc.” (Act No. 8, 2020) enacted on March 31, 2020. However, the Company and certain consolidated domestic subsidiaries currently adopting the consolidated corporate-tax system applied the accounting treatment based on the provisions of the Income Tax Act before the revision for the fiscal year ended March 31, 2021, in accordance with the “Practical Solution on the Treatment of Tax Effect Accounting for the Transition from the Consolidated Taxation System to the Group Tax Sharing System” (ASBJ Practical Issue Task Force No. 39, March 31, 2020).

(Notes to consolidated balance sheets)

\*1 Stocks and investments in unconsolidated subsidiaries and affiliates

Stocks and investments in unconsolidated subsidiaries and affiliates at March 31, 2020 and 2021 were as follows:

March 31	Millions of yen	
	2020	2021
Stocks.....	¥943,980	¥960,834
Investments.....	661	847

Stocks of jointly controlled entities were as follows:

March 31	Millions of yen	
	2020	2021
Stocks of jointly controlled entities.....	¥322,598	¥394,160

\*2 Unsecured loaned securities for which borrowers have the right to sell or pledge

The amount of unsecured loaned securities for which borrowers have the right to sell or pledge at March 31, 2020 and 2021 were as follows:

March 31	Millions of yen	
	2020	2021
Japanese government bonds in “Securities” .....	¥—	¥50,045
Trading securities in “Trading assets” .....	—	2,190

As for the unsecured borrowed securities, securities under resale agreements and securities borrowed with cash collateral with rights to sell or pledge without restrictions, those securities pledged, those securities lent and those securities held without being disposed at March 31, 2020 and 2021 were as follows:

March 31	Millions of yen	
	2020	2021
Securities pledged.....	¥11,030,067	¥8,061,819
Securities lent.....	171,224	394,493
Securities held without being disposed .....	2,546,017	4,090,071

\*3 Bankrupt loans and non-accrual loans

Bankrupt loans and non-accrual loans at March 31, 2020 and 2021 were as follows:

March 31	Millions of yen	
	2020	2021
Bankrupt loans .....	¥ 13,978	¥ 69,452
Non-accrual loans .....	378,173	422,551

“Bankrupt loans” are loans, after write-off, to legally bankrupt borrowers as defined in Article 96-1-3 and 96-1-4 of “Order for Enforcement of the Corporation Tax Act” (Cabinet Order No. 97 of 1965) and on which accrued interest income is not recognized as there is substantial doubt about the ultimate collectability of either principal or interest because they are past due for a considerable period of time or for other reasons.

“Non-accrual loans” are loans on which accrued interest income is not recognized, excluding “Bankrupt loans” and loans on which interest payments are deferred in order to support the borrowers’ recovery from financial difficulties.

\*4 Past due loans (3 months or more)

Past due loans (3 months or more) at March 31, 2020 and 2021 were as follows:

March 31	Millions of yen	
	2020	2021
Past due loans (3 months or more) .....	¥14,400	¥16,784

“Past due loans (3 months or more)” are loans on which the principal or interest payment is past due for 3 months or more, excluding “Bankrupt loans” and “Non-accrual loans.”

\*5 Restructured loans

Restructured loans at March 31, 2020 and 2021 were as follows:

March 31	Millions of yen	
	2020	2021
Restructured loans .....	¥221,288	¥430,080

“Restructured loans” are loans on which terms and conditions have been amended in favor of the borrowers (e.g. reduction of the original interest rate, deferral of interest payments, extension of principal repayments or debt forgiveness) in order to support the borrowers’ recovery from financial difficulties, excluding “Bankrupt loans,” “Non-accrual loans” and “Past due loans (3 months or more).”

\*6 Risk-monitored loans

The total amount of bankrupt loans, non-accrual loans, past due loans (3 months or more) and restructured loans at March 31, 2020 and 2021 were as follows:

March 31	Millions of yen	
	2020	2021
Risk-monitored loans .....	¥627,840	¥938,868

The amounts of loans presented in Notes \*3 to \*6 above are the amounts before deduction of reserve for possible loan losses.

\*7 Bills discounted

Bills discounted are accounted for as financial transactions in accordance with JICPA Industry Committee Practical Guidelines No. 24. SMBC and its banking subsidiaries have rights to sell or pledge without restrictions bank acceptance bought, commercial bills discounted, documentary bills and foreign exchanges bought, etc. The total face value at March 31, 2020 and 2021 were as follows:

March 31	Millions of yen	
	2020	2021
Bills discounted .....	¥850,324	¥1,142,755

\*8 Assets pledged as collateral

Assets pledged as collateral at March 31, 2020 and 2021 consisted of the following:

March 31, 2020	Millions of yen	March 31, 2021	Millions of yen
Assets pledged as collateral:		Assets pledged as collateral:	
Cash and due from banks .....	¥ 78,112	Cash and due from banks .....	¥ 15,483
Trading assets .....	834,864	Trading assets .....	713,410
Securities .....	10,502,767	Securities .....	14,933,325
Loans and bills discounted .....	10,679,243	Loans and bills discounted .....	10,152,979

Liabilities corresponding to assets pledged as collateral:		Liabilities corresponding to assets pledged as collateral:	
Deposits .....	21,908	Deposits .....	13,972
Payables under repurchase agreements .....	6,670,132	Payables under repurchase agreements .....	7,516,287
Payables under securities lending transactions .....	2,334,251	Payables under securities lending transactions .....	1,060,066
Borrowed money .....	10,587,419	Borrowed money .....	14,950,162
Due to trust account .....	432,135	Due to trust account .....	588,785
Acceptances and guarantees .....	103,886	Acceptance and guarantees .....	105,700

In addition to the assets presented above, the following assets were pledged as collateral for cash settlements, and substitution for margins of futures transactions and certain other purposes at March 31, 2020 and 2021:

March 31, 2020	Millions of yen	March 31, 2021	Millions of yen
Cash and due from banks .....	¥ 12,543	Cash and due from banks .....	¥ 21
Trading assets .....	1,179,599	Trading assets .....	1,245,065
Securities .....	3,570,617	Securities .....	5,786,331
Loans and bills discounted .....	10,350	Loans and bills discounted .....	9,664

Other assets include collateral money deposited for financial instruments, surety deposits, margin of futures markets and other margins. The amounts for such assets were as follows:

March 31, 2020	Millions of yen	March 31, 2021	Millions of yen
Collateral money deposited for financial instruments ....	¥2,240,739	Collateral money deposited for financial instruments ....	¥2,111,770
Surety deposits .....	87,976	Surety deposits .....	86,727
Margins of futures markets .....	101,838	Margins of futures markets .....	118,372
Other margins .....	46,569	Other margins .....	98,958

\*9 Commitment line contracts on overdrafts and loans

Commitment line contracts on overdrafts and loans are agreements to lend to customers, up to a prescribed amount, as long as there is no violation of any condition established in the contracts. The amounts of unused commitments at March 31, 2020 and 2021 were as follows:

March 31	Millions of yen	
	2020	2021
The amounts of unused commitments .....	¥61,881,806	¥71,255,100
The amounts of unused commitments whose original contract terms are within 1 year or unconditionally cancelable at any time .....	44,330,598	49,932,323

Since many of these commitments are expected to expire without being drawn upon, the total amount of unused commitments does not necessarily represent actual future cash flow requirements. Many of these commitments include clauses under which SMBC and other consolidated subsidiaries can reject an application from customers or reduce the contract amounts in the event that economic conditions change, SMBC and other consolidated subsidiaries need to secure claims, or other events occur. In addition, SMBC and other consolidated subsidiaries may request the customers to pledge collateral such as premises and securities at the time of the contracts, and take necessary measures such as monitoring customers’ financial positions, revising contracts when such need arises and securing claims after the contracts are made.

\*10 Land revaluation excess

SMBC, a consolidated subsidiary of the Company, revalued their own land for business activities in accordance with “Act on Revaluation of Land” (the “Act”) (Act No. 34, effective March 31, 1998) and “Act for Partial Revision of Act on Revaluation of Land” (Act No. 19, effective March 31, 2001). The income taxes corresponding to the net unrealized gains are reported in “Liabilities” as “Deferred tax liabilities for land revaluation excess,” and the Company’s share of the net unrealized gains, net of deferred taxes, are reported as “Land revaluation excess” in “Net assets.”

Date of the revaluation  
March 31, 1998 and March 31, 2002

Method of revaluation (stipulated in Article 3-3 of the Act)  
Fair values were determined by applying appropriate adjustments for land shape and timing of appraisal to the values stipulated in Article 2-3, 2-4 or 2-5 of “Order for Enforcement of Act on Revaluation of Land” (Cabinet Order No. 119 effective March 31, 1998).

\*11 Accumulated depreciation on tangible fixed assets

Accumulated depreciation on tangible fixed assets at March 31, 2020 and 2021 were as follows:

	Millions of yen	
March 31	2020	2021
Accumulated depreciation .....	¥783,544	¥834,990

\*12 Deferred gain on tangible fixed assets deductible for tax purposes

Deferred gain on tangible fixed assets deductible for tax purposes at March 31, 2020 and 2021 were as follows:

	Millions of yen	
March 31	2020	2021
Deferred gain on tangible fixed assets deductible for tax purposes.....	¥62,099	¥55,626
[The consolidated fiscal year concerned].....	[—]	[—]

\*13 Subordinated borrowings

The balance of subordinated borrowings included in “Borrowed money” at March 31, 2020 and 2021 were as follows:

	Millions of yen	
March 31	2020	2021
Subordinated borrowings.....	¥249,000	¥249,000

\*14 Subordinated bonds

The balance of subordinated bonds included in “Bonds” at March 31, 2020 and 2021 were as follows:

	Millions of yen	
March 31	2020	2021
Subordinated bonds .....	¥2,216,743	¥1,922,165

\*15 Borrowings from trust account in relation to covered bonds issued by trust account

The amount of borrowings from trust account in relation to covered bonds issued by trust account included in “Due to trust account” at March 31, 2020 and 2021 were as follows:

	Millions of yen	
March 31	2020	2021
The amount of borrowings from trust account in relation to covered bonds issued by trust account.....	¥432,135	¥588,785

\*16 Guaranteed amount to privately-placed bonds

The amount guaranteed by SMBC and its banking subsidiaries to privately-placed bonds (stipulated by Article 2-3 of the Financial Instruments and Exchange Act) in “Securities” at March 31, 2020 and 2021 were as follows:

	Millions of yen	
March 31	2020	2021
Guaranteed amount to privately-placed bonds .....	¥1,603,941	¥1,431,071

(Notes to consolidated statements of income)

\*1 Other income

“Other” in “Other income” for the fiscal years ended March 31, 2020 and 2021 included the following:

Year ended March 31, 2020	Millions of yen	Year ended March 31, 2021	Millions of yen
Gains on sales of stocks and others .....	¥154,735	Gains on sales of stocks and others .....	¥124,730

\*2 General and administrative expenses

“General and administrative expenses” for the fiscal years ended March 31, 2020 and 2021 included the following:

Year ended March 31, 2020	Millions of yen	Year ended March 31, 2021	Millions of yen
Salaries and related expenses .....	¥618,071	Salaries and related expenses .....	¥646,959
Depreciation expense .....	180,765	Depreciation expense .....	182,240
Research and development costs .....	77	Research and development costs .....	60

\*3 Other expenses

“Other expenses” for the fiscal years ended March 31, 2020 and 2021 included the following:

Year ended March 31, 2020	Millions of yen	Year ended March 31, 2021	Millions of yen
Write-off of loans.....	¥105,307	Write-off of loans.....	¥117,415
Write-off of stocks and others .....	45,374	Expenses related to equity derivatives .....	45,968
		Write-off of stocks and others .....	24,073
		Losses on sale of delinquent loans.....	20,762

\*4 Other extraordinary gains

“Other extraordinary gains” for the fiscal year ended March 31, 2020 and 2021 including the following gains:

Year ended March 31, 2020	Millions of yen	Year ended March 31, 2021	Millions of yen
Gains on step acquisitions .....	¥22,040	Gains on step acquisitions .....	¥404

\*5 Losses on impairment of fixed assets

The differences between the recoverable amounts and the book value of the following asset is recognized as “Losses on impairment of fixed assets,” and included in “Extraordinary losses” for the fiscal year ended March 31, 2020 and 2021.

Year ended March 31, 2020			Millions of yen
Area	Purpose of use	Type	Impairment loss
Tokyo metropolitan area .....	Branches (21 items)	Land and buildings, etc.	¥ 2,180
	Idle assets (87 items)		6,221
Kinki area .....	Branches (7 items)	Land and buildings, etc.	769
	Idle assets (57 items)		1,105
Other area in Japan.....	Branches (5 items)	Land and buildings, etc.	456
	Idle assets (20 items)		609
Americas .....	Lease assets for freight cars	Assets for rent	13,805
—	—	Goodwill and other intangible fixed assets	39,958
Year ended March 31, 2021			Millions of yen
Area	Purpose of use	Type	Impairment loss
Tokyo metropolitan area .....	Branches (6 items)	Land and buildings, etc.	¥ 873
	Idle assets (164 items)		7,786
Kinki area .....	Branches (1 item)	Land and buildings, etc.	16
	Idle assets (56 items)		2,415
Other .....	Branches (6 items)	Land and buildings, etc.	128
	Idle assets (20 items)		390
—	—	Goodwill	30,914

As for land and buildings, etc., at SMBC, a consolidated subsidiary of the Company, a branch, which continuously manages and determines its income and expenses, is the smallest unit of asset group for recognition and measurement of impairment loss of fixed assets. Assets such as corporate headquarters facilities, training facilities, data and system centers, and health and recreational facilities which do not produce cash flows that can be attributed to individual assets are treated as corporate assets. As for idle assets, impairment loss is measured individually. At other consolidated subsidiaries, a branch or other group is the smallest asset grouping unit as well.

The carrying amounts of idle assets at SMBC are reduced to their recoverable amounts, and the decreased amounts are included in “Extraordinary losses” as “Losses on impairment of fixed assets,” if there are indicators that the invested amounts may not be recoverable.

The recoverable amount is calculated using net realizable value which is basically determined by subtracting the expected disposal cost from the appraisal value based on the Real Estate Appraisal Standard.

Assets for rent are grouped by type of freight cars. For the fiscal year ended March 31, 2020, the carrying amounts of some of the freight cars were reduced to their recoverable amounts, and the decreased amounts were included in “Extraordinary losses” as “Losses on impairment of fixed assets,” as the invested amounts were considered not to be recoverable. The recoverable amount is measured by value in use, which is calculated by discounting future cash flows by 6%.

For goodwill and other intangible fixed assets, a consolidated subsidiary is the main unit of asset group. For the fiscal year ended March 31, 2020, SMBC Trust Bank Ltd. reviewed its future cash flows in view of the current market environment. As a result, all of the unamortized balance of goodwill and other intangible fixed assets at the end of the fiscal year ended March 31, 2020 were included in “Extraordinary losses” as “Losses on impairment of intangible fixed assets,” as the carrying amounts of the aforementioned assets associated with its PRESTIA business were considered not to be recoverable. The recoverable amount is measured by value in use, which is calculated by discounting future cash flows by 6%. For the fiscal year ended March 31, 2021, Sumitomo Mitsui DS Asset Management Company, Limited reviewed its future cash flows because it underperformed its full-year targets despite upward trend in its performance from the second half. This review found that the carrying amount of goodwill may not be recoverable, and as a result, ¥30.9 billion of unamortized balance of goodwill at the end of the fiscal year ended March 31, 2021 was recorded as “Losses on impairment of fixed assets” under “Extraordinary losses.” The recoverable amount is measured by value in use, which is calculated by discounting future cash flows by 9%.

(Notes to consolidated statements of comprehensive income)

\*1 Reclassification adjustment and tax effect of other comprehensive income

Year ended March 31	Millions of yen	
	2020	2021
Net unrealized gains (losses) on other securities:

More than 2 years to 3 years .....	23,880	19,846
More than 3 years to 4 years .....	16,453	15,304
More than 4 years to 5 years .....	13,612	16,973
More than 5 years .....	150,848	178,149
Total.....	¥258,052	¥288,189

- 2. Operating leases
(1) Lessee side
Future minimum lease payments on operating leases which were not cancelable were as follows:

	Millions of yen	
March 31	2020	2021
Due within 1 year.....	¥ 42,384	¥ 39,033
Due after 1 year.....	247,206	223,555
Total.....	¥289,591	¥262,589

- (2) Lessor side
Future minimum lease payments on operating leases which were not cancelable were as follows:

	Millions of yen	
March 31	2020	2021
Due within 1 year.....	¥ 31,498	¥26,601
Due after 1 year.....	72,655	58,759
Total.....	¥104,154	¥85,361

(Notes to financial instruments)

- 1. Status of financial instruments
(1) Policies on financial instruments
The Group conducts banking and other financial services such as leasing, securities, consumer finance, system development and information processing. Its banking business includes deposit taking, lending, securities trading and investment, remittance and transfer, foreign exchange, bond subscription agent, trust business, and over-the-counter sales of securities investment trusts and insurance products.
These services entail holding of financial assets such as loans and bills discounted, bonds, and stocks. Meanwhile, the Group raises funds through deposit taking, borrowing, bond offering, etc. Furthermore, it undertakes derivative transactions to meet customers’ hedging needs to control market risk associated with deposit taking and lending (“ALM purposes”), and to make profit on short-term fluctuations in interest rates, foreign exchange rates, etc. (“trading purposes”). At SMBC, the Company’s major consolidated subsidiary, derivative transactions for ALM purposes are undertaken by the Treasury Dept. and the International Treasury Dept. of the Treasury Unit, while derivative transactions for trading purposes are undertaken by the Trading Dept. of the Treasury Unit (derivative transactions for both ALM and trading purposes are undertaken by the Asia and Oceania Treasury Dept. in Asia and Oceania region, and are undertaken by the East Asia Treasury Dept. in East Asia region).
(2) Details of financial instruments and associated risks
1) Financial assets
The main financial assets held by the Group include loans to foreign and domestic companies and domestic individuals, and securities such as bonds (government and corporate bonds) and stocks (foreign and domestic stocks), etc. Bonds such as government bonds are held for both trading and ALM purposes, and certain bonds are held as held-to-maturity securities. Stocks are held mainly for strategic purposes. These assets expose the Group to credit risk, market risk and liquidity risk. Credit risk is the risk of loss arising from nonperformance of obligations by the borrower or issuer due to factors such as deterioration in the borrower’s/issuer’s financial conditions. Market risk is the risk stemming from fluctuations in interest rates, exchange rates, or share prices. Liquidity risk is the risk arising from difficulty executing transactions in desired quantities at appropriate prices due to low market liquidity. These risks are properly monitored and managed based on “(3) Risk management framework for financial instruments” below.
2) Financial liabilities
Financial liabilities of the Group include borrowed money and bonds, etc. in addition to deposits. Deposits mainly comprise deposits of domestic and foreign companies and domestic individuals. Borrowed money and bonds include subordinated borrowings and subordinated bonds with special clause specifying that the repayment order of borrowing or bond subordinates to other borrowings or bonds. Also, financial liabilities, like financial assets, expose the Group to not only market risk but also funding liquidity risk: the risk of the Group not being able to raise funds due to market turmoil, deterioration in the Group’s creditworthiness or other factors. These risks are properly monitored and managed based on “(3) Risk management framework for financial instruments” below.
3) Derivative transactions
Derivatives handled by the Group include foreign exchange futures; futures, forwards, swaps and options related to interest rates, currencies, equities, bonds and commodities; and credit and weather derivatives.
Major risks associated with derivatives include market risk, liquidity risk, and credit risk arising from nonperformance of contractual obligations due to deterioration in the counterparty’s financial conditions. These risks are properly monitored and managed based on “(3) Risk management framework for financial instruments” below.
Hedge accounting is applied to derivative transactions executed for ALM purposes, as necessary. Hedging instruments, hedged items, hedging policy and hedging method to assess the effectiveness of the hedge are described in “(Significant accounting policies for preparing consolidated financial statements), 4. Accounting policies, (16) Hedge accounting.”
(3) Risk management framework for financial instruments
The fundamental matters on risk management for the entire Group are set forth in “Regulations on Comprehensive Risk Management.” The Company’s Management Committee establishes the basic risk management policy for the entire Group, based on the regulations, which is then approved by the Board of Directors. Each Group company has a risk management system based on the characteristics of its particular businesses and in accordance with the basic policy. Furthermore, the Group CRO is established to assess risk management across the Group unitarily and implement appropriate risk management. The Company is sharing information on group-wide risk management and strengthening related systems through the Group CRO Committee, which consists of the Group CRO and risk management representatives from strategically important Group companies.
1) Management of credit risk
The Company has established fundamental principles on credit risk management to thoroughly manage the credit risk of the entire Group. Each group company conducts integrated management of credit risk according to its operational characteristics, and the credit risk inherent in the entire portfolio as well as the risk in individual credits are managed quantitatively and continuously.
(a) Credit risk management system
The Group CRO formulates credit risk management policies each year based on the group-wide basic policies for risk management. Meanwhile, the Credit & Investment Planning Dept. is responsible for the comprehensive management of credit risk. This department drafts and administers credit risk regulations, including the Group’s credit policies, and performs credit portfolio management including non-performing loans. The Company has also established the Credit Risk Committee to serve as a body for deliberating on matters related to group-wide credit portfolios.

At SMBC, the Company's major consolidated subsidiary, the Credit & Investment Planning Dept. of the Risk Management Unit is responsible for the comprehensive management of credit risk. This department establishes, revises or abolishes credit policies, the internal rating system, credit authority regulations, credit application regulations, and manages non-performing loans and other aspects of credit portfolio management. The department also controls SMBC's total credit risk by quantifying credit risk (*i.e.* calculating risk capital and risk-weighted assets) in cooperation with the Corporate Risk Management Dept. Moreover, the Credit Portfolio Management Dept. within the Credit & Investment Planning Dept. works to stabilize SMBC's overall credit portfolio through selling credit derivatives and loan claims.

The credit departments of each business unit together with branches conduct credit risk management for loans handled by their units and manage their units' portfolios. Credit approval authority is generally determined based on the credit amounts and internal grades, and the credit departments focus on analysis and management of customers and transactions with relatively high credit risk. The Credit Administration Dept. is mainly responsible for formulating and implementing measures to reduce the exposure of non-performing loans. Through industrial and sector-specific surveys and studies of individual companies, the Corporate Research Dept. works to form an accurate idea of the circumstances of borrower companies and identify those with potentially troubled credit positions at early stage.

Moreover, the Credit Risk Committee, a cross-departmental consultative body, rounds out SMBC's oversight systems for undertaking flexible and efficient control of credit risk and ensuring the overall soundness of SMBC's loan operations.

In addition to these, the Internal Audit Unit, operating independently of the business units, audits asset quality, grading accuracy, self-assessment, and appropriateness of the credit risk management system, and reports the audit results to the Management Committee and the Audit Committee.

(b) Method of credit risk management

The Company properly manages the credit risk inherent in individual loans and the entire portfolio by assessing and quantifying the credit risk of each borrower/loan using the internal rating system. In addition to management of individual loans through credit screening and monitoring, it manages the credit portfolio as described below in order to secure and improve the credit portfolio's soundness and medium-term profitability.

- Appropriate risk-taking within capital  
To keep credit risk exposure to a permissible level relative to capital, the Company sets the upper limit of the permissible risk of overall risk capital, which represents the soundness of the risk appetite index, based on each business unit's risk appetite and portfolio plan, and monitors the credit risk capital as part of permissible risk.
- Controlling concentration of risk  
Because concentration of credit risk in an industry or corporate group has the potential to impair the Company's capital significantly, the Company implements measures to prevent excessive concentration of loan in a single industry and to control large exposure to individual borrowers by setting maximum loan amounts and conducting loan reviews thoroughly. To manage country risk, the Company also has credit limit guidelines based on each country's creditworthiness.
- Greater understanding of actual corporate conditions and balancing returns and risks  
The Company runs credit operations on the basic principle of thoroughly understanding actual corporate conditions and gaining profit commensurate with the level of credit risk entailed, and makes every effort to improve profit at after-cost (credit cost, capital cost and overhead cost) level.
- Reduction and prevention of non-performing loans

For non-performing loans and potential non-performing loans, the Company carries out loan reviews to clarify credit policies and action plans, enabling it to swiftly implement measures to prevent deterioration of borrowers' business situations, support business recoveries, collect on loans, and enhance loan security.

In regard to financial instruments such as investments in certain funds, securitized products and credit derivatives that indirectly retain risks related to assets such as corporate bonds and loan claims (underlying assets), such instruments entail market and liquidity risks in addition to credit risk, since such instruments are traded on the market. Credit risk management for these instruments involving detailed analysis and evaluation of characteristics of underlying assets is performed while market risk is comprehensively managed within the framework for managing market and liquidity risks. Moreover, guidelines have been established based on the characteristics of each type of risk to appropriately manage risks of incurring losses.

In regard to credit risk of derivative transactions, the potential exposure based on the market price is regularly calculated and properly managed. When the counterparty is a financial institution with which the Company frequently conducts derivative transactions, measures such as a close-out netting provision, which provide offsetting credit exposures between two parties in a single net payment from one party to the other in case of bankruptcy or other default event, are implemented to reduce credit risk.

2) Management of market and liquidity risks

The Company manages market and liquidity risks across the entire Group by setting allowable risk limits; ensuring the transparency of the risk management process; and clearly separating front-office, middle-office, and back-office operations for a highly efficient system of mutual checks and balances.

(a) Market and liquidity risk management systems

In accordance with the group-wide basic policies for risk management decided upon by the Management Committee, the Company determines important matters relating to the management of market and liquidity risks, such as basic policies and risk limits, in order to manage these risks. The ALM Committee meets four times a year, in principle, to report on the state of market and liquidity risk management and to discuss ALM operation policies. The Corporate Risk Management Dept., which is independent from the business units that directly handle market transactions, manages market and liquidity risks in an integrated manner. This department not only monitors the current risk situations but also reports regularly to the Management Committee and the Audit Committee. Furthermore, the ALM Committee at SMBC, the core bank of the Company, meets on a monthly basis to examine reports on the state of observance of limits on market and liquidity risks and to discuss ALM operation policies.

In addition, the Internal Audit Dept., which is independent of other departments, periodically performs comprehensive internal audits to verify that the risk management framework is properly functioning and reports the audit results to the Management Committee and the Audit Committee.

(b) Market and liquidity risk management methodology

• Market risk management

The Company manages market risk by setting maximum loss and VaR (value at risk: maximum potential loss that may be incurred to a specific financial instrument for a given probability) within the market risk capital limit, which is set taking into account stockholders' equity and other factors in accordance with the market transaction policies.

The Company uses the historical simulation method (a method for estimating the maximum loss by running simulations of changes in profit and loss on market fluctuations scenarios based on historical data) to measure VaR. Regarding banking activities (activities for generating profit through management of interest rates, terms, and other aspects such as loans and bonds in assets, deposits in liabilities) and trading activities (activities for generating profit by taking advantage of short-term fluctuations in market values and differences in value among markets), the Company calculates the maximum loss that may occur as a result of market fluctuations in 1 day with a probability of 1% based on 4 years of historical observation. With regard to the holding of shares (such as listed shares) for the purpose of strategic investment, the Company calculates the maximum loss that may occur as a result of market fluctuations in 1 year with a probability of 1% based on 10 years of historical observation.

Regarding risks associated with foreign exchange rates, interest rates, equity risk, option prices and other market risk factors, the Company manages such risks by setting a maximum limit on the indicator suited for each market risk factor such as BPV (basis point value: denotes the change in value of a financial instrument resulting from a 0.01 percentage-point change in the yield).

• Quantitative information on market risks

As of March 31, 2021, total VaR of SMBC and its major consolidated subsidiaries was ¥55.0 billion for the banking activities, ¥20.7 billion for the trading activities and ¥1,284.1 billion for the holding of shares (such as listed shares) for the purpose of strategic investment.

However, it should be noted that these figures are statistical figures that change according to changes in assumptions and calculation methods, and may not cover the risk of future market conditions fluctuating drastically compared to market fluctuations of the past.

• Liquidity risk management

The Company manages liquidity risk based on the framework of "setting management levels of risk appetite indicators" and "developing contingency plans." Risk appetite indicators are quantitative benchmarks that select the types and indicate the levels of risk that the Company is willing to take on or tolerate. As an example, the Company sets a lower limit on the number of days over which cash flows could be maintained under the stress conditions such as deposit outflow, so as to secure funding sources that do not fall below the benchmark to avoid excessive reliance on short term funding. In addition, the Company develops contingency plans consisting of instructions, reporting lines and action plans in case of emergency.

Moreover, to manage the liquidity risk of marketable instruments, derivative transactions, etc., the Company has trading limits for each business office classified by currency, instrument, transaction period, etc. As for financial futures, etc., risks are managed by restricting positions to within a certain percentage of open interest in the entire market.

(4) Supplementary explanations about matters concerning fair value of financial instruments

Fair values of financial instruments are based on their market prices and, in cases where market prices are not available, on reasonably calculated prices. These prices have been calculated using certain assumptions, and may differ if calculated based on different assumptions.

2. Matters concerning fair value of financial instruments and breakdown by input level

The amounts on the consolidated balance sheet and the fair value of financial instruments as well as the difference between them are as follows.

The amounts shown in the following tables do not include stocks with no market price, etc., and investments in partnerships (refer to Note 3).

The fair values of financial instruments are classified into the following three levels depending on the observability and significance of the input used in the fair value measurement.

Level 1: Fair value determined based on the (unadjusted) quoted price in an active market for the same asset or liability

Level 2: Fair value determined based on directly or indirectly observable inputs other than Level 1 inputs

Level 3: Fair value determined based on significant unobservable inputs

If multiple inputs with a significant impact are used for the fair value measurement of a financial instrument, the financial instrument is classified to the lowest priority level of fair value measurement in which each input belongs.

(1) Financial assets and liabilities at fair value on the consolidated balance sheets

	Millions of yen
March 31, 2020	Consolidated balance sheet amount
Monetary claims bought	¥ 718,948
Trading assets	
Securities classified as trading purposes *1	2,687,362
Money held in trust	353
Securities	
Other securities *1	24,838,288
Total assets	¥28,244,952
Trading liabilities	
Trading securities sold for short sales *1	¥ 1,927,964
Total liabilities	¥ 1,927,964
Derivative transactions *2, 3	
Interest rate derivatives	¥ 826,249
Currency derivatives	(27,773)
Equity derivatives	(301)
Bond derivatives	9,174
Commodity derivatives	2,181
Credit derivative transactions	2,856
Total derivative transactions	¥ 812,386

\*1 The amount of investment trusts for which transitional measures are applied in accordance with Paragraph 26 of the “Implementation Guidance on Accounting Standard for Fair Value Measurement” (ASBJ Guidance No.31, hereinafter, “Guidance for Application of Fair Value Measurement”) are not included in the table above. The amount of such investment trusts on the consolidated balance sheet includes financial assets of ¥711,938 million and financial liabilities of ¥84,511 million.

\*2 The amounts collectively represent the derivative transactions which are recorded on “Trading assets,” “Trading liabilities,” “Other assets” and “Other liabilities.” Debts and credits arising from derivative transactions are presented on a net basis, with a net debt presented in round brackets.

\*3 As for derivative transactions applying hedge accounting, ¥294,816 million is recorded on the consolidated balance sheet.

	Millions of yen			
	Consolidated balance sheet amount			
March 31, 2021	Level 1	Level 2	Level 3	Total
Monetary claims bought	¥ —	¥ 276,989	¥454,827	¥ 731,817

Credit derivative transactions	—	(6,512)	796	(5,716)
Total derivative transactions	¥ (4,751)	¥ 502,601	¥ 28,314	¥ 526,164

\*1 The amount of investment trusts for which transitional measures are applied in accordance with Paragraph 26 of the Guidance for Application of Fair Value Measurement are not included in the table above. The amount of such investment trusts on the consolidated balance sheet includes financial assets of ¥1,200,314 million and financial liabilities of ¥1,510 million.

\*2 The amounts collectively represent the derivative transactions which are recorded in “Trading assets,” “Trading liabilities,” “Other assets” and “Other liabilities.” Debts and credits arising from derivative transactions are presented on a net basis, with a net debt presented in round brackets.

\*3 As for derivative transactions applying hedge accounting, ¥207,017 million is recorded on the consolidated balance sheet. These are interest rate swap and other derivative transactions designated as hedging instruments for stabilizing cash flows of loans and bills discounted, etc., that are hedged items. The Company has mainly applied deferred hedge accounting for those derivative transactions. For these hedging relationships, the Company has applied “Practical Solution on the Treatment of Hedge Accounting for Financial Instruments that Reference LIBOR” (PITF No.40, September 29, 2020).

(2) Financial assets and liabilities which are not stated at fair value on the consolidated balance sheet

Cash and due from banks, Call loans and bills bought, Receivables under resale agreements, Receivables under securities borrowing transactions, Foreign exchanges, Call money and bills sold, Payable under repurchase agreements, Payable under securities lending transactions, Commercial papers, and Short-term bonds payable are not included in the following tables since they are mostly short-term, and their fair values approximate their carrying amounts.

	Millions of yen		
	Consolidated balance sheet amount	Fair value	Net unrealized gains (losses)
March 31, 2020			
Monetary claims bought *	¥ 3,837,831	¥ 3,869,321	¥ 31,490
Securities			
Bonds classified as held-to-maturity	282,379	282,519	140
Loans and bills discounted	82,517,609		
Reserve for possible loan losses *	(301,752)		
	82,215,856	84,118,833	1,902,976
Lease receivables and investment assets *	219,548	218,858	(690)
Total assets	¥ 86,555,615	¥ 88,489,532	¥1,933,917
Deposits	¥127,042,217	¥127,049,743	¥ 7,526
Negotiable certificates of deposit	10,180,435	10,187,496	7,060
Borrowed money	15,210,894	15,254,734	43,839
Bonds	9,235,639	9,360,807	125,167
Due to trust account	1,811,355	1,824,319	12,964
Total liabilities	¥163,480,542	¥163,677,101	¥ 196,558

\* General reserves and special reserves corresponding to loans are deducted. The reserve for possible loan losses on “Monetary claims bought” and “Lease receivables and investment assets” are deducted directly from consolidated balance sheet amount since they are immaterial.

\* General reserves and special reserves corresponding to loans are deducted. The reserve for possible loan losses on "Monetary claims bought" and "Lease receivables and investment assets" are deducted directly from consolidated balance sheet amount since they are immaterial.

(Note 1) Description of the valuation techniques and inputs used to measure fair value

#### Assets

##### Monetary claims bought

The fair values of subordinated trust beneficiary interests related to securitized housing loans among monetary claims bought are determined by estimating future cash flows using the probability of default, loss given default and prepayment rate, and assessing the value by deducting the value of senior beneficial interests, etc. from the value of underlying housing loans. The fair values of other transactions are, in principle, based on methods similar to the methods applied to Loans and bills discounted.

These transactions are mainly classified into Level 3.

##### Trading assets

The fair values of bonds and other securities held for trading purposes are, in principle, based on their market prices at the end of the period.

The fair values of such bonds and other securities are mainly classified into Level 1 depending on the level of market activity. When fair value is determined based on either the prices quoted by the financial institutions, or future cash flows discounted using observable inputs such as interests, spreads, and others, they are classified into Level 2.

##### Money held in trust

The fair values of money held in trust are, in principle, fair values of securities in trust property calculated by the same method as for securities that the Company owns. They are classified into Level 2.

##### Securities

In principle, the fair values of stocks (including foreign stocks) are based on the market price as of the end of the fiscal year ended March 31, 2021. They are mainly classified into Level 1 depending on the level of market activity. The fair values of securities with market prices other than stocks are based on the market price as of the end of the fiscal year ended March 31, 2021. Japanese Government bonds are classified into Level 1 and other bonds are classified into Level 2.

The fair values of privately-placed bonds with no market prices are based on the present value of estimated future cash flows, taking into account the borrower's probability of default, loss given default, etc. Those present values are discounted by a rate comprising a risk free interest rate with certain adjustment. However, the fair values of bonds, such as privately-placed bonds issued by bankrupt borrowers, effectively bankrupt borrowers and potentially bankrupt borrowers are based on the bond's book value after the deduction of the expected amount of a loss on the bond computed by using the same method applied to the estimation of a loan loss.

These transactions are classified into Level 2.

##### Loans and bills discounted, and Lease receivables and investment assets

Of these transactions, considering the characteristics of these transaction, the fair values of overdrafts with no specified repayment dates are their book values as they are considered to approximate their fair values.

For short-term transactions, the fair values are also their book values as they are considered to approximate their fair values.

The fair values of long-term transactions are, in principle, based on the present value of estimated future cash flows taking into account the borrower's probability of default, loss given default, etc. Those present values are discounted by a rate comprising a risk free interest rate with certain adjustment. At certain consolidated subsidiaries of the Company, the fair values are calculated based on the present values of estimated future cash flows, which are computed based on the contractual interest rate. Those present values are discounted by a rate comprising a risk-free rate and a credit risk premium.

Regarding claims on bankrupt borrowers, effectively bankrupt borrowers and potentially bankrupt borrowers, expected losses on such claims are calculated based on either the expected recoverable amount from disposal of collateral or guarantees, or the present value of expected future cash flows. Since the claims' consolidated balance sheet amounts minus the expected amount of loan losses approximate their fair values, such amounts are considered to be their fair values.

These transactions are classified into Level 3.

#### Liabilities

##### Trading liabilities

The fair values of bonds sold for short sales and other securities for trading purposes are, in principle, based on their market prices at the end of the fiscal year ended March 31, 2021. They are mainly classified into Level 1.

##### Deposits, Negotiable certificates of deposit, and Due to trust account

Out of these transactions, the fair values of demand deposits and deposits without maturity are their book values. The fair values of transactions with a short-term remaining maturity are also their book values, as their book values are regarded to approximate their fair values. The fair values of transactions with a long-term remaining maturity are, in principle, based on the present value of estimated future cash flows discounted by the interest rate assuming that the same type of deposit is newly accepted until the end of the remaining maturity.

The fair values of borrowings from the trust account related to covered bond issued by the trust account are based on the amount calculated in accordance with the price quoted by industry associations, etc.

These transactions are classified into Level 2.

##### Borrowed money and Bonds

The fair values of short-term transactions are their book values, as their book values are considered to approximate their fair values. For long-term transactions, their fair values are based on the present value of estimated future cash flows discounted using the refinancing rate applied to the same type of instruments for the remaining maturity.

For transactions with the price quoted by industry associations, etc., fair value is based on the amount calculated by using the published price data, yield data, etc.

These transactions are classified into Level 2.

##### Derivative transactions

The fair values of listed derivatives are based on their closing prices. The fair values of over-the-counter derivative transactions are based on the present value of the future cash flows, option valuation models, etc., using inputs such as interest rate, foreign exchange rate, stock price, commodity price, etc.

Over-the-counter derivative transactions takes into account the counterparty's and the Company's credit risks, and the liquidity risks of the unsecured lending funds. Listed derivative transactions are mainly classified into Level 1. Over-the-counter derivative transactions are classified into Level 2 if observable inputs are available or impact of unobservable inputs to the fair values is not significant. If impact of unobservable inputs to the fair values is significant, they are classified into Level 3.

(Note 2) Quantitative information about financial assets and liabilities measured and stated on the consolidated balance sheet at fair value and classified in Level 3

1) Quantitative information on significant unobservable inputs

	Valuation technique	Significant unobservable inputs	Range
Monetary claims bought	Discounted cash flow	Probability of default	0.1% — 100.0%
		Loss given default	0.0% — 51.4%
		Prepayment rate	2.0% — 7.5%
Trading assets:			
Securities classified as trading purposes	Option valuation model	Equity volatility	24.6% — 57.6%
Securities:			
Other securities	Discounted cash flow	Probability of default	7.9% — 100.0%
		Loss given default	0.0% — 80.2%
Derivative transactions:			
Interest rate derivatives	Option valuation model	Correlation between interest rates	14.9% — 98.0%
Currency derivatives	Option valuation model	Correlation between interest rates	26.7% — 98.0%
		Correlation between interest rate and foreign exchange rate	13.9% — 47.6%
		Foreign exchange rate volatility	8.9% — 14.8%
		Correlation between equities	47.1% — 93.1%
Equity derivatives	Option valuation model	Correlation between foreign exchange rate and equity	(26.0)% — (2.6)%
		Equity volatility	16.6% — 55.9%
		Correlation between foreign exchange rate and CDS* spread	15.0% — 90.0%
Credit derivatives	Credit default model		

\* Credit Default Swap

2) Reconciliation between the beginning and ending balance, and net unrealized gains (losses) recognized in the earnings of the period

Millions of yen								
	Beginning balance	Earnings of the period*1	Other comprehensive income*2	Net amount of purchase, sale, issuance and settlement	Transfer to Level 3*3	Transfer from Level 3*4	Ending balance	Net unrealized gains (losses) on financial assets and liabilities held at consolidated balance sheet date among the amount recognized in the earnings of the period
Monetary claims bought .....	¥451,033	¥ —	¥ 4,789	¥ (994)	¥ —	¥ —	¥454,827	¥ —
Trading assets .....	152	3,499	—	(3,383)	1	—	270	184

Currency .....	1,721	3,038	—	—	—	47	4,807	3,297
Equity .....	32,865	(13,462)	—	2,293	—	—	21,696	10,855
Credit derivative .....	2,240	(1,444)	—	—	—	—	796	(709)
Total	¥525,544	¥(11,145)	¥ 3,274	¥(30,251)	¥48,306	¥ (122)	¥535,605	¥ 9,408

\*1 The amounts shown in the table above are included in consolidated statements of income.

\*2 The amounts shown in the table above are included in “Net unrealized gains (losses) on other securities” under “Other comprehensive income (losses).”

\*3 Transfer from Level 2 to Level 3 due to an increase in the impact on the fair value of unobservable inputs for privately-placed bonds etc. The transfer was made at the beginning of the fiscal year ended March 31, 2021.

\*4 Transfer from Level 3 to Level 2 due to a decrease in the impact on the fair value of unobservable inputs for privately-placed bonds etc. The transfer was made at the beginning of the fiscal year ended March 31, 2021.

3) Description of the fair value valuation process

At the Company, the middle division establishes policies and procedures for the calculation of fair value, and the front division develops valuation models in accordance with such policies and procedures. The middle division verifies the reasonableness of the fair value valuation models, the inputs used, and the appropriateness of the classified fair value level of the calculated fair value.

Observable data is utilized as much as possible for the valuation model. If quoted prices obtained from third parties are used, those values are verified by comparison with results recalculated by the Company using the inputs for the valuation.

4) Description of the sensitivity of the fair value to changes in significant unobservable inputs

Probability of default

Probability of default represents the likelihood that the default will occur, and is calculated based on actual defaults in the past. A significant increase (decrease) in the default rate would result in a significant decrease (increase) in a fair value.

Loss given default

Loss given default is the proportion of estimated losses in the event that default occurs to the total balance of bonds or loans and bills discounted, and is calculated based on actual defaults in the past. A significant increase (decrease) in loss given default would result in a significant decrease (increase) in a fair value.

Prepayment rate

Prepayment rate is the proportion of estimated principals assuming that prepayment is made in each period. In general, a significant change in loss given default would result in a significant increase or decrease in a fair value according to the contractual terms and conditions.

Volatility

Volatility is an indicator that represents the estimation of severity of change over a certain period in values of inputs and market values. Volatility is estimated based on actual results in the past, information derived from third parties and other analysis approach. Volatility is mainly used in valuation of derivatives that refer to potential changes of interest rate, foreign exchange rate, stock price, etc. A significant increase (decrease) in volatility would generally result in a significant increase (decrease) in a fair value.

Correlation

Correlation is an indicator of the relation of variables such as interest rate, foreign exchange rate, Credit Default Swap (CDS) spread and stock price. Correlation is estimated based on actual results in the past, and is mainly used in valuation technique of complex derivatives, etc. A significant change in correlation would generally result in a significant increase or decrease in a fair value according to the contractual terms and conditions of the financial instrument.

(Note 3) Consolidated balance sheet amounts of stocks with no market prices, etc. and investments in partnership, etc. are as follows. In accordance with Paragraph 5 of ASBJ Guidance No.19, “Implementation Guidance on Disclosures about Fair Value of Financial Instruments,” and Paragraph 27 of “Guidance for Application of Fair Value Measurement,” these amounts are not included in “Trading assets” and “Securities” stated on the tables disclosed in “Matters concerning fair value of financial instruments and breakdown by input level”:

	Millions of yen	
	March 31, 2020	March 31, 2021
Stocks with no market prices, etc.*1, 2 .....	¥174,347	¥187,204
Investments in partnership, etc.*2 .....	242,674	278,072
Total .....	¥417,022	¥465,276

\*1 Unlisted stocks are included in stocks with no market prices, etc.

\*2 Unlisted stocks and investments in partnership totaling ¥22,903 million and ¥20,644 million were written-off in the fiscal year ended March 31, 2020 and 2021, respectively.

## (Note 4) Redemption schedule of monetary claims and securities with maturities

March 31, 2020	Millions of yen			
	Within 1 year	After 1 year through 5 years	After 5 years through 10 years	After 10 years

Japanese government bonds.....	7,318,109	6,970	(3,812)
Japanese local government bonds.....	—	—	—
Japanese corporate bonds.....	84,879	408	—
Other .....	9,545,072	164,069	(47,591)
Total.....	¥17,087,264	¥254,745	¥(56,397)

6. Change of classification of securities

Fiscal year ended March 31, 2020

There are no significant corresponding transactions to be disclosed.

Fiscal year ended March 31, 2021

There are no significant corresponding transactions to be disclosed.

7. Write-down of securities

Bonds classified as held-to-maturity and other securities (excluding other securities whose consolidated balance sheet amounts are not measured at fair value) are considered as impaired if the fair value decreases materially below the acquisition cost and such decline is not considered as recoverable. The fair value is recognized as the consolidated balance sheet amount and the amount of write-down is accounted for as valuation loss for the fiscal year. Valuation losses for the fiscal years ended March 31, 2020 and 2021 were ¥23,000 million and ¥8,480 million, respectively. The rule for determining “material decline” is as follows and is based on the classification of issuers under the rules of self-assessment of assets.

Bankrupt/Effectively bankrupt/Potentially bankrupt issuers:	Fair value is lower than acquisition cost.
Issuers requiring caution:	Fair value is 30% or lower than acquisition cost.
Normal issuers:	Fair value is 50% or lower than acquisition cost.
Bankrupt issuers: Issuers that are legally bankrupt or formally declared bankrupt.	
Effectively bankrupt issuers: Issuers that are not legally bankrupt but regarded as substantially bankrupt.	
Potentially bankrupt issuers: Issuers that are not bankrupt now, but are perceived to have a high risk of falling into bankruptcy.	
Issuers requiring caution: Issuers that are identified for close monitoring.	
Normal issuers: Issuers other than the above 4 categories of issuers.	

(Notes to money held in trust)

1. Money held in trust classified as trading purposes

Fiscal year ended March 31, 2020

There are no corresponding transactions.

Fiscal year ended March 31, 2021

There are no corresponding transactions.

2. Money held in trust classified as held-to-maturity

Fiscal year ended March 31, 2020

There are no corresponding transactions.

Fiscal year ended March 31, 2021

There are no corresponding transactions.

3. Other money held in trust

March 31, 2020	Millions of yen		
	Consolidated balance sheet amount	Acquisition cost	Net unrealized gains (losses)
Other money held in trust .....	¥353	¥353	—

March 31, 2021	Millions of yen		
	Consolidated balance sheet amount	Acquisition cost	Net unrealized gains (losses)
Other money held in trust .....	¥309	¥309	—

(Notes to net unrealized gains (losses) on other securities)

The breakdown of “Net unrealized gains (losses) on other securities” reported on the consolidated balance sheets is as shown below:

March 31, 2020	Millions of yen
Net unrealized gains (losses) .....	¥1,918,660
Other securities .....	1,918,660
Other money held in trust .....	—
(-) Deferred tax liabilities .....	453,080
Net unrealized gains (losses) on other securities (before following adjustments) .....	1,465,580
(-) Non-controlling interests.....	103,969
(+) The Company's interest in net unrealized gains (losses) on valuation of other securities held by equity method affiliates.....	9,795
Net unrealized gains (losses) on other securities .....	¥1,371,407

Notes: 1. Net unrealized losses of ¥26,403 million for the fiscal year ended March 31, 2020 recognized in the fiscal year's earnings by applying fair value hedge accounting are deducted from net unrealized gains on other securities.  
2. Net unrealized gains (losses) on other securities include foreign currency translation adjustments on foreign currency denominated securities whose fair value is extremely difficult to determine.  
3. Non-controlling interests include equity acquired from non-controlling stockholders.

March 31, 2021	Millions of yen
Net unrealized gains (losses) .....	¥2,931,364
Other securities .....	2,931,364
Other money held in trust .....	—
(-) Deferred tax liabilities .....	747,355
Net unrealized gains (losses) on other securities (before following adjustments) .....	2,184,009
(-) Non-controlling interests.....	105,206
(+) The Company's interest in net unrealized gains (losses) on valuation of other securities held by equity method affiliates.....	15,802
Net unrealized gains (losses) on other securities .....	¥2,094,605

Notes: 1. Net unrealized gains of ¥399 million for the fiscal year ended March 31, 2021 recognized in the fiscal year's earnings by applying fair value hedge accounting are deducted from net unrealized gains on other securities.  
2. Net unrealized gains (losses) on other securities include foreign currency translation adjustments on foreign currency denominated securities whose fair value is not recognized as consolidated balance sheet amount.  
3. Non-controlling interests include equity acquired from non-controlling stockholders.

(Notes to derivative transactions)

1. Derivative transactions to which the hedge accounting method is not applied

The following tables set forth the contract amount or the amount equivalent to the notional amount, fair value, valuation gains (losses) and fair value calculation methodologies by type of derivative with respect to derivative transactions to which the hedge accounting method is not applied at the end of the fiscal year. Contract amount does not indicate the market risk relating to derivative transactions.

Notes: 1. The above transactions are valued at fair value and the valuation gains (losses) are accounted for in the consolidated statements of income.  
2. Fair value is calculated using discounted present value and option pricing models.  
3. “Sold” represents transactions in which the credit risk is accepted; “Bought” represents transactions in which the credit risk is transferred.

## 2. Derivative transactions to which the hedge accounting method is applied

The following tables set forth the contract amount or the amount equivalent to the notional amount, fair value and fair value calculation methodologies by type of derivative and hedge accounting method with respect to derivative transactions to which the hedge accounting method is applied at the end of the fiscal year. Contract amount does not indicate the market risk relating to derivative transactions.

### (1) Interest rate derivatives

March 31, 2020		Millions of yen			
Hedge accounting method	Type of derivative	Principal items hedged	Contract amount		Fair value
			Total	Over 1 year	
Deferral hedge method	Interest futures:	Interest-earning/bearing financial assets/liabilities			
	Sold .....	such as loans and bills	¥ 435,240	¥ —	¥ 43
	Bought .....	discounted, other securities, deposits and negotiable certificates of deposit	1,142,505	—	269
	Interest rate swaps:				
	Receivable fixed rate/payable floating rate .....		36,700,930	28,992,026	697,034
	Receivable floating rate/payable fixed rate .....		14,785,349	13,677,981	(507,233)
Recognition of gain or loss on the hedged items	Interest rate swaptions:				
	Sold .....		151,789	151,789	26,130
	Bought .....		—	—	—
Special treatment for interest rate swaps	Interest rate swaps:	Loans and bills discounted			
	Receivable floating rate/payable fixed rate .....		409,908	390,290	(13,781)
Special treatment for interest rate swaps	Interest rate swaps:	Borrowed money			
	Receivable floating rate/payable fixed rate .....		71,880	55,700	(Note 3)
	Total .....		/	/	¥ 202,463

Notes: 1. The Company applies deferred hedge accounting stipulated in JICPA Industry Committee Practical Guidelines No. 24.  
2. Fair value of transactions listed on exchanges is calculated using the closing price on the Tokyo Financial Exchange or other relevant exchanges. Fair value of OTC transactions is calculated using discounted present value and option pricing models.  
3. Interest rate swap amounts measured by the special treatment for interest rate swaps are treated with the borrowed money that is subject to the hedge. Therefore such fair value is included in the fair value of the relevant transaction subject to the hedge in the (Notes to financial instruments).

March 31, 2021		Millions of yen			
Hedge accounting method	Type of derivative	Principal items hedged	Contract amount		Fair value
			Total	Over 1 year	
Deferral hedge method	Interest futures:	Interest-earning/bearing financial assets/liabilities			
	Sold .....	such as loans and bills	¥ 7,580,404	¥ 4,439,058	¥ 1,403

Recognition of gain or loss on the hedged items	Equity price index swaps:	Other securities			
	Receivable floating rate/payable equity index .....		33,674	33,674	(2,689)
	Total .....		/	/	¥(1,999)

Note: Fair value is calculated using discounted present value.

**(Notes to employee retirement benefits)****1. Outline of employee retirement benefits**

The Company's consolidated subsidiaries have funded and unfunded contributory defined benefit pension plans and defined-contribution pension plans for benefit payments to their employees.

Funded contributory defined benefit pension plans mainly consist of contributory funded defined benefit pension plans and lump-sum severance indemnity plans which set up employee retirement benefit trusts.

Unfunded contributory defined benefit pension plans are lump-sum severance indemnity plans which do not use such trust scheme.

Some consolidated subsidiaries adopt the simplified method in calculating the projected benefit obligation. Additional benefits may also be granted when employees retire.

**2. Contributory defined benefit pension plan****(1) Reconciliation of beginning and ending balances of projected benefit obligation**

Year ended March 31	Millions of yen	
	2020	2021
Beginning balance of projected benefit obligation.....	¥1,123,760	¥1,123,979
Service cost .....	37,323	32,047
Interest cost on projected benefit obligation .....	4,098	3,970
Unrecognized net actuarial gain or loss incurred .....	13,225	10,691
Payments of retirement benefits .....	(55,337)	(53,586)
Unrecognized prior service cost .....	—	(23,842)
Net change as a result of business combinations .....	1,227	46
Other .....	(318)	4,235
Ending balance of projected benefit obligation.....	¥1,123,979	¥1,097,541

**(2) Reconciliation of beginning and ending balances of plan assets**

Year ended March 31	Millions of yen	
	2020	2021
Beginning balance of plan assets .....	¥1,421,378	¥1,318,775
Expected return on plan assets .....	42,510	39,287
Unrecognized net actuarial gain or loss incurred .....	(112,013)	293,981
Contributions by the employer .....	13,108	11,680
Payments of retirement benefits.....	(43,656)	(41,932)
Other .....	(2,551)	5,949
Ending balance of plan assets .....	¥1,318,775	¥1,627,741

**(3) Reconciliation of the projected benefit obligation and plan assets to net defined benefit asset and net defined benefit liability reported on the consolidated balance sheets**

March 31	Millions of yen	
	2020	2021
Funded projected benefit obligation.....	¥(1,096,602)	¥(1,069,315)
Plan assets .....	1,318,775	1,627,741
	222,172	558,426
Unfunded projected benefit obligation.....	(27,376)	(28,226)
Net amount of asset and liability reported on the consolidated balance sheet .....	¥ 194,795	¥ 530,200

March 31	Millions of yen	
	2020	2021
Net defined benefit asset .....	¥230,573	¥565,534
Net defined benefit liability .....	(35,777)	(35,334)
Net amount of asset and liability reported on the consolidated balance sheet .....	¥194,795	¥530,200

**(4) Pension expenses**

Year ended March 31	Millions of yen	
	2020	2021
Service cost .....	¥ 37,323	¥ 32,047
Interest cost on projected benefit obligation.....	4,098	3,970
Expected return on plan assets .....	(42,510)	(39,287)
Amortization of unrecognized net actuarial gain or loss .....	5,569	8,107
Amortization of unrecognized prior service cost.....	(140)	(2,349)
Other (nonrecurring additional retirement allowance paid and other) .....	7,521	4,659
Pension expenses .....	¥ 11,861	¥ 7,148

Note: Pension expenses of consolidated subsidiaries which adopt the simplified method are included in "Service cost."

**(5) Remeasurements of defined benefit plans**

The breakdown of "Remeasurements of defined benefit plans" (before deducting tax effect) is as shown below:

Year ended March 31	Millions of yen	
	2020	2021
Prior service cost.....	¥ 140	¥ (21,493)
Net actuarial gain or loss .....	119,648	(291,618)
Total.....	¥119,789	¥(313,111)

**(6) Accumulated remeasurements of defined benefit plans**

The breakdown of "Accumulated remeasurements of defined benefit plans" (before deducting tax effect) is as shown below:

March 31	Millions of yen	
	2020	2021
Unrecognized prior service cost .....	¥ (159)	¥ (21,653)
Unrecognized net actuarial gain or loss .....	128,245	(163,372)
Total.....	¥128,085	¥(185,025)

**(7) Plan assets****1) Major asset classes of plan assets**

The proportion of major asset classes to the total plan assets is as follows:

March 31	2020	2021
Stocks.....	56.3%	57.6%
Bonds .....	15.1%	14.6%
General account of life insurance.....	3.0%	2.5%
Other .....	25.6%	25.3%
Total.....	100.0%	100.0%

Note: The retirement benefit trusts set up for employee pension plans and lump-sum severance indemnity plans account for 35.5% and 37.1% of the total plan assets at March 31, 2020 and 2021, respectively.

**2) Method for setting the long-term expected rate of return on plan assets**

The long-term expected rate of return on plan assets is determined based on the current and expected allocation of plan assets and the current and expected long-term rates of return on various asset classes of plan assets.

**(8) Actuarial assumptions**

The principal assumptions used in determining benefit obligation and pension expenses are as follows:

**1) Discount rate**

Year ended March 31, 2020	Percentages	Year ended March 31, 2021	Percentages
Domestic consolidated subsidiaries .....	0.3% to 0.8%	Domestic consolidated subsidiaries .....	0.0% to 0.8%
Overseas consolidated subsidiaries .....	2.3% to 8.3%	Overseas consolidated subsidiaries .....	2.0% to 6.5%

2) Long-term expected rate of return on plan assets

Year ended March 31, 2020	Percentages	Year ended March 31, 2021	Percentages
Domestic consolidated subsidiaries .....	0% to 4.0%	Domestic consolidated subsidiaries .....	0% to 3.7%
Overseas consolidated subsidiaries .....	2.3% to 8.3%	Overseas consolidated subsidiaries .....	2.0% to 6.5%

3. Defined contribution plan

*Fiscal year ended March 31, 2020*

The amount required to be contributed by the consolidated subsidiaries is ¥11,122 million.

*Fiscal year ended March 31, 2021*

The amount required to be contributed by the consolidated subsidiaries is ¥11,088 million.

(Notes to stock options)

1. Amount of stock options expenses

Stock options expenses which were accounted for as general and administrative expenses for the fiscal years ended March 31, 2020 and 2021 are as follows:

Year ended March 31	Millions of yen	
	2020	2021
General and administrative expenses.....	¥7	¥—

2. Amount of profit by non-exercise of stock acquisition rights

Profit by non-exercise of stock acquisition rights which were accounted for as other income for the fiscal years ended March 31, 2020 and 2021 are as follows:

Year ended March 31	Millions of yen	
	2020	2021
Other income .....	¥1,610	¥—

(Notes to segment and other related information)

{Segment information}

1. Summary of reportable segment

The Group’s reportable segment is defined as an operating segment for which discrete financial information is available and reviewed by the Board of Directors and the Company’s Management Committee regularly in order to make decisions about resources to be allocated to the segment and assess its performance.

The businesses operated by each business unit are as follows;

Wholesale Business Unit: Business to deal with domestic medium-to-large-sized and small-to-medium-sized corporate customers

Retail Business Unit: Business to deal with mainly domestic individual customers

Global Business Unit: Business to deal with international (including Japanese) corporate customers

Global Markets Business Unit: Business to deal with financial market

Head office account: Business other than businesses above

“International Business Unit” was renamed as “Global Business Unit” as of April 1, 2020.

2. Method of calculating profit and loss amount by reportable segment

Accounting methods applied to the reported business segment are the same as those described in “(Significant accounting policies for preparing consolidated financial statements).” In case several business units cooperate for transactions, profit and loss, and expenses related to the transactions are recognized in the business units cooperating for the transactions and those amounts are calculated in accordance with internal managerial accounting policy.

The Company does not assess assets by business segments.

3. Information on profit and loss amount by reportable segment

Year ended March 31, 2020	Millions of yen					
	Wholesale Business Unit	Retail Business Unit	Global Business Unit	Global Markets Business Unit	Head office account and others	Total

Total .....	—		¥9,614,639	¥9,628,031	—		—	—

Notes: 1. “Interest rate” indicates a nominal interest rate which is applied at respective consolidated balance sheet dates. Therefore, this rate may differ from an actual interest rate.  
2. (\*1) This represents straight bonds issued in Yen by SMBC Nikko, a domestic consolidated subsidiary.  
(\*2) This represents straight bonds issued in U.S. dollar by SMBC Nikko, a domestic consolidated subsidiary.  
(\*3) This represents straight bonds issued in Euro by SMBC Nikko, a domestic consolidated subsidiary.  
(\*4) This represents straight bonds issued in Australian dollar by SMBC Nikko, a domestic consolidated subsidiary.  
(\*5) This represents straight bonds issued in Turkish lira by SMBC Nikko, a domestic consolidated subsidiary.  
(\*6) This represents straight bonds issued in Indonesia rupiah by PT Bank BTPN Tbk, an overseas consolidated subsidiary.  
(\*7) This represents straight bonds issued in Renminbi by Sumitomo Mitsui Banking Corporation (China) Limited, an overseas consolidated subsidiary.  
(\*8) This represents subordinate term bonds issued in Yen by SMBC International Finance N.V., an overseas consolidated subsidiary.  
(\*9) This represents an aggregate of short-term bonds issued in yen by SMBC Nikko and SMCC, domestic consolidated subsidiaries.  
3. Figures showed in ( ) in “At the beginning of the fiscal year” and “At the end of the fiscal year” are in foreign currency.  
4. Figures showed in [ ] in “At the beginning of the fiscal year” and “At the end of the fiscal year” are the amounts to be redeemed within one year.  
5. The redemption schedule over the next 5 years after respective balance sheet dates of the consolidated subsidiaries was as follows:

Millions of yen				
Within 1 year	More than 1 year to 2 years	More than 2 years to 3 years	More than 3 years to 4 years	More than 4 years to 5 years
¥1,879,715	¥1,049,667	¥776,615	¥1,040,315	¥811,163

[Schedule of borrowings]

Classification	Millions of yen		Percentages	Repayment Term
	At the beginning of the fiscal year	At the end of the fiscal year	Average interest rate	
Borrowed money .....	¥15,210,894	¥17,679,690	0.15	—
Other borrowings.....	15,210,894	17,679,690	0.15	Apr. 2021 ~ Perpetual
Lease obligations .....	29,103	28,835	2.83	Apr. 2021 ~ Jul. 2032

Notes: 1. “Average interest rate” represents the weighted average interest rate based on the interest rates and “At the end of the fiscal year” at respective balance sheet dates of consolidated subsidiaries.  
2. The redemption schedule over the next 5 years on Borrowings and Lease obligations after respective balance sheet dates of the consolidated subsidiaries was as follows:

	Millions of yen				
	Within 1 year	More than 1 year to 2 years	More than 2 years to 3 years	More than 3 years to 4 years	More than 4 years to 5 years
Other borrowings .....	¥7,638,210	¥1,858,272	¥2,640,346	¥4,521,769	¥134,549
Lease obligations .....	7,885	6,399	5,722	4,181	2,596

Since the commercial banking business accepts deposits and raises and manages funds through the call loan and commercial paper markets as a normal course of business, the schedule of borrowings shows a breakdown of Borrowed money included in the “Liabilities” and Lease obligations included in “Other liabilities” in the consolidated balance sheet.

Reference: Commercial paper issued for funding purpose as a normal course of business is as follows:

	Millions of yen		Percentages	Repayment Term
	At the beginning of the fiscal year	At the end of the fiscal year	Average interest rate	
Commercial paper .....	¥1,409,249	¥1,686,404	0.12	Apr. 2021 ~ Dec. 2021

[Schedule of asset retirement obligations]

Since the amount of asset retirement obligations accounts for 1% or less than the total of liabilities and net assets, the schedule of asset liability obligation is not disclosed.

[Others]

Independent Auditor’s Report

To the Board of Directors of  
Sumitomo Mitsui Financial Group, Inc.:

Opinion

We have audited the accompanying consolidated financial statements of Sumitomo Mitsui Financial Group, Inc. (“the Company”) and its consolidated subsidiaries (collectively referred to as “the Group”), which comprise the consolidated balance sheets as at March 31, 2021 and 2020, the consolidated statements of income, comprehensive income, changes in net assets and cash flows for the years then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at March 31, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with accounting principles generally accepted in Japan.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in Japan. Our responsibilities under those standards are further described in the *Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Japan, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The reasonableness of management’s assessment of the reserve for possible loan losses for SMBC’s corporate loans	
The key audit matter	How the matter was addressed in our audit
In the consolidated balance sheet of Sumitomo Mitsui Financial Group, Inc. and its consolidated subsidiaries (collectively referred to as the “Group”) as of March 31, 2021, the reserve for possible loan losses (the “Reserve”) was ¥456,861 million on loans and bills discounted (the “Loans”) of ¥85,132,738 million (or approximately 35.1% of total assets). Included in such balances were mainly corporate loans and the related reserve of Sumitomo Mitsui Banking Corporation (“SMBC”), a commercial banking subsidiary.  As discussed in “Notes (Significant accounting policies for preparing consolidated financial statements), 4. Accounting policy, (5) Reserve for	The primary procedures we performed to assess the reasonableness of management’s assessment of the Reserve for SMBC’s corporate loans included the following:  (1) <b>Internal control testing</b>  We evaluated the design and tested the operating effectiveness of certain of SMBC’s internal controls over its process to assess the Reserve for SMBC’s corporate loans, which included addressing the impact of COVID-19. In this assessment, we focused on the controls that related to:  · approval of the internal rules for accounting for the

<p>possible loan losses” to the consolidated financial statements, SMBC assesses all claims including the Loans in accordance with the internal criteria for self-assessment of asset quality, and classifies borrowers into credit categories through examining individual credit risk profiles. On the basis of each borrower category, reserves and write-offs are recorded based on the historical loan-loss ratios or the probability of default, and a discounted cash flow (DCF) method in accordance with its internal policy for write-offs and provisions. Additionally, considering the recent economic environment and risk factors, a potential loss amount that is deemed to have incurred in specific portfolios, among others, is reflected in the Reserve based on an overall assessment of a probable future outlook for those portfolios that has not been fully captured in the historical data or individual borrower classification.</p> <p>Further, as discussed in “Notes (Significant accounting estimates)” and “Notes (Additional information)”, the assessment of the Reserve for SMBC’s corporate loans involved significant estimation uncertainty, and required a high level of management judgment primarily in the following aspects:</p> <ul style="list-style-type: none"><li>· classifying borrowers into appropriate credit categories through performing an obligor-specific qualitative assessment, including the use of forward-looking information;</li><li>· determining whether additional provisions for specific portfolios, among others, are deemed necessary, and selecting appropriate methodologies to estimate such provisions based on the future outlook in light of the recent economic environment and risk factors; and</li><li>· projecting future cash flow scenarios as an input to the DCF method for borrowers with large claims classified mainly as substandard or lower level classifications.</li></ul> <p>During the course of the assessment in the current fiscal year, it was required to incorporate, especially, the impact of the spread of COVID-19, which remained uncertain. Included in such an assessment were evaluating any adverse impact on individual borrowers including their liquidity positions, as well as estimating the credit risk implications of changes in the economic environment and market conditions</p>	<p>Reserve, including the criteria for self-assessment and the policy for write-offs and provisions;</p> <ul style="list-style-type: none"><li>· validation of the obligor grading models;</li><li>· classification of individual borrowers into credit categories through a qualitative assessment;</li><li>· determination of additional provisions for specific portfolios, among others, based on the future outlook in light of the recent economic environment and risk factors; and</li><li>· projection of future cash flow scenarios used in the DCF method.</li></ul> <p><b>(2) Evaluation of the appropriateness of the policy for reserve for possible loan losses and the obligor grading models</b></p> <p>We evaluated the policy for provisions for compliance with the accounting principles generally accepted in Japan. Additionally, we involved credit risk specialists with industry-specific knowledge and expertise who assisted us in evaluating the obligor grading models, which provided the basis for borrower classification, through analyzing the consistency of obligor grades with external ratings, and also through retrospectively assessing the models’ capability to identify potentially defaulting borrowers.</p> <p><b>(3) Evaluation of the appropriateness of borrower classification taking into account qualitative factors</b></p> <p>For SMBC’s corporate borrowers that we selected based on certain criteria, we evaluated the appropriateness of borrower classification taking into account qualitative factors including a prolonged impact of COVID-19 through:</p> <ul style="list-style-type: none"><li>· analyzing the borrowers’ current business performance including liquidity positions;</li><li>· assessing the reasonableness of the borrowers’ business plans as a basis for management’s borrower classification, by comparing the plans with the industry outlook and the recent performance, and also by analyzing the impact of stressed scenarios and other factors considered by management;</li><li>· analyzing the forecasts of liquidity position incorporating financial support programs by governments and financial institutions in each country and the borrowers’ business plans; and</li><li>· evaluating the implications on borrower</li></ul>
--	---

<p>caused by voluntary restraints and other restrictions on social and economic activities, considering the effects of government support programs on the trends of bankruptcy cases and other attributes.</p> <p>We, therefore, determined that management’s assessment of the Reserve for SMBC’s corporate loans, specifically, classifying borrowers into credit categories through a qualitative assessment, determining additional provisions for specific portfolios, among others, based on the future outlook in light of the recent economic environment and risk factors, and projecting cash flow scenarios used in the DCF method, was of most significance in our audit of the consolidated financial statements for this fiscal year, and accordingly, a key audit matter.</p>	<p>classification from management’s credit decisions in response to the situation of individual customers, such as the renewal at maturity or modifications to terms and conditions of the facilities that were originally provided to support customers’ liquidity during the COVID-19 pandemic.</p> <p><b>(4) Evaluation of additional provisions for specific portfolios based on the future outlook in light of the recent economic environment and risk factors</b></p> <p>Given that uncertainty remained over the impact of COVID-19 on the economic environment, we evaluated the reasonableness of additional provisions for specific portfolios, among others, through:</p> <ul style="list-style-type: none"><li>· analyzing the respective industry environment by referencing the relevant indices and other information published by external agencies;</li><li>· assessing the appropriateness of the selection of portfolios subject to additional provisions, by analyzing the effects of financial support programs from governments and financial institutions in each country on the trends of bankruptcy cases and other attributes, and also by analyzing the observed trends in recent revisions of internal ratings by portfolios;</li><li>· assessing the appropriateness of the method used to estimate additional provisions considering the nature of and risk factors identified in each portfolio; and</li><li>· assessing the consistency of assumptions used in estimating additional provisions, especially the assumption about the extent to which changes in economic environment and market conditions caused by voluntary restraints and other restrictions on social and economic activities have an impact on each portfolio with the respective industry environment.</li></ul> <p><b>(5) Evaluation of the reasonableness of future cash flow scenarios used in the DCF method</b></p> <p>For borrowers that we selected based on certain criteria among those in scope of the DCF method, we evaluated the reasonableness of future cash flow scenarios through:</p> <ul style="list-style-type: none"><li>· analyzing the feasibility of the restructuring plans considering the recent economic environment and the prospect of the impact of COVID-19;</li></ul>
--	--

	<ul style="list-style-type: none"><li>· analyzing the current progress against the restructuring plans; and</li><li>· assessing the borrower's ability to repay in light of the schedule and underlying sources of repayments based on the restructuring plans.</li></ul>
--	---

**Responsibilities of Management and the Audit Committee for the Consolidated Financial Statements**

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in Japan, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern in accordance with accounting principles generally accepted in Japan.

The Audit Committee is responsible for overseeing the directors and the corporate executive officers' performance of their duties with regard to the design, implementation and maintenance of the Group's financial reporting process.

**Auditor's Responsibilities for the Audit of the Consolidated Financial Statements**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with auditing standards generally accepted in Japan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of our audit in accordance with auditing standards generally accepted in Japan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, while the objective of the audit is not to express an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate whether the presentation and disclosures in the consolidated financial statements are in accordance with

accounting standards generally accepted in Japan, the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit, significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**Convenience Translation**

The U.S. dollar amounts in the accompanying consolidated financial statements with respect to the year ended March 31, 2021 are presented solely for convenience. Our audit also included the translation of yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made on the basis described in basis of presentation in the notes to the consolidated financial statements.

**Interest required to be disclosed by the Certified Public Accountants Act of Japan**

We do not have any interest in the Group which is required to be disclosed pursuant to the provisions of the Certified Public Accountants Act of Japan.

Notes: 1. The figures above comprise totals for domestic and overseas operations after inter-segment eliminations.  
2. In principle, average balances are calculated by using daily balances. However, some consolidated subsidiaries use weekly, monthly or quarterly balances instead.  
3. “Interest-earning assets” are shown after deduction of the average balance of noninterest-earning deposits (2021, ¥58,776,143 million; 2020, ¥52,536,286 million).  
4. The Company has changed the recognition of installment-sales-related income and installment-sales-related expenses from fiscal year ended March 31, 2021, and the change in accounting policies is applied retroactively for the year ended March 31, 2020. As a result of retrospective application, the total “Interest” of “Interest-earning assets” increased by ¥30,335 million for the fiscal year ended March 31, 2020.

Notes: 1. Mizuho Securities Co., Ltd. has submitted a Report of Possession of Large Volume regarding its shareholding as of September 25, 2018. It stated that Mizuho Securities Co., Ltd. and two other shareholders held the following common shares in the Company as of September 14, 2018. But, these three are not included in the above Principal Shareholders because the Company was unable to confirm the number of shares owned by them at the end of the fiscal year ended March 31, 2021.  
The Report of Possession of Large Volume is detailed as follows:  
Principal Shareholder: Mizuho Securities Co., Ltd. (and two other joint holders)  
Number of shares held: 70,765,251 shares (including joint ownership)  
Shareholding ratio: 5.06%

2. Sumitomo Mitsui Trust Bank, Limited has submitted a Change Report of Possession of Large Volume regarding its shareholding as of June 4, 2020. It stated that Sumitomo Mitsui Trust Asset Management Co., Ltd. and another shareholder held the following common shares in the Company as of May 29, 2020. But, these two are not included in the above Principal Shareholders because the Company was unable to confirm the number of shares owned by them at the end of the fiscal year ended March 31, 2021.  
The Change Report of Possession of Large Volume is detailed as follows:  
Principal Shareholder: Sumitomo Mitsui Trust Asset Management Co., Ltd. (and another joint holder)  
Number of shares held: 75,961,300 shares (including joint ownership)  
Shareholding ratio: 5.53%

3. BlackRock Japan Co., Ltd. has submitted a Change Report of Possession of Large Volume regarding its shareholding as of June 19, 2020. It stated that BlackRock Japan Co., Ltd. and seven other shareholders held the following common shares in the Company as of June 15, 2020. But, these eight are not included in the above Principal Shareholders because the Company was unable to confirm the number of shares owned by them at the end of the fiscal year ended March 31, 2021.  
The Change Report of Possession of Large Volume is detailed as follows:  
Principal Shareholder: BlackRock Japan Co., Ltd. (and seven other joint holders)  
Number of shares held: 72,639,742 shares (including joint ownership)  
Shareholding ratio: 5.29%

4. Nomura Securities Co., Ltd. has submitted a Change Report of Possession of Large Volume regarding its shareholding as of July 22, 2020. It stated that Nomura Securities Co., Ltd. and two other shareholders held the following common shares in the Company as of July 15, 2020. But, these three are not included in the above Principal Shareholders because the Company was unable to confirm the number of shares owned by them at the end of the fiscal year ended March 31, 2021.  
The Change Report of Possession of Large Volume is detailed as follows:  
Principal Shareholder: Nomura Securities Co., Ltd. (and two other joint holders)  
Number of shares held: 71,289,221 shares (including joint ownership)  
Shareholding ratio: 5.19%

5. Mitsubishi UFJ Financial Group, Inc. has submitted a Report of Possession of Large Volume regarding its shareholding as of April 5, 2021. It stated that Mitsubishi UFJ Trust and Banking Corporation and two other shareholders held the following common shares in the Company as of March 29, 2021. But, these three are not included in the above Principal Shareholders because the Company was unable to confirm the number of shares owned by them at the end of the fiscal year ended March 31, 2021.  
The Report of Possession of Large Volume is detailed as follows:  
Principal Shareholder: Mitsubishi UFJ Trust and Banking Corporation (and two other joint holders)  
Number of shares held: 68,950,200 shares (including joint ownership)  
Shareholding ratio: 5.02%

Basel III Information

Capital Ratio and Leverage Ratio Information (Consolidated)

Sumitomo Mitsui Financial Group, Inc. and Subsidiaries

Regarding the calculation of the capital ratio and leverage ratio of Sumitomo Mitsui Financial Group, an external audit was performed by KPMG AZSA LLC pursuant to the Technical Practical Guidelines 4465 “Practical Guidelines on Agreed-Upon Procedures for the Capital Ratio and Leverage Ratio Calculation Framework.” The aforementioned external audit was not meant to provide a statement of opinions or conclusions on the capital ratio and leverage ratio themselves, or our internal control framework for calculating these ratios, but to present us a report on the results of the procedure performed within the scope agreed upon between the external auditor and us. It constitutes neither part of the audit of consolidated financial statements nor part of the audit of our internal control over financial reporting. “Consolidated Capital Ratio and Leverage Ratio Information” was prepared principally based on the Notification, and the terms and details in the section may differ from those in other sections of this report.

■ Scope of Consolidation

1. Consolidated Capital Ratio Calculation

- Number of consolidated subsidiaries: 177  
Please refer to “Principal Subsidiaries and Affiliates” on page 158 for their names and business outline.
- Scope of consolidated subsidiaries for calculation of the consolidated capital ratio is based on the scope of consolidated subsidiaries for preparing consolidated financial statements.
- There are no affiliates to which the proportionate consolidation method is applied.

2. Restrictions on Movement of Funds and Capital within Holding Company Group

There are no special restrictions on movement of funds and capital among us and its group companies.

3. Names of companies among subsidiaries of bank-holding companies (other financial institutions), with the Basel Capital Accord required amount, and total shortfall amount

Not applicable.

■ Capital Ratio Information (Consolidated)

The consolidated capital ratio is calculated using the method stipulated in “Standards for Bank Holding Company to Examine the Adequacy of Its Capital Based on Assets, Etc. Held by It and Its Subsidiaries Pursuant to Article 52-25 of the Banking Act” (Notification No. 20 issued by the Japanese Financial Services Agency in 2006; hereinafter referred to as “the Notification”). In addition to the method stipulated in the Notification to calculate the consolidated capital ratio (referred to as “International Standard” in the Notification), we have adopted the Advanced Internal Ratings-Based (AIRB) approach for calculating credit risk-weighted asset amounts and the Advanced Measurement Approach (AMA) for calculating the operational risk equivalent amount.

■ Credit Quality of Assets

1. Overview of Criteria for Accounting Provisions and Write-Offs

(1) Policies and Methods of Provisions and Write-Offs

For “Policies and Methods of Provisions and Write-Offs,” please refer to pages 130 to 134 (Risk Management - 3. Credit Risk Management Methods - (1) Credit Risk Assessment and Quantification, (4) Self-Assessment, Write-Offs and Provisions, Non-Performing Loans Disclosure).

(2) Extent of the Number of Delinquency Days of “Past Due Loans of Three Months or More” that are Allowed Not to Classify Their Loan Category as “Doubtful Assets” or Below (or Not to Judge as Loans to Parties Classified as Potentially Bankrupt Borrowers or Below) and Reasons Thereof

At SMBC, as a core bank of SMBC Group, the delinquency period of past due loans of three months or more that are allowed not to classify loans as doubtful assets or below (or not to judge as loans to parties classified as potentially bankrupt borrowers or below) is generally less than six months, and they are loans to parties that are expected to improve business conditions. If there are any past due loans of six months or more, they shall be in principle classified as loans to potentially bankrupt borrowers or below.

(3) Definition of Loans Whose Loan Terms and Conditions were Restructured

At SMBC, as a core bank of SMBC Group, loans whose loan terms and conditions were restructured are defined as loans with interest rate reduction, deferred payment of interest, deferred repayment of principal amount, abandonment of loans, or other arrangements that are advantageous for the obligors, for the purpose of business rehabilitation or support for the obligors. Obligor with loans whose loan terms and conditions were restructured may not be classified as doubtful assets or below depending on the outlook for business conditions, financial statements and loan terms and conditions. If the borrower category deteriorates due to restructuring of loan terms and conditions, provisions will increase.

(4) Key Differences in Parameters of Credit Risks Used to Calculate Provisions and Capital Ratio, Respectively

SMBC, as a core bank of SMBC Group, uses Probability of Default and loan-loss ratio as parameters for calculation of provisions. Probability of Default is calculated based on the actual performance in the past of the deterioration rate for one year from each borrower category to potentially bankrupt borrowers or below (regarding the deterioration rate to potentially bankrupt borrowers, the deterioration transition rates equivalent to three accumulated years from potentially bankrupt borrowers to virtually bankrupt borrowers or below are included). For the PD used to calculate the capital ratio, deterioration to substandard borrowers or below is defined as default, and assuming a long-term average value of the default rate, conservative estimation for some portfolios is conducted, which is the major difference from the Probability of Default used to calculate provisions. Loan-loss ratio is calculated using the loan-loss amount including direct write-offs and indirect write-offs incurred during the year for each borrower category to the amount of initial existing exposure by borrower category. For details of parameters used to calculate the capital ratio, please refer to pages 269 to 270 “3. Overview of Internal Rating System (2) Parameter Estimation and Its Validation System.”

5		Other changes	3,809
6	Stock of loans and securities (of which: debt securities) that were placed in defaulted status as of March 31, 2021 (1+2-3-4+5)	967,121	

Note: The major factors for other changes are due to decreases in stock by collection and sale of receivables that were placed in defaulted status at the end of the previous fiscal year, and the increase in the right to reimbursement that had occurred since the end of the previous fiscal year.

(Millions of yen)

CR2: Changes in stock of defaulted loans and securities (of which: debt securities)			
Item No.		Amount	
1	Stock of loans and securities (of which: debt securities) that were placed in defaulted status as of March 31, 2019	689,254	
2	Changes in loans and securities (of which: debt securities) by factors during the current interim period	Amounts defaulted	160,092
3		Amounts returned to non-defaulted status	27,420
4		Amounts written off	128,030
5		Other changes	(19,148)
6	Stock of loans and securities (of which: debt securities) that were placed in defaulted status as of March 31, 2020 (1+2-3-4+5)	674,747	

Note: The major factor for other changes is due to decreases in stock by collection and sale of receivables that were placed in defaulted status at the end of the previous fiscal year.

4. Term-End Balance of Exposures by Category and Their Breakdown by Major Type of Assets

(1) Exposure Balance by Type of Assets, Geographic Region and Industry

(Millions of yen)

Category	As of March 31, 2021				As of March 31, 2020			
	Loans, commitments and other off-balance sheet exposures except derivatives	Bonds	Others	Total	Loans, commitments and other off-balance sheet exposures except derivatives	Bonds	Others	Total
Domestic operations (excluding offshore banking accounts)	132,130,058	23,209,501	8,138,180	163,477,741	117,104,673	15,714,695	6,751,935	139,571,303

Other regions	204.9	71.1	9.1	85.4	48.1	4.1
Total	1,294.2	410.3	108.4	929.8	325.3	118.9

(2) By Industry

(Billions of yen)

	Fiscal 2020			Fiscal 2019		
	Term-end balance	Term-end Reserves	Write-offs for the year	Term-end balance	Term-end Reserves	Write-offs for the year
Domestic operations (excluding offshore banking accounts)	841.5	253.3	81.7	713.9	218.0	91.9
Manufacturing	77.5	30.7	3.4	57.0	18.9	0.6
Agriculture, forestry, fishery and mining	9.9	6.8	0.0	8.4	6.7	0.0
Construction	9.9	2.2	0.3	12.0	2.5	0.4
Transport, information, communications and utilities	34.1	15.9	0.5	44.0	20.8	0.9
Wholesale and retail	90.2	37.2	0.9	86.1	36.8	1.0
Financial and insurance	6.7	1.0	0.0	5.4	0.2	(0.3)
Real estate, goods rental and leasing	50.4	6.4	(4.0)	48.0	5.6	(0.8)
Services	155.0	47.4	5.9	72.5	21.0	0.5
Other industries	407.9	105.7	74.7	380.5	105.4	89.5
Overseas operations and offshore banking accounts	452.7	157.1	26.8	215.9	107.2	27.0
Financial institutions	15.6	4.6	0.0	1.9	0.2	0.0
C&I companies	326.3	127.2	10.9	127.7	76.0	16.3
Others	110.8	25.2	15.9	86.3	31.0	10.8
Total	1,294.2	410.3	108.4	929.8	325.3	118.9

Notes: 1. Term-end Reserves include partial direct write-offs (direct reduction).  
2. “Domestic operations” comprises the operations of SMBC Group (excluding overseas branches) and domestic consolidated subsidiaries. “Overseas operations” comprises the operations of SMBC Group’s overseas branches and overseas consolidated subsidiaries, and the term-end balances are calculated based on the obligor’s domicile country.

6. Term-End Balance of Exposures by Past Due Periods

(Billions of yen)

Fiscal 2020				
Less than 1 month	1 month or more to less than 2 months	2 months or more to less than 3 months	3 months or more	Total
149.0	34.2	28.8	106.1	318.2

Notes: 1. Bankrupt and Quasi-Bankrupt Assets prescribed in Article 4, Paragraph 2 of the Ordinance for Enforcement of the Act on Emergency Measures for the Revitalization of Financial Functions and doubtful assets prescribed in Paragraph 3 of the said Article are excluded.  
2. Items that are not accompanied by deterioration of business conditions/cash flows are excluded.

(Billions of yen)

Fiscal 2019				
Less than 1 month	1 month or more to less than 2 months	2 months or more to less than 3 months	3 months or more	Total
160.4	60.4	37.5	81.0	339.5

Notes: 1. Bankrupt and Quasi-Bankrupt Assets prescribed in Article 4, Paragraph 2 of the Ordinance for Enforcement of the Act on Emergency Measures for the Revitalization of Financial Functions and doubtful assets prescribed in Paragraph 3 of the said Article are excluded.  
2. Items that are not accompanied by deterioration of business conditions/cash flows are excluded.

7. Term-End Balance of Exposures of Obligors Whose Loan Conditions were Restructured for Business Rehabilitation or Support; of Which Amounts of Increased Reserves for Such Exposures and Other Amounts due to the Restructuring of the Loan Conditions

(Billions of yen)

Fiscal 2020			Fiscal 2019		
Term-end balance	Of which: amounts of increased Reserves for such exposures due to the restructuring of the loan conditions	Of which: other amounts	Term-end balance	Of which: amounts of increased Reserves for such exposures due to the restructuring of the loan conditions	Of which: other amounts
418.9	418.9	0.0	248.2	248.2	0.0

Note: Bankrupt and Quasi-Bankrupt Assets prescribed in Article 4, Paragraph 2 of the Ordinance for Enforcement of the Act on Emergency Measures for the Revitalization of Financial Functions, doubtful assets prescribed in Paragraph 3 of the said Article, and loans past due three months or more prescribed in Paragraph 4 of the said Article are excluded.

Internal Ratings-Based (IRB) Approach

1. Background on Determining the Scope of Application of Internal Ratings-Based (IRB) Approach

When the criteria of materiality defined by us according to business characteristics and business conditions, etc. are met, in principle, the IRB approach is adopted by the unit of our asset class or by the unit of the affiliated group companies. In addition, for the asset class or group companies that meet the quantitative criteria specified by the authorities, the IRB approach is in principle adopted regardless of whether the criteria of materiality are met.

For adopting the IRB approach, the Advanced Internal Ratings-Based (AIRB) approach is in principle adopted. However, for group companies which were judged unnecessary or inappropriate to adopt the AIRB approach in light of the scale, business contents, etc., the Foundation Internal Ratings-Based (FIRB) approach is adopted.

2. Scope

We and the following consolidated subsidiaries have adopted the Advanced Internal Ratings-Based (AIRB) approach for exposures as of March 31, 2009.

(1) Domestic Operations

Sumitomo Mitsui Banking Corporation, Sumitomo Mitsui Card Company, Limited and SMBC Guarantee Co., Ltd., SMBC Trust Bank Ltd.

(2) Overseas Operations

SMBC Bank International plc, Sumitomo Mitsui Banking Corporation (China) Limited, Banco Sumitomo Mitsui Brasileiro S.A., JSC Sumitomo Mitsui Rus Bank, PT Bank Sumitomo Mitsui Indonesia, Sumitomo Mitsui Banking Corporation Malaysia Berhad, SMBC Leasing and Finance, Inc., SMBC Capital Markets, Inc., SMBC Nikko Capital Markets Limited, SMBC Derivative Products Limited and SMBC Capital Markets (Asia) Limited, SMBC Bank EU AG and PT Bank BTPN Tbk.

SMBC Finance Service Co., Ltd. has adopted the Foundation Internal Ratings-Based (FIRB) approach.

Note: Directly controlled SPCs and limited partnerships for investment of consolidated subsidiaries using the AIRB approach have also adopted the AIRB approach. Further, the AIRB approach is applied to equity exposures on a group basis, including equity exposures of consolidated subsidiaries applying the standardised approach.

3. Overview of Internal Rating System

(1) Rating Procedures

(A) Corporate Exposures

- “Corporate, sovereign and bank exposures” includes credits to domestic and overseas commercial/industrial (C&I) companies, individuals for business purposes (domestic only), sovereigns, public sector entities, and financial institutions. Business loans such as apartment construction loans are, in principle, included in “retail exposures.” However, credits of more than ¥100 million are treated as corporate exposures in accordance with the Notification.
- An obligor is assigned an obligor grade by first assigning a financial grade using a financial strength grading model and data obtained from the obligor’s financial statements. The financial grade is then adjusted taking into account the actual state of the obligor’s balance sheet and qualitative factors to derive the obligor grade (for details, please refer to “Credit Risk Assessment and Quantification” on pages 130 to 131). Different rating series are used for domestic and overseas obligors — J1 ~ J10 for domestic obligors and G1 ~ G10 for overseas obligors — as shown in the table following page due to differences in actual default rate levels and portfolios’ grade distribution. Different Probability of Default (PD) values are applied also.
- In addition to the above basic rating procedure which builds on the financial grade assigned at the beginning, in some cases, the obligor grade is assigned based on the parent company’s credit quality or credit ratings published by external rating agencies. The Japanese government, local authorities and other public sector entities with special basis for existence and unconventional financial statements are assigned obligor grades based on their attributes (for example, “local municipal corporations”), as the data on these obligors are not suitable for conventional grading models. Further, credits to individuals for business purposes and business loans are assigned obligor grades using grading models developed specifically for these exposures.
- PDs used for calculating credit risk-weighted assets are estimated based on the default experience for each grade and taking into account the possibility of estimation errors. In addition to internal data, external data are used to estimate and validate PDs. The definition of default is the definition stipulated in the Notification (an event that would lead to an exposure being classified as “substandard loans,” “doubtful assets” or “bankrupt and quasi-bankrupt assets” occurring to the obligor).
- Loss Given Defaults (LGDs) and exposure at default (EAD) used in the calculation of credit risk-weighted assets are estimated based on historical loss experience of credits in default, taking into account the possibility of estimation errors.

Obligor Grade		
Domestic Corporate	Definition	Borrower Category
J1	Very high certainty of debt repayment	Normal Borrowers
J2	High certainty of debt repayment	
J3	Satisfactory certainty of debt repayment	
J4	Debt repayment is likely but this could change in cases of significant changes in economic trends or business environment depending on the situation	
J5	No problem with debt repayment over the short term, but not satisfactory over the mid to long term and the situation could change in cases of any changes in economic trends or business environment	Borrowers Requiring Caution
J6	Currently no problem with debt repayment, but it is highly likely that this could change in cases of significant changes in economic trends or business environment	
J7	Close monitoring is required due to problems in meeting loan terms and conditions, sluggish/unstable business, or financial problems	
J7R	Borrowers Requiring Caution identified as Substandard Borrowers	
J8	Currently not bankrupt, but experiencing business difficulties, making insufficient progress in restructuring, and highly likely to go bankrupt	Potentially Bankrupt Borrowers
J9	Though not yet legally or formally bankrupt, has serious business difficulties and rehabilitation is unlikely; thus, effectively bankrupt	Virtually Bankrupt Borrowers
J10	Legally or formally bankrupt	Bankrupt Borrowers

Obligor Grade		
Overseas Corporate	Definition	Borrower Category
G1	Very high certainty or high certainty of debt repayment	Normal Borrowers
G2	Satisfactory certainty of debt repayment	
G3	Debt repayment is likely but this could change in cases of significant changes in economic trends or business environment depending on the situation	
G4	Debt repayment is likely but this could change in cases of significant changes in economic trends or business environment	
G5	No problem with debt repayment over the short term, but not satisfactory over the mid to long term and the situation could change in cases of any changes in economic trends or business environment	Borrowers Requiring Caution
G6	Currently no problem with debt repayment, but it is highly likely that this could change in cases of significant changes in economic trends or business environment	
G7	Close monitoring is required due to problems in meeting loan terms and conditions, sluggish/unstable business, or financial problems	
G7R	Borrowers Requiring Caution identified as Substandard Borrowers	
G8	Currently not bankrupt, but experiencing business difficulties, making insufficient progress in restructuring, and highly likely to go bankrupt	Potentially Bankrupt Borrowers
G9	Though not yet legally or formally bankrupt, has serious business difficulties and rehabilitation is unlikely; thus, effectively bankrupt	Virtually Bankrupt Borrowers
G10	Legally or formally bankrupt	Bankrupt Borrowers

- “Specialized lending” is sub-classified into “project finance,” “object finance,” “commodity finance,” “income-producing real estate” (IPRE) and “high-volatility commercial real estate” (HVCRE) in accordance with the Notification. Project finance is financing of a single project, such as a power plant or transportation infrastructure, and cash flows generated by the project are the primary source of repayment. Object finance includes aircraft finance and ship finance, and IPRE and HVCRE include real estate finance (a primary example is non-recourse real estate finance). There were no commodity finance exposures as of March 31, 2021.
- Each SL product is classified as either a facility assigned a PD grade and LGD grade or a facility assigned a grade based primarily on the expected loss ratio, both using grading models and qualitative assessment. The former has the same grading structure as that of corporate, and the latter has ten grade levels as with obligor grades but the definition of each grade differs from that of the obligor grade which is focused on PD.  
For the credit risk-weighted asset amount for the SL category, the former facility is calculated in a manner similar to corporate exposures, while the latter facility is calculated by mapping the expected loss-based facility grades to the five categories (hereinafter the “slotting criteria”) of the Notification because it does not satisfy the requirements for PD application specified in the Notification.

(B) Retail Exposures

- “Residential mortgage exposures” includes mortgage loans to individuals and some real estate loans in which the property consists of both residential and commercial facilities such as a store or rental apartment units, but excludes apartment construction loans.
- Mortgage loans are rated as follows.  
Mortgage loans are allocated to a portfolio segment with similar risk characteristics in terms of default risk determined using loan contract information, a borrower category under self-assessment in accordance with an exclusive grading model, and recovery risk at the time of default determined using Loan To Value (LTV) calculated based on the assessment value of collateral real estate. PDs and LGDs are estimated based on the default experience for each segment and taking into account the possibility of estimation errors.  
Further, the portfolio is subdivided based on the lapse of years from the contract date, and the effectiveness of segmentation in terms of default risk and recovery risk is validated periodically.  
Internal data are used to estimate and validate PDs and LGDs. The definition of default is the definition stipulated in the Notification.
- “Qualifying revolving retail exposures” includes card loans and credit card balances.
- Card loans and credit card balances are rated as follows.  
Card loans and credit card balances are allocated to a portfolio segment with similar risk characteristics determined based, for card loans, on the credit quality of the loan guarantee company, credit limit, settlement account balance and payment history, and, for credit card balances, on repayment history and frequency of use.  
PDs and LGDs used to calculate credit risk-weighted asset amounts are estimated based on the default experience for each segment and taking into account the possibility of estimation errors.  
Further, the effectiveness of segmentation in terms of default risk and recovery risk is validated periodically.  
Internal data are used to estimate and validate PDs and LGDs. The definition of default is the definition stipulated in the Notification.
- “Other retail exposures” includes business loans such as apartment construction loans and consumer loans such as My Car Loan.
- Business loans and consumer loans are rated as follows.
  - a. Business loans are allocated to a portfolio segment with similar risk characteristics in terms of default risk determined using loan contract information, a borrower category under self-assessment in accordance with an exclusive grading model, and recovery risk determined based on LTV for business loans.  
PDs and LGDs are estimated based on the default experience for each segment and taking into account the possibility of estimation errors.
  - b. Rating procedures for consumer loans depends on whether the loan is collateralized. Collateralized consumer loans are allocated to a portfolio segment using the same standards as for mortgage loans of “Residential Mortgage Exposures.” Uncollateralized consumer loans are allocated to a portfolio segment based on account history. PDs and LGDs are estimated based on the default experience for each segment and taking into account the possibility of estimation errors.  
Further, the effectiveness of segmentation in terms of default risk and recovery risk is validated periodically.  
Internal data are used to estimate and validate PDs and LGDs. The definition of default is the definition stipulated in the Notification.

(C) Equity Exposures

When acquiring equities subject to the PD/LGD approach, issuers are assigned obligor grades using the same rules as those of general credits to C&I companies, sovereigns and financial institutions. The obligors are monitored (for details, please refer to page 131) and their grades are revised if necessary (credit risk-weighted asset amount is set to 1.5 times when they are not monitored individually). In the case there is no credit transaction with the issuer or it is difficult to obtain financial information, internal grades are assigned using ratings of external rating agencies if it is a qualifying investment.  
In the case it is difficult to obtain financial information and it is not a qualifying investment, the simple risk weight method under the market-based approach is applied.

(2) Parameter Estimation and Its Validation System

A. PD

This is defined as the probability that obligors could default over one year. PD is estimated as the expected value in the long term regardless of the business cycle using the default rate for each fiscal year based on the historical data for five consecutive fiscal years or more. In principle, the default rate for each fiscal year is measured by the initial number of target obligors as the denominator and the number of defaults occurred during the fiscal year as the numerator.  
For assets and ratings applicable to LDP (LDP: Low Default Portfolio), conservative PD is estimated by creating virtual rating transition data based on Monte Carlo simulation and by using the floor value proposed under Basel Capital Accord.

The actual default rates in the past three periods are lower than PD estimate values applied for the respective periods for the most portfolios, because the long-term average value including the recession period is estimated, and also because the possibility of estimation errors is taken into account.

Validation consists of two systems: “backtesting” to retrospectively compare and validate the parameter estimated value and the actual value for the respective applicable period, and “pretesting” to validate before applying the parameter for the purpose of complementing the “backtesting.” The overview for each is as follows.

(a) Backtesting

This is to compare the estimated value with the actual value at least once a year, and to validate that the degree of divergence is within the statistically assumed range.

In case of hitting the predetermined excess criteria as a result of validation, reviews shall be taken including revising the estimation method or rating system.

(b) Pretesting

This is to compare and validate the estimated value to be applied and the historical value. In the case of hitting the predetermined excess criteria, the estimated value shall be conservatively corrected.

The purpose is to prevent underestimation by making adjustments, if necessary.

B. LGD

This is defined as the ratio of loss amounts after default to the amount of receivable at the time of default. LGD is estimated as a long-term average value calculated based on historical data over seven consecutive fiscal years (for retail, five fiscal years) or more. However, in the case where a high positive correlation with the default rate is observed, LGD shall be in principle the value taking into account the possibility that the loss rate of the recession period will exceed the long-term average value, and it is estimated mainly by one of the following methods.

- By taking into account the influence of the recession period on the interest rate to customers constituting the discount rate for calculating the economic loss to be used for estimation
- By taking into account the influence of the recession period by modeling the relationship between the loss ratio and economic and financial indicators, etc.

For the purpose of estimating LGD using economic loss based on requirement of Basel Capital Accord, discount rate is estimated using recovery cost. The averaged period from the time of default to the termination of recovery is used as discount period.

As for validation, backtesting and pretesting are conducted as in A. PD.

C. EAD

This is defined as the amount of exposure at the time of default. EAD is estimated as a long-term average value calculated based on the historical data over seven consecutive fiscal years (for retail, five fiscal years) or more. For estimation, the possibility that the default balance may exceed the latest balance is assumed and taken into account, and EAD is estimated by one of the following methods.

- By estimating the conversion factor that is the ratio of actually drawn amount to the amount associated with undrawn commitments one year before the time of default
- By estimating the conversion factor that is the ratio of the average outstandings of the default borrowers to the average outstandings of the non-default borrowers of the whole limit-type credit subject to the estimation
- By estimating an increased amount by comparing the initial outstandings with ones at the time of default and taking the average for each segment

As for validation, backtesting and pretesting are conducted as in A. PD.

4. Percentage of EAD by Asset Class by Type of Approach for Calculating Credit RWA to Total EAD

	As of March 31, 2021	As of March 31, 2020
IRB approach	95.47 %	94.70 %
Corporate exposures (Advanced Internal Ratings-Based (AIRB) approach)	83.96 %	82.44 %
Corporate exposures (Foundation Internal Ratings-Based (FIRB) approach)	0.26 %	0.24 %
Retail exposures	6.40 %	7.48 %

- Notes: 1. IRB model presented in this table covers all models used within the scope of regulatory consolidation.  
2. Applicable portfolios of each IRB model take into account the portfolio classification under Basel Capital Accord. “Corporates” include “Sovereign,” “Banks,” “Specialized lending,” “Equity (PD/LGD approach)” and “Purchased receivables (corporates),” and “Residential mortgage” and “Other retail” include “Purchased receivables (retail).” Therefore, the same classifications are used in this table.  
3. A maximum of ten categories of obligor rating in the internal rating system are consolidated into five categories as PD categories.  
4. For the external ratings associated with, external ratings equivalent to the PD of non-Japanese companies mainly are listed in the columns of S&P, Moody's, and Fitch, and external ratings equivalent to the PD of Japanese companies mainly are listed in the columns of R&I and JCR.  
5. The number of obligors of “Qualifying revolving retail,” “Residential mortgage” and “Other retail” states the number of receivables.  
6. The proportion of credit risk-weighted assets subject to the IRB approach is that “Corporates” accounts for 86.31 percent, “Qualifying revolving retail” accounts for 4.01 percent, “Residential mortgage” accounts for 4.79 percent, and “Other retail” accounts for 3.38 percent.

9. SL (Slotting Criteria Approach) and Equity Exposures (Market-Based Approach, etc.) (CR10)

10. Credit Risk-Weighted Assets under Article 145 of the Notification

Exposures under Article 145 of the Notification include investments to funds. In the case of such exposures, in principle, each underlying asset of the fund is assigned an obligor grade to calculate the asset’s credit risk-weighted asset amount and the amounts are totaled to derive the credit risk-weighted asset amount of the fund. When it is difficult to calculate the credit risk-weighted asset amount of individual underlying assets, the weighted average of the risk weight of individual underlying assets is calculated, where risk weight of 250%/ 400% is applied if the result of such calculation proved to be 250%/400% or less, while 1,250% is applied otherwise.

(Millions of yen)

Calculation method	As of March 31, 2021	As of March 31, 2020
Look-through approach	1,696,974	964,706
Mandate-based approach	—	—
Simple approach (subject to 250% risk weight)	32,783	16,497
Simple approach (subject to 400% risk weight)	89,091	93,856
Fall-back approach	7,119	4,720

■ Standardised Approach

1. Scope

The following consolidated subsidiaries have adopted the standardised approach for exposures as of March 31, 2021 (i.e. consolidated subsidiaries not listed in the “Internal Ratings-Based (IRB) Approach: 1. Scope” on page ●●●).

(1) Consolidated Subsidiaries Planning to Adopt Phased Rollout of the AIRB Approach  
SMBC Consumer Finance Co., Ltd. and SMBC Nikko Securities Inc.

(2) Consolidated Subsidiaries Planning to Adopt Phased Rollout of the FIRB Approach  
Currently, there are no subsidiaries applicable.

(3) Other Consolidated Subsidiaries  
These are consolidated subsidiaries judged not to be significant in terms of credit risk management based on the type of business, scale, and other factors. These subsidiaries will adopt the standardised approach on a permanent basis.

2. Credit Risk-Weighted Asset Calculation Methodology

A 100% risk weight is applied to claims on corporates in accordance with Article 45 of the Notification, and risk weights corresponding to country risk scores published by the Organization for Economic Co-operation and Development (OECD) are applied to claims on sovereigns and financial institutions.

Note: As the sum of the respective risk weight of the original obligor and the original obligee are applied for the risk weight for loan participation transactions by a bank adopting the SA, the credit RWA amount calculated by summing up the exposure amount multiplied by the corresponding risk weights in the above table does not match with the credit RWA amount shown in column e of CR4 (SA-CR exposure and CRM effects).

■ Credit Risk Mitigation (CRM) Techniques

1. Overview of Risk Characteristics, Risk Management Policy, Risk Management Procedures and Risk Management System

In calculating credit risk-weighted asset amounts, We take into account credit risk mitigation (CRM) techniques. Specifically, amounts are adjusted for eligible financial or real estate collateral, guarantees, and credit derivatives. The methods and scope of these adjustments and methods of management are as follows.

(1) Scope and Management

A. Collateral (Eligible Financial or Real Estate Collateral)

SMBC designates deposits and securities as eligible financial collateral, and land and buildings as eligible real estate collateral.

Real estate collateral is evaluated by taking into account its fair value, appraisal value, and current condition, as well as our lien position. Real estate collateral must maintain sufficient collateral value in the event security rights must be exercised due to delinquency. However, during the period from acquiring the rights to exercising the rights, the property may deteriorate or suffer damage from earthquakes or other natural disasters, or there may be changes in the lien position due to, for example, attachment or establishment of liens by a third party. Therefore, the regular monitoring of collateral is implemented according to the type of property and the type of security interest.

B. Guarantees and Credit Derivatives

Guarantors are sovereigns, municipal corporations, credit guarantee corporations and other public entities, financial institutions, and C&I companies. Counterparties to credit derivative transactions are mostly domestic and overseas banks and securities companies.

Credit risk-weighted asset amounts are calculated taking into account credit risk mitigation of guarantees and credit derivatives acquired from entities with sufficient ability to provide protection such as sovereigns, municipal corporations and other public sector entities of comparable credit quality, and financial institutions and C&I companies with sufficient credit ratings.

(2) Concentration of Credit Risk and Market Risk under Credit Risk Mitigation Techniques

There is a framework in place for controlling concentration of risk in obligors with large exposures which includes large exposure limit lines, risk concentration monitoring, and reporting to the Credit Risk Committee (please refer to pages 129 to 134). Further, exposures to these obligors are monitored on a group basis, taking into account risk concentration in their parent companies in cases that exposures to the obligors are guaranteed by the parent companies for risk mitigation.

In addition, when marketable financial products (for example, credit derivatives) are used as credit risk mitigants, market risk generated by these products is controlled by setting upper limits.

As credit risk mitigation techniques, eligible real estate collateral and guarantees have shown a certain effect.

2. Credit Risk Mitigation Techniques (CR3)

Counterparty Credit Risk

1. Overview of Risk Characteristics

Counterparty credit risk is actualized when counterparties become default in a condition where derivative transactions, etc. have a positive value, and risks fluctuate according to the credit quality of counterparties and related market indicators.

2. Risk Management Policy and Procedures

(1) Risk Management Policy

For counterparty credit risks, credit limits are set according to the frameworks of credit management in each SMBC Group company. For transactions with CCP, credit risks are managed after validating the financial base and the default management process, etc.

(2) Policy on Collateral Security and Impact of Deterioration of Our Credit Quality

Collateralized derivative is a CRM technique in which collateral is delivered or received regularly in accordance with replacement cost.

The Group conducts collateralized derivative transactions as necessary, thereby reducing credit risk. In the event our credit quality deteriorates, however, the counterparty may demand additional collateral, but its impact is deemed to be insignificant.

(3) Netting

Netting is another CRM technique, and “close-out netting” is the main type of netting. In close-out netting, when a default event, such as bankruptcy, occurs to the counterparty, all claims against, and obligations to, the counterparty, regardless of maturity and currency, are netted out to create a single claim or obligation. Close-out netting is applied to foreign exchange and swap transactions covered under a master agreement with a net-out clause or other means of securing legal effectiveness, and the effect of CRM is taken into account only for such claims and obligations.

3. Amount of Counter Party Credit Risk (CCR) Exposure by Approach (CCR1)

(Millions of yen)

CCR1: Amount of CCR exposure by approach		As of March 31, 2021

## ■ Securitisation Transactions

### 1. Overview of Risk Characteristics

Securitisation exposures have, in addition to credit risk and market risk, the following intrinsic risks, which are properly managed based on the nature of each risk.

#### (1) Dilution Risk

Means the risk of a decrease in purchased receivables due to cancellation or termination of the original contract for the purchased receivables, or netting of debts between the original obligor and the original obligee.

#### (2) Servicer Risk

##### A. Commingling Risk

Means the risk of uncollectible funds, which should be collected from the underlying assets, due to the bankruptcy of the servicer before the delivery of the funds collected from the obligor of the receivables.

##### B. Performance Risk

Means the risk of difficulty in maintenance and collection due to the servicer's failure to properly and accurately perform its clerical duties and procedures.

#### (3) Liquidity Risk

Means the risk that cash flows related to the underlying assets may be insufficient for paying the principal and interest of the securitisation exposure due to a timing mismatch between the securitisation conduit's receipt of the cash flows related to the underlying assets and payment of the securitisation exposure of the principal and interest, etc.

#### (4) Fraud Risk

Means the risk of a decrease in or complete loss of the receivables subject to collection due to a fraud, prejudicial or other malicious act by a customer or a third-party obligor.

### 2. Overview of Risk Management Policy and Procedures

Definition of securitisation exposure has been clarified in order to properly identify, measure, evaluate and report risks, and a risk management department, independent of business units, has been established to centrally manage risks from recognizing securitisation exposures to measuring, evaluating and reporting risks.

Securitisation transactions are subject to the following policies.

- Undertake those which allow separate assessment of underlying short-term assets by making credit decisions on individual underlying assets.
- Undertake those which cover short-term receivables, etc., by creating a framework mainly to estimate the default rate of the underlying assets based on the historical loan-loss ratio and ensure that they have sufficient subordination.
- Undertake others such as those requiring special management by implementing additional management, such as an analysis of the market environment. Particularly, with respect to securitisation transactions backed by retail loans whose creditworthiness is relatively inferior, such as subprime loans in the U.S., the Group deals only with transactions that are sufficiently structured by taking into account not only the above policies, but others such as the underlying asset selection criteria of the originator and the average life.

The Group shall basically not conduct resecuritisation transactions.

Its policy is to conduct securitisation transactions by verifying effectiveness in mitigating credit risk through the use of the asset transfer type or synthetic type securitisation transactions covering domestic and foreign exposures and using them as underlying exposures if securitisation transactions are used as an approach for credit risk mitigation.

The Group takes one of the following positions for securitisation transactions.

- Originator (a direct or indirect originator of underlying assets or a sponsor of an ABCP conduit or a similar program that acquires exposures from third-party entities)
- Investor
- Others (for example, provider of swap for preventing a mismatch between the dividend on trust beneficiary rights and cash flows generated by underlying assets on which the rights are issued)

3. Name of Securitisation Conduit and Whether or Not It Possesses Securitisation Exposure Related to Securitisation Transactions, as well as Names of Subsidiaries and Affiliated Companies of us Which Hold Securitisation Exposures Related to Securitisation Transactions Conducted by us and we Engage in the Management of the Company or Provides Advice

In order to undertake securitisation transactions related to third-party assets, the Group mainly uses a special purpose company (SPC) as a securitisation conduit.

- Manhattan Asset Funding Company LLC
- Chelsea Capital Corporation
- Forest Corporation
- Spur Funding Corporation
- Deccan Funding GK
- Taeguk Funding Designated Activity Company

Excluding consolidated subsidiaries, subsidiaries or affiliated companies holding securitisation exposures related to the security transactions conducted by the Holding Company Group are as follows:

- The Japan Net Bank, Limited

4. Name of Securitisation Conduit that Provides Non-Contractual Credit Enhancement, etc. and Impacts on Capital by Such Non-Contractual Credit Enhancement, etc. for Each Securitisation Conduit

Not applicable.

5. Accounting Policy on Securitisation Transactions

The recognition of the generation and extinguishment of financial assets and financial liabilities associated with securitisation transactions and the valuation and accounting treatment thereof are mainly governed by the “Accounting Standard for Financial Instruments” (ASBJ Statement No. 10).

6. Names of Qualifying External Ratings Agencies

In order to calculate the amount of credit risk weighted asset for securitisation exposure with the external ratings-based approach or the standardised approach, or to calculate the amount of market risk associated with specific risk, the risk weights are determined by mapping the ratings of qualifying rating agencies to the risk weights stipulated in the Notification. The qualifying rating agencies are Rating and Investment Information, Inc. (R&I), Japan Credit Rating Agency, Ltd. (JCR), Moody’s Investors Service, Inc. (Moody’s), S&P Global Ratings (S&P), and Fitch Ratings Ltd. (Fitch).

When more than one rating is available for an exposure, the second smallest risk weight is used, in accordance with the Notification.

## ■ Equity Exposures

### 1. Overview of Risk Management Policy and Procedures

Securities in the banking book are properly managed, for example, by setting upper limits on the allowable amount of risk under the market or credit risk management framework selected according to their holding purpose and risk characteristics.

For securities held as “available-for-sale securities,” the upper limits are also set in terms of price fluctuation risk and default risk.

In addition, regarding stocks of subsidiaries, assets and liabilities of subsidiaries are categorized into corresponding risk categories and risk-managed on a consolidated basis, in light of the upper limits set for each risk.

As for stocks of affiliates, risks related to gains and losses from investments are managed with the upper limits.

The limits are established within the maximum amount of overall risk capital, taking into account the financial and business situations of SMBC Group.

### 2. Valuation of Securities and Other Significant Accounting Policies

Stocks of non-consolidated subsidiaries and affiliates not accounted for by the equity method are carried at amortized cost using the moving-average method. Available-for-sale securities with market prices (including foreign stocks) are carried at their average market prices during the final month of the fiscal year. Securities other than these securities are carried at their market prices at the end of the fiscal year under review (cost of securities sold is calculated using primarily the moving-average method), and those with no available market prices are carried at cost using the moving-average method.

Net unrealized gains (losses) on available-for-sale securities and net of income taxes are reported as a component of “net assets.”

## ■ Market Risk

### 1. Scope

The following approaches are used to calculate market risk equivalent amounts.

#### (1) Internal Models Method

General market risk of SMBC, SMBC Bank International plc, SMBC Bank EU AG, Sumitomo Mitsui Banking Corporation (China) Limited, SMBC Capital Markets, Inc., SMBC Nikko Capital Markets Limited, SMBC Derivative Products Limited, and SMBC Capital Markets (Asia) Limited

#### (2) Standardized Measurement Method

- Specific risk
- General market risk of consolidated subsidiaries other than SMBC, SMBC Bank International plc, SMBC Bank EU AG, Sumitomo Mitsui Banking Corporation (China) Limited, SMBC Capital Markets, Inc., SMBC Nikko Capital Markets Limited, SMBC Derivative Products Limited, and SMBC Capital Markets (Asia) Limited
- A portion of general market risk of SMBC

### 2. Market Risk under standardised approach (MR1)

4. IMA values for trading portfolios (MR3)

(Millions of yen)

MR3: IMA values for trading portfolios			
		Fiscal 2020	Fiscal 2019
Item No.			
	VaR (holding period of 10 business days, one-sided confidence level of 99%)		
1	Maximum value	16,686	18,358
2	Average value	11,590	12,618
3	Minimum value	9,237	8,806
4	Period end	10,406	16,397
	Stressed VaR (holding period of 10 business days, one-sided confidence level of 99%)		
5	Maximum value	39,801	42,390
6	Average value	30,000	30,302
7	Minimum value	23,261	22,261
8	Period end	34,774	30,736
	Incremental risk value (one-sided confidence level of 99.9%)		
9	Maximum value	—	—
10	Average value	—	—
11	Minimum value	—	—
12	Period end	—	—
	Comprehensive risk value (one-sided confidence level of 99.9%)		
13	Maximum value	—	—
14	Average value	—	—
15	Minimum value	—	—
16	Period end	—	—
17	Floor (modified standardized measurement method)	—	—

Note: The VaR and the stressed VaR are calculated using the historical simulation method. Specifically, they are calculated on a daily basis, assuming a one-sided confidence level of 99.0% and a one-day holding period, based on profit and loss simulation on a scenario-specific basis generated from historical data (the full valuation method, in principle), and they are adjusted to a 10-day holding period using the square root of time method. Under this method, the VaR and the stressed VaR use observation periods of four years immediately preceding, and 12 months including the stress period, respectively.

5. Backtesting results by the internal models approach (MR4)

The status of backtesting of trading for Fiscal 2020 and 2019 is as follows. “Daily gain/loss” represents the actual gain/loss incurred, and “Daily VaR” represents the daily VaR calculated using the risk measurement model with a one-day holding period. In the past 250 business days, the number of times loss exceeded VaR was 0, and the VaR model (one-sided confidence level of 99.0%) is considered to have sufficient accuracy.

Interest Rate Risk in the Banking Book

1. Overview of Risk Management Policy and Procedures

Interest rate risk in the banking book is the risk to the present value of a bank’s assets and liabilities and/or the future earnings (interest income) from the rate-sensitive instruments when interest rates change. SMBC Group recognizes interest rate risk as a significant risk and manages it in an integrated manner, together with other market risks (equity position risk, etc.) (For details, please refer to pages 134 to 135).

Interest rate risk management is conducted using basis point value (BPV) as a measure of the risk, which denotes the change of present value given a basis point rise in the interest rate. Appropriate limits on BPVs are set for each significant subsidiary including SMBC according to its capital and business plan, and BPVs are monitored daily for risk management. BPVs are managed not only by changing the balance and term structures of assets and liabilities, but also by using hedging instruments such as interest rate swaps and futures.

2. Calculation Method of Interest Rate Risk

Interest rate risk in the banking book is measured based on the future cash flows of the bank’s assets and liabilities. Especially, the method of recognizing the dates for maturity of demand deposits (current accounts and ordinary deposit accounts that can be withdrawn at any time) and the method of estimating the time of cancellation prior to maturity of time deposits and mortgage loans affect the risk significantly. Key assumptions for measuring interest rate risk of such instruments are as follows.

Method of recognizing the maturity of demand deposits

The amount of the bank’s core deposits is identified as the amount of demand deposits expected to be left with the bank after 5 years (with 50% of the lowest balance during the past 5 years as the upper limit). The maturity of the core deposits is regarded to be 5 years (2.5 years on average). The maturity of the bank’s demand deposits are recognized with 5 years as the maximum term (the average is 0.7 year).

Method of estimating the time of cancellation prior to maturity of time deposits and mortgage loans

Cash flows of mortgage loans tend to be different from the initial scheduled ones, as customers may exercise their prepayment options to redeem early in a bonus month or as time passes. Similarly, fixed-term deposits may be canceled prior to maturity. For such instruments, interest rate risk is managed by using statistical models to estimate cash flows for each instrument, considering the seasonality, elapsed years, interest rate levels at the effective time, etc. These models are validated and reviewed regularly.

3. Interest Rate Risk

Table IRRBB1 shows changes in economic value of equity (ΔEVE) and net interest income (ΔNII) in the banking book, simulated based on a set of prescribed interest rate shock scenarios.

As stipulated under the Pillar 2 of Basel Framework (Supervisory Review Process), in order to identify banks that may have taken too large interest rate risk, the Japan FSA applies “materiality test” as comparing the bank’s ΔEVE with 15% of its Tier 1 capital, under a set of prescribed interest rate shock scenarios. The measurement result of SMBC Group’s ΔEVE shows that the economic value of equity declines when interest rates rise and the maximum change amount is under the prescribed parallel shock up scenario. SMBC Groups’ ΔEVE is not larger than 15% of our Tier 1 capital.

As for ΔNII, net interest income declines under the prescribed parallel shock down scenario and increased under the parallel shock up scenario. Due to the assumption of zero floor on the interest rate of customer’s deposits in JPY, which limits reduction of the funding cost when interest rate down, the change amount is larger under the parallel shock down scenario.

The measurement scope, the definition of each figure and the calculation assumption are as follows.

Scope

- The consolidated subsidiaries of SMBC
- ΔEVE is calculated by simple aggregation of the decrease in economic value for all currencies.
  - ΔNII is calculated by simple aggregation of the change amount of interest income for each currency in which the total amount of interest rate-sensitive assets and liabilities is 5% or more of the total.

Definition of Each Figure and Calculation Assumption

- ΔEVE  
Decrease in economic value (EVE, Economic Value on Equity) against interest rate shock (excluding the credit spread).
- ΔNII  
Decrease in 1 year interest income (NII, Net Interest Income) under each the interest rate shock. It is calculated under the constant balance sheet, which means that the balance sheet does not change through a year. In each simulation, we do not allow negative interest rate for domestic yen deposits and loans in any scenario.

Note: Interest rate shocks of deposits with central banks is considered to be the same with the standardized interest rate shocks when calculating ΔNII.

Operational Risk

1. Operational Risk Equivalent Amount Calculation Methodology

Sumitomo Mitsui Financial Group adopted the Advanced Measurement Approach (AMA) for exposures as of March 31, 2008. The following consolidated subsidiaries have also adopted the AMA, and the remaining consolidated subsidiaries have adopted the Basic Indicator Approach (BIA).

Sumitomo Mitsui Banking Corporation, Sumitomo Mitsui Card Company, Limited, The Japan Research Institute, Limited, SMBC Finance Service Co., Ltd., SMBC Guarantee Co., Ltd., SMBC Operation Service Co., Ltd., SMBC Green Service Co., Ltd., SMBC Bank International plc, Sumitomo Mitsui Banking Corporation (China) Limited, SMBC Nikko Securities Inc., and SMBC Consumer Finance Co., Ltd.

2. Outline of the AMA

For the “Outline of the AMA,” please refer to pages 137 to 139.

3. Usage of Insurance to Mitigate Risk

Sumitomo Mitsui Financial Group had not taken measures to mitigate operational risk through insurance coverage for exposures.

Notes: 1. Transactions in the trading book including derivative transactions extend over multiple risk categories, since they are subject to both market risks and counterparty credit risks.

2. Account titles including monetary claims boughts are subject to securitisation products if they have a characteristic of securitisation products, otherwise they are subject to CR, therefore, they extend over multiple risk categories.

3. Foreign exchange risk and commodities risk in the banking book are not included in column f "Market risk," since it is difficult to link them with account titles.

## 2. Main Sources of Differences between Regulatory Exposure Amounts and Carrying Values in Consolidated Financial Statements (LI2)

(Millions of yen)

LI2: Main sources of differences between regulatory exposure amounts and carrying values in consolidated financial statements amounts		As of March 31, 2021				
Item No.		a	b	c	d	e
		Total	Items subject to:			
			CR (excluding amounts relevant to c and d)	CCR	Securitisation (excluding amounts relevant to e)	Market risk
1	Asset carrying value amount under scope of regulatory consolidation	240,382,285	215,336,276	18,164,407	3,796,431	6,609,195
2	Liabilities carrying value amount under scope of regulatory consolidation	20,684,944	3,082	18,690,222	955	5,357,649
3	Total net amount under regulatory scope of consolidation	219,697,340	215,333,193	(525,814)	3,795,475	1,251,545

Note: Terms in this form shall, unless otherwise prescribed separately, be used in accordance with the terminology used in the Notification as well as the Bank Holding Company Equity Capital Adequacy Notification.

- a. Basel III Template No. (hereinafter referred to as “Item No.” in this form) 3 “Total exposures” shall state the total amount of the following.
- (1) The amount of on-balance sheet assets (total assets reported in the non-consolidated balance sheet or the consolidated balance sheet, less the amount of customers’ liabilities for acceptance and guarantees, less the amounts reported with respect to (2) and (3) reported in the non-consolidated balance sheet or the consolidated balance sheet)
  - (2) The amount of derivative transactions, etc. (referring to forward contract, swap, option, and other derivatives and long settlement transactions; hereinafter the same in (2) and (4)) (the amount of exposure calculated in respect of derivative transactions, etc. (the amount of replacement cost calculated by using current exposure method (which shall be zero if such amount turned out to be a negative value), added by the add-on amount, as well as the notional amount of the credit derivative that provides protection), added by the consideration of the margin deposited in cash in connection with derivative transactions, etc.)
  - (3) The amount of SFTs (amount of cash receivables in SFTs added by the amount of exposure at the counterparty of transaction calculated for each unit of SFTs (which shall be zero if such amount turned out to be a negative value))
  - (4) The amount of off-balance sheet transactions (excluding derivative transactions, etc., and SFTs) (the amount of credit risk exposure at the counterparty of transaction, added by the amount of exposure arising from the underlying asset, as well as the amount of securitisation exposure)
- b. Item No.4 “Mutual relevance - Intra-financial system assets” shall state the total amount of the following balances concerning the credit granted to financial institutions, etc. (including financial instruments business operators prescribed under Article 2, Paragraph 9 of the Financial Instruments and Exchange Act, insurance companies, central counterparty, pension funds and other business operators of the similar kind; hereinafter the same in b. and c.).
- (1) Funds deposited with or lent to other financial institutions and undrawn committed lines extended to other financial institutions
  - (2) Holdings of securities issued by other financial institutions (referring to secured bonds, general unsecured bonds, subordinated bonds, short-term bonds, negotiable certificates of deposit and stock; hereinafter the same in Item No. 6)
  - (3) Net positive current exposure of SFTs with other financial institutions (which can take into account the effect of legally binding netting contracts, but cannot have a negative value)
  - (4) The add-on amount calculated based on the amount measured at fair value and by using the current exposure method as adopted for the derivative instruments transactions and long settlement transactions with other financial institutions, without involving financial instruments markets as defined under Article 2, Paragraph 14 of the Financial Instruments and Exchange Act, and foreign financial instruments markets as defined under Article 2, Paragraph 8, Item 3(b) of the same Act (which can

- take into account the effect of legally valid bilateral netting contracts, but cannot have a negative value; hereinafter collectively referred to as “financial instruments markets, etc.” in Item No. 10 and c.)
- c. Item No. 5 “Mutual relevance - Intra-financial system liabilities” shall state the total amount of the following balances.
- (1) Deposits due to, and loans obtained from other financial institutions (including undrawn committed lines)
- (2) Net negative current exposure of SFTs with other financial institutions (which can take into account the effect of legally valid bilateral netting contracts, but cannot exceed zero)
- (3) The add-on amount calculated based on the amount measured at fair value and by using the current exposure method as adopted for the derivative instruments transactions and long settlement transactions with other financial institutions, without involving financial instruments markets, etc. (which can take into account the effect of legally valid bilateral netting contracts, but cannot exceed zero)
- d. Item No. 8 “Substitutability/financial infrastructure – the annual total amount of payments through settlement systems” shall state the annual total amount of payments settled through the BOJ-NET, the Japanese Banks’ Payment Clearing Network and other similar settlement systems but excluding intra-group payments in the most recently ended fiscal year.
- e. Item No.9 “Substitutability/financial infrastructure – the annual total amount of underwritten transactions in debt and equity markets” shall state the annual total amount of transactions underwritten in debt and equity markets in the most recently ended fiscal year (referring to securities underwriting as prescribed in Article 2, Paragraph 8, Item 6 of the Financial Instruments and Exchange Act).
- f. Financial institutions mentioned in Item No.10 “Complexity – total amount of notional amount of OTC derivatives and long settlement transactions with other financial institutions” refer to financial institutions, etc. as defined in b. above.
- g. Item No.12 “Complexity – Held-for-trading (HFT) securities and available-for-sale (AFS) securities” shall state the total amount of balances of Held-for-trading (HFT) securities and available-for-sale (AFS) securities (excluding HFT and AFS securities that are considered to have high liquidity).
- h. In each item in this form, if there is no specific applicable amount in the submitting financial institution, the item in question shall not be deleted but just be marked with { - }.
- i. In this form, all amounts shall be stated in the designated unit herein, and any fraction less than such unit shall be rounded down.
- j. This form shall be prepared only by a bank subject to the uniform international standards (excluding the bank that is a consolidated subsidiary of a bank as well as the bank that is a consolidated subsidiary not of a bank but of a banking holding company, and consolidated subsidiary of a regulated foreign entity), or a holding company subject to the uniform international standards that states in Item No. 3 an equivalent to an amount in excess of 200 billion euros at the exchange rate as at the end of its most recently ended fiscal year, or that is designated by the Commissioner of the Financial Services Agency of Japan as an equivalent to a bank or a holding company subject to the uniform international standards.

		The amount of deposits with the Bank of Japan	61,884,206	
		Total exposures (including deposits with the Bank of Japan) (f')	260,054,990	
		Leverage ratio on a consolidated basis (including deposits with the Bank of Japan) ((e)/(f'))	4.30%	

Note: The key drivers of material change observed from March 31, 2020 to March 31, 2021

Leverage ratio as of March 31, 2021 is higher than March 31, 2020 due to a decrease in the total exposures as a result of the exclusion of deposits with the Bank of Japan, based on the amendment of Japanese Financial Services Agency (JFSA) Notification on June 30, 2020, under the provision to Paragraph 4 of Article 5 of the notification of JFSA No. 12, 2019.

TLAC information

■ TLAC1: TLAC composition for G-SIBs (at resolution group level)

Sumitomo Mitsui Financial Group, Inc. and Subsidiaries

(Millions of yen, except percentages)			
Basel III Template No.	Items	As of March 31, 2021	As of March 31, 2020
Preferred resolution strategy (1)			
The SPE (Single Point of Entry) resolution strategy is considered to be the preferred resolution strategy for Sumitomo Mitsui Financial Group, Inc. (SMFG) and its subsidiaries. More concretely, at the time of a stress, following the relevant authority's determination that one or more of the material sub-groups, i.e. Sumitomo Mitsui Banking Corporation and SMBC Nikko Securities Inc., have reached the point of non-viability, losses incurred to them would be passed to SMFG, the ultimate holding company. While this could lead to a resolution of SMFG, the material sub-groups are expected to continue their business as usual under the Specified Bridge Financial Institution, etc. incorporated by the Deposit Insurance Corporation of Japan (DICJ) to which SMFG transfers its business.			
Regulatory capital elements of TLAC and adjustments (2)			
1	Common Equity Tier 1 capital (CET1)	(A) 10,562,772	9,581,264
2	Additional Tier 1 capital (AT1) before TLAC adjustments	(B) 636,528	668,672
3	AT1 ineligible as TLAC as issued out of subsidiaries to third parties	(C) —	—
4	Other adjustments	(D) —	—
5	AT1 instruments eligible under the TLAC framework ((B) - (C) - (D))	(E) 636,528	668,672
6	Tier 2 capital (T2) before TLAC adjustments	(F) 1,089,970	1,302,063
7	Amortised portion of T2 instruments where remaining maturity > 1 year	(G) (179,401)	(249,452)
8	T2 capital ineligible as TLAC as issued out of subsidiaries to third parties	(H) —	—
9	Other adjustments	(I) 52,811	152,042
10	T2 instruments eligible under the TLAC framework ((F) - (G) - (H) - (I))	(J) 1,216,561	1,399,473
11	TLAC arising from regulatory capital ((A) + (E) + (J))	(K) 12,415,862	11,649,410
Non-regulatory capital elements of TLAC (3)			
12	External TLAC instruments issued directly by the bank and subordinated to excluded liabilities	(L) 5,307,262	4,972,597
13	External TLAC instruments issued directly by the bank which are not subordinated to excluded liabilities but meet all other TLAC term sheet requirements		
14	Of which: amount eligible as TLAC after application of the caps		
15	External TLAC instruments issued by funding vehicles prior to 1 January 2022		
16	Eligible ex ante commitments to recapitalise a G-SIB in resolution	(M) 1,650,200	1,539,976
17	TLAC arising from non-regulatory capital instruments before adjustments ((L) + (M))	(N) 6,957,463	6,512,574
Non-regulatory capital elements of TLAC: adjustments (4)			
18	TLAC before deductions ((K) + (N))	(O) 19,373,325	18,161,984
19	Deductions of exposures between MPE resolution groups that correspond to items eligible for TLAC (not applicable to SPE G-SIBs)	(P) —	—
20	Deduction of investments in own other TLAC liabilities	(Q) —	—
21	Other adjustment to TLAC	(R) —	—
22	TLAC after deductions ((O) - (P) - (Q) - (R))	(S) 19,373,325	18,161,984
Risk-weighted assets and leverage exposure measure for TLAC purposes (5)			
23	Total risk-weighted assets (RWA)	(T) 66,008,023	61,599,066
24	Total exposures	(U) 198,170,783	237,488,658
TLAC ratios and buffers (6)			
25	TLAC before deduction of CET1 specific buffer requirement (as a percentage of RWA) ((S) / (T))	29.34%	29.48%
25a	TLAC (as a percentage of RWA)	25.82%	25.96%
26	TLAC (as a percentage of total exposures) ((S) / (U))	9.77%	7.64%
27	CET1 available after meeting the minimum capital requirements	10.61%	10.63%
28	CET1 specific buffer requirement	3.52%	3.52%
29	of which: capital conservation buffer requirement	2.50%	2.50%
30	of which: countercyclical buffer requirement	0.02%	0.02%

Liquidity Coverage Ratio Information (Consolidated)

Sumitomo Mitsui Financial Group, Inc. and Subsidiaries

Since March 31, 2015, the “Liquidity Coverage Ratio” (hereinafter referred to as “LCR”), the liquidity ratio regulation under the Basel III, has been introduced in Japan. In addition to the application of uniform international standards, Sumitomo Mitsui Financial Group calculates its consolidated LCR using the calculation formula stipulated in the “Criteria for Evaluating the Soundness of Liquidity Status Set Forth by a Bank Holding Company as a Benchmark for Judging the Soundness of Management of Itself and its Subsidiaries, etc., Based on the Provision of Article 52-25 of the Banking Act, and Which Are Also the Criteria to be Referred to for Judging the Soundness of Management in Banks” (Notification No. 62 issued by the Japanese Financial Services Agency in 2014; hereinafter referred to as the “LCR Notification”).

■ Disclosure of Qualitative Information about Liquidity Coverage Ratio

1. Intra-period Changes in Consolidated LCR

As described on the following page, the LCR has remained stable since the introduction of the liquidity ratio regulation on March 31, 2015.

2. Assessment of Consolidated LCR

The LCR Notification stipulates the minimum requirement of the LCR at 100%. The LCR of Sumitomo Mitsui Financial Group (consolidated) exceeds the minimum requirements of the LCR, having no cause for concern. In terms of the future LCR forecasts, Sumitomo Mitsui Financial Group does not expect significant deviations from the disclosed ratios. In addition, the actual LCR does not differ significantly from the initial forecast.

3. Composition of High-Quality Liquid Assets

Regarding the high-quality liquid assets allowed to be included in the calculation, there are no significant changes in locations and properties of currency denominations, categories and so on. In addition, in respect of major currencies (those of which the aggregate amount of liabilities denominated in a certain currency accounts for 5% or more of Sumitomo Mitsui Financial Group’s total liabilities on the consolidated basis), there is no significant mismatch in currency denomination between the total amount of the high-quality liquid assets allowed to be included in the calculation and the amount of net cash outflows.

4. Other Information Concerning Consolidated LCR

Sumitomo Mitsui Financial Group has not applied “special provisions concerning qualifying operational deposits” prescribed in Article 28 of the LCR Notification and “increased liquidity needs related to market valuation changes on derivative or other transactions simulated through Scenario Approach” prescribed in Article 37 of the LCR Notification. Meanwhile, Sumitomo Mitsui Financial Group records “due to trust account,” etc. under “cash outflows based on other contracts” prescribed in Article 59 of the LCR Notification.

Gross banking profit rate (%) .....	0.95%	1.26%	1.11%	1.06%	1.27%	1.19%

- Notes: 1. Domestic operations include yen-denominated transactions by domestic branches, while international operations include foreign-currency-denominated transactions by domestic branches and operations by overseas branches. Yen-denominated nonresident transactions and Japan offshore banking accounts are included in international operations.
2. Figures in brackets [ ] indicate interest payments of interdepartmental lending and borrowing activities between domestic and international operations. Difference between sums of domestic and international operations and some figures in the total column due to indication on a net basis of interest from interest rate swaps and similar instruments, is included in figures in brackets [ ].
3. As net figures are shown for trading income and losses, figures in the total column of trading income and trading losses are less than sums of domestic operations and international operations, respectively (¥0 million for the year ended March 31, 2021).
4. As net figures are shown for financial derivatives, figures in the total column of other operating income and other operating expenses are less than sums of domestic operations and international operations, respectively (¥4,892 million for the year ended March 31, 2021).
5. Gross banking profit rate = Gross banking profit / Average balance of interest-earning assets × 100

### Classification based on Self-Assessment, and the Financial Reconstruction Act, and Write-Offs/Reserves

March 31, 2021		(Billions of yen)							
Category of borrowers under self-assessment	NPLs based on the Financial Reconstruction Act	Classification under self-assessment				Reserve for possible loan losses	Reserve ratio		
		Classification I	Classification II	Classification III	Classification IV				
Bankrupt Borrowers	Bankrupt and quasi-bankrupt assets (1) ¥112.7	Portion of claims secured by collateral or guarantees, etc. (a)		Fully reserved	Direct write-offs (Note 1)	Specific reserve	¥21.9 (Note 2)		100% (Note 3)
Effectively Bankrupt Borrowers		¥94.4		¥18.3					
Potentially Bankrupt Borrowers	Doubtful assets (2) ¥306.3	Portion of claims secured by collateral or guarantees, etc. (b)		Necessary amount reserved			¥83.0 (Note 2)		71.32% (Note 3)
Borrowers Requiring Caution	Substandard loans (3) ¥208.8	Portion of substandard loans secured by collateral or guarantees, etc. (c) ¥70.5				General reserve	General reserve for substandard loans ¥53.1		38.18% (Note 3)
	(Claims to substandard borrowers)	Claims to borrowers requiring caution, excluding claims to substandard borrowers					¥351.3 (Note 5)		6.55% (11.81%) (Note 4)
Normal Borrowers	Normal assets ¥95,426.7	Claims to normal borrowers							0.11% (Note 4)
				Loan loss reserve for specific overseas countries			¥0.3		
NPL ratio (5) / (4) 0.65%	Total (4) ¥96,054.5		Total reserve for possible loan losses			¥456.4		Reserve ratio (D) / (C) 57.91% (Note 6)	
			(D) Specific reserve + General reserve for substandard loans			¥1,580			
	(A) = (1) + (2) + (3) ¥627.8 (5)		Portion secured by collateral or guarantees, etc. (B) = (a) + (b) + (c) ¥355.0		Unsecured portion (C) = (A) – (B) ¥272.8				
			Coverage ratio {(B) + (D)} / (A)		81.71%				

Notes: 1. Includes amount of direct reduction totaling ¥115.3 billion.  
2. Includes reserves for assets that are not subject to disclosure under the Financial Reconstruction Act. (Bankrupt/Effectively Bankrupt Borrowers: ¥3.6 billion; Potentially Bankrupt Borrowers: ¥2.5 billion)  
3. Reserve ratios for claims on Bankrupt/Effectively Bankrupt Borrowers, Potentially Bankrupt Borrowers, Substandard Borrowers, and Borrowers Requiring Caution (including Substandard Borrowers): The proportion of each category's total unsecured claims covered by reserve for possible loan losses.  
4. Reserve ratios for claims on Normal Borrowers and Borrowers Requiring Caution (excluding claims to Substandard Borrowers): The proportion of each category's total claims covered by reserve for possible loan losses. The reserve ratio for unsecured claims on Borrowers Requiring Caution (excluding claims to Substandard Borrowers) is shown in brackets.  
5. Includes Specific reserve for Borrowers Requiring Caution totaling ¥0.2 billion.  
6. The proportion of the reserve to the claims, excluding the portion secured by collateral or guarantees, etc.

### Non-performing loans (NPLs) based on the Financial Reconstruction Act, and Risk-Monitored Loans

## Results of off-balancing of NPLs

	Billions of yen						
	March 31, 2019	Fiscal 2019		March 31, 2020	Fiscal 2020		March 31, 2021
	①	New occurrences	Off-balanced	②	New occurrences	Off-balanced	③
Bankrupt and quasi-bankrupt assets...	¥ 75.3	¥ 27.6	¥ (30.0)	¥ 73.0	¥ 66.6	¥ (26.9)	¥112.7
Doubtful assets .....	337.4	110.0	(186.5)	260.8	186.7	(141.2)	306.3
Total.....	¥412.7	¥137.6	¥(216.5)	¥333.8	¥253.3	¥(168.0)	¥419.3
				Increase/ Decrease ② – ①			Increase/ Decrease ③ – ②
Bankrupt and quasi-bankrupt assets...				¥ (2.4)			¥39.7
Doubtful assets .....				(76.5)			45.5
Total.....				¥(78.9)			¥85.2

Notes: 1. The off-balancing (also known as “final disposal”) of NPLs refers to the removal of such assets from the bank’s balance sheet by way of sale, direct write-off or other means.

2. The figures shown in the above table under “new occurrences” and “off-balanced” are simple additions of the figures for the first and second halves of fiscal 2019. Amount of ¥29.8 billion in fiscal 2020, recognized as “new occurrences” in the first half of the term, was included in the amounts off-balanced in the second half.

15		The exposures for agent repo transaction		
16	5	Total exposures related to repo transactions, etc. (c)	6,741,519	9,602,429
Exposures related to off-balance sheet transactions (4)				
17		Notional amount of off-balance sheet transactions	63,839,002	55,713,902
18		The amount of adjustments for conversion in relation to off-balance sheet transactions (-)	39,602,954	35,281,098
19	6	Total exposures related to off-balance sheet transactions (d)	24,236,047	20,432,803
Leverage ratio on a consolidated basis (5)				
20		The amount of capital (Tier 1 capital) (e)	9,517,983	8,842,271
21	8	Total exposures ((a)+(b)+(c)+(d)) (f)	182,660,741	222,537,560
22		Leverage ratio on a consolidated basis ((e)/(f))	5.21%	3.97%
Leverage ratio on a consolidated basis (including deposits with the Bank of Japan) (6)				
		Total exposures (f)	182,660,741	
		The amount of deposits with the Bank of Japan	60,965,165	
		Total exposures (including deposits with the Bank of Japan) (f')	243,625,906	
		Leverage ratio on a consolidated basis (including deposits with the Bank of Japan) ((e)/(f'))	3.90%	

Note: The key drivers of material change observed from March 31, 2020 to March 31, 2021  
Leverage ratio as of March 31, 2021 is higher than March 31, 2020 due to a decrease in the total exposures as a result of the exclusion of deposits with the Bank of Japan, based on the amendment of Japanese Financial Services Agency (JFSA) Notification on June 30, 2020, under the provision to Paragraph 4 of Article 6 of the notification of JFSA No. 11, 2019.

Liquidity Coverage Ratio Information (Consolidated)

Sumitomo Mitsui Banking Corporation and Subsidiaries

Since March 31, 2015, the “Liquidity Coverage Ratio” (hereinafter referred to as “LCR”), the liquidity ratio regulation under the Basel III, has been introduced in Japan. In addition to the application of uniform international standards, SMBC calculates its consolidated LCR using the calculation formula stipulated in the “Criteria for Evaluating the Soundness of Liquidity Status Set Forth by a Bank as a Benchmark for Judging its Soundness of Management, Based on the Provision of Article 14-2 of the Banking Act” (Notification No. 60 issued by the Japanese Financial Services Agency in 2014; hereinafter referred to as the “LCR Notification”).

■ Disclosure of Qualitative Information about Liquidity Coverage Ratio

1. Intra-period Changes in Consolidated LCR

As described on the following page, the LCR has remained stable since the introduction of the liquidity ratio regulation on March 31, 2015.

2. Assessment of Consolidated LCR

The LCR Notification stipulates the minimum requirement of the LCR at 100%. The LCR of SMBC (consolidated) exceeds the minimum requirements of the LCR, having no cause for concern. In terms of the future LCR forecasts, SMBC does not expect significant deviations from the disclosed ratios. In addition, the actual LCR does not differ significantly from the initial forecast.

3. Composition of High-Quality Liquid Assets

Regarding the high-quality liquid assets allowed to be included in the calculation, there are no significant changes in locations and properties of currency denominations, categories and so on. In addition, in respect of major currencies (those of which the aggregate amount of liabilities denominated in a certain currency accounts for 5% or more of SMBC’s total liabilities on the consolidated basis), there is no significant mismatch in currency denomination between the total amount of the high-quality liquid assets allowed to be included in the calculation and the amount of net cash outflows.

4. Other Information Concerning Consolidated LCR

SMBC has not applied “special provisions concerning qualifying operational deposits” prescribed in Article 29 of the LCR Notification and “increased liquidity needs related to market valuation changes on derivative or other transactions simulated through Scenario Approach” prescribed in Article 38 of the LCR Notification. Meanwhile, SMBC records “due to trust account,” etc. under “cash outflows based on other contracts” prescribed in Article 60 of the LCR Notification.

■ Disclosure of Quantitative Information about Liquidity Coverage Ratio (Consolidated)

(In million yen, %, the number of data)

Item		Current Quarter (From 2021/1/1 To 2021/3/31)		Prior Quarter (From 2020/10/1 To 2020/12/31)	
High-Quality Liquid Assets (1)					
1	Total high-quality liquid assets (HQLA)	71,881,224		71,843,483	
Cash Outflows (2)		TOTAL UNWEIGHTED VALUE	TOTAL WEIGHTED VALUE	TOTAL UNWEIGHTED VALUE	TOTAL WEIGHTED VALUE

13	of which, Cash outflows related to credit and liquidity facilities	27,512,574	7,238,553	26,783,017	7,069,945
14	Cash outflows related to contractual funding obligations, etc.	7,886,666	5,507,696	7,436,867	5,425,008
15	Cash outflows related to contingencies	73,804,247	1,221,365	73,245,089	1,242,969
16	Total cash outflows		58,606,604		56,686,316
Cash Inflows (3)		TOTAL UNWEIGHTED VALUE	TOTAL WEIGHTED VALUE	TOTAL UNWEIGHTED VALUE	TOTAL WEIGHTED VALUE
17	Cash inflows related to secured lending, etc.	2,164,655	132,747	1,603,636	83,602
18	Cash inflows related to collection of loans, etc.	10,914,856	7,353,748	9,398,126	6,192,718
19	Other cash inflows	2,414,358	966,488	2,065,706	896,275
20	Total cash inflows	15,493,870	8,452,984	13,067,468	7,172,595
Consolidated Liquidity Coverage Ratio (4)					
21	Total HQLA allowed to be included in the calculation		71,881,224		71,843,483
22	Net cash outflows		50,153,620		49,513,721
23	Consolidated liquidity coverage ratio (LCR)		143.3%		145.0%
24	The number of data used to calculate the average value	60		63	

Notes: 1. The data after the introduction of the liquidity ratio regulation on March 31, 2015 is available on Sumitomo Mitsui Financial Group’s website. ([https://www.smfg.co.jp/english/investor/financial/basel\\_3.html](https://www.smfg.co.jp/english/investor/financial/basel_3.html))  
2. The average values are calculated based on daily data in accordance with Notification No. 7 issued by the Japanese Financial Services Agency in 2015. Some data, such as attribute information of customers and data on consolidated subsidiaries, is updated on the monthly or quarterly basis.

■ Breakdown of High-Quality Liquid Assets

(In million yen)

Item		Current Quarter (From 2021/1/1 To 2021/3/31)	Prior Quarter (From 2020/10/1 To 2020/12/31)
1	Cash and due from banks	65,659,234	64,401,534
2	Securities	6,221,990	7,441,949
3	of which, government bonds, etc.	3,408,094	5,000,827
4	of which, municipal bonds, etc.	202,239	85,933
5	of which, other bonds	1,061,497	927,445
6	of which, stocks	1,550,160	1,427,744
7	Total high-quality liquid assets (HQLA)	71,881,224	71,843,483

Note: The above amounts are those of high-quality liquid assets in accordance with the liquidity ratio regulation under the Basel III and do not correspond to the financial amounts. The amounts stated are those after multiplying factors in the liquidity ratio regulation under the Basel III.

		The amount of receivables arising from providing cash margin, provided where deducted from the balance sheet pursuant to the operative accounting framework	—	—
7		The amount of deductions of receivables (out of those arising from providing cash variation margin) (-)	384,726	225,519
8		The amount of client-cleared trade exposures for which a bank acting as clearing member is not obliged to make any indemnification (-)		
9		Adjusted effective notional amount of written credit derivatives	—	—
10		The amount of deductions from effective notional amount of written credit derivatives (-)	—	—
11	4	Total exposures related to derivative transactions (b)	4,354,962	5,885,893
Exposures related to repo transactions (3)				
12		The amount of assets related to repo transactions, etc.	4,152,522	6,907,318
13		The amount of deductions from the assets above (line 12) (-)	—	—
14		The exposures for counterparty credit risk for repo transactions, etc.	281,497	366,826
15		The exposures for agent repo transaction		
16	5	Total exposures related to repo transactions, etc. (c)	4,434,019	7,274,144
Exposures related to off-balance sheet transactions (4)				
17		Notional amount of off-balance sheet transactions	60,674,787	53,501,369
18		The amount of adjustments for conversion in relation to off-balance sheet transactions (-)	35,548,380	31,790,200
19	6	Total exposures related to off-balance sheet transactions (d)	25,126,406	21,711,168
Leverage ratio (5)				
20		The amount of capital (Tier 1 capital) (e)	8,580,903	7,959,801
21	8	Total exposures ((a)+(b)+(c)+(d)) (f)	169,820,757	206,431,546
22		Leverage ratio ((e)/(f))	5.05%	3.85%
Leverage ratio (including deposits with the Bank of Japan) (6)				
		Total exposures (f)	169,820,757	
		The amount of deposits with the Bank of Japan	59,831,323	
		Total exposures (including deposits with the Bank of Japan) (f')	229,652,080	
		Leverage ratio (including deposits with the Bank of Japan) ((e)/(f'))	3.73%	

Note: The key drivers of material change observed from March 31, 2020 to March 31, 2021

Leverage ratio as of March 31, 2021 is higher than March 31, 2020 due to a decrease in the total exposures as a result of the exclusion of deposits with the Bank of Japan, based on the amendment of Japanese Financial Services Agency (JFSA) Notification on June 30, 2020, under the provision to Paragraph 4 of Article 6 of the notification of JFSA No. 11, 2019.

Liquidity Coverage Ratio Information (Non-consolidated)

Sumitomo Mitsui Banking Corporation

Since March 31, 2015, the “Liquidity Coverage Ratio” (hereinafter referred to as “LCR”), the liquidity ratio regulation under the Basel III, has been introduced in Japan. In addition to the application of uniform international standards, SMBC calculates its non-consolidated LCR using the calculation formula stipulated in the “Criteria for Evaluating the Soundness of Liquidity Status Set Forth by a Bank as a Benchmark for Judging its Soundness of Management, Based on the Provision of Article 14-2 of the Banking Act” (Notification No. 60 issued by the Japanese Financial Services Agency in 2014; hereinafter referred to as the “LCR Notification”).

Disclosure of Qualitative Information about Liquidity Coverage Ratio

1. Intra-period Changes in Non-consolidated LCR

As described on the following page, the LCR has remained stable since the introduction of the liquidity ratio regulation on March 31, 2015.

2. Assessment of Non-consolidated LCR

The LCR Notification stipulates the minimum requirement of the LCR at 100%. The LCR of SMBC (non-consolidated) exceeds the minimum requirements of the LCR having no cause for concern. In terms of the future LCR forecasts, SMBC does not expect significant deviations from the disclosed ratios. In addition, the actual LCR does not differ significantly from the initial forecast.

3. Composition of High-Quality Liquid Assets

Regarding the high-quality liquid assets allowed to be included in the calculation, there are no significant changes in locations and properties of currency denominations, categories and so on. In addition, in respect of major currencies (those of which the aggregate amount of liabilities denominated in a certain currency accounts for 5% or more of SMBC’s total liabilities on the non-consolidated basis), there is no significant mismatch in currency denomination between the total amount of the high-quality liquid assets allowed to be included in the calculation and the amount of net cash outflows.

4. Other Information Concerning Non-consolidated LCR

SMBC has not applied “special provisions concerning qualifying operational deposits” prescribed in Article 29 of the LCR Notification and “increased liquidity needs related to market valuation changes on derivative or other transactions simulated through Scenario Approach” prescribed in Article 38 of the LCR Notification. Meanwhile, SMBC records “due to trust account,” etc. under “cash outflows based on other contracts” prescribed in Article 60 of the LCR Notification.

Disclosure of Quantitative Information about Liquidity Coverage Ratio (Non-Consolidated)

(In million yen, %, the number of data)

Item		Current Quarter (From 2021/1/1 To 2021/3/31)		Prior Quarter (From 2020/10/1 To 2020/12/31)	
High-Quality Liquid Assets (1)					
1	Total high-quality liquid assets (HQLA)	66,612,926		66,285,520	
Cash Outflows (2)		TOTAL UNWEIGHTED VALUE	TOTAL WEIGHTED VALUE	TOTAL UNWEIGHTED VALUE	TOTAL WEIGHTED VALUE
2	Cash outflows related to unsecured retail funding	53,117,750	4,120,809	52,126,232	4,044,495
3	of which, Stable deposits	17,023,400	510,702	16,697,276	500,918
4	of which, Less stable deposits	36,094,350	3,610,107	35,428,955	3,543,577
5	Cash outflows related to unsecured wholesale funding	74,486,347	36,762,591	72,001,032	34,889,632

13	of which, Cash outflows related to credit and liquidity facilities	25,947,605	7,034,834	25,272,624	6,860,900
14	Cash outflows related to contractual funding obligations, etc.	7,300,044	3,629,715	6,982,154	3,509,675
15	Cash outflows related to contingencies	74,919,238	1,177,237	75,196,885	1,225,893
16	Total cash outflows		53,665,331		51,412,004
Cash Inflows (3)		TOTAL UNWEIGHTED VALUE	TOTAL WEIGHTED VALUE	TOTAL UNWEIGHTED VALUE	TOTAL WEIGHTED VALUE
17	Cash inflows related to secured lending, etc.	684,519	120,357	584,690	67,451
18	Cash inflows related to collection of loans, etc.	11,534,779	8,244,402	9,817,563	6,894,228
19	Other cash inflows	1,849,914	754,363	1,486,912	586,870
20	Total cash inflows	14,069,212	9,119,121	11,889,165	7,548,549
Non-Consolidated Liquidity Coverage Ratio (4)					
21	Total HQLA allowed to be included in the calculation		66,612,926		66,285,520
22	Net cash outflows		44,546,209		43,863,455
23	Non-consolidated liquidity coverage ratio (LCR)		149.5%		151.1%
24	The number of data used to calculate the average value	60		63	

Notes: 1. The data after the introduction of the liquidity ratio regulation on March 31, 2015 is available on Sumitomo Mitsui Financial Group’s website. ([https://www.smfg.co.jp/english/investor/financial/basel\\_3.html](https://www.smfg.co.jp/english/investor/financial/basel_3.html))  
2. The average values are calculated based on daily data in accordance with Notification No. 7 issued by the Japanese Financial Services Agency in 2015. Some data such as attribute information of customers, is updated on the monthly or quarterly basis.

Breakdown of High-Quality Liquid Assets

(In million yen)

Item		Current Quarter (From 2021/1/1 To 2021/3/31)	Prior Quarter (From 2020/10/1 To 2020/12/31)
1	Cash and due from banks	61,453,636	59,836,193
2	Securities	5,159,290	6,449,326
3	of which, government bonds, etc.	2,646,776	4,240,230
4	of which, municipal bonds, etc.	202,239	85,933
5	of which, other bonds	760,114	695,420
6	of which, stocks	1,550,160	1,427,744
7	Total high-quality liquid assets (HQLA)	66,612,926	66,285,520

Note: The above amounts are those of high-quality liquid assets in accordance with the liquidity ratio regulation under the Basel III and do not correspond to the financial amounts. The amounts stated are those after multiplying factors in the liquidity ratio regulation under the Basel III.

Glossary

ABL

Abbreviation for Asset Based Lending of having movable assets as col-lateral such as accounts receivable and/or inventory.

Advanced Measurement Approach (AMA)

Based on the operational risk measurement methods used in the internal management of financial institutions, this is a method for obtaining the operational risk equivalent amount by calculating the maximum amount of operational risk loss expected over a period of one year, with a one-sided confidence interval of 99.9%.

Basic Indicator Approach (BIA)

A calculation approach in which an average value for the most recent three years derived by multiplying gross profit for the financial institution as a whole by certain level (15%) is deemed to be the operational risk equivalent amount.

Calculation of credit risk-weighted assets under Article 145 of the Notification

Method used for calculating the credit risk-weighted assets for the fund exposure, etc. There is a method of making the total credit risk-weighted asset of individual underlying asset of funds, etc. as the relevant expo-sure of the credit risk-weighted asset; or a method of applying the risk weight determined based on the formation of underlying assets to the relevant exposure.

Capital adequacy ratio notification (“the Notification”)

Administrative action or written ordinance by which the Financial Services Agency officially informs Japanese banks of regulations regard-ing capital adequacy ratio.

CCF

Abbreviation for Credit Conversion Factor  
Ratio required for converting off-balance sheet items such as guarantees or derivatives into on-balance sheet credit exposure equivalents.

CCP-related exposure

Exposure to a central counterparty (CCP) that interposes itself between counterparties to contracts traded in one or more financial markets, becoming the buyer to every seller and the seller to every buyer and thereby ensuring the future performance of open contracts.

CDS

Abbreviation for Credit Default Swap  
Derivative transactions which transfer the credit risk.

Credit Risk Mitigation (CRM) Techniques

Method of reducing credit risk by guarantees, collateral and purchase of credit derivatives, etc.

Credit risk-weighted assets

Total assets (lending exposures, including credit equivalent amount of off-balance sheet transactions, etc.) which is reevaluated according to the level of credit risk.

Current exposure method

One of the methods for calculating the credit exposure equivalents of derivative transactions, etc. Method of calculating the equivalents by adding the amount (multiplying the notional amount by certain rate, and equivalent to the future exposure fluctuation amount) to the mark-to-market replacement cost calculated by evaluating the market price of the transaction.

CVA (credit value adjustment) amount

Capital charges for market-price fluctuation of derivatives transaction due to deteriorated creditworthiness of a counterparty.

EL

Abbreviation for Expected Loss  
Average loss expected to occur over the coming one year.

Full revaluation approach

An approach for PL simulation by repricing the financial instruments un-der each scenario.

High-quality liquid assets (HQLA)

Liquid assets that can be converted easily and immediately into cash to meet liquidity needs in a specified stress scenario for the subsequent 30 calendar days.

Historical simulation method

A method of simulating future fluctuations without the use of random numbers, by using historical data for risk factors.

Internal models approach

Methods of measuring market risk equivalent amount as the value at risk (VaR) calculated with models determined by each bank.

Internal models method

One of the methods of market-based approach using the VaR model to calculate the loss for shares held by the bank applying the Internal Ratings-Based Approach, and dividing such loss amount by 8% to obtain the credit risk-weighted asset of the equity exposure.

The Internal Ratings-Based (IRB) Approach

A method of calculating the risk asset by applying PD (Probability of Default) estimated internally by financial institution which conducts sophisticated risk management. There are two methods to calculate exposures to corporate client, etc.: the Advanced Internal Ratings-Based (AIRB) Approach and the Foundation Internal Ratings-Based (FIRB) Approach. The former uses self-estimated LGD and EAD values, while the latter uses LGD and EAD values designated by the authorities.

LCR Notification

Administrative action and written ordinance for official notification to the general public of regulations concerning the LCR of financial institutions in Japan which are decided by the Japanese Financial Services Agency based on the Basel Agreement.

LGD

Abbreviation for Loss Given Default  
Percentage of loss assumed in the event of default by obligor; ratio of uncollectible amount of the exposure owned in the event of default.

Market-based approach

Method of calculating the risk assets of equity exposures, etc., by using the simple risk weight method or internal model method.

Market risk equivalent amount

Pursuant to the Basel Capital Accord, the required capital amount im-posed on the market-related risk calculated for the four risk categories of mainly the trading book: interest rates, stocks, foreign exchange and commodities.

Net cash outflows

Net cash flows calculated as total expected cash outflows minus total expected cash inflows in a specified stress scenario for the subsequent 30 calendar days.

Object finance

For providing credit for purchasing ships or aircrafts, the only source of repayments for the financing should be profits generated from the said tangible assets; and the said tangible assets serve as collaterals, and having an appreciable extent of control over the said tangible assets and profits generated from the said tangible assets.

Operational risk equivalent amount

Operational risk capital requirements under the Basel Capital Accord.

Originator

The term “originator” is used in the case that we are directly or indirectly involved in the formation of underlying assets for securitisation transac-tions when we have the securitisation exposure; or the cases of provid-ing the back-up line for ABCP issued by the securitisation conduit for the purpose of obtaining exposure from the third party, or providing ABL to the securitisation conduit (as sponsor).

PD

Abbreviation for Probability of Default  
Probability of becoming default by obligor during one year.

Phased rollout

Under the Basel Capital Accord, it is a transition made by certain group companies planning to apply the Internal Ratings-Based Approach after the implementation of such methods on consolidated-basis.

Project finance

Out of credit provided for specified businesses such as electric power plants and transportation infrastructure, the only source of repayments is profits generated from the said businesses, and the collateral is tangi-ble assets of the said businesses, and having an appreciable extent of control over the said tangible assets and profits generated from the said tangible assets.

Qualifying Revolving Retail Exposures (QRRE)

Exposure which may fluctuate up to the upper limit set forth by an agreement according to the individual's voluntary decision, such as card loan and credit card, etc., and the upper limit of the exposure without any collateral is 10 million yen or less.

Resecuritisation transaction

Out of securitisation transactions, it is a transaction with securitisa-tion exposure for part of or entire underlying assets. However, in the case that all of underlying assets is the single securitisation exposure and the transaction's risk characteristics are substantively unchanged prior to or after the securitisation, the transaction is excluded from the resecuritisation transactions.

Risk capital

The amount of capital required to cover the theoretical maximum potential loss arising from risks of business operations. It differs from the minimum regulatory capital requirements, and it is being used in the risk management framework voluntarily developed by financial institutions for the purpose of internal management.

Risk weight

Indicator which indicates the extent of credit risk determined by the types of assets (claims) owned. Risk weight becomes higher for assets with high risk of default.

Root-T rule

A method of converting the term of estimating the maximum loss as VaR into short term or long term using statistical assumption.

Securitisation transaction

It is a transaction which stratifies the credit risk for the underlying assets into more than two exposures of senior/subordinated structure and has the quality of transferring part of or entire exposure to the third party.

Servicer risk

The risk of becoming unable to claim for the collectives, in cases of which bankruptcy of the supplier/servicer occurs prior to collecting receivables, in securitisation and purchased claims transactions.

Simple risk weight method

One of market-based approaches for calculating the risk-weighted asset amount for the equity exposure, etc. by multiplying the listed shares and unlisted shares with the risk weights of 300% and 400%, respectively.

Slotting criteria

For risk-weighted asset calculation under the Internal Ratings-Based (IRB) Approach, it is a method of mapping the credit rating to the risk-weight in 5 levels set forth by the Financial Services Agency for Specialised Lending.

Specialized Lending (SL)

General term used for project finance, object finance, commodity finance and lending for commercial real estate.

The Standardised Approach (SA)

Method of calculating risk-weighted assets by multiplying each obligor classification (corporation, financial institution, country, retail, etc.) by the risk-weight designated by the authorities.

Standardised method

Method of calculating market risk using formula determined by the Financial Services Agency.

Underlying assets

General term used for assets which serve as the source of payments for principal and interest for securitisation exposures, etc.

VaR

Abbreviation for Value at Risk  
The maximum loss that can be expected to occur with a certain degree of probability when holding a financial asset portfolio for a given amount of time.

# Compensation

Sumitomo Mitsui Financial Group

## ■ Compensation Framework of Sumitomo Mitsui Financial Group and Its Group Companies

### 1. Scope of Officers, Employees and Others

The scope of officers, employees and others whose compensation is subject to disclosure under the revised Cabinet Office on Disclosure of Corporate Affairs, etc. and other ordinances are as described below.

#### (1) Scope of Officers

Officers subject to compensation disclosure are directors and executive officers of Sumitomo Mitsui Financial Group during the fiscal year under review (excluding outside directors).

#### (2) Scope of Employees and Others

Employees and others subject to compensation disclosure are employees of Sumitomo Mitsui Financial Group and officers and employees of its major consolidated subsidiaries who are highly compensated and have a material influence on the business management or the assets of Sumitomo Mitsui Financial Group and its major consolidated subsidiaries.

##### a) Scope of major consolidated subsidiaries

A major consolidated subsidiary is a consolidated subsidiary of Sumitomo Mitsui Financial Group with total assets accounting for more than 2% of the total consolidated assets of Sumitomo Mitsui Financial Group and has a material influence on the management of Sumitomo Mitsui Financial Group and its group companies. Specifically, they are Sumitomo Mitsui Banking Corporation, SMBC Nikko Securities Inc., SMBC Guarantee Co., Ltd., Limited and overseas subsidiaries such as SMBC Bank International plc, and Sumitomo Mitsui Banking Corporation (China) Limited.

##### b) Scope of highly compensated persons

A highly compensated person is an individual whose compensation paid by Sumitomo Mitsui Financial Group or its major subsidiaries is equal to or more than the base amount. The base amount of Sumitomo Mitsui Financial Group is set at ¥60 million which is based on the average amount of compensation paid to the officers of Sumitomo Mitsui Financial Group and SMBC (excluding officers appointed or retired during the fiscal year in question) over the last three fiscal years (hereinafter “executive compensation amount”) and is applied to all group companies. This is because many of the officers of Sumitomo Mitsui Financial Group also serve as officers of SMBC, and their executive compensation amount is determined according to their contribution to the group as a whole. With respect to lump-sum retirement payment for officers serving in Japan, the executive compensation amount for the fiscal year in question is “(his/her executive compensation amount – lump-sum retirement payment) + (lump-sum retirement payment/years of service)” and the executive compensation amount calculated using this formula is compared to the base amount.

##### c) Material influence on the business management or assets of Sumitomo Mitsui Financial Group and its major consolidated subsidiaries

A person has a material influence on the business management or assets of Sumitomo Mitsui Financial Group and its major consolidated subsidiaries if his/her regular transactions or regular matters managed by him/her have a substantial impact on the business management of Sumitomo Mitsui Financial Group and its group companies, or losses incurred through such actions have a significant impact on the financial situation of Sumitomo Mitsui Financial Group and its group companies. Specifically, persons having such influence are directors, corporate auditors and corporate officers of Sumitomo Mitsui Financial Group and its major consolidated subsidiaries, both domestic and overseas.

## 2. Names, Compositions, and Duties of the Main Bodies, Such as the Committee Responsible for Supervising Business Execution Concerning the Determination of Compensation, Its Payment and Other Related Matters

### (1) Establishment and Maintenance of the Compensation Committee

Sumitomo Mitsui Financial Group, as a Company with a Nomination Committee, has established a Compensation Committee to resolve the “policy to determine individual remuneration for directors and executive officers,” “executive compensation programme and relevant regulations,” and “individual remuneration for Sumitomo Mitsui Financial Group’s directors and corporate executive officers.” The Compensation Committee is a body independent from the influence of business units, chaired by an outside director, with the majority of its members being also outside directors, and tasked to determine and deliberate matters related to executive compensation of Sumitomo Mitsui Financial Group and its group companies. In addition, Sumitomo Mitsui Financial Group Compensation Committee reviews and discusses executive compensation programmes/practices of group companies of Sumitomo Mitsui Financial Group and the individual remuneration for Sumitomo Mitsui Financial Group’s other executive officers. Furthermore, group companies of Sumitomo Mitsui Financial Group respect the details of the deliberations at the Compensation Committee of Sumitomo Mitsui Financial Group and determine the compensation for directors and corporate auditors within the maximum total amount of compensation approved at an ordinary general meeting of shareholders.

### (2) For Employees and Others

The amount and type of compensation paid to the employees of Sumitomo Mitsui Financial Group and SMBC and the officers and employees of major consolidated subsidiaries are determined and paid according to the compensation policies established by the boards of directors of Sumitomo Mitsui Financial Group and its major consolidated subsidiaries. Compensation systems based on the compensation policies are designed and documented by the HR departments of respective companies, independent from the influence of business units. The compensation policies of major consolidated subsidiaries are regularly reported to the HR department of Sumitomo Mitsui Financial Group for review. The amount and type of compensation for overseas officers and employees is determined and paid under the compensation system established by the relevant office or subsidiary in accordance with local laws, regulations and employment practices.

### (3) Total Amount of Compensation Paid to Compensation Committee Members and Number of Compensation Committee Meetings Held

	Number of Meetings Held (April 1, 2020 to March 31, 2021)
Compensation Committee (Sumitomo Mitsui Financial Group).....	6
Compensation Committee (SMBC Nikko Securities Inc.).....	2

Note: The total amount of compensation is not provided because the portion of the compensation paid to a committee member for services rendered as a committee member cannot be calculated as the amount of compensation paid is based on the committee member’s position in the company.

## ■ Assessment of Design and Operation of Compensation Structure

### Compensation Policies for Officers, Employees and Others

#### (1) For Officers

Sumitomo Mitsui Financial Group hereby establishes the Executive Compensation Policy (the “Policy”) in order to provide guiding principles for its Compensation Committee to determine individual remuneration for its directors and executive officers (the “Executives”). The Policy’s aim is that executive compensation pursuant to it shall provide the appropriate incentives for the Executives to pursue our Mission while materializing our medium-/long-term vision.

<Basic Concept>

Executive compensation at SMBC Group shall be determined based on the following concept.

- I. SMBC Group’s executive compensation aims at providing appropriate incentives toward the realization of our mission and our vision.
- II. SMBC Group’s executive compensation shall reflect the changing business environment and the short-, medium-and long-term performance of the group, and shall account for the contribution to shareholder value, customer satisfaction, and realisation of sustainable society.
- III. Individual remuneration shall reflect the assigned roles and responsibilities as well as the performance of the respective Executive.
- IV. SMBC Group shall research and review market practices, including the use of third-party surveys, in order to provide its Executives with a competitive remuneration package.
- V. SMBC Group’s executive compensation shall discourage excessive risk-taking and foster a prudent risk culture expected of a financial institution.
- VI. Both external and internal regulations/guidelines on executive compensation shall be observed and respected.
- VII. SMBC Group shall establish appropriate governance and controls of the compensation process, and shall regularly review to update its executive compensation practices according to changing market practices and/or business environment.

<Compensation Programme>

- I. SMBC Group’s executive compensation programme (the “Programme”) shall have three components: base salary, cash bonus, and stock compensation. However, compensation for outside directors and Audit Committee members shall comprise base salary alone, in consideration of the nature of their role of management supervision.
- II. In order to hold the Executives accountable and provide them with appropriate incentives for the performance of SMBC Group, the Programme targets the variable compensation component of total remuneration at 40%, if paid at standard levels. Corresponding with performance and the business environment, the variable component could range from 0% to 150% of the standard levels, which shall be determined by corporate titles of the Executives.
- III. In order to enhance shareholding of the Executives and align their interests with shareholders, the Programme targets its stock-based compensation components at 25% of total remuneration, if paid at standard levels.
- IV. The above target levels shall be appropriately set in accordance with the roles, responsibilities, etc. of each Executive.
- V. Base salary shall be periodically paid in cash and shall be, in principle, determined by the corporate titles of each Executive, reflecting the roles, responsibilities, etc.
- VI. Annual incentives shall be determined based on the performance of previous fiscal year of SMBC Group and the business unit each Executive is accountable for, as well as on the performance of each Executive reviewed both from short-term and medium-/long-term perspectives. 70% of the determined amount shall be, in principle, paid as a cash bonus and the remaining 30% shall be paid under Stock Compensation Plan II (annual performance share plan).

Weight by each target index is as follows:

Target index		Weight
SMBC Banking profit*1	Annual growth/Target achievement	50%
SMBC Net income (Pre-Tax)*2	Annual growth/Target achievement	25%
SMFG Net income*3	Annual growth/Target achievement	25%

\*1 Adding cooperated profit and loss recorded by SMBC Group companies, etc. in a managerial accounting basis to business profit at Sumitomo Mitsui Banking Corporation.

\*2 Income before income taxes at Sumitomo Mitsui Banking Corporation.

\*3 The Group’s profit attributable to owners of parent.

- VII. Stock compensation plans consist of three types, which are, Stock Compensation Plan I (the “Plan I”), under which the remuneration of the Executives shall be determined based on SMBC Group’s medium-term performance, etc., Stock Compensation (the “Plan II”), determined based on SMBC Group’s single year performance, etc. and Stock Compensation Plan III (the “Plan III”), determined based on corporate titles, etc.
  - a. Under the stock compensation plans, the Executives shall receive remuneration via shares of Sumitomo Mitsui Financial Group common stock. The transfer of such stock shall be restricted for appropriately defined periods.
  - b. Remuneration under Plan I shall be determined based on SMBC Group’s performance against the Medium-term Management Plan, performance of Sumitomo Mitsui Financial Group shares, and the results of customer satisfaction surveys, etc. after the term of SMBC Group’s Medium-term Management Plan ends. 80% of the target index is determined based on Financial performance (Medium-term Management Plan target), and 20% is determined based on Share performance of SMFG. Weight by each target index is as follows:

Target index *1,2		Weight
Financial performance	ROCE1*3	20%
	Base expense*4	20%
	SMFG Gross profit*5	20%
	SMFG Net income	20%
Share performance	TSR (Total shareholder return)	20%

\*1 (Qualitative evaluation) The Compensation Committee determines the score of maximum 10% plus or minus such figure taking into account comprehensively four items, which are “Customer satisfaction,” “ESG initiative,” “Employee engagement,” and “Efforts to develop new business areas.”

\*2 (Knock-out provision) In case “CET1 ratio (Post-Basel III reforms basis, excludes net unrealized gains or losses on other securities)” falls below a designated level at the end of each fiscal year, Stock compensation Plan I for the respective fiscal year becomes null and void.

\*3 Post-Basel III reforms basis, excludes net unrealized gains or losses on other securities.

\*4 Sales expenses excluding “revenue linked cost,” “prior investment cost” and others  
\*5 The Group’s consolidated gross profit

- c. Remunerations under Plan II shall be determined based on the performance of the previous fiscal year of SMBC Group and the business unit each Executive is accountable for, as well as on the performance of each Executive reviewed both from a short-term and medium-/long-term perspectives. Remuneration paid by restricted shares shall effectively act as deferred compensation.
- d. Remuneration under Plan III shall be determined based on corporate titles, roles, and responsibilities, etc.
- VIII. In the event of material amendments to the financial statements or material reputational damages caused by the Executives, remunerations under the Plans could be reduced or fully forfeited.
- IX. Notwithstanding the aforementioned “Compensation Programme,” executive compensation for the Executives locally appointed at overseas entities and those domiciled outside Japan shall be individually designed, not only in accordance with the basic concept above, but also with consideration to local regulations, tax regime, guidelines, and other local market practices, whilst ensuring the compensation should not incentivize for excessive risk-taking.

<Governance and Control of the Compensation Processes>  
Sumitomo Mitsui Financial Group, as a Company with a Nomination Committee, establishes a “Compensation Committee” to resolve the following:

- The Policy, executive compensation programme including the aforementioned compensation programme and regulations concerning the Policy
- Individual remunerations for Sumitomo Mitsui Financial Group’s directors and corporate executive officers

In addition to the above, the Compensation Committee shall review and discuss the below:

- The individual remuneration for Sumitomo Mitsui Financial Group’s corporate officers and other officers.
- Executive compensation programmes/practices of group companies of Sumitomo Mitsui Financial Group.

(2) For Employees and Others

In order to link the business philosophy and strategy of the company to the roles and responsibilities of employees and others, Sumitomo Mitsui Financial Group and its major consolidated subsidiaries determine the domestic compensation taking into account their job responsibilities, business performance and other factors. Compensation for employees and others are determined by the HR departments of respective SMBC Group companies by comprehensively taking into account the surrounding business environment, performance trends, pay history and other factors. Compensation policies for overseas employees are determined following the aforementioned compensation policy for employees and others in Japan as well as in accordance with local laws, regulations and employment practices.

■ Consistency between Compensation Structure and Risk Management and Link between Compensation and Performance

1. Sumitomo Mitsui Financial Group and SMBC

In determining the compensation for the officers of Sumitomo Mitsui Financial Group, the details of individual compensation for directors and executive officers are determined by the mandatory Compensation Committee, where the majority of the committee members are the outside directors. The compensation for the officers of SMBC are determined within the scope approved at a shareholders’ meeting with the President, delegated by the Board of Directors, determining the details of compensation for each individual, reflecting the assigned roles and responsibilities as well as achievements at SMBC, in light of the deliberations of the SMFG Compensation Committee.

In order to hold the Executives accountable and provide them with appropriate incentives for the performance of the group, the Programme targets the variable compensation component of total remuneration at 40%, if paid at standard levels. The Programme shall have three components: base salary, cash bonus, and stock compensation. Cash bonus shall be determined and paid each fiscal year based on the Group’s performance in the previous year, as well as on the performance of the respective Executive reviewed both from short-term and medium-/long-term perspectives. Stock compensation is determined and paid based on the progress of targets during the period of the Medium-term Management plan, performance of Sumitomo Mitsui Financial Group shares, and the results of customer satisfaction surveys, etc. Sumitomo Mitsui Financial Group and SMBC allot restricted stocks via the Plans to Executives to effectively defer part of executive compensation.

Stock Compensation Plan I involves removal of the restriction on transfer, after the expiry of Sumitomo Mitsui Financial Group’s Medium-term Management Plan. In the event that the finalized amount of compensation falls short of the initially allocated amount, Sumitomo Mitsui Financial Group will retrieve all or part of the allotted shares at nil cost in the case the final amount falls below the initial amount.

Stock Compensation Plan II involves step-by-step removal of the restriction on transfer, one third in each year over the three years following the payment.

Stock Compensation Plan III involves removal of the restriction on transfer, either 30 years after payment or at the time of retirement from the position of officer.

In addition, Sumitomo Mitsui Financial Group and SMBC introduced the malus (forfeiture) of restricted stock and the claw-back of vested stock allocated to the Executives under the Plans in order to restrain excessive risk-taking and foster a prudent risk culture expected of a financial institution. Provisions on malus and clawbacks are included in the Allotment Agreement and they shall be exercised in the event of material amendments to the financial statements or material reputational damage caused by the Executives after thorough review at the Compensation Committee.

In addition, in determining the compensation for employees, their job responsibilities and business performance are taken into account. For variablecompensation, in order to avoid an excessive result-oriented approach, it is determined after comprehensive evaluation based on not only short-term performance results but also qualitative evaluation. Compensation is individually designed with consideration to local regulations, guidelines, and other market practices, whilst ensuring the compensation should not incentivize for excessive risk-taking.

2. Other Major Consolidated Subsidiaries

The compensation for officers and employees of other major subsidiaries of Sumitomo Mitsui Financial Group are determined by comprehensively taking into account the assessment of the subsidiaries’ medium- and long-term earnings, and in the case of an overseas subsidiary, local laws, regulations and employment practices, and a compensation structure that could affect the risk management of SMBC Group has not been adopted. While terms of employment presented at the time of recruitment may include the minimum amount of compensation within a reasonable scope under local practice, the compensation structure is designed to avoid an excessive result-oriented approach. In addition, expenses for employee retention are recorded for employees of certain major consolidated subsidiaries.

■ Type, Total Amount Paid, and Payment Method of Compensation for Officers, Employees and Others of Sumitomo Mitsui Financial Group and Its Group Companies

Compensation, etc. allocated to the applicable fiscal year (Headcount, millions of yen)

Item No.			(a)	(b)
			Officers	Employees and others
1	Fixed compensation	Number of applicable officers, employees and others	19	264
2		Total fixed compensation (3+5+7)	1,108	10,980
3		of which: cash compensation	1,031	10,207
4		of which in 3: deferred amount	—	—
5		of which: amount of stock compensation or stock-linked compensation	54	359
6		of which in 5: deferred amount	54	359
7		of which: other compensation	21	412
8		of which in 7: deferred amount	—	—
9	Variable compensation	Number of applicable officers, employees and others	15	263
10		Total variable compensation (11+13+15)	666	10,455
11		of which: cash compensation	333	9,098
12		of which in 11: deferred amount	—	1,403
13		of which: amount of stock compensation or stock-linked compensation	333	1,357
14		of which in 13: deferred amount	333	898
15	Retirement allowance	of which: amount of other compensation	—	—
16		of which in 15: deferred amount	—	—
17		Number of applicable officers, employees and others	—	177
18		Amount of retirement allowance	—	860
19		of which: deferred amount	—	117
20	Other compensation	Number of applicable officers, employees and others	—	90
21		Amount of other compensation	—	117
22		of which: deferred amount	—	—
23	Total compensation, etc. (2+10+18+21)		1,774	22,413

Notes: 1. Compensation amount includes those amounts of major consolidated subsidiaries.  
2. Stock Compensation Plan III is classified as fixed compensation because the amount allotted depends on the individual’s position. Other stock compensation involves an amount of issuance prone to performance-linked fluctuations, and is thus classified as variable compensation.

Special compensation, etc. (Headcount, millions of yen)

Note: “Amount of deferred compensation, etc. paid in the applicable fiscal year” includes the reversal of deferred compensation due to removal of the restriction on transfer for Plan I in the fiscal year under review.

# Compensation

Sumitomo Mitsui Banking Corporation (SMBC) and Its Group Companies

## ■ Compensation Framework of SMBC Group

### 1. Scope of Officers and Employees

The scope of officers, employees and others whose compensation is subject to disclosure under the revised Cabinet Office on Disclosure of Corporate Affairs, etc. and other ordinances are as described below.

#### (1) Scope of Officers

Officers subject to compensation disclosure are directors and corporate auditors of SMBC during the fiscal year under review.

#### (2) Scope of Employees and Others

Employees and others subject to compensation disclosure are employees of SMBC and officers and employees of its major consolidated subsidiaries who are highly compensated and have a material influence on the business management or the assets of SMBC and its major consolidated subsidiaries.

##### a) Scope of major consolidated subsidiaries

A major consolidated subsidiary is a consolidated subsidiary of SMBC with total assets accounting for more than 2% of the total consolidated assets of SMBC and has a material influence on the management of SMBC and its group companies. Specifically, they are SMBC Guarantee Co., Ltd. and overseas subsidiaries such as SMBC Bank International plc and Sumitomo Mitsui Banking Corporation (China) Limited.

##### b) Scope of highly compensated persons

A highly compensated person is an individual whose compensation paid by SMBC or its major subsidiaries is equal to or more than the base amount. The base amount of SMBC is set at ¥60 million which is based on the average amount of compensation paid to the officers of Sumitomo Mitsui Financial Group and SMBC (excluding officers appointed or retired during the fiscal year in question) over the last three fiscal years (hereinafter “executive compensation amount”) and is applied to all group companies. This is because many of the officers of Sumitomo Mitsui Financial Group also serve as officers of SMBC, and their executive compensation amount is determined according to their contribution to the group as a whole. With respect to lump-sum retirement payment for officers serving in Japan, the executive compensation amount for the fiscal year in question is “(his/her executive compensation amount – lump-sum retirement payment) + (lump-sum retirement payment/years of service)” and the executive compensation amount calculated using this formula is compared to the base amount.

##### c) Material influence on the business management or assets of SMBC and its major consolidated subsidiaries

A person has a material influence on the business management or assets of SMBC and its major consolidated subsidiaries if his/her regular transactions or regular matters managed by him/her have a substantial impact on the business management of SMBC and its group companies, or losses incurred through such actions have a significant impact on the financial situation of SMBC and its group companies. Specifically, persons having such influence are directors, corporate auditors and corporate officers of SMBC and its major consolidated subsidiaries, both domestic and overseas.

## 2. Names, Compositions, and Duties of the Main Bodies, Such as the Committee Responsible for Supervising Business Execution Concerning the Determination of Compensation, Its Payment and Other Related Matters

### (1) Determination of compensation for officers

Compensation for SMBC’s Directors (excluding members of the Audit and Supervisory Committee) is determined within the limit approved at a shareholders’ meeting with the President, delegated by the Board of Directors, determining the amount of compensation for each individual, reflecting the assigned roles and responsibilities as well as achievements at SMBC, in light of the deliberations of the SMFG Compensation Committee.

The details of the above determination are reported to SMBC’s Audit and Supervisory Committee.

Individual compensation for Directors who are members of the Audit and Supervisory Committee is determined within the scope approved at a shareholders’ meeting, through discussion by Directors who are members of the Audit and Supervisory Committee.

### (2) Determination of compensation for employees

Compensation for employees is stated in “Compensation” of Sumitomo Mitsui Financial Group (please refer to “2. Names, Compositions, and Duties of the Main Bodies, Such as the Committee Responsible for Supervising Business Execution Concerning the Determination of Compensation, Its Payment and Other Related Matters (2) For Employees and Others” on page 384).

## ■ Assessment of Design and Operation of Compensation Structure

### Compensation Policy

### Compensation Policies for Officers, Employees and Others

#### (1) For Officers

Sumitomo Mitsui Banking Corporation hereby establishes the Executive Compensation Policy (the “Policy”) in order to provide guiding principles for its Compensation Committee to determine individual remuneration for its directors and executive officers (the “Executives”).  
The Policy’s aim is that executive compensation pursuant to it shall provide the appropriate incentives for the Executives to pursue our Group Mission while materializing our medium-/long-term vision.

<Basic Concept>

Executive compensation at SMBC shall be determined based on the following concept.

- I. SMBC Group’s executive compensation aims at providing appropriate incentives toward the realization of our mission and our vision.
- II. SMBC Group’s executive compensation shall reflect the changing business environment and the short-, medium- and long-term performance of the group, and shall account for the contribution to shareholder value, customer satisfaction, and realization of sustainable society.
- III. Individual remuneration shall reflect the assigned roles and responsibilities as well as the performance of the respective Executive.
- IV. SMBC Group shall research and review market practices, including the use of third-party surveys, in order to provide its Executives with a competitive remuneration package.
- V. SMBC Group’s executive compensation shall discourage excessive risk-taking and foster a prudent risk culture expected of a financial institution.
- VI. Both external and internal regulations/guidelines on executive compensation shall be observed and respected.
- VII. SMBC Group shall establish appropriate governance and controls of the compensation process, and shall regularly review to update its executive compensation practices according to changing market practices and/or business environment.

<Compensation Programme>

- I. SMBC Group’s executive compensation programme (the “Programme”) shall have three components: base salary, cash bonus, and stock compensation. However, compensation for outside directors and Audit Committee members shall comprise base salary alone, in consideration of the nature of their role of management supervision.
- II. In order to hold the Executives accountable and provide them with appropriate incentives for the performance of SMBC Group, the Programme targets the variable compensation component of total remuneration at 40%, if paid at standard levels. Corresponding with performance and the business environment, the variable component could range from 0% to 150% of the standard levels, which shall be determined by corporate titles of the Executives.
- III. In order to enhance shareholding of the Executives and align their interests with shareholders of Sumitomo Mitsui Financial Group (“SMFG”), the parent, the Programme targets its stock-based compensation components of SMFG stocks at 25% of total remuneration, if paid at standard levels.
- IV. The above target levels shall be appropriately set in accordance with the roles, responsibilities, etc. of each Executive.
- V. Base salary shall be periodically paid in cash and shall be, in principle, determined by the corporate titles of each Executive, reflecting the roles, responsibilities, etc.
- VI. Annual incentives shall be determined each year based on the performance of previous fiscal year of SMBC Group and the business unit each Executive is accountable for, as well as on the performance of each Executive reviewed both from short-term and medium-/long-term perspectives. 70% of the determined amount shall be, in principle, paid as a cash bonus and the remaining 30% shall be paid under Stock Compensation Plan II (the “Plan II”).

Weight by each target index is as follows:

Target index		Weight
SMBC Banking profit*1	Annual growth/Target achievement	50%
SMBC Net income (Pre-Tax)*2	Annual growth/Target achievement	25%
SMFG Net income*3	Annual growth/Target achievement	25%

\*1 Adding cooperated profit and loss recorded by SMBC Group companies, etc. in a managerial accounting basis to business profit at and Sumitomo Mitsui Banking Corporation.

\*2 Income before income taxes at Sumitomo Mitsui Banking Corporation.

\*3 The Group’s profit attributable to owners of parent.

- VII. Stock compensation plans consist of three types, which are, Stock Compensation Plan I (the “Plan I”), under which the remuneration of the Executives shall be determined based on SMBC Group’s medium-term performance, etc., Stock Compensation (the “Plan II”), determined based on SMBC Group’s single year performance, etc. and Stock Compensation Plan III (the “Plan III”), determined based on corporate titles, etc.
- a. Under the stock compensation plans, the Executives shall receive remuneration via shares of Sumitomo Mitsui Financial Group common stock. The transfer of such stock shall be restricted for appropriately defined periods.
- b. Remuneration under Plan I shall be determined based on SMBC Group’s performance against the Medium-term Management Plan, performance of SMFG shares, and the results of customer satisfaction surveys, etc. after the term of SMBC Group’s Medium-term Management Plan ends. 80% of the target index is determined based on Financial performance (Medium-term Management Plan target), and 20% is determined based on Share performance of SMFG. Weight by each target index is as follows:

Target index <sup>*1, 2</sup>		Weight
Financial performance	ROCET1 <sup>*3</sup>	20%
	Base expense <sup>*4</sup>	20%
	SMFG Gross profit <sup>*5</sup>	20%
	SMFG Net income	20%
Share performance	TSR (Total shareholder return)	20%

<sup>\*1</sup> (Qualitative evaluation) The Compensation Committee determines the score of maximum 10% plus or minus such figure taking into account comprehensively four items, which are “Customer satisfaction,” “ESG initiative,” “Employee engagement,” and “Efforts to develop new business areas.”

<sup>\*2</sup> (Knock-out provision) In case “CET1 ratio (Post-Basel III reforms basis, excludes net unrealized gains or losses on other securities)” falls below a designated level at the end of each fiscal year, Stock compensation Plan I for the respective fiscal year becomes null and void.

<sup>\*3</sup> Post-Basel III reforms basis, excludes net unrealized gains or losses on other securities.

<sup>\*4</sup> Sales expenses excluding “revenue linked cost,” “prior investment cost” and others

<sup>\*5</sup> The Group’s consolidated gross profit

- c. Remunerations under Plan II shall be determined based on the performance of the previous fiscal year of SMBC Group and the business unit each Executive is accountable for, as well as on the performance of each Executive reviewed both from a short-term and medium-/long-term perspectives. Remuneration paid by restricted shares shall effectively act as deferred compensation.
- d. Remuneration under Plan III shall be determined based on corporate titles, roles, and responsibilities, etc.
- VIII. In the event of material amendments to the financial statements or material reputational damages caused by the Executives, remunerations under the Plans could be reduced or fully forfeited.
- IX. Notwithstanding the aforementioned “Compensation Programme,” executive compensation for the Executives locally appointed at overseas entities and those domiciled outside Japan shall be individually designed, not only in accordance with the basic concept above, but also with consideration to local regulations, tax regime, guidelines, and other local market practices, whilst ensuring the compensation should not incentivize for excessive risk-taking.

<Governance and Control of the Compensation Processes>

- I. This Policy is determined at SMBC’s Board of Directors in light of the “Executive Compensation Policy” determined by SMFG Compensation Committee.
- II. Compensation for SMBC’s Directors (excluding members of the Audit and Supervisory Committee) is determined within the limit approved at a shareholders’ meeting with the President, delegated by the Board of Directors, determining the amount of compensation for each individual, reflecting the assigned roles and responsibilities as well as achievements at SMBC, in light of the deliberations of the SMFG Compensation Committee.
- III. The details of the determination in II above are reported to SMBC Audit and Supervisory Committee.
- IV. The specific amount, payment period, and method of compensation for SMBC’s executive officers is determined by the President, reflecting the assigned roles and responsibilities as well as achievements at SMBC.
- V. Individual compensation for Directors who are members of the Audit and Supervisory Committee is determined within the limit approved at a shareholders’ meeting, through discussion by Directors who are members of the Audit and Supervisory Committee.

■ Consistency between Compensation Structure and Risk Management and Link between Compensation and Performance

Consistency between compensation structure and risk management and link between compensation and performance is stated in “Compensation” of Sumitomo Mitsui Financial Group (please refer to “Consistency between Compensation Structure and Risk Management and Link between Compensation and Performance” on page 386).

■ Type, Total Amount Paid, and Payment Method of Compensation for Officers, Employees and Others of SMBC and Its Group Companies

1. Compensation Allocated in the Applicable Fiscal Year (SMBC consolidated)

			(Headcount, millions of yen)	
Item No.			(a)	(b)
			Officers	Employees and others
1	Fixed compensation	Number of applicable officers, employees and others	14	237
2		Total fixed compensation (3+5+7)	880	10,065
3		of which: cash compensation	809	9,307
4		of which in 3: deferred amount	—	—
5		of which: amount of stock compensation or stock-linked compensation	49	344
6		of which in 5: deferred amount	49	344
7		of which: other compensation	21	412
8		of which in 7: deferred amount	—	—
9	Variable compensation	Number of applicable officers, employees and others	11	236
10		Total variable compensation (11+13+15)	480	8,949
11		of which: cash compensation	241	7,548
12		of which in 11: deferred amount	—	1,282
13		of which: amount of stock compensation or stock-linked compensation	239	1,400
14		of which in 13: deferred amount	239	941

16		of which in 15: deferred amount	—	—
17	Retirement allowance	Number of applicable officers, employees and others	—	175
18		Amount of retirement allowance	—	744
19		of which: deferred amount	—	1
20	Other compensation	Number of applicable officers, employees and others	—	89
21		Amount of other compensation	—	108
22		of which: deferred amount	—	—
23	Total compensation, etc. (2+10+18+21)		1,360	19,868

Notes: 1. Compensation amount includes those amounts of major consolidated subsidiaries.

2. Stock Compensation Plan III is classified as fixed compensation because the amount allotted depends on the individual’s position. Other stock compensation involves an amount of issuance prone to performance-linked fluctuations, and is thus classified as variable compensation.

2. Special Compensation, Etc.
