# **Liquidity Coverage Ratio Information** (Consolidated)

Sumitomo Mitsui Banking Corporation and Subsidiaries

Since March 31, 2015, the "Liquidity Coverage Ratio" (hereinafter referred to as "LCR"), the liquidity regulation under the Basel III, has been introduced in Japan. In addition to the application of uniform international standards, SMBC calculates its consolidated LCR using the calculation formula stipulated in the "Criteria for Evaluating the Soundness of Liquidity Status Set Forth by a Bank as a Benchmark for Judging its Soundness of Management, Based on the Provision of Article 14-2 of the Banking Act" (Notification No. 60 issued by the Japanese Financial Services Agency in 2014; hereinafter referred to as the "LCR Notification").

### Disclosure of Qualitative Information about Liquidity Coverage Ratio

#### 1. Intra-period Changes in Consolidated LCR

As described on the following page, the LCR has remained stable with no significant fluctuation since the introduction of the liquidity regulation on March 31, 2015.

#### 2. Assessment of Consolidated LCR

The LCR Notification stipulates that the minimum requirement of the LCR for 2018 is set at 90%, and from 2019 onwards, the minimum requirement of the LCR will be 100%. The LCR of SMBC (consolidated) exceeds the minimum requirements of the LCR for 2018 and for 2019 onwards, having no cause for concern. SMBC does not expect that the future LCR forecasts will differ significantly from the announced ratios. In addition, the actual LCR does not differ significantly from the initial forecast.

### 3. Composition of High-Quality Liquid Assets

Currency denominations, categories and locations, etc. of the high-quality liquid assets allowed to be included in the calculation have not shown any significant changes. In addition, in respect of major currencies (those of which the aggregate amount of liabilities denominated in a certain currency accounts for 5% or more of SMBC's total liabilities on the consolidated basis), there is no significant mismatch in currency denomination between the total amount of the high-quality liquid assets allowed to be included in the calculation and the amount of net cash outflows.

#### 4. Other Information Concerning Consolidated LCR

SMBC has not applied "special provisions concerning qualifying operational deposits" prescribed in Article 29 of the LCR Notification and "increased liquidity needs related to market valuation changes on derivative or other transactions simulated through Scenario Approach" prescribed in Article 38 of the LCR Notification. Meanwhile, SMBC records "cash outflows related to small-sized consolidated subsidiaries," etc. under "cash outflows based on other contracts" prescribed in Article 60 of the LCR Notification.

## ■ Disclosure of Quantitative Information about Liquidity Coverage Ratio (Consolidated)

(In million yen, %, the number of data)
